Plan of Polk River N.H. site (20 acres) (MCG-007)

Main channel Polk River runs 200 yds N of site; Kankakee River ca 200 yds W of site.
Side channel of Polk River dry when in winter
but water table must be near surface
because of appreciable number of
spruce dead spruces in
the gravel stream bed ca
100 ft NW cabin

clearing roughly triangular
120' x 90'

- S-1 - cabin
- S-2 - small, hand-hewn building with red steel iron shingle roof, partially collapsed
- S-3 - dog barn, partially collapsed
- S-4 - privy (collapsed)
- S-5 - dog house
