STATEMENT OF SIGNIFICANCE:

Total Points 0>

The Dexter Trading Post is nationally significant because of its association with the Iditarod National Historic Trail. The structure is also nationally significant given its role in the early (pre-Nome) trade on the Seward Peninsula. The trading post served as an early outlet for the sale of salted hering from local process plants around 1896-1898.

Many of the early discovery miners on the Seward Peninsula were grubstaked by the Dexter family, including the "Swedes" who were to make the initial gold discoveries at Nome.

Several sites in the Nome area have been named after the Dexter family.

The Dexter Trading Post remains within the Dexter family and is in good to excellent condition. It may be the oldest structure on the Iditarod National Historic Trail.
