

remaining accountable property, all field gear and equipment, was verified by RFMC Sheldon during a second visit in June. Our total property inventory revealed that two items were missing. It was discovered later that one of the items had been properly disposed of but mistakenly remained on the list. The other "missing" item will undoubtedly show up after the Report of Survey is completed.

BT Medeiros assisted with office work for two weeks during the summer while AT Collins was away on vacation. BT Medeiros time during the field season was divided between administrative and biological work. Her knowledge of routine office procedures as well as field operations was most helpful.

Regional Aviation Manager (RAM) John Sarvis served as our refuge pilot from July 23-27. His assistance during WB/P Finley's absence due to a family medical problem was greatly appreciated. Eric Akola, John's assistant, also provided assistance by flying the station aircraft during the first week in September.

Regional Archaeologist Debra Corbett conducted a station visit the week of August 3rd. The purpose of her visit was to conduct a historical and archeological review. Considerable time was well spent in reviewing station materials and interviewing knowledgeable residents of the area. Unfortunately, the weather precluded any site visits via aircraft.

Regional Archeologist Debra Corbett was prepared to go to the field, but due to bad weather had to postpone her visits until the summer of 1994. (SJC 6/93)
