

14.0 TERMINATION

The expected life of the Point Thomson Gas Cycling Project is about 30 years. Abandonment timing will be determined based on the need for the facilities. Detailed abandonment procedures will be developed at the time of project termination. Specific plans will depend on the facilities in place and the specific requirements applicable to those facilities at the time of abandonment.

Abandonment activities will be consistent with lease terms, requirements in the Unit Agreement, permit conditions, and other applicable regulatory requirements. Abandonment plans will be subject to review by multiple agencies, with input from other local, state, and federal agencies, and likely will involve some degree of overlapping authority.
