

Governing general, subsistence, and commercial uses of Alaska's wildlife

Effective July 1, 2019 - June 30, 2020

For hunts on federal lands, check federal regulations to see if you are eligible to hunt
Visit http://hunt.alaska.gov for the most up-to-date regulation information

The regulations in this publication are taken from Title 5, Alaska Administrative Code and Title 16 of Alaska Statutes, both available for inspection at any Alaska Department of Fish and Game office. Other sections of Title 5, Alaska Administrative Code are included in the following publications: Trapping Regulations, Waterfowl Regulations, and Predator Control Supplements. These publications are also available at all Alaska Department of Fish and Game offices or at: http://hunt.alaska.gov

If an Alaska Wildlife Trooper, Alaska State Trooper, police officer, or authorized Alaska Department of Fish and Game (ADF&G) employee asks to see your license, locking-tags, harvest tickets, permits, game, or any equipment used to take game, you must show any or all of these items.

How Alaska's hunting regulations are changed

Alaska has a very public process of setting hunting regulations. The Board of Game determines the hunting regulations and meets at least twice a year. The board deals with topics on a rotating basis. When the agenda for the next meeting is set, the board issues a "Call for Proposals," which is sent to various agencies, groups, individuals, and is published online and in Alaska newspapers.

Advisory committees were created to provide a local forum to discuss and make recommendations on fish and wildlife issues before the board. There are currently 84 local fish and game advisory committees. Advisory committees meet and develop proposals relating to the committee's concerns, and meet after all proposals are published to comment and provide reasons opposing or supporting proposals.

Any individual or group in the state can propose a change in a hunting regulation:

- You can submit a proposal online at http://www.boardofgame.adfg.alaska.gov or use the printed proposal form available at local ADF&G offices or boards support section.
- Use clear and concise wording on your proposal.
- State the Alaska Administrative Code number (for example, 5 AAC 92.990) for the regulation you want to change, or provide the general heading and page number in the present regulation book.
- State the problem you are trying to correct and list the reasons why you want the regulation changed.
- Submit your proposal before the deadline.
- Questions? Call Boards Support at (907) 465-4110 or (907) 267-2354.

Following is a list of species referenced in this book, together with the section of Alaska Administrative Code that addresses seasons and bag limits for each species (5 AAC 85.xxx; for example, 5 AAC 85.015 pertains to black bear.)

Photographs seen throughout this publication have been used with permission from the owners. For information on submitting photos, see http://www.adfg.alaska.gov/index.cfm?adfg=wildliferegulations.hunting.

Photographs submitted cannot always be used and must be accompanied by an accurate hunt description that can be verified, along with permission from the photographer for their use, and contact information for both the hunter and the photographer.

This publication, released by the Alaska Department of Fish and Game, was produced at a cost of \$0.45 per copy to provide hunting regulations to the public, and was printed by Anchorage Printing. (AS 44.99.210).

The State of Alaska is an Affirmative Action/Equal Opportunity Employer. Contact the Division of Wildlife Conservation at (907) 465-4190 for alternative formats of this publication.

Comments or questions regarding this publication may be emailed to natalie.weber@alaska.gov.

Dear Alaskan Hunters,

This fall, thousands of hunters will enter Alaska's backcountry in search of moose, caribou, birds, and other wildlife to fill their freezers and provide nutrition for their families before the onset of winter. This annual tradition is ingrained in Alaska's culture and is an opportunity to teach young Alaskans responsible hunting practices, respect for wildlife, and to continue an important tradition by passing it on to the next generation.

Hunting is also an important part of Alaska's economy. More than 100,000 hunting licenses are sold each year and that revenue, including revenue from the sale of firearms and ammunition, supports programs like public outreach, wildlife research and management, hunter education classes, and more. The result is sustainable wildlife populations and safe, enjoyable hunting opportunities for Alaskans and our visitors.

Please read the hunting regulations in this booklet carefully so you understand the laws before heading out into the field. If you have any questions, please contact the friendly, helpful staff at the Alaska Department of Fish and Game. These dedicated professionals are there to inform you about the regulations and best hunting practices in the area you plan to hunt.

I hope you have a successful hunting trip and please be safe in Alaska's backcountry.

Sincerely,

Michael J. Dunleavy Governor

Dear Hunter,

Welcome to the 2019-2020 Alaska Hunting Regulations booklet. The rules and regulations contained here reflect the Alaska Department of Fish and Game's ongoing efforts to manage our wildlife sustainably and in the best interest of Alaskans and our state's economy.

As a lifelong Alaskan and hunter, I know firsthand that wild meat is an important part of food security for many. That's why maintaining healthy game populations while maximizing our opportunities to place healthy, organic, wild foods on our tables heads the department's list of priorities. Maintaining this balance is accomplished in part through the hunting seasons, bag limits, and draw and registration permit hunting systems listed in the following pages.

Alaska's science-based hunting regulations are sensible and effective, and our wildlife management programs rank among the world's best. To help inform bag limits and regulations the Division of Wildlife Conservation monitors game populations closely and considers hunter harvests and factors like weather, habitat health, wildlife disease, and predation. The division's findings and recommendations based on our biologists' field work and research advise wildlife managers and the public and, ultimately, influence regulatory decisions made by the Alaska Board of Game, the state's hunting and trapping rulemaking body.

The importance of your role as an Alaska hunter in our state's wildlife management and regulatory efforts can't be overstated. Hunters are the unsung heroes of the conservation movement and supply a great deal of the resources necessary to sustaining healthy wildlife populations. Alaska has one of the most inclusive management and rulemaking processes in the world and we encourage your involvement. Whether it is only filling out your harvest reports, or participating in your local Advisory Committee, or attending Board of Game meetings, your participation makes a positive contribution.

Alaska's wildlife management system works; it's the reason behind our longstanding record of robust and vibrant populations of moose, caribou, deer, Dall sheep and other game species.

As you enter the field this hunting season, stay sharp and stay safe. Keep an eye out for ways we can continue to maintain and improve the hunting experience for all Alaskans and visiting hunters, too. Read through these regulations before heading out and keep a copy handy in your pack for reference while out there. In the meantime, if you encounter

any questions while poring through these pages, please call your local Alaska Department of Fish and Game during regular business hours. We'll be happy to hear from you, and more than happy to help.

Here's wishing you the best of luck in your hunting endeavors.

Sincerely,

Eddie Grasser Director

MAJOR CHANGES IN 2019-2020 REGULATIONS

This is a summary of changes adopted by the Alaska Board of Game for regulatory year 2019-2020. This is not a comprehensive list of all the detailed changes. It is your responsibility to read the Alaska Hunting Regulations carefully for complete information. Changes to existing hunts and new hunts are shown in red throughout this regulation book.

Predator Control Supplements are available online at: http://www.adfg.alaska.gov/index.cfm?adfg=wildliferegulations.main.

BEAR BAITING

Unit 1C, allowed use of bait for black bears outside of the City and Borough of Juneau.

Unit 14C, remainder, excluding the Glacier Creek drainage outside of the Chugach State Park, allowed use of bait for black bears.

BLACK BEAR

Unit 3, Kuiu Island, removed five-day harvest reporting requirement and changed the sealing requirements for nonresidents.

Unit 14C, DL455, lengthened season to Sept 1 - June 15.

BROWN BEAR

Unit 3, established a fall registration brown bear hunt for residents, Sept 15 - Dec 31.

Unit 9C, 9D, 9E, shortened season to Oct 7 - 21 and May 10 - 25.

Unit 14C, remainder, increased bag limit to one bear every regulatory year.

DEER

Unit 1C, Douglas Island, modified bag limit so that only one doe may be included in the Sept 15 - Dec 31 any deer bag limit.

Unit 3, Petersburg Management Area, lengthened deer season to Oct 1 - Dec 15.

Unit 3, Mitkof, Woewodski, Butterworth islands, and that portion of Kupreanof Island on the Lindenberg Peninsula east of the Portage Bay - Duncan Canal Portage, lengthened resident deer season to Oct 1 - Nov 7.

Unit 4, remainder, increased bag limit to six deer.

ELK

Units 1, 2, and the remainder of Unit 3, eliminated the general season elk hunt.

WOLF

Unit 1C, Douglas Island Management Area, increased harvest limit to five.

MOUNTAIN GOAT

Unit 8, RG480, lengthened season to Aug 20 - Mar 31 and changed bag limit to two goats, only one of which may be a billy.

Unit 8, RG471-RG476, lengthened season to Nov 1 - Jan 31.

Unit 8, established new resident, registration hunts.

MOOSE

Unit 5A, east of the Dangerous River and Harlequin Lake, lengthened season to Oct 1 - Nov 15.

Unit 6B, Moose Controlled Use Area, clarified and shortened closure to the use of any motorized vehicle for moose hunting, including the transportation of moose hunters, or moose hunting gear, from Aug 25 - Sept 4.

Units 7 and 15, excluding Kalgin Island and that portion southwest of a line from Point Pogibshi to the point of land between Rocky Bay and Windy Bay, changed the bag limit from 4 to 3 brow tines while retaining other antler configurations.

Unit 18, south of the Eek River drainage and north of the Goodnews River drainage, established a resident registration hunt.

Unit 19A, remainder, established a resident registration bunt

Unit 21D, south of the south bank of the Yukon River, downstream of the up-river entrance of Kala Slough and west of Kala Creek, established a resident registration hunt.

UNCLASSIFIED & SMALL GAME

Unit 14C, Joint Base Elmendorf-Richardson, required hunter education for small game hunting and established a year-round season for unclassified game.

Unit 15A, within the Skilak Loop Wildlife Management Area, expanded the boundary of the small game youth hunt to encompass the entire management area and lengthened the season to Aug 10 - Mar 31, federal restrictions apply.

MISCELLANEOUS

Unit 1C, Juneau Road System Closed Area, updated the boundary.

Unit 3, Petersburg Management Area, updated the boundary.

Unit 4, established the Greens Creek Mine Closed Area to prohibit the use of wheeled vehicles (including bicycles) and carts for hunting on the "B" Access road.

Unit 13B, Clearwater Creek Controlled Use Area, modified the boundary.

Unit 14C, changed opening dates of hunts that opened "the day after Labor Day" to open September 1.

Unit 14C, Birchwood Management Area, clarified the boundary.

Units 1, 5, 11-13, 20, 25, allowed the harvest of white-tailed deer and mule deer.

Units 6-8, 14C, 15, allowed the use of crossbows in hunts open to shotgun, muzzleloader, and bow and arrow, unless specifically prohibited.

Plan ahead now - what's happening and when?

July

- · New hunting regulation books are available
- · New harvest tickets for the regulatory year are available

November

- Drawing and Subsistence supplements are available
- Agenda Change Requests are due November 1 for the upcoming Board of Game meetings

December

• Online permit applications (Drawing and Subsistence) due by 5 p.m. (AKST) on December 16, 2019

January

· Board of Game work session, January 16, 2020 in Nome

January (continued)

- * Board of Game meeting Arctic/Western Region, January 17-20, 2020 in Nome
- New hunting licenses and big game locking-tags are available

February

• Drawing and Subsistence permits awarded

March

- $\cdot \ Under subscribed \ draw \ permits \ announced$
- · Board of Game meeting Interior Region, March 6-14, 2020 in Fairbanks

Apr

• Proposals for winter 2020-2021 Board of Game meetings due by end of the

Hunting seasons, types of hunts, and other resources

Hunting seasons and bag limits for big game are listed by unit on pages 39-139 of this book. Other game seasons and bag limits are listed in the back of the book (pages 140-142). If the species is not listed, you MAY NOT hunt that species.

Sometimes seasons need to be changed on short notice. When this happens, ADF&G issues emergency orders to protect a wildlife resource. Emergency orders are as legally binding as regulations adopted by the Board of Game and statutes adopted by the legislature. Emergency orders are posted at ADF&G offices and at: http://hunt.alaska.gov

Not familiar with this book? Hunting seasons

First, read the statewide general information on pages 7-38.

Game Management Unit (unit) descriptions for each area of the state are listed beginning on page 39. In each unit listing, you will find the big game species you may hunt as well as the bag limits and seasons for each species. A map of each unit is included for your reference. At the beginning of each set of unit pages, or on the map for that unit, restricted areas are clearly listed. Here you will learn which areas of that unit have restrictions, or are closed to hunting, or where methods of access are controlled by state Board of Game regulation. Remember, these restrictions are in addition to any restrictions imposed by landowners (e.g., private or federal).

Make your hunt a legal hunt

When planning a hunt, you should determine the following details and be certain you understand the ADF&G definition of each, as all these components play a factor in ensuring your hunt is legal.

Who is going to hunt? (Are you a resident, nonresident, nonresident alien, youth hunter, or a disabled hunter?)

Where do you plan to hunt? (Which unit, which subunit? Is your hunt in a restricted area?)

How are you going to hunt? (Are there weapons restrictions or access restrictions?)

What species do you want to hunt? (Is there an open season for that species *in the area you wish to hunt?)*

When do you plan to hunt? (Seasons)

What is the legal animal? (Bull, cow, horn or antler restrictions?)

There are hunting seasons for residents and nonresidents. Hunts are open to residents (R), nonresidents (N), and both residents and nonresidents (B), as shown in the far left column of the unit pages. See page 38 for an example of the format.

Nonresidents are allowed to hunt when there is enough game to allow everyone to participate. When there isn't enough game, nonresident hunters are restricted or eliminated first. If more restrictions are necessary, seasons and bag limits may be reduced or eliminated for some residents.

Types of hunts:

General Season Drawing Registration Tier I/II Community Harvest Targeted

More information on each type of hunt can be found on pages 14-15.

Reporting your harvest

To protect, conserve, and enhance our wildlife populations in Alaska, ADF&G needs to know how many animals are taken by hunters. Therefore, ADF&G collects harvest information using a variety of methods.

Harvest reports are used in some general season hunts, permit reports are used in permit hunts, and sealing information is collected for certain species.

ADF&G requires hunters to return harvest and permit reports even when they did not hunt or no game was taken, in order to help measure hunting pressure and hunter effort. You can find more information regarding harvest and permit tickets and reports on pages 14 and 15.

Remember, ignorance is no excuse; YOU MUST KNOW THE LAW! Read and understand the hunting regulations BEFORE YOU HUNT. If you violate a game law, YOU ARE RESPONSIBLE FOR YOUR **ACTIONS.**

Other information sources

Each fall, we publish additional information regarding Drawing and Subsistence (Tier I/ II and Community Harvest) hunts in separate supplements which can be found online, at ADF&G offices, and vendors. For more information on these hunts, see page

Migratory bird (waterfowl) regulations are available in mid-August at ADF&G offices and vendors. To take waterfowl, if you are 18 years of age or older, you must have a hunting license, state and federal duck stamps (some exceptions apply, see the current waterfowl regulations for duck stamp requirements), and follow the seasons, bag limits, and methods and means permitted.

Marine mammal harvest is controlled by the federal government. Contact the U.S. Fish and Wildlife Service at (907) 786-3311 for information on hunting walrus, polar bears, and sea otters. Contact the National Marine Fisheries Service at 1-800-853-1964 for information on hunting seals, sea lions, and beluga whales.

See page 8 for information on obtaining a copy of the federal subsistence regulations.

Hunter Harassment Law

It is against state law (AS 16.05.790) to intentionally obstruct or hinder another person's lawful hunting, fishing, trapping or viewing of fish and game. Illegal activities include positioning one's self in a location where human presence may alter the behavior of fish or game another person is pursuing. It is also illegal to create a sight, sound, smell, or physical stimulus to alter the behavior of fish and game another person is attempting to take.

The law does not prohibit lawful competitive practices among hunters, fishermen, or trappers. Violators of this statute are subject to a fine of up to \$500 and/or up to 30 days in jail.

Know who owns the land where you plan to hunt

Land ownership and public access information

The U.S. Bureau of Land Management (BLM) and the Alaska Department of Natural Resources (DNR) maintain general land status records. Both agencies also maintain records indicating the availability of public access (roads, trails, campsites) that can be used to reach public lands and waters. Access and use of the State of Alaska's navigable and public waters is protected under the state constitution and statutes. Use of these waters, below the ordinary highwater mark, does not require a permit from the upland owner. For more information on land status and access contact: BLM Public Information Center (907) 271-5960;DNR Public Information Center (907) 269-8400 or visit DNR's website at http://dnr.alaska.gov/mlw/index.htm

State lands

State lands are open to hunting unless they are closed by state, local, or municipal laws.

State Park lands

Parts of the state park system are open to hunting. Laws about the discharge of firearms and land use regulations vary from park to park. For information call the DNR Public Information Center at (907) 269-8400.

State Refuge lands

Most state refuge lands are open to hunting, but there may be access or registration requirements. For more information call the ADF&G office nearest the refuge where you plan to hunt.

Federal public lands

Subject to federal restrictions and closures, most federal public lands are open to hunting under state regulations; however, National Parks and National Park Monuments are closed to hunting except by those eligible under National Park Service regulations.

Additionally, a comblem in this book indicates that other federal regulations may apply. If you are planning to hunt on federal lands consult the federal subsistence regulations. Calling federal agencies is also advised as in-season closures can occur at any time and may not be reflected in their biennial regulatory publication.

For more information or a copy of Regional Native Corporation lands the federal subsistence regulations, contact the U.S. Fish and Wildlife Service, Subsistence Management by phone 1-800-478-1456, by email subsistence@fws.gov, or online at http://doi.gov/subsistence/index.cfm You may also contact the following agencies by phone:

National Parks and Preserves: National Park Service (907) 644-3509

National Wildlife Refuges: U.S. Fish and Wildlife Service (800) 478-1456 or in Juneau (907) 780-1160

National Recreation Areas: Bureau of Land Management (907) 271-5960

National Forests: U.S. Forest Service (907) 586-8806

Local restrictions

Local, municipal, or federal governments may prohibit the discharge of firearms or access to an area. Check with the agency with jurisdiction for more information.

Private lands

State hunting regulations apply to private land, but do not guarantee access. Most of Alaska's land is in public ownership and managed by federal or state agencies. However, a significant portion of the state is in individual or corporate ownership. If you intend to hunt on private lands in Alaska, make sure you have permission from the landowner.

Use of private lands without the landowner's permission, other than those legally reserved for public access easements, is trespassing.

It is illegal to destroy, deface, collect, transport, sell/trade, or assist others with these activities associated with archaeological, cultural, and historic resources.

The largest private landowners in the state are the Native village and regional corporations. If you wish to hunt on these private lands, you must contact the appropriate land management office to determine if a land use permit and/or fees are required. Some of these lands are closed to use by non-shareholders. Many corporations have land status maps available. See table below:

Native corporation lands contact information		
Unit Corporation P		Phone
1-5	Sealaska	(907) 586-1512

Military lands

Civilians are allowed to hunt on some military lands. Hunters must obtain a recreation access permit prior to entering military lands. Access may be closed on short notice, and an access fee may be charged. All designated impact areas are permanently closed to access because unexploded ordnance (UXO) may be present in the area. Contact the Alaska State Troopers at (907) 451-5100 to report potential UXO. See box below for more information.

Alaska resident licenses and big game locking-tags

Big game locking-tags, not to be confused with harvest tickets (shown on page 14), are numbered metal locking objects that must be purchased prior to hunting. Resident locking-tags are not required for most species. In areas where a locking-tag is required, it must be affixed, attached, or locked on the part of the animal required to be salvaged (skull, hide, or meat) prior to leaving the kill site and must remain there until the animal is prepared for storage, consumed, or exported. Harvest tickets or permits may also be required prior to hunting.

An Alaska resident is...

- a person (including an alien) who is physically present in Alaska with the intent to remain indefinitely and make a home here, has maintained that person's domicile in Alaska for the 12 consecutive months immediately preceding the application for a license, and is not claiming residency or obtaining benefits under a claim of residency in another state, territory, or country; OR - a member of the military service or U.S. Coast Guard who has been stationed in Alaska for the 12 consecutive months immediately preceding the ap-

plication for a license; OR - a dependent of a resident member of the military service or U.S. Coast Guard who has lived in Alaska for the 12 consecutive months immediately preceding the application for a license.

A person who does not otherwise qualify as a resident may not qualify by virtue of an interest in an Alaska business.

If you have any questions about your residency call your local Alaska Wildlife Troopers (phone numbers listed on page 4).

Alaska residents ages 17 years or younger are not required to possess a license to hunt. Alaska residents ages 18 years or older must possess a valid license to hunt. Alaska residents ages 60 years or older may apply for a free permanent identification card in lieu of a license. In addition to a license, all hunters must carry any required harvest tickets, permits, locking-tag(s) and duck stamps while hunting. Children under 10 years old are not allowed to have their own harvest tickets or permits. (See youth hunting information, page 13.)

hunts in Units 22 and 23.

Resident locking-tag fees Brown/grizzly bear.....\$25 Muskox nonsubsistence hunts: Unit 18 (Nunivak Is.) bull (drawing)......\$500 bull or cow (registration)......\$25 Unit 18 (Nelson Is.) bull or cow (registration).....\$25

Buying your licenses and locking-tags

Licenses and big game locking-tags must be purchased and are available from most license vendors and online at http://hunt.alaska.gov. Hunting licenses and big game locking-tags are only valid for the calendar year printed on the license or locking-tag. Check with your local sporting goods or hardware store to see if they sell licenses and locking-tags.

Low-income licenses

You can buy a low-income license for \$5 if your family or household income is equal to or less than the most recent poverty guidelines for the state set by the United States Department of Health and Human Services for the year preceding the application. The Residents hunting for most species are \$5 license is for hunting, trapping, and not required to obtain a locking-tag, sport fishing; it is not a "subsistence" libut may be required to obtain a harvest cense. Low-income license holders do not need a king salmon or a state duck stamp; Residents must possess a locking-tag however, you must still obtain any required before hunting brown/grizzly bears in harvest tickets, permits, or locking-tags.

Resident hunters 60 years or older may Residents must posses a locking-tag be- obtain a free permanent identification card fore hunting muskox in nonsubsistence that is valid as long as Alaska residency hunts; residents hunting muskox with a is maintained. This replaces the annual lidrawing or registration permit in Unit censes for hunting, trapping, and sport fish-18 must pay the appropriate locking- ing as well as king salmon and state duck tag fee. A locking-tag is not required for stamps. However, you must still obtain any residents hunting muskox in subsistence required harvest tickets, locking-tags and permits.

Disabled Alaska veterans

Disabled veterans who are Alaska residents may qualify for a free hunting and sport fishing license (this does not include trapping) that is valid as long as Alaska residency is maintained. This replaces the annual licenses for sport fishing and hunting, as well as king salmon and state duck stamps. To receive this license you must have been honorably discharged from military service, be eligible for a loan under AS 18.56.101, and be certified by the U.S. Department of Veterans Affairs (VA) as having incurred a 50 percent or greater disability during military service. Written proof from the VA is required at the time of application.

To obtain a license

Licenses for Alaska residents who are 60 years and older or a disabled veteran are available online at http://hunt.alaska.gov and at any ADF&G office. Licenses for Alaskan residents who are 70 percent physically disabled, or developmentally disabled are available at any ADF&G office.

For applications and information, contact:

ADF&G Licensing Section PO Box 115525 Juneau, AK 99811-5525

(907) 465-2376 (phone) (907) 465-2440 (fax) adfg.license@alaska.gov

Nonresident/nonresident alien licenses and locking-tags

Big game locking-tags, not to be confused with harvest tickets (shown on page 14), are numbered metal locking objects that must be purchased prior to hunting and are required for big game species. The locking-tag must be affixed, attached, or locked on the part of the animal required to be salvaged (skull, hide, or meat) prior to leaving the kill site and must remain there until the animal is prepared for storage, consumed, or exported. Harvest tickets or permits may also be required prior to hunting. (See list below.)

A nonresident...

- is anyone who is not a resident of Alaska, but is a U.S. citizen.
- who hunts for sheep, mountain goat, or brown/grizzly bear must be accompanied in the field by an Alaska-licensed guide or resident relative within second-degree of kindred age 19 or older** who possesses a valid Alaska hunting license. The guide or resident relative must be within 100 yards of the nonresident when they attempt to take

See guide information on right side of page.

A nonresident alien...

- is a citizen of a foreign country who is not a resident of the United States.
- must be accompanied in the field by any Alaska-licensed guide to hunt any big game animal. The guide must be within 100 yards of the nonresident alien when they attempt to take game.

All nonresidents, regardless of age, must have appropriate licenses and big game locking-tags. Hunting licenses and big game locking-tags are valid for a specific calendar year. In addition to licenses and lockingtags, all nonresidents 10 years or older must also have appropriate harvest tickets or permits. Nonresidents under the age of 10 will not be issued harvest tickets or permits. (See youth hunting information, page 13.)

Nonresident big game locking-tags

Nonresident and nonresident alien hunters must buy the appropriate locking-tag before hunting a big game animal. Prior to leaving the kill site, the locking-tag must be locked on a portion of the animal that is required to be salvaged. The locking-tag must remain on the animal until the animal is prepared for storage, consumed, or exported.

A big game locking-tag may be used for a species of equal or lesser value. You must have obtained a harvest ticket or a permit for the other species prior to hunting. For example, if you purchase a \$1,000 brown bear locking-tag, but do not take a brown bear, and take a moose instead, you may use the bear locking-tag on the moose, because the moose has a lesser locking-tag value.

A locking-tag may not be used more than once. The value of two or more locking-tags may not be combined.

Guide information

Nonresidents who hunt brown/grizzly bear, Dall sheep, or mountain goat must be personally accompanied in the field by an Alaska-licensed guide or an Alaska resident 19 years or older within second-degree of kindred** holding a current Alaska hunting license. The guide or relative must be within 100 yards of the nonresident when they attempt to take game.

Nonresident aliens (non-U.S. citizens) hunting any big game must be accompanied in the field by an Alaskalicensed guide and the guide must be within 100 yards of the nonresident alien when they attempt to take game.

It is illegal for anyone, except an Alaska-licensed guide, to be compensated for any supplies, equipment, or services (other than transportation) provided to a big game hunter in the field. Transporters and individuals cannot legally be compensated for vehicles, fuel, bait, camping, hunting, bear baiting, or game processing equipment, or any hunting services such as cleaning of game, glassing, packing, etc. from a permanent, or nonpermanent structure in the field, or on a boat on saltwater.

Licensed transporters may provide transportation services and accommodations (room and board) only at a personally-owned permanent structure in the field, or on a boat on saltwater. It is illegal for a transporter to accompany or remain in the field at a nonpermanent structure with a big game hunter who is a client of the transporter except as necessary to perform transportation services. Unlicensed individuals may not legally provide transportation or accommodations for compensation.

**Second-degree of kindred:

father, mother, brother, sister, son, daughter, spouse, grandparent, grandchild, brother/sister-in-law, son/ daughter-in-law, father/mother-inlaw, stepfather, stepmother, stepsister, stepbrother, stepson, or stepdaughter.

Military licenses and locking-tags

All military personnel must comply with Alaska regulations, regardless of where they hunt. License and locking-tag requirements are explained below; however, harvest tickets or permits may also be required prior to hunting.

Resident military personnel

Active members of the Alaska National Guard, U.S. Army Reserve, U.S. Air Force Reserve, U.S. Navy Reserve, U.S. Marine Corps Reserve, or U.S. Coast Guard Reserve may qualify for a free hunting license.

The application for this license may be completed online at http://hunt.alaska.gov and can only be issued by the Licensing Section in Juneau.

Nonresident military personnel on all lands

Active duty members of the U.S. military or the U.S. Coast Guard and their dependents, who do not qualify as residents and who are permanently stationed in Alaska (with Permanent Change of Station) may obtain a special nonresident military hunting license. Nonresident military license holders must follow nonresident seasons and bag limits until they qualify as a resident (see page 9). Active duty nonresident military personnel and their dependents that receive this nonresident military hunting license are required to purchase locking-tags for brown/grizzly bear and muskox at the resident rates. Locking-tags for sheep and goat are also required but may be obtained at no cost. Locking-tags are not required for the other big game species, however guides are still required for brown/grizzly bear, Dall sheep, and mountain goat. (See page 10 for more guide information.)

Deployed military personnel permit transfers and reissues

Active duty military personnel <u>deployed to a combat zone</u> who are unable to use their Drawing or Tier II permit may qualify for the following permit provisions:

- Drawing permit holder may be reissued a permit for the same hunt the following regulatory year.
- Tier II permit holder may transfer their permit to a substitute hunter who is a resident of Alaska. The person originally issued the permit has all rights to the game harvested under this permit transfer.

Forms and information are available online at http://hunt.alaska.gov. Additional information is available by contacting the Permit Hunt Administrator by phone (907) 746-6398.

Completed forms should be emailed to dfg.dwc.huntpermit.reissue@alaska.gov or mailed to:

Alaska Department of Fish and Game Division of Wildlife Conservation ATTN: Permit Hunt Administrator 1800 Glenn Highway, Suite 4 Palmer, AK 99645

Hunters: You can help fight hunger in Alaska

Hunters have donated thousands of pounds of wild meat to charitable organizations in recent years. Such donations of unprocessed meat are legal and can represent a significant contribution to their programs. Hunters are encouraged to consider donating surplus or unneeded moose, caribou, or deer carcasses to Food Bank of Alaska. With prior notification, some air carriers will fly donated carcasses to Anchorage at no cost to the hunter. Check with air carrier(s) in your hunt area before taking the carcass to an airport for flight information and other details. Food Bank of Alaska will pay for processing costs in Anchorage. The finished product will be donated to shelters, soup kitchens, and more than 250 other agencies serving the needy statewide. Use the Transfer of Possession Form on the inside back cover of this publication, or create your own to donate the meat to Food Bank of Alaska. For further information on donating unprocessed game, call (907) 272-3663.

A current list of licensed guides, transporters, and general information on guiding is available online at:

https://www.commerce.alaska.gov/web/cbpl/ProfessionalLicensing/BigGameCommercialServicesBoard.aspx
or may be obtained by mail for \$5 from: Alaska Department of Commerce, Community & Economic Development

(ADCCED) Division of Corporate, Business & Professional Licensing

Proxy hunting provisions for disabled and elderly Alaskans

An Alaska resident (the beneficiary) Both beneficiary and proxy must have may obtain an authorization allowing another Alaska resident (the proxy) to hunt moose, caribou, or deer for them if they are blind, 70-percent physically disabled, 65 years of age or older, or are developmentally disabled. A person may not be a proxy for more than one beneficiary at a time.

Proxy hunting is allowed for most caribou hunts, most deer hunts, and some moose hunts. See below for details:

You may proxy hunt for caribou *EXCEPT*:

- in Units 20B, 20D, 20E, 20F, and 25C caribou registration hunts (RC860 and RC867);
- Mulchatna Caribou Herd (RC503) hunts before Nov 1 in Units 9A, 9B, 9C within the Alagnak River drainage, 17B, 17C, 18, 19A, and 19B.

You may proxy hunt for deer *EXCEPT*:

• in Unit 5A, Youth Hunt Management Area from Oct 15-Oct 31.

You may proxy hunt for moose in:

- Tier II hunts:
- bull hunts with no antler restrictions:
- antlerless moose hunts:

EXCEPT, you may **NOT** proxy hunt moose:

- in 20D moose (DM795)
- in Unit 20E moose (RM865);
- in Units 21B, 21C, 21D, and 24 moose hunts if either the proxy hunter or the beneficieary holds a drawing permit for the Units 21B, 21C, 21D, and 24 moose hunts.

Antler destruction in proxy hunts:

- Consists of removing at least one antler from the skull plate or cutting the skull plate in half to destroy the trophy value.
- Is required for all species.
- Is required for each animal taken by the proxy hunter (both the proxy hunter's animals and the beneficiary's animals).
- Must occur at the kill site unless uncut antlers must be submitted to ADF&G for measuring. Antler destruction will be completed after measuring by ADF&G.

Additional special restrictions:

- Unit 13, you may not be a proxy hunter more than once per season per species.
- Units 20A and 20B, you may not be a proxy hunter more than once per season for moose.

obtained licenses, regardless of age, and any necessary harvest tickets and/ or permits, before applying for a Proxy Hunting Authorization at any ADF&G office or other issuing location. Resident hunters age 10-17 may proxy hunt, but must obtain a current hunting

In order for the beneficiary to qualify based on a physical or developmental disability, a physician's affidavit is required. The affidavit must document a 70-percent or greater physical disability, or a qualifying developmental disability, and must be signed by an Alaska-licensed physician. Either party may obtain the Proxy Hunting Authorization form to be completed and signed by both parties.

Physician's affidavits and definitions of qualifying physical and developmental disabilities may be obtained online at http://hunt.alaska.gov.

Once validated, this authorization will allow the proxy to hunt for the beneficiary until the end of the regulatory year. As a proxy, you may hunt for the beneficiary and yourself at the same time, as long as the appropriate licenses, harvest tickets and/or permits for both hunters are in your possession. The beneficiary may not hunt while the proxy is hunting for them.

The beneficiary is responsible for all harvest and permit reporting, whether or not the proxy is successful. The proxy is responsible for providing the beneficiary with the information necessary for the beneficiary to properly report. The Proxy Hunting Authorization may not be used in federal subsistence registration hunts.

Complete details of proxy hunting are available at ADF&G offices; see page 4 for phone numbers.

To assure the efficient and timely completion of your proxy paperwork, please verify that your physician's affidavit clearly states a developmental disability or a 70-percent or greater physical disability.

Other disability provisions Those who are at least 70-percent physically disabled qualify for the special provisions outlined below:

A person with physical disabilities may obtain a permit to shoot big game from a boat in Units 1-5, or black bear from a boat in Unit 6D. Permit holders may only shoot from a boat when the motor is turned completely off and when progress from the motor has ceased. Applications are available at the ADF&G office nearest the hunt area.

A person with physical disabilities may take game from a motorized vehicle in portions of Units 7 and 15 within the Kenai National Wildlife Refuge. This person must require a wheelchair for mobility, obtain a permit from ADF&G, and be in compliance with Kenai National Wildlife Refuge regulations. ADF&G may require that the permit holder be accompanied by another hunter with a valid hunting license capable of assisting with the retrieval of game taken by the permit holder. For more information on acquiring a permit to hunt within the Kenai National Wildlife Refuge, contact ADF&G in Soldotna at (907) 262-9368.

For further information on disability provisions, contact ADF&G by phone at (907) 465-4148 or by email at dfg.dwc.permits@alaska.gov.

Hunter Education Requirements

ADF&G offers four types of certification courses: Basic Hunter Education, Bowhunter Education, Crossbow Education and Muzzleloader Education. Courses are taught by volunteer instructors in many areas of the state. These courses are popular and fill up quickly. Do not wait until the last minute to sign up. For more information, call (907) 267-2187 or any ADF&G office, visit the Hunter Education web site at http://huntereducation.alaska.gov, or email dfg.dwc.hitprogram@alaska.gov. All certification courses are also available online.

Requirements for all hunters:

Hunter education is now mandatory in most states. In Alaska, all hunters must successfully complete a Basic Hunter Educa- If you were born after January 1, 1986 and are 18 years old or tion course before hunting in the following areas:

- Eagle River Management Area (14C bears and small game)
- Eklutna Lake Management Area (14C bears)
- Anchorage Coastal Wildlife Refuge (14C)
- Joint Base Elmendorf-Richardson Management Area (JBER) (14C small game and big game)
- Mendenhall Wetlands State Game Refuge (1C; hunters under 10 years of age must be accompanied by an adult or must have Basic Hunter Education)
- Palmer/Wasilla Management Area (14A shotgun for big game)
 Attention bowhunters: Hunters wishing to hunt in a weapons restricted area must suc- All hunters participating in archery-only hunts must have successfully cessfully complete a course for the weapon with which they will be hunting. Certain bowhunter, crossbow, muzzleloader, <u>If you were born on or after January 1, 1986</u> you must have and shotgun hunts also require the hunter to be in possession of a Basic Hunter Education card. See page 20 for information on weapons restricted hunts.

Weapons specific courses do not satisfy the Basic Hunter Education certification, and Basic Hunter Education does not satisfy bowhunter, crossbow, or muzzleloader certifications. Do not wait until the last minute to attend a hunter education class. If you have successfully completed a hunter education course elsewhere, check to see if you need to attend the Alaska course. ADF&G recognizes approved bowhunter and hunter education courses from other states.

Requirements for hunters before hunting in Units 7, 13, 14, 15, and 20:

older, you must have successfully completed a Basic Hunter Education course before you hunt in the units listed above.

If you are under 18 years of age, you must have either successfully completed a Basic Hunter Education course or be under the direct immediate supervision of a licensed hunter who is:

- (a) 18 years of age or older and has successfully completed a Basic Hunter Education course, OR
- (b) born on or before January 1, 1986.

Interior/Arctic

completed an ADF&G-approved bowhunter certification course.

successfully completed an ADF&G-approved bowhunter certification course and the certification card must be carried in the field when hunting big game.

(907) 459-7375

Hunter Education contact numbers:

Statewide (907) 267-2373 Southeast (907) 465-4345 **Southcentral** (907) 267-2241

Youth Hunting Big game bag limit for hunters under age 10, all hunts:

Hunters under age 10 may not have their own big game bag limit, so they may not obtain harvest tickets or permits. They may only take big game on behalf of a licensed hunter at least 18 years of age, and they must be under the direct, immediate supervision of that hunter. The supervising adult hunter is responsible for ensuring that all legal requirements are met, and must comply with big game locking-tag requirements, if applicable, and validate required harvest tickets or permits.

Big game general season hunts for hunters age 10 and older:

Hunters age 10 and older have their own big game bag limit and must obtain their own harvest tickets. Adult supervision is not a requirement for hunters with their own harvest tickets.

Big game *vouth* hunts only:

Basic Hunter Education is required for all youth hunters participating in "youth hunts." See page 35 for "youth hunt" definition and additional information.

Big game permit hunts for hunters age 10 and older:

Hunters age 10 and older are allowed their own big game bag limit and may obtain their own permits. Adult supervision is not a requirement for hunters with their own permits (except youth hunts).

Resident hunters age 10-17 who have successfully completed a Basic Hunter Education course are allowed to hunt on behalf of an adult permit holder, under the direct, immediate supervision of that adult. The adult permit holder must be a licensed hunter, 18 or older, and is responsible for ensuring all legal requirements are met. This does not apply to harvest tickets.

In all cases, if a youth is hunting big game on behalf of an adult, the bag limit and responsibility to report belongs to the adult.

Hunter Education volunteers

Each year, ADF&G trains volunteer instructors to provide quality training and education to thousands of Alaskans, teaching Hunter, Bowhunter, Crossbow, and Muzzleloader education certification courses. Common themes taught in each of these courses are hunter responsibility, ethics, wildlife conservation, management and the safe handling of firearms, muzzleloaders, crossbows, and archery

During calendar year 2018, volunteer instructors around the state provided 5,728 hours of valuable instruction to 3,114 students. The 2018 Hunter Education Instructor of the Year was Richard Graham of Wasilla. The 2018 Bowhunter Education Instructor of the Year was Ryan Adam of North Pole. The 2018 H.I.T. Outstanding Educator of the Year was Robert Taylor of Fairbanks. Richard Sterling of Fairbanks and Richard Groff of Cordova were given Lifetime Achievement Awards.

Harvest tickets and reports

Harvest tickets

Harvest tickets are required in general season hunts for caribou, deer, moose, and sheep in all units. Harvest tickets are also required in general season hunts for black bear in Units 1-7, 11-16, 19D, and 20. Harvest tickets are available free online, from license vendors, and at ADF&G offices. They are valid from the date issued through June, or until the season ends. The harvest ticket number must be written on your hunting license. Harvest ticket numbers issued during the previous calendar year which are still valid must be recorded on your new hunting license.

Harvest tickets are not required for hunts where permits are required.

Your harvest ticket(s) must be carried in the field and must be validated by cutting out the month and day immediately upon killing game. You must keep each validated harvest ticket(s) in your possession until that animal has been delivered to the location where it will be processed for human consumption.

You must use your deer harvest tickets in sequential order, and you must carry any unused deer harvest tickets on your person whenever you are hunting deer.

General season hunts

General season hunts are the least restrictive hunts. These hunts are generally open to most people and require less pre-planning than permit hunts. They are not managed as conservatively as permit hunts and are subject to fewer emergency closures. These hunts are indicated in the unit sections with the letters "HT" in the "permit/hunt #" column. Reporting your harvest is mandatory for most big game species. You must submit a harvest report for every harvest ticket you possess, even if you did not hunt. Information at right explains how to complete harvest tickets and reports.

Harvest reports

Harvest reports are attached to your harvest tickets. All hunters who obtain a harvest ticket are required to report.

The report need not be carried in the field, but must be completed and returned within 15 days of taking the bag limit, or within 15 days after the close of the season, even if you did not hunt or did not take an animal.

For sheep, the harvest report must accompany the horns at the time of sealing. See page 33 for sealing information.

Reports of personal harvest locations are confidential.

Reporting your hunt online

In many cases, hunters may now report their hunting activities online at http://hunt.alaska.gov.

Filing your hunt reports electronically has many advantages over reporting by mail. Using this system, you can be sure we have received your report. Online reporting also allows you to verify which reports you have filed and which you have not.

When you file online, you will immediately see a confirmation number, and you will receive a certified receipt by email. If there is ever a question, we will accept this receipt as proof that you filed your report. When you file electronically, you'll help save printing, postage, and labor costs. Not all hunts have this option available.

If you give false information when applying for or reporting on a license, permit, locking-tag or harvest ticket, these documents are void and you have broken the law. It is illegal to alter, change, loan, or transfer any license, permit, locking-tag, or harvest ticket issued to you, and you may not use anyone else's license, locking-tag, permit or harvest ticket. There is an exception provided for Alaska residents who are blind, physically disabled, 65 or older, or developmentally disabled. (See proxy hunting, page 12.) A person whose hunting license privileges have been revoked/suspended in any other state may not purchase an Alaska hunting license during the period of the revocation/suspension.

Permit hunts

When hunter demand is higher than a game population can sustain, harvest is often restricted by permits. Six kinds of permit hunts are used: drawing, registration, targeted, Tier I, Tier II, and community subsistence harvest. These hunts may close early by emergency order. It is your responsibility to check with the department for hunt closure information prior to hunting. Hunt information can be found at http://hunt.alaska.gov. Each type of hunt is described below:

Drawing permit hunts

These hunts limit harvest by restricting the number of hunters. Hunters apply for permits in November and December and pay a nonrefundable application fee. Permits are awarded by random lottery.

These hunts do not generally limit the number of permits, although a few registration hunts limit the number of permits on a first-come first-serve basis.

Prior to applying for drawing permits, the applicant must obtain or have applied by mail or internet for the appropriate hunting license. This license requirement does not apply to residents under the age of 18. If you have a hunting license, the license number must appear on the drawing permit application or the application will become void.

Details about permit hunts and applications are included in a drawing permit hunt supplement available at hunting license vendors and ADF&G offices or online at http://hunt.alaska.gov.

One drawing application period is held each year. Drawing supplements are available in November and December, with a December deadline.

Tier II subsistence permit hunts (residents only)

These hunts are held when there is not enough game to satisfy all subsistence needs. Hunters must answer questions on the application concerning their dependence on the game for their livelihood and availability of alternative resources. Applications are scored based on responses to the questionnaire and permits are issued to those with the highest scores. Details are included in a subsistence supplement which is available in offices or online at http://hunt.alaska.gov during November and December.

Registration permit hunts

These hunts do not generally limit the number of permits, although a few registration hunts limit the number of permits on a first-come first-serve basis. Registration permits are available as listed for each registration hunt as described in this booklet. Seasons will be closed by emergency order if a harvest quota is met. In most cases you must apply in person, but some hunts allow application by mail or online. Registration hunts have very specific hunt boundaries. A person may be limited to one big game registration permit at a time in Units 1, 17, 20E, 22, and 23.

Tier I hunts

Some registration hunts are Tier I subsistence hunts and limited to residents only. In the Unit 13 Tier I caribou hunt, each household is limited to one permit. An application is required for each household during November and December for hunts occurring the following regulatory year. See Subsistence Supplements for further details.

Targeted hunts

Targeted hunts are similar to registration hunts but require hunters to apply only during a specific time. A random lottery is then held and permits are awarded based on order drawn.

Community subsistence harvest hunts

Community subsistence harvest hunts are established to accommodate traditional subsistence hunting practices and create group bag limits rather than individual bag limits. Hunters who sign up for a community subsistence harvest hunt during a regulatory year cannot hunt for the same species under other regulations during the same regulatory year, except in specific circumstances. Other people can hunt in a community subsistence harvest hunt area, however, they will have individual bag limits.

The Board of Game will consider proposals to establish community subsistence harvest hunt areas during regularly scheduled meetings to consider seasons and bag limits for affected species in a hunt area. If the Board of Game has established a community subsistence harvest hunt area for a big game population, either a group or community must then apply to the department, designating a hunt coordinator.

Currently, there are three community harvest hunt areas:

- Chalkyitsik moose
- Yukon Flats black bear
- Copper Basin moose and caribou

Permit tickets and reports

The following conditions and procedures apply to permit tickets and reports for all permit hunts:

- A permit ticket is not valid until you sign it.
- You must carry the permit ticket while hunting.
- In most cases, you may not transfer your permit to another hunter. Special conditions allowing transfer apply to military personnel deployed into an active combat zone (see page 11).
- You may apply for a permit as an Alaska resident (see page 9) only if you qualify as a resident by the start date of the hunt.
- You must validate the permit ticket by cutting out the month and day immediately upon killing game.
- You must keep the validated permit ticket in your possession until the animal has been delivered to the location where it will be processed for human consumption.
- All permit holders must complete the permit report, including those who did not hunt, those who were unsuccessful, and those who were successful.
- You must complete and return the permit report to ADF&G within the time period specified on the permit.
- If you fail to report, you will be ineligible for any permits the following regulatory year, and you may be cited.

Permit ticket:

Complete this portion in the field if your hunt is successful.

Permit report:

Complete and return this portion, after your hunt. You may also report online at http://hunt.alaska.gov for some hunts.

Reports of personal harvest locations are confidential.

Bag limit

The bag limit is the maximum number of animals of any one game species a person may take during a regulatory year.

Bag limits are assigned by unit or portions of units. A bag limit applies to a regulatory year (July 1–June 30) unless otherwise specified, and includes animals taken for any purpose, including subsistence.

You may hunt a species if the bag limit in your hunt area is greater than the number of animals of that species you have already taken anywhere in the state. If the limit is greater, you may take the number of animals needed to reach the limit.

For example: if you took one black bear from Unit 6 (which has a limit of one black bear) and then go to Unit 9 (which has a limit of three black bears), you may take up to two more black bears in Unit 9.

But if you hunt in Unit 9 first (limit of three black bears) and kill one black bear, you may not hunt black bear in Unit 6 (limit of one black bear) within the same regulatory year because you have attained the bag limit for that unit.

When there is a hunting season and a trapping season for the same species, the bag limit under hunting regulations is separate from the bag limit for trapping.

For example: the hunting bag limit in Unit 16A is one wolverine. The trapping bag limit is two wolverine. If you buy both a hunting and trapping license, you may take three wolverine in Unit 16A, one by hunting and two by trapping.

A person who has wounded game should make every legal effort to retrieve and salvage that game. Animals disturbed while hunting do not count against your bag limit; however, bears wounded in Units 1-5, and 8, and elk wounded in Unit 8 do count toward your bag limit for the regula-

A big game animal taken under a youth hunt, except for deer in an area where the bag limit is one, will count against the bag limit for both the youth and the accompanying adult. See page 35 for "youth hunt" definition.

All hunters, regardless of age, have their own small game bag limit.

Sealing requirements

Sealing means having an authorized ADF&G representative place a seal on an animal hide and/or skull.

Hunters must present, in person, the required items unfrozen (hide, if required, and skull for bears; hide only for lynx, wolf, and wolverine; horns attached to the skull plate for sheep; moose antlers attached to the uncut skull plate). The sealing officer asks questions about when, where and how the animal was taken, and may measure the skull and take some biological samples. The seal must remain on the hide and/or skull until it has been transported from Alaska or until the tanning process has begun.

If you are unable to bring in an animal for sealing within the required time, you must complete and sign a temporary sealing form (available at ADF&G offices) so another person can have the animal sealed. This form must be presented at the time of sealing.

Where sealing is required, wolves, wolverine, lynx, sheep, brown bears, and black bears in most units must be sealed within 30 days of the kill. (See bear information, pages 24-28.)

In Units 7 and 15, moose sealing is required. The antlers must be presented for sealing and will be **permanently** sealed by an ADF&G representative within 10 days of the kill, or a lesser time if designated.

Emergency taking of game In defense of life or property

You may kill game animals in defense of your life or property if you did not provoke an attack or cause a problem by negligently leaving human food, animal food, mineral supplements, or garbage in a manner that attracts wildlife and if you have done everything else you can to protect your life and property.

Property means your dwelling, means of travel, pets or livestock, fish drying racks, or other valuable property necessary for your livelihood or survival.

The meat of a game animal that you have legally taken becomes your property, but you may not kill another wild animal to protect the meat unless the meat is necessary for your livelihood or survival. In this situation you still must do everything possible to protect the meat, such as proper storage, scaring off the scavengers, etc. before you may kill the scavenger.

Game animals taken in defense of life or property belong to the state. If you kill a bear, wolf, wolverine, coyote, beaver, fox, lynx, mink, weasel, muskrat, marten or river otter, you must salvage the hide and skull and surrender them to the state.

Where sheep horn sealing is required, the horns must be presented for sealing and will be permanently sealed by an ADF&G representative within 30 days of the kill, or a lesser time if designated. The harvest report must be presented at the time of sealing.

Sealing is required for:

- Brown/grizzly bears, except those taken in and not removed from the brown bear subsistence areas under a subsistence registration permit, see page 25.
- Black bears taken in Units 1-7, 14A, 14C, 15-17, and 20B.
- Any untanned bear hide or skull transported or exported from Alaska.
- Black and brown bear hides and skulls intended for sale.
- Sheep taken in Units 7, 9, 11-16, 19, 20, and 24.
- Sheep rams with horn restrictions in Units 23, 25, and 26.
- Lynx, wolf, and wolverine.
- Bull moose in Units 7 and 15.

Check the information relative to your particular hunt to see if there are sealing requirements.

REMEMBER, ALL HIDES AND SKULLS MUST BE UNFROZEN AT THE TIME OF SEALING.

For bear hides, the claws must remain naturally attached. A surrendered hide and skull must have been completely removed from

If you kill a bison, caribou, deer, elk, moose, muskox, sheep, or mountain goat in defense of life or property, you must salvage horns or antlers and the meat.

You must immediately notify ADF&G or Alaska Wildlife Troopers of the kill and surrender what you salvaged. Within 15 days, you must also complete and submit a questionnaire explaining the circumstances of the incident. If you attempted to take an animal, but it escaped and may have been wounded, you should also report the incident to ADF&G or Alaska Wildlife Troopers immediately.

For food in a dire emergency

If you are in a remote area and unintentionally run out of food and cannot expect to get food from another source soon enough, you may kill wildlife for food to save your life or prevent permanent health problems. If this happens, you must salvage all meat and surrender what is left to the state after your rescue. You will be asked to fill out a statement about the circumstances.

Use of game

Game taken under a hunting license <u>MAY NOT</u> be used for the following purposes: (exceptions noted)

Buying or selling of game meat, EXCEPT hares.

Buying, selling, or bartering of any part of a bear gall bladder.

Buying or selling of any part of a brown/grizzly bear, *EXCEPT*:

- -- an article of handicraft made from the fur of a bear (see definition of handicraft, page 34);
- brown bears taken in a brown bear control area with a control permit, where ADF&G will issue permits allowing permittees to sell untanned hides (with claws attached) and skulls, after sealing;
- -- brown bear hides (with claws attached) and skulls from bears harvested in areas with a two brown bear bag limit per regulatory year may be sold after sealing; a permit is required. Hides and skulls will be permanently marked by ADF&G.

Buying or selling of any unsealed beaver (EXCEPT in Units 12, 16, and 18-26), lynx, wolf, or wolverine pelt.

Buying or selling of any big game animal skulls, EXCEPT black bear, wolf, and wolverine, taken under a hunting license.

Buying, selling, or bartering horns or antlers, *UNLESS they have been naturally shed or have been completely removed from any part of the skull. HOWEVER,in Unit 23:*

- -- you <u>MAY NOT</u> remove caribou antlers from the skull and buy, sell or barter them, UNLESS they have been transformed into a handicraft (see definition, page 34).
- -- you MAY buy, sell, or barter naturally shed, unmodified caribou antlers, AS LONG AS the pedicle is still attached to the antler.
- -- you <u>MAY</u> remove caribou antlers from the skull for your own use, but you <u>MAY NOT</u> sell them before they are transformed into a handicraft.

You <u>MAY NOT</u> buy, sell, barter, advertise, or otherwise offer for sale or barter a big game trophy, including any trophy made from any part of a big game animal.

You MAY barter subsistence taken game meat, EXCEPT: individuals or businesses licensed under AS 43.70 or AS 43.75, or if you are an Alaska resident employed by an individual or business holding a license under AS 43.70 or AS 43.75 to engage in the commercial sale of the food items or nonedible items provided by the barter exchange, or to engage in providing the services provided by the barter exchange.

Using the meat of game as bait or food for pets and livestock. *HOWEVER*, you <u>MAY</u> use the following as bait or food for pets or livestock:

- the skin, guts, heads, or bones of game legally taken or killed by vehicles, after the salvage of edible meat,
- brown bear meat (EXCEPT taken under a subsistence brown bear management permit),
- black bear meat taken June 1 Dec 31 (as long as the black bear hide is salvaged),
- the skinned carcasses of furbearers and fur animals, and the meat from small game (other than birds) and unclassified game, and
- game that died of natural causes <u>MAY</u> be used as bait, AS LONG AS the game is not moved from where it was found. Natural causes do not include death caused by humans.

Illegally taken game

Any game animal taken illegally is the property of the state. If you mistakenly take an animal you thought was legal, you must comply with salvage requirements for that species. (See page 36.)

You may transport game taken illegally only if your purpose is to salvage and transport the game to the nearest office of ADF&G or Alaska Wildlife Troopers and surrender it.

If you comply with this regulation, you will not be prosecuted for illegally possessing the animal, and you are less likely to be punished severely for illegally taking the animal. You may not possess, transport, give away, receive, or barter any illegally taken game or game parts.

Roadkills

Any wildlife killed or injured by a vehicle belongs to the state. If your vehicle hits and injures or kills a big game animal, you must notify the Alaska Wildlife Troopers as soon as possible.

Marked or tagged game

Unless otherwise prohibited, it is legal to harvest marked or tagged game, however, data provided by that animal is important and the department asks hunters to avoid taking marked or tagged game. If you do take an animal that has been marked or tagged, you must notify ADF&G when and where you took it, and return the identification equipment to ADF&G. If sealing is required, any tag, collar, tattoo, or other identification must be retained until sealed. Even if you just find any of these items, returning them to ADF&G provides biologists with valuable insight into the animal's movements, habitat, and lifespan.

General hunting restrictions for all game:

Please see page 19 for additional requirements specific to big game.

You **MAY NOT** take any game by:

- Shooting on, from, or across the driveable surface of any constructed road or highway.
- Driving, herding, harassing, or molesting game with any motorized vehicle such as an aircraft, airboat, snowmachine, motor-driven boat, etc.
- A motor-driven boat or motorized land vehicle, unless the motor has been shut off and the progress from the motor's power has ceased (see page 19 for additional restrictions in Units 1-5 and Unit 6D), EXCEPT:
 - -- A motor-driven boat may be used as follows:
 - in Units 23 and 26 to take caribou;
 - in Unit 22 to position hunters to select individual wolves for harvest;
 - under the authority of a permit issued by the department.
 - -- A motorized land vehicle may be used as follows:
 - under the authority of a permit issued by the department;
 - in Units 7 and 15 with a permit, see page 12;
 - A snowmachine may be used to position a caribou for harvest, and a caribou may be shot from a stationary snowmachine in Units 22, 23, and 26A;
 - A snowmachine may be used in Unit 17 to assist in the taking of a caribou and caribou may be shot from a stationary snowmachine. In Unit 17, "Assist in the taking of a caribou" means a snowmachine may be used to approach within 300 yards of a caribou at speeds under 15 miles per hour, in a manner that does not involve repeated approaches or that causes a caribou to run. A snowmachine may not be used to contact an animal or to pursue a fleeing caribou.
 - A snowmachine may be used to position a wolf or wolverine for harvest, and a wolf or wolverine may be shot from a stationary snowmachine in Units 18, 22, 23, and 26A
 - A snowmachine may be used to position hunters to select individual wolves for harvest, and wolves may be shot from a stationary snowmachine in wolf control areas and in the following areas:
 - -Units 9B, 9C, 9E, 17, 18, 19, 21, 22, 24, 25C, and 25D, except on any National Park Service or National Wildlife Refuge lands not approved by the federal agencies;
 - A snowmachine may be used to position hunters to select a bear for harvest in bear control areas and bears may be shot from a stationary snowmachine, see predator control supplement online at http://hunt.alaska.gov for area descriptions.
 - An <u>ATV</u> may be used to position hunters to select individual wolves for harvest, and wolves may be shot from a stationary ATV in Units 9B, 9C, 9E, 17, 22, and 25C, except on any National Park Service or National Wildlife Refuge lands not approved by the federal agencies.
- · Using an electronic control Taser-type device that temporarily incapacitates wildlife, EXCEPT under the authority of a permit issued by the department.
- Using poison or other substances that temporarily incapacitates wildlife, without written permission from the Board of Game.
- Using a bow that shoots more than one arrow at a time.
- Using a machine gun, set gun, or shotgun larger than 10 gauge.

- · Using a helicopter for hunting or for transporting hunters, hunting gear, game meat, trophies, or any equipment used to pursue or retrieve game, EXCEPT helicopter use may be authorized to rescue hunters, gear, or game in a life-threatening situation.
- Pursuing with a vehicle an animal that is fleeing.
- Using a crossbow in a hunt restricted to bow and arrow **only.** You may use a crossbow in any hunt that does not restrict weapons. For big game, minimum standards are listed on page 19.
- Using a pit, fire, laser sight (excluding rangefinders), electronically-enhanced night vision, any forward looking infrared device, any device that has been airborne, controlled remotely, or communicates wirelessly, and used to spot or locate game with the use of a camera or video device, any camera or other sensory device that can send messages through wireless communication, artificial salt lick, explosive, expanding gas arrow, bomb, smoke, deer urine, elk urine, or chemicals (excluding scent lures), EXCEPT:
 - -- Electronic calls may be used for all game animals except moose.
 - -- Scent lures (without deer or elk urine) may be used for ungulates, and for bears ONLY under a black bear baiting permit.
- Using wireless communication to take a specific animal by a person until after 3:00 a.m. following the day after the use of the device, *EXCEPT*:
 - -- Communications equipment may be used for safety but may not be used to aid in taking of game.
 - -- In the Unit 20D bison hunt, the use of ground-based wireless communications to locate bison is allowed.
 - -- In targeted moose hunts, the use of ground-based wireless communication to locate individual moose for harvest is allowed
- Using artificial light, EXCEPT:
 - -- Artificial light may be used while tracking and dispatching a wounded game animal; however, a hunter may not be on or in a motorized vehicle while using artificial light.
 - -- Artificial light may be used by resident hunters taking black bear under customary and traditional use activities at a den site Oct 15-Apr 30 in Unit 19A, Unit 19D upstream from the Selatna and Black River drainages, and Units 21B, 21C, 21D, 24, and 25D.
- Using a trap or a snare to take big game, fur animals, or small game, EXCEPT: you may use a trap or snare to take grouse, hare, and ptarmigan (see definitions of fur animals and small game, pages 34-35).
- · Intentionally or negligently feeding deer, elk, moose, bear, wolf, coyote, fox, wolverine, sheep, or deleterious exotic wildlife (see page 142), or intentionally leaving human food, animal food, mineral supplements or garbage in a manner that attracts these animals, EXCEPT: you may hunt wolves, fox, and wolverine with game parts that are not required to be salvaged. (See page 17 for list of game parts that are allowed to be used for bait.) Use of any type of bait other than those allowed on page 17 will be considered a violation of the feeding regulation.
- Wearing foot gear with felt soles or other absorbent fibrous material.

Additional hunting restrictions specific to big game:

Big game includes black bear, brown/grizzly bear, bison, caribou, Dall sheep, Sitka black-tailed deer, elk, mountain goat, moose, muskox, wolf, and wolverine.

In addition to general hunting restrictions listed on page 18, you MAY NOT:

- Hunt big game using a rimfire firearm, EXCEPT: you may use .22 caliber rimfire cartridges to take swimming caribou in Units 23 and 26.
- Hunt big game with a bow, UNLESS:
 - -- the bow is at least:
 - 40 pounds peak draw weight when hunting caribou, wolf, wolverine, black bear, Dall sheep, and deer;
 - 50 pounds peak draw weight when hunting mountain goat, moose, elk, brown bear, muskox, and bison;
 - -- the arrow is at least 20 inches in overall length, tipped with a broadhead, and at least 300 grains in total weight;
 - -- the broadhead is a fixed, replaceable or mechanical/retractable blade type and not barbed.
- Hunt big game with a crossbow, UNLESS:
 - -- the crossbow is at least 100 pounds peak draw weight:
 - -- the bolt is at least 16 inches in overall length, tipped with a broadhead, and at least 300 grains in total weight;
 - -- the broadhead is a fixed, replaceable or mechanical/retractable blade type and not barbed;
 - no electronic devices are attached to the crossbow, except scopes or electronic sights that do not project light externally;
 - -- the crossbow is shoulder-mounted.
- Hunt big game with a slingbow or airbow.

Attention all crossbow hunters:

All hunters using a crossbow in any hunt must have successfully completed an ADF&G-approved crossbow certification course.

Same day airborne:

It is against the law to hunt or help someone else take big game until 3:00 a.m. the day following the day you have flown. This does not apply if you have flown on a regularly scheduled commercial or commuter airplane. *EXCEPTIONS*:

- You may hunt deer the same day airborne (provided you are 300 feet from the airplane).
- In Units 7, 9, 11-13, 14A, 14B, 15-21, 23-25, 26B, and 26C black bears may be taken at permitted bait stations the same day you have flown, provided you are at least 300 feet from the airplane. In Units 7, 11, 12, 13, 14A, 14B, 15, 16, 18, 19A, 19D, 20A, 20B, 20C, that portion of 20D north of the Tanana River, 20E, 20F, 21C, 21D, 23, 24C, 24D, and 25D, brown bears may be taken at permitted bait stations the same day you have flown, provided you are at least 300 feet from the airplane. Same day airborne take is not allowed on National Park Service lands.

From Aug 10-Sept 20, aircraft may only be used by and for sheep hunters to place and remove hunters and camps, maintain existing camps, and salvage harvested sheep. A person may not use or employ an aircraft to locate sheep or direct hunters to sheep during the open sheep hunting season.

- Take a cub bear or a sow accompanied by cub(s), EXCEPT: black bear cubs and sows accompanied by cubs, may be taken by resident hunters Oct. 15-Apr. 30 under customary and traditional use activities at a den site in Unit 19A, Unit 19D upstream of the Selatna and Black River drainages, Units 21B, 21C, 21D, and 24; in Unit 25D, black bear cubs and sows accompanied by cubs may be taken year-round. Cub bear means a brown/grizzly bear in the 1st or 2nd year of life, or a black bear (including the cinnamon and blue color phases) in the 1st year of life.
- Shoot big game from a boat in Units 1-5 or black bear in Unit 6D, UNLESS you have obtained a Permit to Hunt From a Boat, see page 12.
- Shoot big game animals while they are swimming, EXCEPT caribou in Units 23 and 26.
- Use bait, EXCEPT for:
 - -- bears under specific conditions, see page 26 or online at http://hunt.alaska.gov.
 - -- wolves and wolverines under specific conditions, see page 18. See the definition of bait, page 34.
- Hunt big game with a muzzleloader, UNLESS: it is a shoulder-mounted long gun and is at least .45 caliber or larger with a barrel that is either rifled or smooth bore and discharges a single projectile.
- Hunt big game with a muzzleloader equipped with a scope, or using smokeless powder as a charge, during any special season for muzzleloading firearms only.
- · Hunt moose with the use of electronic calls.
- Hunt sheep, mountain goat, or muskox using domestic goats or domestic sheep as pack animals.
- Hunt big game with the aid or use of a dog, EXCEPT: dogs may be used to hunt black bears under a permit issued by ADF&G. A single, leashed dog may be used in conjunction with tracking and dispatching a wounded big game animal.

Fur animal restrictions

Beaver, coyote, Arctic fox, red fox, lynx, and squirrel are fur animals; further restrictions are listed on page 140.

Furbearer restrictions

River otter, marten, mink, weasel, fisher, muskrat, and marmot are furbearers and may be taken only under trapping regulations with a trapping license.

See trapping regulations online at:
www.adfg.alaska.gov/index.cfm?adfg=trapping.main

Stream Crossings

It is unlawful to operate a motorized or tracked vehicle without a valid Fish Habitat Permit, in or across waters where salmon, trout, Dolly Varden, Arctic char, sheefish, or whitefish spawn, rear, or migrate. For more information, visit: http://www.adfg.alaska.gov/index.cfm?adfg=uselicense.main or call the nearest ADF&G Division of Habitat office: Anchorage (907) 267-2342 Fairbanks (907) 459-7289 Douglas (907) 465-4105 Palmer (907) 861-3200

Weapons restricted hunts

Bow and arrow, crossbow, or muzzleloaders may be used to hunt during any open season unless otherwise restricted. Hunts or areas may be restricted to "Certified bowhunters only", or "bow and arrow only", or "crossbow only", or "muzzleloader only", or specifically exclude the use of other weapons, including crossbows. ADF&G recognizes approved bowhunter and hunter education courses from other states. See page 13 for course information.

Archery/Bow and Arrow

In any hunt or area specifically restricted to bow and arrow only, you MAY NOT:

- Hunt with a crossbow.
- Hunt with a bow designed to shoot more than one arrow at a time.
- Hunt with expanding gas arrows.
- Hunt using poisons or substances that temporarily incapacitate wildlife.

Equipment:

You MAY NOT hunt big game with a bow, UNLESS:

- the bow is at least:
 - -- 40 pounds peak draw weight when hunting black-tailed deer, wolf, wolverine, black bear, Dall sheep, and caribou; -- 50 pounds peak draw weight when hunting mountain goat, moose, elk, • the bolt is at least 16 inches in overall brown/grizzly bear, muskox, and bison;
- the arrow is at least 20 inches in overall length, tipped with a broadhead, and at . least 300 grains in total weight;
- the broadhead is a fixed, replaceable or mechanical/retractable blade type and not • no electronic devices are attached to barbed.

You **MAY NOT** use electronic devices or lights attached to the bow, arrow, or arrowhead with the exception of a nonilluminating camera or a lighted nock on the end of the arrow or a battery-powered sight light.

You **MAY NOT** use scopes or other devices attached to the bow or arrow for optical enhancement.

You **MAY NOT** use any mechanical device that anchors a nocked arrow at full or partial draw unaided by the bowhunter.

Definitions:

Bow - a longbow, recurve bow, or compound bow; that is, a device for launching an arrow which derives its propulsive energy solely from the bending and recovery of two limbs. The device must be hand-held and hand-drawn by a single and direct pulling action of the bowstring by the shooter with the shooter's fingers, or a hand-held, or wrist-attached release aid. The energy used to propel the arrow may not be derived from hydraulic, pneumatic, explosive, or mechanical devices, but may be derived from the mechanical advantage provided by wheels or cams so long as the available energy is stored in the bent limbs of the bow. No portion of the bow's riser (handle) or an attachment to the bow's riser may contact, support, or guide the arrow from a point rearward of the bowstring when strung and at rest. "Bow" does not include a crossbow or any device which has a gun-type stock or incorporates any mechanism that holds the bowstring at partial or full draw without the shooter's muscle power;

Muzzleloader

You MAY NOT use a muzzleloader for

- **UNLESS** it is a shoulder-mounted long gun and is at least .45 caliber or larger with a barrel that is either rifled or smooth bore and discharges a single projectile.
- that is equipped with a scope or uses smokeless powder during any permitted, registered, or special season hunt for muzzleloader only.

Crossbow

You **MAY NOT** use a crossbow for **big** game *UNLESS*:

- the crossbow is at least 100 pounds peak draw weight;
- length, tipped with a broadhead, and at least 300 grains in total weight;
- the broadhead is a fixed, replaceable or mechanical/retractable blade type and not barbed;
- the crossbow, except scopes or electronic sights that do not project light externally:
- the crossbow is shoulder-mounted.

Attention bowhunters:

All hunters participating in archery-only hunts must have successfully completed an ADF&G-approved bowhunter certification

<u>If you were born on or after January</u>

1, 1986 you must have successfully completed an ADF&G-approved bowhunter certification course and the certification card must be carried in the field when hunting big game.

Education requirements:

Bowhunters

An International Bowhunter Education Program (IBEP) or equivalent certification is required to hunt big game with a bow and arrow in weapons restricted hunts. The certification card must be carried in the field when hunting.

A hunter who applies for a "certified bowhunter only" permit hunt must have successfully completed an ADF&G approved bowhunter certification course prior to submitting a permit application.

Muzzleloader Hunters

You may not hunt with a muzzleloader in any hunt or area with weapon restrictions for the taking of big game unless you have successfully completed an ADF&G-approved muzzleloader hunter education course that includes ballistic limitations of muzzleloading weapons and a proficiency test.

A hunter who applies for a "certified muzzleloader hunter only" permit hunt must have successfully completed an ADF&G-approved muzzleloader certification course prior to submitting a permit application.

Shotgun Hunters

You may not hunt for big game with a shotgun in a weapons restricted hunt unless you have successfully completed a Basic Hunter Education course.

Crossbow Hunters

You may not hunt with a crossbow in any hunt or area unless you have successfully completed an ADF&G-approved crossbow

Barbed - an arrowhead with any fixed portion of the rear edge of the arrowhead forming an angle less than 90 degrees with the shaft when measured from the nock end of the arrow, a notch or space of no more than two millimeters between the base of the blade and the shaft shall not be considered a barb:

Broadhead - a fixed, replaceable, or mechanical/retractable blade-type arrowhead that is not barbed with two or more sharp cutting edges having a minimum cutting diameter of seven-eighths inch (7/8");

Bow peak draw weight - the peak poundage at which the bow is drawn through or held at full draw by the shooter at the shooters draw length;

Muzzleloader - any firearm where firing components are loaded into the muzzle end of the firearm.

Exporting meat or other wildlife parts

State export requirements

Raw furs

You may not transport or export any untanned fur or hide from Alaska until sealing requirements have been met.

Federal shipping and export requirements

Shipping between states

If you ship any wildlife parts between states, packages must be clearly marked on the outside with both the name and address of the shipper and consignee, and an accurate list of the package contents by species and number of each species.

Shipping outside the United States

As well as the above requirements if you ship any wildlife parts or products out of the United States, federal regulations require that you complete a "Declaration of Importation or Exportation of Fish and Wildlife" (Form #3-177), available online at http://www.fws.gov/le/declaration-form-3-177.html. In addition, if you ship hides, skulls, meat, or products of brown/grizzly bears, black bears, wolves, lynx, or river otters out of the United States, you must first obtain a federal CITES permit. These forms are not available through ADF&G, but are available at the U.S. Fish and Wildlife offices listed in the green box below.

Transporting to or through Canada

If you take any wildlife parts or products out of the United States, federal regulations require that you complete a "Declaration of Importation or Exportation of Fish and Wildlife" (Form #3-177) available online at https://www.fws.gov/le/declaration-form-3-177. <u>html</u>. You are also required to obtain a federal CITES permit for brown/grizzly bears, black bears, wolves, lynx, or river otters. However, an exception has been made for residents of Canada and the U.S. to transport untanned black bear hides (fresh, frozen, or salted with paws and claws attached) accompanied by the meat or skull using only Form #3-177. This will allow you to transport these items as noncommercial items accompanying personal baggage into or through Canada to other states. For further information and forms, contact: Duty Wildlife Officer at (907) 271-6198, U.S. Fish and Wildlife Service offices listed below, or at Canadian border stations. Canadian federal wildlife legislation requires that CITES controlled wildlife entering Canada from the USA be accompanied by a U.S. Fish and Wildlife Service CITES export or re-export permit and be accompanied by a Canadian issued CITES re-export permit at the time of export out of Canada. For more information on how to obtain a Canadian CITES permit please contact (819) 997-2800 or visit http://www.ec.gc.ca/cites/.

U.S. Fish and Wildlife Service Import/Export Office in Anchorage (907) 271-6198

Law Enforcement Offices

Juneau (907) 586-7545 Fairbanks (907) 456-2335 Ketchikan (907) 225-2254 Tetlin National Wildlife Refuge in Tok (907) 883-5312 (Import/Export permits only, not CITES)

Transporting requirements

You must transport all meat to your departure point from the field (landing strip, trail head, road, river, etc.) before transporting antlers, horns, or bear hides and skulls (when required to be salvaged) from the kill site. Antlers, horns, bear hides and skulls may be transported simultaneously with the last load of meat. After leaving the field, antlers or horns being transported must be accompanied by all edible meat unless possession of the meat has been transferred to and accepted by someone else (see *Transfer of Possession* below).

"Field" means an area outside established year-round dwellings, businesses, or other developments usually associated with a city, town, or village. "Field" does not include permanent hotels or roadhouses on the state road system or state or federally maintained airports.

Transfer of Possession

A Transfer of Possession Form can be found on the inside back cover of this booklet.

Unprocessed meat and other game parts may be transferred to others permanently (given as a gift) or may be transferred temporarily for the purpose of transport. In doing so, both you and the person taking possession must be able to provide a signed statement that includes: both of your names and addresses, signatures, when and where the game was taken, what specific game or parts of game changed hands, and hunting license number of the person who harvested the game. You must show this statement and the meat to an ADF&G representative if asked.

It is your responsibility to make sure that game is legally taken before you accept or transport it. If you accept game or parts of game from someone else, either permanently as a gift or temporarily in order to transport that game, it becomes your responsibility to salvage all edible meat for human consumption.

Firearms advisory for nonresident aliens

Federal regulations are now in effect for temporarily importing firearms and ammunition into the United States.

- 1. Nonresident aliens (someone who is neither a citizen nor a permanent resident of the United States) must provide U.S. Customs with a pre-approved U.S. import permit and evidence that they fall into an exemption category (e.g., by providing a valid Alaska hunting license/permit) before they will be allowed to import firearms or ammunition.
- 2. The Bureau of Alcohol, Tobacco and Firearms (ATF) issues the required import permit. This permit can be obtained by completing a form (Form 6 Part 1, Application and Permit for Importation of Firearms, Ammunition and Implements of War), which is available from the ATF or on the ATF website. It can take 6 to 12 weeks to process the application so the permit should be applied for well in advance.
- 3. The application form for the import permit must be accompanied by a copy of an Alaska (or other U.S.) hunting license.

Contact Information:

Bureau of Alcohol, Tobacco and Firearms Firearms and Explosives Imports Branch Telephone: 1-800-800-3855 Website: http://www.atf.gov

Canadian firearms restrictions Canadian laws significantly restrict transportation of firearms

To transport firearms through Canada, you must pay a \$25 fee (Canadian) and fill out a firearms declaration form. To transport a handgun through Canada, you must also receive an "Authorization to Transport" (ATT) permit; this permit must be authorized BEFORE you arrive at the border. If not, your handgun may be confiscated. An ATT permit is free, however you will still have to pay the \$25 fee and fill out a firearms declaration form. For more information or to order a copy of the Firearms Act, its regulations, application forms and other Canadian Firearms Centre publications, contact them at:

Salvage and possession of game
Salvage of meat means to transport the edible meat to the location where it will be processed for human consumption. Successful hunters must validate their harvest ticket or permit immediately upon taking game. Once you have validated your harvest ticket or permit, you can begin to salvage. Edible meat in all cases must be salvaged, and the following information will help you understand what other requirements may be necessary for salvaging game.

Meat Salvage

Wanton waste of big game meat is an extremely serious offense punishable by a fine of up to \$10,000 and 1 year in jail.

You must salvage all the edible meat of moose, caribou, sheep, mountain goat, deer, elk, bison, musk-oxen, and spring black bear, for which seasons and bag limits exist.

You must salvage either the hide or meat of beaver, pika, and ground squirrel; for small game birds, the breast meat must be salvaged, except for geese, cranes, and swans; for these you must salvage the meat of the breast, back, legs, thighs, and wings Additional salvage requirements for Copper Basin Community Subsistence Harvest hunts exist, see the CSH hunt conditions online at http://hunt.alaska.gov.

Big game meat you must salvage (excluding bear) includes:

- · all of the neck meat;
- · all of the chest meat (brisket);
- all of the meat of the ribs;
- front quarters as far as the distal joint of the radius-ulna (knee);
- hindguarters as far as the distal joint of the tibia-fibula (hock);
- all of the meat along the backbone between the front and hindquarters (backstraps and tenderloins).

When the salvage of bear meat is required, you must salvage the meat of the front quarters and hindquarters and meat along the backbone (backstraps). When the salvage of brown bear meal is required under a subsistence permit, you

must also salvage all of the meat of the neck, brisket and ribs (see bear information, pages 24-28). The meat is required to be salvaged first, and bear hides and skulls (when required to be salvaged) may be transported simultaneously with the last load of

You are not required to salvage the meat of the head, guts, bones, sinew, and meat left on the bones after close trimming, or meat that has been damaged and made inedible by the bullet or arrow. These portions of the animal may be left in the field because they are not included in the definition of edible meat that must be salvaged.

Hide Salvage

You must salvage the hide of a wolf, wolverine, coyote, fox, or lynx. You must salvage either the hide or meat of a beaver, pika, or ground squirrel.

You must salvage the entire hide (including claws attached) and skull of a brown/grizzly bear unless it was taken in (and not removed from) one of the subsistence hunt areas under a subsistence registration permit (see page 25). Salvage requirements for black bear are listed on page 24.

Antler/Horn Salvage

In hunts with antler/horn restrictions, antlers/horns must be salvaged and may not be altered unless required by permit conditions. Antlers must remain naturally attached to the unbroken/uncut skull plate if the required number of brow tines aren't present.

In big game hunts with antler/horn restrictions, you may only possess or transport the animal if both antlers/horns accompany the last load of meat.

Horn and Antler Possession

You may not possess the horns or antlers of hunter

harvested big game animals unless you also salvaged and removed the meat from the field.

You may possess horns or antlers if they were given to you by someone who salvaged and removed the meat from the field, or if you have already eaten the meat of the animal you killed.

Legal No boning of meat in field

Legal Meat removed by close trimming (bones left in field)

Illegal In some units prior to Oct 1

Meat that must be left on the bone when salvaged prior to Oct 1:

FQ = Front Quarters

HQ = Hindquarters R = Ribs

UNIT	Caribou	Moose
9B	FQ, HQ	FQ, HQ
13	FQ, HQ, R	FQ, HQ, R
17	FQ, HQ	FQ, HQ
18	FQ, HQ	FQ, HQ
19A Holitna/	FQ, HQ	FQ, HQ
Hoholitna con-		
trolled use area		
19B	FQ, HQ	FQ, HQ
21A	FQ, HQ	FQ, HQ, R
21B, C, D, E	NONE	FQ, HQ, R
23	FQ, HQ, R	FQ, HQ, R
24	FQ, HQ, R	FQ, HQ, R
25A	FQ, HQ, R	FQ, HQ, R
25B, C, D	NONE	FQ, HQ, R

You must salvage meat unless it has been stolen, taken or destroyed by a wild animal, lost to unanticipated weather conditions or other acts of God, or transferred to someone who accepts responsibility for salvaging and removing the meat from the field.

Evidence of Sex

Hides of all brown bears, and of black bears taken in Units 1-7, 14A, 14C, 15-17, and 20B must have the penis sheath or vaginal orifice naturally attached during transport or until sealed (see pages 24-28).

If you kill a big game animal (other than a sheep) where the bag limit is restricted to one sex, you must keep enough of the sex organs (penis, scrotum, testicles, udder, teats, vaginal orifice) naturally attached to part of a rear quarter to show the sex of the animal, until the animal is processed for human consumption. Antlers are not proof of sex, except for deer when the antlers are naturally attached to the entire carcass with or without the viscera.

Horns are evidence of sex for Dall sheep, and they must be kept with sheep meat until it is processed for human consumption. Horns may be transported simultaneously with the final load of meat.

Do you know how much meat the law requires you to take?

It's not just four quarters... If you take a moose, caribou, sheep, mountain goat, wild reindeer, deer, elk, bison, muskox, or subsistence brown bear, you must salvage:

- all of the neck meat;
- all of the chest meat (brisket);
- all of the meat of the ribs;
- front quarters to the knee;
- hindguarters to the hock;
- all of the meat along the backbone (backstraps and tenderloins).

Proper meat care

After you have harvested an animal, it is your responsibility to follow salvage requirements, see page 22.

Never eat raw game meat. Always cook game meat thoroughly to prevent disease. Some parasites cannot be seen but may be present in the meat of any mammal. Cooking meat thoroughly eliminates risk from disease or parasites.

Field dressing

Hunters should know how to field dress and care for game meat. Some hunters waste a lot of nutritious, tasty meat because they do not know how to properly field dress game. You will be successful with any method of field dressing as long as you remember these keys to meat care: keep the meat cool, clean, and dry.

Always keep meat cool, clean, and dry

Heat is the greatest threat to game meat. To cool meat, remove the hide as quickly as possible and get the meat away from internal organs. The warmer the weather, the more urgent this becomes. Meat around the hip joint in the ham (rear leg) spoils most quickly. In weather over 60 degrees, it may be necessary to actually place the meat in cool water for 30-45 minutes to reduce the heat. A nearby creek, river, or lake will do the job. If this is necessary, the meat must be immediately dried after removing it from the water.

Boned meat is difficult to keep clean and dry

Some hunters bone the meat, that is, remove all edible meat from the bones to reduce the weight to be packed. The problem with boning is that chunks of meat placed together in a game bag are harder to keep cool and dry. In some management units in Alaska it is illegal to bone the meat. The fewer cuts you make in the field, the more meat you'll get at home.

After the meat is removed from the animal it should be placed in cotton meat bags. Good meat bags allow air to circulate to the meat but are tough enough to hold heavy loads. The meat bags also help keep the meat clean.

Game care at camp

Back at camp hang the bagged meat off the ground to help keep the meat clean and cool.

A tarp should be loosely laced over the meat pole to keep rain off the meat bags. All meat should be checked daily. Any loose pieces of meat in the "hamburger" bag should be moved around each day to insure the meat remains cool and dry.

If you don't have access to a meat pole, gather branches and layer them in a grid to keep the meat off the ground. The goal is to provide good air circulation. Loosely cover the pile with a tarp to keep the meat dry.

Spray meat with citric acid to slow bacterial growth

Once all the meat is hung, remove the bags and spray the meat with a citric acid/water mixture. The meat should be sprayed until the mixture begins to run off the meat. About two ounces of citric acid for each quart of water will do the job.

Food grade citric acid can be purchased at most pharmacies or feed stores. The citric acid will slow down bacterial growth that spoils meat. It also creates a dark outer crust that makes it harder for flies to lay their eggs on the meat. Don't worry about the citric acid mixture getting the meat too wet. The mixture will dry quickly.

River float/winter hunt meat care

If you are on a river float hunt it is very difficult to keep the meat dry and cool when it is stacked inside the raft. You must remove the meat from the raft every night before you camp and hang it where it can stay cool. REMEMBER, A RAFT IS NOT A REFRIGERATOR!

If participating in a winter hunt, a phenomenon called cold shortening may affect the quality of your meat. If the meat is allowed to freeze too quickly, before the rigor-relaxation process can occur, the muscle can shrink due to loss of water, vitamins, minerals, and water soluble proteins.

Cold shortening also results in tough meat. Depending on the temperature, you may want to leave the skin on the meat or pack it with snow to prevent it from chilling too quickly until you are ready to process it.

Information on wildlife diseases and parasites by species: http://hunt.alaska.gov/

Wildlife diseases and common parasites

If you harvest an animal you believe sick or diseased, you are still required by Alaska law to salvage the meat. You must transport all required meat from the field to fulfill salvage requirements, even if you think the meat is not fit for consumption. ADF&G appreciates reports of diseases to better understand the health of the wildlife populations. Contact the local office with information on location, description, photographs, etc. of abnormalities you encounter while hunting or observing wildlife, or submit a report by email at dfg.dwc.vet@alaska.gov or call the Wildlife Disease Information and Reporting Hotline at (907) 328-8354.

No known risk to humans

-Tapeworm cysts are common and different types are found in the muscle, liver, and lungs of **ruminants**, **including moose**, **caribou**, **deer**, **etc**. They are oblong, semi-clear, fluid-filled sacs with a white spot 'head' at one end. People cannot get the adult tapeworm directly from the animal. Simply cut the cysts from the meat or cook the meat thoroughly.

-Legworm. This roundworm is a white worm up to eight inches long under the skin of the legs or brisket and is found in moose and caribou. It does not affect humans, or the edibility of meat.

High risk to humans

-Trichinosis. This roundworm, Trichinella nativa, occurs most commonly in the muscle of bears, lynx, and walrus. It cannot be seen so all bear, walrus, and lynx meat should be treated as if infected, and cooked to an internal temperature of at least 160°F to be safe. Freezing, smoking, drying, salting, or microwaving do not kill this parasite.

Under surveillance

-Respiratory diseases in wild sheep and goats - If harvested animals have abnormal lung tissue (lungs should be spongy and uniform pink, except for bloodshot areas) immediately call or text the Wildlife Disease Surveillance Reporting Line at (907) 328-8354 or send an email to dfg.dwc.vet@alaska.gov. Record the location, take photos of the carcass and abnormal tissue, and collect a lung for submittal to your nearest ADF&G office.

-Moose winter tick— No risk to humans, high risk to moose. Hair loss in a triangle pattern on the neck is a sign of moose winter tick. Present in B.C. and the Yukon but has not been detected in Alaska.

-Chronic Wasting Disease (CWD) – No risk to humans, high risk to deer, elk, and moose. To date, CWD has NOT been detected in free ranging Alaska wildlife. Elsewhere, infected deer species show signs including extreme weight loss, excessive salivation, stumbling, and tremore.

http://hunt.alaska.gov 2019-2020 Alaska Hunting Regulations 23

Important information for all bear hunters

Nonresident brown/grizzly bear hunters must be accompanied in the field by an Alaska-licensed guide or a resident relative within second-degree of kindred. (See guide info, page 10.)

Locking-tag requirements Nonresidents must purchase a locking-tag in addition to their license to hunt either a black or brown/grizzly bear. Harvest tickets and permits may also be required.

Resident hunters do not need a lockingtag to hunt black bears.

Resident hunters must possess a \$25 locking-tag to hunt brown/grizzly bear in Units 1-10, 14, and 15 (however, no locking-tag is required for registration hunt RB525 in Units 9 and 10 or subsistence hunt RB502 in Unit 9).

Big game locking-tags are valid from the date of purchase through December 31 of that year. Locking-tags must be locked on the part of the animal required to be salvaged prior to leaving the kill site and must remain there until the animal is prepared for storage, consumed, or exported.

Bear locking-tags may not be transferred to another hunter. A nonresident bear locking-tag may be used for any other species for which the locking-tag fee is of equal or lesser value, but you must have a harvest ticket or permit (if required) for that species.

A hunter less than 10 years old is not allowed to kill a bear, except under direct, immediate supervision of a licensed hunter at least 18 years old. The bear is then counted against the licensed hunter's bag limit. (See youth hunting information. page 13.)

In Units 1-5, and in Unit 8, bears wounded by a hunter count toward the bag limit for the regulatory year, but do not count toward the every four regulatory year bag limit. "Wounded" means there is a sign of blood or other sign that the bear has been hit by a hunting projectile.

You may not transport or export any untanned bear hide or skull from Alaska until it has been sealed. All bear hides intended for sale must be sealed.

Evidence of sex

If you take a brown/grizzly bear anywhere in the state or a black bear in Units 1-7, 14A, 14C, 15-17, and 20B, evidence of sex (penis sheath or vaginal orifice) must remain attached to the hide or meat until sealing requirements have been met.

Salvage for brown/grizzly bears You must salvage the entire hide (with claws attached) and skull of a brown/grizzly bear unless it was taken in (and not removed from) one of the subsistence hunt areas under a subsistence registration permit (see the sealing officer within the time repage 25).

Salvage for black bears

Meat: In all areas of the state during Jan 1-May 31, edible meat must be salvaged and removed from the field. This meat may <u>not</u> be used for pet food or bait.

and Black River drainages, 21B, 21C, 21D, 24, and 25D, the edible meat of black bears, taken under customary and traditional use activities at a den site, must be salvaged.

The hide and skull may not be transported from the field until the edible meat has been salvaged.

Skull AND Hide or Skull AND Meat: In Units 1-7, 14A, 14C, 15-17, and 20B, the skull must be salvaged and removed from the field year round for sealing; during June 1-Dec 31, either the hide with claws attached (for sealing) or the meat must also be salvaged and removed from the field. If salvaging the meat, the hide and/or skull may not be transported from the field until the edible meat has been salvaged.

Hide or Meat: In Units 9-13, 14B, 18, 19, 20 (except 20B), and 21-26 during June 1-Dec 31, either the hide (with claws attached) or the meat must be salvaged and permanently marked by ADF&G. removed from the field.

(See definition of edible meat, page 34.)

Sealing requirements

All brown/grizzly bears must be sealed. Black bears taken in Units 1-7, 14A, 14C, 15-17, and 20B must be sealed. Sealing means taking the skull and hide (with claws and evidence of sex attached) of the bear you killed to an officially designated "sealing officer." The skull must be skinned from the hide and **both must be unfrozen**. Sealing must be completed within 30 days of kill, or less as required by permit conditions. During June 1-Dec 31, if the hide is not salvaged, only the skull will be sealed. The sealing officer asks questions about when, where, and how the bear was taken, measures the skull and may pull a small tooth or take other biological samples.

Then the officer locks a metal or plastic seal on the hide and on the skull. The seal must remain on the hide until the tanning process begins and on the skull unless it is cleaned for display.

Part of the sealing requirement is that you sign the sealing certificate. If you can't get your bear to a sealing officer in person, you must complete and sign a temporary sealing form available from the department. You must also make sure that someone takes the bear and the temporary certificate to quired.

If you are a nonresident and kill a brown/grizzly bear while on a guided hunt or while hunting with an Alaskalicensed resident relative within second-degree of kindred, both you and your guide or resident relative must In Units 19A, 19D upstream from the Selatna sign the sealing certificate or temporary sealing certificate.

> Special sealing requirements apply within the brown bear subsistence registration permit (see subsistence hunt areas on page 25).

> If you kill a brown/grizzly bear in Unit 8, you may not take the bear out of that unit until it has been sealed.

> Black bear hides and skulls may be sold after sealing. Black bear trophies may not be sold (see definition of trophy, page 35).

> Brown bear hides (with claws attached) and skulls from bears harvested in areas with a two brown bear bag limit per regulatory year may be sold after sealing; a permit is required. Hides and skulls will be

Important information regarding the use of motorized vehicles:

You may **not** drive, harass, herd, or molest a bear with any motorized vehicle, such as a snowmachine. While you may use a motorized vehicle to locate a bear, you may not use a motorized vehicle to pursue a bear that is fleeing. In addition, you may **not** use a motorized vehicle to drive a bear to another hunter. See page 18 for exceptions.

Brown/grizzly bear bag limits

Depending on where you hunt, brown/grizzly bear bag limits are either one bear every four regulatory years, one bear every regulatory year, or two bears every regulatory year. A regulatory year is July 1 through June 30. See the unit you intend to hunt for bag limit information.

One bear every four regulatory years

If you kill a bear in any "one bear every four regulatory years" area you may kill a bear in any "one bear every regulatory year" or "two bears every regulatory year" areas during the next regulatory year, but you **MAY NOT** kill a bear in any "one bear every four regulatory years" area for four regulatory years.

One bear every regulatory year

If you kill a bear in any "one bear every regulatory year" area, you may kill a bear in any legal area of the state during the next regulatory year.

Two bears every regulatory year

You may kill two bears in any "two bears every regulatory year" area. If you have already killed a bear in any other legal area of the state, you may kill one more bear in areas where the bag limit is "two bears every regulatory year" during the same regulatory year. You may kill a bear in any legal area of the state during the next regulatory year.

Brown/grizzly bear subsistence hunting

Resident hunting by subsistence registration permit for brown/grizzly bears used for food is allowed in Units 9B, all drainages in 9E that drain into the Pacific Ocean between Cape Kumlium and the border of 9E and 9D, 17, 18, that portion of 19A and 19B downstream of and including the Aniak River drainage, 21D, 22-24, and 26A. Hunters may hunt under an alternate set of regulations adopted to better allow subsistence use of brown bears. General brown bear hunting seasons remain in effect in these areas.

Registration subsistence hunts in Units 9B, 9E, 18, 19B, 21D, 22C, 22D, 22E, 24, and 26A, have a bag limit of one bear every regulatory year. Registration subsistence hunts in Units 17, 19A, 22A, 22B, and 23 have a bag limit of two bears every regulatory year. Taking a brown bear in one of these areas under a subsistence permit does not count in the "one bear every four regulatory years" bag limit restriction in other units.

Subsistence regulations versus general regulations within the brown bear subsistence areas:

Subsistence hunting

- · see units for bag limits
- meat must be salvaged for human consumption and may not be used as bait
- no locking-tag required but you must register to hunt
- hide and skull need not be sealed unless removed from subsistence area or presented for commercial tanning; if sealing is required, it must be completed by a designated sealing officer; at the time of sealing, the skin of the head and front claws are removed and kept by ADF&G
- no use of aircraft for subsistence hunting in Units 21D, 22, 23, 24, and 26A
 see units for season dates.

General hunting

- see units for bag limits
- · meat need not be salvaged
- \$25 locking-tag may be required for residents
- see units for seasons
- hide and skull must be sealed by a designated sealing officer

See unit pages (39-140) for information on where subsistence permits are available. For specific information on hunts listed in unit pages, please call the ADF&G office in or nearest the subsistence area where you want to hunt.

In units with a brown/grizzly bear bag limit of one bear every four regulatory years...

jour regulatory years		
last successful hunt was: n	ext opportunity to hunt is:	
fall '15 - spring '16	fall '19 - spring '20	
fall '16 - spring '17	fall '20 - spring '21	
fall '17 - spring '18	fall '21 - spring '22	
fall '18 - spring '19	fall '22 - spring '23	

Other bear regulations

Bears taken under a predator control permit do not count against the statewide bag limit for bears.

You MAY NOT take black or brown/grizzly bear cubs or sows accompanied by cubs; however, black bear cubs and sows accompanied by cubs may be taken by resident hunters Oct 15-Apr 30 under customary and traditional use activities at a den site in Unit 19A, that portion of Unit 19D in the Kuskokwim River drainage upstream from the Selatna and Black River drainages, Units 21B, 21C, 21D, 24, and 25D. In addition, black bear cubs and sows accompanied by cubs may be taken by resident hunters year-round in Unit 25D.

"Cub bear" means a brown/grizzly bear in the 1st or 2nd year of life, or a black bear (including cinnamon and blue color phases) in the 1st year of life.

You MAY NOT buy or sell any part of a brown/grizzly bear *EXCEPT*:

- an article of handicraft made from the fur of a bear;
- for brown/grizzly bears taken in brown bear control areas with a control permit, ADF&G will issue permits allowing permittees to sell untanned hides (with claws attached) and skulls, after sealing. See predator control supplement online;
- brown bear hides (with claws attached) and skulls from bears harvested in areas with a two brown bear bag limit per regulatory year may be sold after sealing; a permit from ADF&G is required. Hides and skulls will be permanently marked by ADF&G.

You <u>MAY NOT</u> hunt or kill brown/grizzly bears within one-half mile of garbage dumps or landfills.

You <u>MAY</u> use the carcass of a skinned brown/grizzly or a black bear taken June 1–Dec 31, as animal food or bait as long as the black bear hide was salvaged. (See *Use of Game*, page 17.)

If you take a brown/grizzly bear in a brown bear subsistence area under a registration permit for subsistence purposes, you are required to salvage all meat for human consumption; salvage of the hide or skull is optional.

If you wish to hunt black bears with dogs, you must first obtain a permit from the ADF&G office nearest the area you wish to hunt. You may not hunt brown/grizzly bears with dogs.

Bears killed in defense of life or property must be skinned and the hide (with claws and evidence of sex attached) and skull turned over to an ADF&G representative. (See *Emergency taking of game*, page 16.)

Brown/grizzly bears MAY NOT be taken over bait or scent lures EXCEPT under conditions of a bear baiting permit in Units 7, 11-13, 14A, 14B, 15, 16, 18, 19A, 19D, 20A, 20B, 20C, 20D north of the Tanana River, 20E, 20F, 21C, 21D, 23, 24C, 24D, and 25D.

Bear baiting seasons and requirements

Bear bait stations may be established in certain areas. All bait stations must be registered at ADF&G and all persons who wish to register a bait site must have successfully completed an ADF&G-approved bear baiting clinic. Clinics are available in person or online at http://www.adfg.alaska.gov/index.cfm?adfg=bearbaiting.main

Bait stations may be registered in person at an ADF&G office 15 days prior to the start of the season. Bait may not be placed at the site until the season is open.

TO REGISTER A BAIT STATION YOU MUST:

- · Be at least 18 years old.
- · Have successfully completed an ADF&G-approved bear baiting clinic.
- · Provide ADF&G with a specific description of the location where you will place bait.

You will be given a sign to post at your station. You may use this sign or make your own, but the sign must clearly identify the site as a "Bear Bait Station" and displays:

- 1) the bear bait permit number assigned by ADF&G, and
- 2) your hunting license number and hunting license numbers of others who hunt over that bait station.

You MAY:

- Place bait at only 2 bait stations at the same time. Only biodegradable materials may be used for bait. Scent lures may also be used. The skinned carcasses of furbearers, fur animals, unclassified game, and small game (other than birds) may be used as bait. If fish or big game is used, only the head, bones, guts, and skin may be used; however, in Units 7 and 15, fish or fish parts may not be used for bait.
- Other hunters may use, place bait at, or maintain your bait station with your written permission. Written permission must be carried in the field.
- In Units 6, 7, 9, 11-13, 14A, 14B, 15-17, 19-21, 24, and 25, a registered guide may operate up to 10 bait stations at a time in each guide use area that they are registered to operate in. A guide contract is required for each hunter.
- In Units 7, 9, 11-13, 14A, 14B, 15-21, 23-25, 26B, and 26C, black bears (and brown bears where allowed-see units listed below) may be taken at permitted bait stations the same day you have flown provided you are at least 300 feet from the airplane. This is NOT allowed on National Park Service lands.
- In Units 7, 11-13, 14A, 14B, 15, 16, 18, 19A, 19D, 20A, 20B, 20C, 20D north of the Tanana River, 20E, 20F, 21C, 21D, 23, 24C, 24D, and 25D brown/grizzly bears may be taken at bear bait stations. Hunters must comply with seasons, bag limits, salvage, and sealing requirements for brown/grizzly bears (registration permits and locking-tags may be required in some areas, contact ADF&G for details).

You MAY NOT:

- Set up a bait station within 1 mile of a:
 - ·house (including your own home),
 - ·school.
 - ·business,
 - ·developed recreational facility,
 - ·campground, or
 - permanent dwelling including seasonally-occupied cabins (including your own). Establishing bait stations within 1 mile of seasonally occupied cabins is allowed in some areas. (See page 27 for the list of places this is allowed.)

ADF&G may prohibit

bear baiting in local areas.

- Set up a bait station within one-quarter mile of:
 - ·a publicly maintained road or trail,
 - ·the Alaska Railroad.
 - the Unit 14 shorelines of the Susitna River and Little Susitna River south of the Parks Highway bridge; or
 - the Unit 7 or 15 shorelines of the Kenai River
 - (including Kenai Lake and Skilak Lake),
 - the Unit 15 shorelines of the Kasilof and Swanson rivers.
- Take money, bartered goods, or services from someone who uses your bait station. This does not apply to a registered guide-outfitter, master guideoutfitter or employee of the contracting guide for providing big game hunting services.
- Use another's bait station without their written permission. You must write your hunting license number on the permit at each site you intend to hunt over and written permission must be carried in the field.

Black bear salvage requirements

= Sealing required, skull must be salvaged

= Sealing not required

Units	Jan 1 - May 31 *Evidence of sex must remain naturally attached to the hide.	June 1 - Dec 31 *Evidence of sex must remain naturally attached to salvaged meat or hide.
1-7, 14A, 14C, 15-17, 20B	Meat, Hide*, Skull	Skull AND Meat* or Skull AND Hide*
9-13, 14B, 18-19, 20A, 20C, 20D, 20E, 20F, 21-26	Meat	Meat or Hide

Bowhunters wishing to hunt bears over bait in Units 7 and 14-16 are required to complete an IBEP or equivalent course, and must carry the certification card while hunting.

All bait, litter, and equipment must be removed from the bait site when hunting is completed. This includes all attractants. In this section, "equipment" means barrels, tree stands, game cameras, and other items associated with a bear bait station. Tree stands may be left in the field year-round with permission of the landowner or such other person authorized to give permission.

Areas Open for Bear Baiting	Dates
Units 1A, 1B, 1C*, 1D*, 2, 3, 5, 6A, 6B, 6C	Apr 15-June 15
Unit 6D*	Apr 15-June 10
Units 7*, 9, 11, 12, 13*, 14A*, 14B*, 14C remainder*, 15*, 18, 19, 20**, 21A, 21B, 21C, 21E, 23, 24, 25A, 25B, and 25C	Apr 15-June 30
Unit 16*	July 1-Oct 15 Apr 15-June 30
Unit 17	Apr 15-May 31
Unit 19D East Predation Control Area: those portions of the Kuskokwim River drainage within Unit 19D upstream from Selatna River drainage and the Black River drainage. Units 21D, 24C, 24D, and 25D	Aug 1-Sept 30 Apr 15-June 30

^{*}Bait MAY NOT be used and bait stations MAY NOT be registered in the following areas:

- Unit 1C, those portions within the City and Borough of Juneau.
- Unit 1D, that portion of the Chilkat Peninsula south of the Haines Hwy and within 1 mile of the Haines Hwy, Lutak Road, the Porcupine Mine road to the confluence of the Porcupine and Klehini rivers, and the Chilkat Lake road from the Porcupine Bridge to Chilkat Landing on the Tsirku River.
- Unit 6D, Blackstone Bay and Harriman Fiord.
- Unit 7, Resurrection Creek and tributaries and within one-quarter mile of the shoreline of the Kenai River (including Kenai Lake).
- Unit 13, within one-quarter mile of the Alyeska pipeline and pipeline access road from mile 75 of the Richardson Hwy (where the pipeline crosses the Tonsina River) north to the unit boundary at mile 227 of the Richardson Hwy (Black Rapids).
- Units 14A, 14B within one-quarter mile of the shoreline of the Susitna River, and Little Susitna River south of the Parks Hwy Bridge.
- Unit 14C remainder, the Glacier Creek drainage outside of Chugach State Park.
- Unit 15, within one-quarter mile of the shoreline of the Kenai River (including Skilak Lake), Kasilof River, and Swanson River.
- Units 13E and 16A in Denali State Park.

Bait <u>MAY</u> be used within 1 mile of seasonally occupied cabins, provided that the cabin is on the opposite side of the river from the bait site, in the following areas:

- 11 and 13, the Copper River north of Miles Lake.
- 16, the Beluga, Susitna, and McArthur rivers, the Deshka River (Kroto Creek) below its confluence with Trapper Creek, the Yentna River below its confluence with the Skwentna River, and Alexander Creek.

It is legal to take a wolf at a bear bait station during an open wolf hunting season, provided the hunter has a hunting license, and the following are not present at the bait site: chemicals, scent lures, human food, animal food, mineral supplements, or garbage. In addition, if game parts are used as bait, only those parts not required to be salvaged may be used. (See page 26 for game that may be used as bear bait.)

^{**}Chena State Recreation Area: additional hunting, shooting, and off-road vehicle use restrictions apply. Call DNR at (907) 451-2705 for specific information.

ENEW! Deer in Alaska

In response to concerns over mule and white-tailed deer entering Alaska, the Board of Game made it possible for hunters to harvest those deer in **Units 1, 5, 11-13, 20, and 25** (no closed season, no limit, any mule deer or any white-tailed deer). Hunters must contact the nearest ADF&G office prior to harvesting the deer, and must return the entire carcass, including the hide, to ADF&G. Providing the required specimens helps ADF&G learn more about these animals and conduct disease surveillance.

See page 4 for office contact information, or go online to http://hunt.alaska.gov.

More information on mule deer and white-tailed deer is available at http://alaska.gov/go/CE5V

Mule deer

Does: 110-165 lbs Bucks: 150-250 lbs

Distinguishing characteristics: bifurcated antlers - each beam forks (bucks), antlers are larger when compared to Sitka blacktailed deer, black tipped tail, and large, mule-like ears. Not

common in Alaska.

Photo Credits: Brent Stettler, Utah Division of Wildlife Resources

White-tailed deer

Does: 100-160 lbs Bucks: 150-225 lbs

Distinguishing characteristics: antlers that have one main beam with individual tines growing off of it (bucks), outside of tail is brown, and underside of tail is bright white and visible when nervous or fleeing. Not common in Alaska.

Photo Credit: National Park Service

Sitka black-tailed deer

Does: 80 lbs Bucks: 120-200 lbs

Distinguishing characteristics: bifurcated antlers - each beam forks (bucks), antlers are smaller when compared to mule deer, outside of tail is entirely black or dark brown, and the face is dark.

Common in Southeast Alaska, Prince William Sound, and Kodiak.

Identifying a legal caribou

In all hunts limited to one sex, evidence of sex must remain naturally attached to the meat.

penis sheath, peeing forward = bull caribou

Bull

- 1. The best method to identify bulls is to determine the presence of a penis sheath. On young bulls (1- to 3-years-old) the sex organs are less apparent. The white rump patch is narrower on bulls than cows.
- 2. Antlers are well developed (3+ feet) in mature bulls. Young bulls typically have smaller antlers with relatively small brow tine/shovel development, and often cannot be distinguished from a cow using antler development alone.
- 3. Bull caribou have antlers from May through part of the winter. The oldest bulls drop antlers first, sometimes as early as November, while young bulls (yearlings and 2-year-olds) may not drop their antlers until April.

vulva patch, peeing backward = cow caribou

Cow

- 1. The vaginal opening (the lower and larger of two dark oval areas) is apparent when viewed carefully from the rear. The white rump patch is wider on cows than bulls.
- 2. The antlers of cows are smaller than those of most bulls, with the exception of many yearling bulls and a small percentage of 2-year-old bulls.
- 3. Most cow caribou have antlers from June through April of the following year.

Cows and young bulls may look alike when their tails are down.

Special meat salvage requirements:

Edible meat must be salvaged. In addition, caribou taken before October 1 in Units 9B, 13, 17, 18, those portions of 19A within the Holitna/Hoholitna Controlled Use Area, 19B, 21A, 23, 24, and 25A the edible meat of the front quarters and hindquarters must remain naturally attached to the bone until the meat has been transported from the field or is processed for human consumption. In addition to the edible meat of the front quarters and hindquarters, in Units 13, 23, 24, and 25A the edible meat of the ribs must remain naturally attached to the bone until the meat has been transported from the field or is processed for human consumption. (See page 22.) Additional salvage requirements for Copper Basin Community Subsistence Harvest hunts exist, see the CSH hunt conditions online at http://hunt.alaska.gov.

Caribou Hunters:

Know Your Targets! Be sure to check out the new caribou identification guide online at:

http://www.adfg.alaska.gov/index.cfm?adfg=caribouhunting.resources

Identifying a legal moose in antler restricted hunts

In many units, regulations restrict the harvest of bull moose to a specific antler size or configuration. The accompanying illustrations provide general assistance to hunters in field identification of moose antler size and configuration. It must be emphasized that moose antlers vary considerably. Each hunter is responsible for determining if a moose is legal before attempting to take it.

Legal bull moose in areas with a 50-inch antler OR number of brow tines restriction:

Antler restrictions are defined by both an antler spread and a brow 50-inch antlers means the antlers of a bull moose with a spread of tine restriction. The brow tine portion of the 50-inch antler restriction is intended to help verify a legal moose if the hunter is center line of the skull. uncertain about antler spread. If uncertain about the antler spread, count brow tines. If uncertain about the number of brow tines, don't shoot!

50 inches or more measured in a straight line perpendicular to the

In some areas of the state, bulls with antlers less than 50 inches wide are legal if they have at least 3 brow tines on EITHER side. In other areas, bulls with antlers less than 50 inches wide must have at least 4 brow tines on EITHER side to be legal. Be sure to check the regulations for the brow tine minimum requirement in the area you are hunting.

However, if the antlers are 50 or more inches wide, it doesn't matter how many brow tines are present, the moose is legal. Likewise, if the moose has the required number of brow tines, it is legal regardless of the antler spread.

To accurately identify and count brow tines, bulls must be viewed from the front; viewing from the side runs a risk of counting main palm points as brow tines. Distinguishing legal brow tines can be difficult. Brow tines emerge from the brow palm or near the base of the antler and typically project forward.

Antlers must be salvaged where there are antler restrictions; such antlers must remain naturally attached to the unbroken or uncut skull plate if the required number of brow tines are not present.

If antlers must be salvaged, they may not be altered prior to completion of all salvage requirements. In Units 7 and 15, antlers are required to be sealed in Homer, Soldotna, or Anchorage ADF&G offices within ten days of take. Wildlife trooper offices on the Kenai Peninsula can also seal antlers by appointment.

A point or tine is an antler projection at least one inch long, and longer than it is wide, with the width measured one inch or more from the tip; an antler point or tine originating within 2 inches from the base, and less than 3 inches in length will not be counted as a brow tine or point.

The use of electronic calls for moose hunting is prohibited.

"Spike" means antlers of a bull moose with only one tine on at least one side; male calves are not spike bulls.

Legal bull moose in areas with a spike restriction (only in Units 7 and 15)

A spike-fork bull is legal if it has one antler on either side that is a SPIKE (1 point) or a FORK (2 points). The antler on the other side can be any configuration. Males calves are not considered spike bulls. Bulls with palmated antlers (paddles) seldom are legal under the "spike or fork" requirement.

A spike bull is legal if it has one antler on either side that is a SPIKE (1 point). The antler on the other side can be any configuration. Bulls with palmated antlers (paddles) seldom are legal under the "spike" requirement.

In Units 7 and 15, hunters must successfully complete the Moose Hunter Orientation prior to hunting moose. The orientation is available online at http://hunt.alaska.gov, see page 88 for more details.

"Fork" means antlers of a bull moose with only two tines on at least one antler.

Some male calves have a small amount of antler growth covered with hair and skin. These are still calves and are not legal in a spike, spike-fork, or antlered bull hunt. Male calves are only legal in antlerless, any moose, or any bull hunts that do not specifically prohibit the taking of calves.

If antlers must be salvaged, they may not be altered prior to completion of all salvage requirements. A damaged, broken or altered antler is not considered a spike-fork antler in Units 1B. that portion of 1C south of Point Hobart, including all Port Houghton drainages, and 3.

Special meat salvage requirements:

Moose taken before October 1 in Units 9B, 13, 17, 18, those portions of 19A within the Holitna/Hoholitna Controlled Use Area, 19B, 21, and 23-25, the edible meat of the front quarters and hindquarters must remain naturally attached to the bone until the meat has been transported from the field or is processed for human consumption, and in Units 13, 21, 23, 24, and 25, the edible meat of the ribs also must remain naturally attached to the bone. (See page 22.)

Additional salvage requirements for Copper Basin Community Subsistence Harvest hunts exist, see the CSH hunt conditions online at http://hunt.alaska.gov.

To better understand the spike-fork 50-inch antler restriction, check out the DVD 'Is This Moose Legal?' at your nearest ADF&G office or online: www.legalmoose.adfg.alaska.gov

For some hunts, viewing of this video is required prior to hunting.

2-year-old bulls in spring

2-year-old bull in spring (left)
3-year-old bull in spring (right)

3-year-old bull develops large horn boss by fall

Bull muskox horn characteristics:

 Young bulls have larger horn mass than cows, but incomplete growth of a horn boss.

(Figs. 1 & 2)

- By fall, 3-year-old bulls have a thin, but developed horn boss.
 (Fig. 3)
- Mature bulls (4-years-old and older) develop a thick horn boss at the base of each horn. (Fig. 4)
- All bulls have horns that are thicker and more massive than cows.
 (Figs. 4 & 5)
- Black horn tips can be found on bulls.

Cow muskox horn characteristics:

- Cows do not have a horn boss at any age. Mature cows (4-years-old and older) have horn bases that are small, dark, and visible. (Fig. 5)
- Cow horn diameter is smaller and less massive than bulls.
 From a distance, the length of the hook may be similar to bull horns.
- Young cows have incomplete growth of horn bases and considerable white hair between the horns.
- Black horn tips can be found on cows.

How many animals do you see in Fig. 6?

- Know what is behind your target before you shoot.
- Muskox cluster together as herd animals making separate individuals hard to see.
- Calves, yearlings, and 2-year-olds often stand behind larger animals for protection.
- Take your time! The group will eventually disperse giving you a clear shot.

Identifying a legal ram

Figure 2 - Ram with both horns broken

Figure 3 - Annual horn rings

There is a youth hunt for hunters age 10-17 in all areas open to sheep hunting by general season harvest ticket. Basic Hunter Education is required. The animal harvested counts as the bag limit of both the youth and the accompanying resident adult. See "youth hunt" definition on page 35.

A legal ram under a full-curl regulation is:

- A full-curl ram, whose tip of at least one horn has grown through 360° of a circle described by the outer surface of the horn, as viewed from the side (Figure 1).
- A ram with the tips of both horns broken which means the lamb tip is completely absent. Horn tips that are chipped or cracked are not considered broken if any portion of the lamb tip is present (Figure 2).

Lamb tip characteristics:

- · a length of less than four inches;
- the inside surface of the lamb tip is distinctly concave when compared to the remainder of the horn;
- the lamb tip is the section of a horn that is grown during the first six months of a sheep's life and is the section of horn distal of the first annulus, which is the swelling of the horn that forms during the first winter of life.
- A ram at least 8 years old as determined by counting annual horn rings and segments (Figure 3). If a ram's horns are not legal based on degree of curl or broken tips, you are responsible for counting at least 8 true annuli before attempting to take the ram. It is difficult and ill-advised to age a ram in the field by only counting horn rings because of false annuli and narrow horn segments on older rams.

A legal ram under an any ram hunt is: Any ram. It can be difficult to tell the difference between ewes and young rams. For more tips on judging legal sheep visit: http://hunt.alaska.gov

Ram horn sealing requirements:

Horns from rams harvested in areas where sealing is required must be **permanently** sealed prior to exporting from Alaska; it is illegal to transport sheep horns outside the state before sealing. **The horns, along with the harvest or permit report, must be presented to an ADF&G representative for sealing** within 30 days of the date of kill, or sooner if permit or harvest ticket requires. Horns must be attached to the skull plate for sealing purposes. If the hunter is unable to present horns in person for sealing, another individual must provide the hunter's completed harvest report with horns at the time of sealing.

NOTE: Sheep sealing is available at most ADF&G offices Monday through Friday, except holidays. Sheep sealing is not available anywhere in Arctic or Western Alaska (except Kotzebue), so plan accordingly.

In areas where sheep horns must be sealed, they may not be altered prior to sealing.

From Aug 10-Sept 20, aircraft may only be used by and for sheep hunters to place and remove hunters and camps, maintain existing camps, and salvage harvested sheep. A person may not use or employ an aircraft to locate sheep or direct hunters to sheep during the open sheep hunting season. This prohibition does not prohibit any flight maneuvers that are necessary to make an informed and safe landing in the field.

More information on sheep, including the 'Dall Sheep Hunting Full-Curl Identification Guide', is available at http://www.adfg.alaska.gov/index.cfm?adfg=sheephunting.resources

Definitions

airport - an airport listed in the Federal Aviation Agency Alaska Airman's Guide and Chart Supplement.

antler - the annually cast and regenerated bony growth originating from the pedicle portion of the skull in members of the deer family.

antlerless - the absence of antlers.

ATV (all-terrain vehicle) - a motorized tracked vehicle, or a vehicle with four or more wheels operated on land weighing less than 1,000 pounds dry weight, except for snowmachines.

bag limit - the maximum number of animals of any one game species a person may take in the unit or portion of a unit in which the taking occurs. Animals disturbed in the course of legal hunting do not count toward the bag limit.

bait - any material, excluding scent lures, placed to attract an animal by its sense of smell or taste; bait does not include those parts of legally taken animals that are not required to be salvaged as edible meat if the parts are not moved from the kill site.

big game - black bear, brown/grizzly bear, bison, caribou, Sitka black-tailed deer, elk, mountain goat, moose, muskox, Dall sheep, wolf, and wolverine.

boat - a vehicle, vessel, or watercraft operated in or on water deep enough to float it at rest; includes hovercraft, airboats, personal watercraft, and amphibious vehicles.

bow - see page 20.

brow tine - is a tine emerging from the first branch or brow palm on the main beam of a moose antler; the brow palm is separated from the main palm by a wide bay; a tine originating in or after this bay is not a brow tine an antler point or tine originating within 2 inches from the base, and less than 3 inches in length, will not be counted as a brow tine; see pages 30-31.

brown bear - Ursus arctos, including grizzly bears; the terms brown bear and grizzly bear are synonymous.

buck - a male deer.

bull moose - a male moose.

calf - a moose, caribou, elk, muskox, or bison less than 12 months old.

crossbow - a shoulder-mounted bow. mounted on a stock, which mechanically holds the string at partial or full draw, that shoots projectiles which are generally called bolts or quarrels.

cub bear - a brown/grizzly bear in 1st or 2nd year of life, or a black bear (including the cinnamon and blue color phases) in the 1st year of life.

dire emergency - a situation in which a person:

- (A) is in a remote area;
- (B) is involuntarily experiencing an absence of food required to sustain
- (C) will be unable to perform the functions necessary for survival, leading to high risk of death or serious and permanent health problems, if wild game food is not immediately taken and consumed; and
- (D) cannot expect to obtain other food sources in time to avoid the consequences described in (C) above.

domestic mammals - muskox, bison, elk, and reindeer, if lawfully owned.

domicile - the true and permanent home of a person from which the person has no present intention of moving and to which the person intends to return when the person is away.

drainage - the area of land drained by a creek, stream, or river unless further defined in regulation.

Drawing permit - a permit issued to a limited number of people selected by means of a lottery held for all people submitting valid applications for such permits and who agree to abide by the conditions specified for each hunt.

edible meat - big game (except bear): the meat of the ribs, neck, brisket, front quarters as far as the distal joint of the radius-ulna (knee), hindquarters as far as the distal joint of the tibia-fibula (hock), and the meat along the backbone between the front and hindquarters;

bear: the meat of the front quarters and hindquarters and meat along the backbone (backstrap);

small game birds (except cranes, geese, and swan): the meat of the breast:

cranes, geese, and swan: the meat of the breast, back, meat of the femur and tibia-fibula (legs and thighs), and meat of the wings excluding the meta-

However, edible meat of big game or small game birds does not include: meat of the head, meat that has been damaged and made inedible by the method of taking; bones, sinew, and incidental meat reasonably lost as a result of boning or a close trimming of the bones; or viscera.

field - an area outside of established year-round dwellings, businesses, or other developments usually associated with a city, town, or village; "field" does not include permanent hotels or roadhouses on the state road system or state or federally maintained airports.

front quarter - the front leg and shoulder, including the scapula, as far as the distal joint of the radius-ulna.

full-curl horn - see page 33.

fur animal - beaver, covote, Arctic fox, red fox, lynx, squirrel, that has not been domestically raised; fur animal is a classification of animals subject to taking with a hunting license.

furbearer - beaver, black bear, coyote, fisher, Arctic fox, red fox, lynx, marten, mink, weasel, muskrat, river otter, squirrel, marmot, wolf, or wolverine; furbearer is a classification of animals subject to taking with a trapping license.

game - any species of bird, reptile, or mammal, including a feral domestic animal, found or introduced in the state, except domestic birds and mammals; game may be classified by regulation as big game, small game, furbearers or other categories.

grizzly bear - the terms brown bear and grizzly bear are synonymous.

handicraft - a finished product in which the shape or appearance of the natural material has been substantially changed by skillful use of hands, such as sewing, carving, etching, scrimshawing, painting, or other means and which has substantially greater monetary and aesthetic value than the unaltered natural material alone.

harass - to repeatedly approach an animal in a manner which results in the animal altering its behavior.

hide - see skin.

highway - the driveable surface of any constructed road.

hindquarter - means the hind leg, excluding the pelvis, as far as the distal joint *of the tibia-fibula (hock).*

household - that group of people domiciled in the same residence.

hunting area - that portion of a game management unit where a season and a bag limit for a species are set.

inboard motor - any motor located within the confines of the boat.

Continued...

Definitions (continued)

meat-on-bone - meat remains naturally attached to the bone. Requirements vary by area or type of hunt. Check specific hunt requirements.

moose antler - see pages 30-31.

motorized land vehicle - any motorized vehicle operated on land; includes hovercraft and airboats.

muzzleloader - see page 20.

naturally shed antler - any portion of an antler which has the base (burr) intact and has not been physically removed by cutting, sawing, or breaking from the skull.

nonresident - a person who is not a resident of Alaska.

nonresident alien - a person who is neither a citizen nor a permanent resident of the United States.

peace officer - a police officer of the state or a person authorized by the Commissioner of Fish and Game.

permit hunt - a hunt for which permits are issued on a drawing, registration, targeted, or Tier II hunt basis.

processed for human consumption - prepared for immediate consumption or prepared in such a manner, and in an existing state of preservation, as to be fit for human consumption after a 15-day period.

Registration permit - a hunting permit issued to a person who agrees to the conditions specified for each hunt; permits are issued in the order applications are received, and are issued:

(A) beginning on a date announced by the department and continuing throughout the season, or until the season is closed by emergency order when a harvest quota is reached;

(B) beginning on a date announced by the department and continuing until a predetermined number of permits have been issued.

regulatory year - July 1 through June 30 of the following calendar year.

resident -

• a person (including an alien) who is physically present in Alaska with the intent to remain indefinitely and make a home here, has maintained that person's domicile in Alaska for the 12 consecutive months immediately preceding application for a license, and is not claiming residency or obtaining benefits under a claim of residency in another state, territory, or country; or • a member of the military service or U.S. Coast Guard who has been stationed in Alaska for the 12 consecutive months immediately preceding this application for a license; or

 a dependent of a resident member of the military service or U.S. Coast Guard who has lived in Alaska for the 12 consecutive months immediately preceding this application for a license; or

• a person who does not otherwise qualify as a resident may not qualify by virtue of an interest in an Alaska business.

salvage - to transport the edible meat, heart, liver, kidneys, head, skull or hide, as required by statute or regulation, of a game animal or small game bird to the location where the edible meat, heart, liver, or kidneys will be consumed by humans or processed for human consumption in a manner which saves or prevents the edible meat from waste, and the head, skull or hide will be put to human use.

sealing - the placement of an official marker or seal by an authorized representative of the ADF&G on an animal hide and/or skull, and may include:

(A) collecting and recording biological information concerning the conditions under which the animal was taken; (B) measuring the specimen submitted for sealing;

(C) retaining specific portions of the animal for biological information such as a pre-molar tooth from a bear.

second-degree of kindred - a father, mother, brother, sister, son, daughter, spouse, grandparent, grandchild, brother-or sister-in-law, son- or daughter-in-law, father- or mother-in-law, stepfather, stepmother, stepsister, stepbrother, stepson, or stepdaughter.

skin, hide, and pelt - are all the same, and mean any untanned external covering of any game animal's body; but do not include a handicraft or other finished product; skin, hide, or pelt of a bear means the entire external covering with claws attached.

small game - all species of grouse, hares, ptarmigan, waterfowl, cranes, and snipe.

snowmachine - a motor vehicle of 850 pounds or less gross vehicle weight, primarily designed to travel over snow, and supported, in part by skis, belts, or tracks; snowmachine and snowmobile are synonymous.

take - taking, pursuing, hunting, fishing, trapping, or in any manner disturbing, capturing, or killing or attempting to take, pursue, hunt, fish, trap, or in any manner capture or kill fish or game.

Targeted permit - a permit issued on short notice and a lottery basis to an applicant who has previously registered and is willing to participate in a hunt under short notice.

Tier I - when the board has identified a game population that is customarily and traditionally used for subsistence and where it is anticipated that a reasonable opportunity can be provided to all residents who desire to engage in that subsistence use.

Tier II - when the board has identified a game population that is customarily and traditionally used for subsistence and where, even after non-subsistence uses are eliminated, it is anticipated that a reasonable opportunity to engage in the subsistence use cannot be provided to all eligible residents.

tine or point - see page 31.

transport - shipping, carrying, importing, exporting, or receiving or delivering for shipment, carriage, or export.

trophy - a mount of a big game animal, including the skin of the head (cape) or the entire skin, in a lifelike representation of the animal; trophy also includes a "European mount" in which the horns or antlers and the skull or a portion of the skull is mounted for display.

unclassified game - all species of game not otherwise classified in these definitions.

unit - one of the 26 geographical areas listed under Game Management Units in the codified hunting and trapping regulations and the game unit maps of Alaska.

wireless communication - electronic communication of any form that is transmitted through the air without requiring any cable or wires between two or more devices.

year - calendar year unless another year is specified.

youth hunt - a hunt limited to a child aged 10–17 and an accompanying adult that is a licensed resident hunter 21 years of age or older. If the child is a nonresident, the accompanying adult must be a resident parent, stepparent, or legal guardian of the child. For big game, the bag limit counts against both the youth and the accompanying adult.

Note: Some of these definitions appear elsewhere in this book, where they are most needed for reference. The form shown in other parts of the book may be slightly different to help the reader better understand the intent of the language.

Common violations

Below are some common violations hunters should be aware of:

- -Leaving the kill site for any reason without first validating your harvest ticket or permit (see *Harvest tickets*, page 14 and *Permits*, page 15).
- -Failing to salvage all meat of big game animals (except wolves and wolverines) and small game birds for human consumption. Some restrictions apply to bears taken at certain times of the year in specific areas. If you don't want all of the meat, contact someone in the nearest community and offer them the meat. You may legally transfer the meat to another person (see *Salvage*, page 22, *Transfer of Possession*, page 21, and *Definitions: edible meat*, page 34).
- -Failing to leave evidence of sex naturally attached to the meat when the hunt is restricted to one sex. Antlers are not proof of sex, except for deer when the antlers are naturally attached to an entire carcass. Horns are proof of sex for Dall sheep; both horns must be salvaged. In most units, the evidence of sex must remain naturally attached to the hide of bears (see *Evidence of Sex*, page 22).
- -Transporting antlers or horns to the departure point from the field (landing strip, trail head, road, river, etc.) before bringing out the meat. Antlers or horns may be transported simultaneously with the last load of meat (see *Transporting requirements*, page 21).
- -Leaving any part of a harvested animal on a public road or right-of-way is littering and is illegal. Leave guts, hides, etc., in the field and out of sight of roads and trails.

Illegal take of game

Every hunter is responsible for taking legal game. Sometimes, mistakes happen and the animal harvested is not legal. When this happens, the hunter is subject to criminal penalties. What is the best thing a hunter can do if this happens?

Under hunting and trapping regulations in Alaska, there is no law that requires a person to self-report their unlawful take of game. Ethical hunters will obligate themselves to take ownership of the mistake and self-report to authorities, but they may not know the best steps to proceed.

Each year, self-reporting of violations accounts for some wildlife cases where animals have been taken unlawfully. By reporting yourself to Alaska Wildlife Troopers you maintain high ethical standards and will be treated differently than if your actions were discovered through investigations by authorities.

Follow these steps if you have taken game illegally:

- 1. Immediately validate your harvest ticket or permit for the appropriate species.
- 2. As soon as possible after taking illegal game, contact your local Alaska Wildlife Troopers office (see page 4 for a list of office locations and phone numbers). Advise them of your situation and your location.
- 3. After harvesting an animal, you must comply with salvage requirements for that species. The Alaska Wildlife Troopers will tell you where to take the animal.
- 4. Keep the meat in the best condition possible. This may mean you will need to come out of the field to prevent spoilage.

After self-reporting your violation, you can expect an Alaska Wildlife Trooper will speak to you about your hunt and taking of game. Any salvaged meat, hide, antlers, or horns will be seized. According to Alaska law, animals taken unlawfully are the property of the state. The meat is usually donated to a charitable organization but may be retained as evidence. Hides, horns, or antlers will be retained by Alaska Wildlife Troopers until instructed by the court. You will likely receive a citation for taking the animal illegally; however you will receive a substantially lower fine and other potential leniency compared to not self-reporting. In most situations, Alaska Wildlife Troopers will recommend that fines be consistent with self-reporting in other areas of the state and that the illegal take be resolved as a "violation" instead of a "criminal" offence.

Hunters who do not self-report their error risk being discovered by Alaska Wildlife Troopers in the future. Carefully consider your actions after you take an animal unlawfully in Alaska. Your next decision can determine the consequences of your actions.

Game Management Units

About the Unit maps on the following pages:

This Game Management Units map of Alaska and the individual unit maps found throughout the following section on seasons and bag limits are included to help you determine the area in which a regulation applies. These maps are not intended to reflect exact unit or restricted area boundaries. For exact boundaries, please refer to the written description at the beginning of each unit, and consult a large-scale topographical map of the area. Not all roads, streams, and geographical features are illustrated because of the small scale. Hunters are advised that additional restrictions may be imposed by the land owner. See page 4 for phone numbers of ADF&G offices in the communities noted on these maps.

effective July 1, 2019 through June 30, 2020 Additionally, registration permits have specific pickup locations and dates they are available, as shown here. A red star indicates that federal restrictions exist, check federal regulations. Hunt types are also noted at the bottom of each unit page.

its 14A -14B Matanuska-Susitna Valley

Unit 14: Drainages into the north side of Turnagain Arm west of and excluding the Portage Creek drainage, drainages into Knik Arm excluding drainages of the Chickaloon and Matanuska rivers in Unit 13, drainages into the north side of Cook Inlet east of the Susitna River, drainages into the east bank of the Susitna River downstream from the Talkeetna River, and drainages into the south and west bank of the Talkeetna River to its confluence with Clear Creek, the westside drainages of a line going up the south bank of Clear Creek to the first unnamed creek on the south, then up that unnamed creek to lake 4408, along the northeast shore of lake 4408, then southeast in a straight line to the northernmost fork of the Chickaloon River, and all seaward waters and lands within three (3) miles of these coastlines;

Unit 14A: drainages in Unit 14 bounded on the west beginning at the Matanuska-Susitna Borough boundary along longitude line 150°30'00" to the mouth of the Susitna River, then north along the east bank of the Susitna River, on the north by the north bank of Willow Creek and Peters Creek to its headwaters, then east along the hydrologic divide separating the Susitna River and Knik Arm drainages to the outlet creek at lake 4408, on the east by the eastern boundary of Unit 14, and on the south by Cook Inlet, Knik Arm, and the Matanuska-Susitna Borough boundary to the Glenn Highway bridge, then to the south bank of Knik Arm, then to the south bank of the Knik River from its mouth to its junction with Knik Glacier, across the face of Knik Glacier and along the north side of Knik Glacier to the Unit 6 boundary;

Unit 14B: that portion of Unit 14 north of Unit 14A

See map page 79 for state restricted areas in Units 14A &14B.

Additional Refuge and Habitat areas in Unit 14A and B:

2 Susitna Flats Game Refuge: has restrictions regarding use of motorized vehicles and aircraft (for details, see refuge General Permit requirements at http://refuges.adfg.alaska.gov or call (907) 861-3200, (907) 861-2112): a) Refuge Lands: the use off-road vehicles are prohibited except that those weighing less than 1,000 lbs. GVW (including ATVs and snow machines) may be used on refuge lands Nov 9 - Mar 31 provided there is at least a 12inch snow cover and sufficient ground frost to prevent penetration of or disturbance to the soil surface or plant roots. If operating on frozen waterways the ice cover must be of sufficient thickness to support the weight-bearing load of the off-road vehicle. If operating on the Enstar Gas Pipeline right-ofway, or the marked trails to Figure Eight Lake or Flat Horn Lake, the 12-inch snow cover requirement is waived but there must be sufficient ground frost to prevent penetration of or disturbance to the soil surface or plant roots. b) Aircraft: Landing is prohibited Apr 1 - May 15 in the High Density Spring Waterfowl Staging Area (defined roughly as the coastal marsh seaward of the forested bluff edge).

Goose Bay State Game Refuge: the use of off-road vehicles (including snow machines and ATVs) is prohibited except that the use of vehicles off-road weighing less than 1,000 lbs GVW can be used on all refuge lands from Nov 9 – Mar 31 only when there is at least a 12-inch snow cover and sufficient ground frost to prevent penetration of or disturbance to the soil surface or plant roots. If operating on frozen waterways the ice cover must be of sufficient thickness to support the weight-bearing load of the off-road vehicle. For details, see refuge General Permit requirements at http://refuges.adfg.alaska.gov or call (907) 861-3200, (907) 861-2112.

Willow Mountain Critical Habitat Area: the use of off-road vehicles (including snow machines and ATVs) is prohibited except that the use of vehicles off-road weighing less than 1,000 lbs GVW can be used a) year-round on designated trail, and b) on all refuge lands from Dec 1 – Mar 31 only when there is at least a 12-inch snow cover and sufficient ground frost to prevent penetration of or disturbance to the soil surface or plant roots. If operating on frozen waterways the ice cover must be of sufficient thickness to support the weight-bearing load of the off-road vehicle. For details, see refuge General Permit requirements at http://refuges.adfg.alaska.gov or call (907) 861-3200, (907) 861-2112.

**Orientation Requirement for NONRESIDENT Moose Hunters in Unit 17A and 17B

A nonresident hunter must have viewed the hunter orientation materials: "Is This Moose Legal" video and the "Field Care of Big Game" video prior to hunting or must be accompanied in the field by an Alaska-licensed guide or resident family member within the second-degree of kindred. Videos are available at http://www.adfg.alaska.gov/index.cfm?adfg=moosehunting.resources or at ADF&G offices. You may print the certification card online, or contact ADF&G at (907) 842-2334 to obtain your certification card.

Orientation Requirement for NONRESIDENT Moose Hunters in Unit 19B

A nonresident hunter must have viewed the hunter orientation materials: "Is This Moose Legal" video and the "Field Care of Big Game" video prior to hunting or must be accompanied in the field by an Alaska licensed guide or resident family member within the second-degree of kindred. Videos are available at http://www.adfg.alaska.gov/index.cfm?adfg=moosehunting.resources or at ADF&G offices. You may print the certification card online, or contact ADF&G at (907) 459-7206 to obtain your certification card.

Unit 20 Fairbanks-Central Tanana

Unit 20: The Yukon River drainage upstream from and including the Tozitna River drainage to and including the Hamlin Creek drainage, drainages into the south bank of the Yukon River upstream from and including the Charley River drainage, the Ladue River and Fortymile River drainages, and the Tanana River drainage north of Unit 13 and downstream from the east bank of the Robertson River;

Unit 20A: that portion of Unit 20 bounded on the south by the Unit 13 boundary, bounded on the east by the west bank of the Delta River, bounded on the north by the north bank of the Tanana River from its confluence with the Delta River downstream to its confluence with the Nenana River, and bounded on the west by the east bank of the Nenana River;

Unit 20B: drainages into the north bank of Tanana River from and including Hot Springs Slough upstream to and including Banner Creek drainage; **Unit 20C:** that portion of Unit 20 bounded on the east by the east bank of the Nenana River and on the north by the north bank of the Tanana River downstream from the Nenana River;

Unit 20D: that portion of Unit 20 bounded on the east by the east bank of Robertson River and on the west by the west bank of Delta River, and drainages into the north bank of the Tanana River from its confluence with the Robertson River downstream to, but excluding, the Banner Creek drainage; Unit 20E: drainages into the south bank of the Yukon River upstream from and including Charley River drainage and the Ladue River drainage; Unit 20F: the remainder of Unit 20.

Army impact areas permanently closed, call (907) 361-9686 for information. Unexploded ordnance may be present in portions of Unit 20A, 20B, and 20D. More information is available at https://usartrak.isportsman.net/

State restricted areas in Unit 20 (see corresponding numbers on map, page 104):

- 1 Dalton Highway Corridor Management Area (DHCMA) -Units 20, 24, 25, and 26 extending five miles from each side of the Dalton Highway, including the drivable surface of the Dalton Highway, from the Yukon River to the Arctic Ocean, and including the Prudhoe Bay Closed Area. The area within the Prudhoe Bay Closed Area is closed to the taking of big game; the remainder of the DHCMA is closed to hunting; however, big game, small game, and fur animals may be taken in the area by bow and arrow only, and small game may be taken by falconry. Aircraft and boats may be used to transport hunters, their gear, or parts of game within the DHCMA. A snowmachine may be used to transport hunters, their hunting gear, or parts of game across the management area from land outside the management area to access land on the other side of the management area. **No** motorized land vehicle may be used to transport hunters, their hunting gear, or parts of game, within the DHCMA, **EXCEPT** licensed highway vehicles may be used on the following designated roads: 1) Dalton Highway; 2) Bettles Winter Trail during periods when BLM and the City of Bettles announce that the trail is open to winter travel; 3) Galbraith Lake road from the Dalton Highway to the BLM campground at Galbraith Lake, including the gravel pit access road when the gate is open; 4) Toolik Lake Road, excluding the driveway to the Toolik Lake Research Facility; 5) The Sagavanirktok River access road two miles north of Pump Station 2; 6) any constructed roadway or gravel pit within 1/4 mile of the Dalton Highway. Any hunter traveling on the Dalton Highway must stop at any check station operated by the department within the DHCMA.
- 2 Minto Flats Management Area Unit 20B bounded by Elliott Highway beginning at Mile 118, then northeasterly to mile 96, then east to the Tolovana Hotsprings Dome, then east to the Winter Cat Trail, then along the Cat Trail south to the Old Telegraph Trail at Dunbar, then westerly along the trail to a point where it joins the Tanana River three miles upstream from Old Minto, then along the north bank of the Tanana River (including all channels and sloughs except Swan Neck Slough*), to the confluence of the Tanana and Tolovana Rivers and then northerly to the point of beginning. (*Note: The area between Swan Neck Slough and the Tanana River is within the Minto Flats Management Area.) Aircraft or airboats may not be used for moose hunting or to transport moose, moose hunters or moose hunting equipment within the Management Area.
- 3 Minto Flats State Game Refuge Use of four-wheelers and other wheeled/tracked vehicles is generally prohibited within the refuge. Individuals with private inholdings may be permitted to use vehicles on authorized routes only for access to and from inholdings. However, a General (public) Permit has been issued authorizing the 'non-winter' use of fully-tracked vehicles with a curb weight of 1,500 pounds or less and a ground contact pressure rating of 2.0 pounds per square inch or less on limited portions of the refuge (described in the permit) from May 1 through October 14. The 'winter' use of tracked or wheeled (non-highway) vehicles is authorized refuge-wide from October 15 through April 30, provided there is sufficient snow cover, ground frost, and frozen water surfaces to prevent penetration of, or disturbance to, the soil surface, vegetation root system, and water quality. This is only a synopsis of the general permit. To view the refuge management plan, refuge map, and the general permit for a description of the refuge boundary and additional permit restrictions and authorizations visit our Conservation Areas website at http://www.adfg.alaska. gov/index.cfm?adfg=mintoflats.main.To view a finer scale map of the refuge boundary visit our Fish Resource Monitor GIS website http://extra.sf.adfg.state.ak.us/FishResourceMonitor/. further information on the refuge or other Special Areas contact the ADF&G, Division of Habitat, Fairbanks office (907) 459-7280.
- 4 Lost Lake (Mile 306.1 Richardson Highway) Closed Area the area within 1/2 mile of the lake is closed to the taking of big game with firearms and crossbows.
- **5** Creamer's Field Migratory Waterfowl Refuge In this portion of Unit 20B hunting and trapping are allowed by registration only. The department may use its discretionary authority to implement the management plan for the refuge. Weapons restrictions and motorized vehicle restrictions apply.

2019-2020 Alaska Hunting Regulations 105

6 Fairbanks Management Area - that portion of Unit 20B bounded by a line from the confluence of Rosie Creek and the Tanana River, northerly along Rosie Creek to the middle fork of Rosie Creek through section 26 to the Parks Highway, then east along the Parks Highway to Alder Creek, then upstream along Alder Creek to its confluence with Emma Creek, then upstream along Emma Creek to its headwaters, then northerly along the hydrographic divide between Goldstream Creek drainages and Cripple Creek drainages to the summit of Ester Dome, then down Sheep Creek to its confluence with Goldstream Creek, then easterly along Goldstream Creek to Sheep Creek Road, then north on Sheep Creek Road to Murphy Dome Road, then west on Murphy Dome Road to Old Murphy Dome Road, then east on Old Murphy Dome Road to the Elliot Highway, then south on the Elliot Highway to Davidson Ditch, then southeasterly along the Davidson Ditch to its confluence with the tributary to Goldstream Creek in Section 29, then downstream along the tributary to its confluence with Goldstream Creek, then in a straight line to First Chance Creek, then up First Chance Creek to the summit of Tungsten Hill, then southerly along Steele Creek to its intersection with the Trans-Alaska Pipeline right-of-way, then southeasterly along the easterly edge of the Trans-Alaska Pipeline right-of-way to the Chena River, then along the north bank of the Chena River to the Moose Creek dike, then southerly along the Moose Creek dike to its intersection with the Tanana River, and then westerly along the north bank of the Tanana River to the point of beginning. The area is open to moose hunting by bow and arrow only and Creamer's Field is also open to muzzleloaders.

7 Birch Lake (Mi. 306 Richardson Highway) & Harding Lake (Mi. 319 Richardson Highway) Closed Area - the area within 1/2 mile of these lakes is closed to taking big game.

8 Ferry Trail Management Area - Unit 20A bounded on the north by the Rex Trail; bounded on the west by the east bank of the Nenana River from its intersection with the Rex Trail south to the divide forming the north boundary of the Lignite Creek drainage; bounded on the south by that divide easterly and southerly to the headwaters of Sanderson Creek at Usibelli Peak, then along a southwesterly line to the confluence of Healy Creek and Coal Creek, then upstream easterly along the south bank of Healy Creek to the north fork of Healy Creek, then along the north fork of Healy Creek to its headwaters; bounded on the east by a straight line from the headwaters of Healy Creek to the headwaters of Dexter Creek, then along Dexter Creek to the Totatlanika River, then down the east bank of the Totatlanika River to the Rex Trail. **Open to caribou hunting by permit only**.

9 Healy-Lignite Management Area - Unit 20A that includes the entire Lignite Creek drainage, and that portion of the Nenana River drainage south of the Lignite Creek drainage and north of a boundary beginning at the confluence of the Nenana River and Healy Creek, then easterly along the south bank of Healy Creek to its confluence with Coal Creek, then northeasterly to the headwaters of Sanderson Creek at Usibelli Peak. **Open to hunting by bow and arrow only, small game may also be taken by falconry.**

10 Wood River Controlled Use Area - Unit 20A bounded on the north by the south side of the Rex Trail beginning at its intersection with the east bank of the Totatlanika River, then easterly along the Rex Trail to Gold King airstrip, then from Gold King airstrip along the trail's extension along the north side of Japan Hills to the Wood River; bounded on the east by the east bank of the Wood River, including the Wood River drainage upstream from and including the Snow Mountain Gulch Creek drainage; bounded on the south by the divide separating the Yanert River drainage from the drainages of the Healy Creek, Moody Creek, Montana Creek, and the Wood River; and bounded on the west by the east bank of the Nenana River from the divide separating the drainage of the Yanert River and Montana Creek north to Healy Creek, then easterly along the south bank of Healy Creek to the north fork of Healy Creek, then along the north fork of Healy Creek to its headwaters, then along a straight line to the headwaters of Dexter Creek, then along the east bank of Dexter Creek to the Totatlanika River, and then down the east bank of the Totatlanika River to the Rex Trail. The area is closed to the use of any motorized vehicle, except aircraft for big game hunting including the transportation of any big game hunters, their hunting gear, and/or parts of big game, Aug **1-Sept 30**; however, this does not prohibit motorized access via, or transportation of game on, the Parks Highway or the transportation into the area of game meat that has been processed for human consumption.

11 Yanert Controlled Use Area - Unit 20A drained by the Nenana River upstream from and including the Yanert Fork drainage. The area is closed to any motorized vehicle, except aircraft, for big game hunting, including transportation of big game hunters, their hunting gear, and/or parts of big game. However, this does not prohibit motorized access via, and transportation of game on, the Parks Highway or the transportation into the area of game meat that has been processed for human consumption.

12 Delta Junction Management Area - Unit 20D bounded by a line beginning at the confluence of Donnelly Creek and the Delta River, then up Donnelly Creek to Richardson Highway (MP 238), then north along the east side of the highway to the "12-mile crossing trail" (Mile 252.4) then east along the south side of the "12-mile crossing trail" and across Jarvis Creek to the 33-mile loop road, then northeast along the 33-mile loop road to the intersection with the Alaska Highway (MP 1414), then southeast along the north side of the Alaska Highway to the bridge at Sawmill Creek (MP 1403.9), then down the west bank of Sawmill Creek to its confluence with Clearwater Creek and down the south bank of Clearwater Creek to its confluence with the Tanana River, then down the Tanana River to its confluence with the Delta River, and upstream along the east bank of the Delta River to the point of beginning at Donnelly Creek, the area is **open to moose hunting by permit only.**

- **13** Delta Controlled Use Area beginning at the confluence of Miller Creek and the Delta River then west to Vertical Angle Bench mark (VABM) Miller, then west to include all drainages of Augustana Creek and Black Rapids Glacier, then north and east to include all drainages of McGinnis Creek to its confluence with the Delta River, then east in a straight line across the Delta River to the east bank of the Delta River, then north along the east bank to a point opposite the intersection of the Alaska and Richardson highways then east in a straight line to the intersection of the Alaska and Richardson highways, then east along the Alaska Highway, to the west bank of the Johnson River, then south along the west bank of the Johnson River and Johnson Glacier to the head of the Canwell Glacier, then west along the north bank of the Canwell Glacier, and Miller Creek to the Delta River. The area is closed to any motorized vehicle or pack animal for big game hunting, including the transportation of big game hunters, their hunting gear, and/or parts of big game, Aug 5-25. However, this does not prohibit motorized access to the area for hunting, or transportation of game on the Richardson Highway, or the use of aircraft at the Charlie Boyd airstrip (63° 29 30" N. lat., 144° 50' 45" W. long.) along the Johnson River.
- 14 Bison Range Controlled Use Area the area consists of 2 field complexes within the Delta Junction Bison Range in Unit 20D as follows: (i) the Panoramic Field hunting area is located 3/4 mile south of the Alaska Highway between MP 1404.0 and 1407.6, and bounded by a line beginning at the northeast corner (latitude/longitude 63° 53.299'/145° 14.714'), then northwest 3.5 miles to 63°54.956'/145°20.767', then southwest 2.4 miles to 63°53.206'/145°23.232', then southeast 1.5 miles to 63° 52.537'/145° 20.758', then northeast 1.0 mile to 63° 53.301'/145° 19.659', then southeast 2.0 miles to 63° 52.330'/145°16.075', then northeast 1.0 miles to the beginning point; and (ii) the Gerstle Field hunting area is located 3/4 mile south of the Alaska Highway between MP 1394.1 and 1396.8, and bounded by a line beginning at the northeast corner (latitude/longitude 63°48.984'/144°57.766'), then northwest 2.9 miles to 63°50.242'/145°02.874', then southwest 1.1 miles to 63°49.102'/145°04.197', then southeast 2.3 miles to 63°48.239'/145°00.339', then northeast 1.6 miles to the beginning point. The area is closed to motorized vehicles for hunting July 1-Sept 30, including the transportation of hunters, their hunting gear or parts of game, in the area.
- 15 Ladue River Controlled Use Area Unit 20E bounded on the west by the east bank of the Dennison Fork of the Fortymile River from its confluence with the South Fork of the Fortymile River upstream to the confluence with the unnamed creek that drains north from Son Mountain, then south along the east bank of this creek to the top of Son Mountain; on the south by a straight line east from the top of Son Mountain to the north bank of the Ladue River, then along the north bank of the Ladue River to the U.S./ Canada border; on the east by the U.S./Canada border; and on the north from the intersection of the U.S./Canada border and the divide on the north side of the mainstem of the Sixtymile drainage, then westerly along this divide to the unnamed tributary of Liberty Creek at N 63° 53.630', W 141° 15.370', then downstream along the south bank of the unnamed tributary to its confluence with the mainstem of Liberty Creek, then downstream along the south bank of Liberty Creek to the confluence with the Walker Fork of the Fortymile River then downstream along the west bank of the Walker Fork of the Fortymile River, to the Taylor Highway then

- westerly along the Taylor Highway to the Taylor Highway bridge over the South Fork of the Fortymile River, then upstream along the east bank of the South Fork of the Fortymile River to the confluence with the Dennison Fork of the Fortymile River; the area is closed to the use of any motorized land vehicle for hunting, including the transportation of hunters, their hunting gear, and/or parts of game, Aug 24-Sept 20. However, this does not prohibit motorized access or transportation of game on the Nine Mile and Liberty Creek trails, U.S./Canada border, or the Boundary Cutoff of the Taylor Highway or the transportation into the area of game meat that has been processed for human consumption.
- 16 Macomb Plateau Controlled Use Area Unit 20D, south of the Alaska Highway, draining into the south side of the Tanana River between the east bank of the Johnson River upstream to Prospect Creek, and the east bank of Bear Creek (Mile 1357.3). The area is closed to any motorized vehicle for hunting including the transportation of hunters, their hunting gear, and/or parts of game, from August 10-Sept 30 except for a floatplane on Fish Lake, and motorized vehicles, including aircraft, to, from, and on the Dry Creek Airstrip at Mile 1379 Alaska Highway or the transportation into the area of game meat that has been processed for human consumption.
- 17 Tok Management Area (also included in portions of Units 12, 13C, and 20D) bounded by a line along the Alaska Highway east from the west side of the Johnson River bridge to Tok Junction, then south along the Tok-Slana Cutoff (Glenn Highway) to the Slana River, then west along the north bank of the Slana River to its confluence with Lost Creek, then up the north side of Lost Creek to the divide between Lost Creek and Jack Creek, then north to the Unit 12 boundary then west along the Unit 12 boundary to Mount Kimball (63°17' N. lat., 144°40' W. long.), then west in a straight line to Mount Gakona (63°17' N. lat., 145°12' W. long.), then southwesterly to the head of Canwell Glacier, then northerly to the head of the Johnson Glacier, then northerly along the west bank of the Johnson Glacier and Johnson River to the Johnson River Bridge; the area is open to sheep hunting by permit only.
- 18 Glacier Mountain Controlled Use Area Unit 20E bounded by a line beginning at mile 140 of the Taylor Highway, then north along the highway to Eagle, then west along the cat trail from Eagle to Crooked Creek, then from Crooked Creek southwest along the west bank of Mogul Creek to its headwaters on North Peak, then west across North Peak to the headwaters of Independence Creek, then southwest along the west bank of Independence Creek to its confluence with the North Fork of the Fortymile River, then easterly along the south bank of the North Fork of the Fortymile River to its confluence with Champion Creek. then across the North Fork of the Fortymile River to the south bank of Champion Creek and easterly along the south bank of Champion Creek to its confluence with Little Champion Creek, then northeast along the east bank of Little Champion Creek to its headwaters, then northeasterly in a direct line to mile 140 on the Taylor Highway. The area is closed to any motorized vehicle for hunting, including transportation of hunters, their hunting gear, and/or parts of game, during July 26-Sept 20. However, this does not prohibit motorized access via, or transportation of game on, the Taylor Highway or the transportation into the area of game meat that has been processed for human consumption.
- 19 Chena River State Recreation Area Hunting and ORV restrictions apply, call (907) 451-2705 or visit http://dnr.alaska.gov/parks/ for details.

Unit 20 Fairbanks-Central Tanana

See pages 105-107 for state restricted areas in Unit 20.

Portions of Unit 20F are in DHCMA and additional restrictions apply, see page 114.

All Fortymile/White Mountains caribou hunts are subject to openings and closings on short notice.

Call the Fortymile hotline at (907) 267-2310 for information before departing for the field.

For detailed zone descriptions, maps, and restricted areas go to

http://www.adfg.alaska.gov/index.cfm?adfg=caribouhunting.40mile

NEW! Mule deer and white-tailed deer may be harvested. See page 28 for more information.

Moose

- Proxy hunting restrictions apply, see page 12.
- Spike-fork, 50-inch antlers, and brow tines are defined on page 30-31.
- In bag limit, "moose" means an animal of either sex; "bull" means a male moose.
- In all hunts limited to one sex, evidence of sex must remain naturally attached to the meat.

		- In an nuni	timited to one sex, evidence of sex must remain naturally allached to the	теш.

Dalton Highway Corridor Management Area (DHCMA)

Units 20, 24, 25, and 26 extending five miles from each side of the Dalton Highway, including the driveable surface of the Dalton Highway, from the Yukon River to the Arctic Ocean, and including the Prudhoe Bay Closed Area. The area within the Prudhoe Bay Closed Area is closed to the taking of big game; the remainder of the DHCMA is closed to hunting; however, big game, small game, and fur animals may be taken in the area by bow and arrow only. Small game may also be taken by falconry. Aircraft and boats may be used to transport hunters, their gear, or parts of game within the DHCMA. A snowmachine may be used to transport hunters, their hunting gear, or parts of game across the management area from land outside the management area to access land on the other side of the management area. No motorized vehicle may be used to transport hunters, their hunting gear, or parts of game, within the DHCMA, EXCEPT licensed highway vehicles may be used on the following designated roads: 1) Dalton Highway; 2) Bettles Winter Trail during periods when BLM and the City of Bettles announce that the trail is open to winter travel; 3) Galbraith Lake road from the Dalton Highway to the BLM campground at Galbraith Lake, including the gravel pit access road when the gate is open; 4) Toolik Lake Road, excluding the driveway to the Toolik Lake Research Facility; 5) The Sagavanirktok River access road two miles north of Pump Station 2; 6) any constructed roadway or gravel pit within 1/4 mile of the Dalton Highway. Any hunter traveling on the Dalton Highway must stop at any check station operated by the department within the DHCMA.

Maximum Weights of Some Alaska Species

Estimated maximum weights of animals that hunters might handle and transport.

species	live weight (lbs.)	carcass weight (lbs.)ª	boned-out carcass (lbs.) ^b
bison	2000	1200	684
black bear	350	210	120
brown bear	1250	750	428
caribou	500	300	171
Dall sheep	230	138	79
elk	1350	810	462
moose	1650	990	564
mountain goat	280	168	96
muskox	800	480	274
Sitka black-tailed deer	200	120	68

b Weight following removal of viscera, head, hide, and lower legs. Weight of carcass meat after all bones are removed.

WING COLLECTIONS: Grouse and Ptarmigan Hunters

ADF&G is asking for your help in the collection of wings, tails, and heads from hunter harvested grouse and ptarmigan. These samples allow biologists to better understand sex and age structure of the harvest which is important for managing these valuable resources.

If you are interested in helping, please:

- 1. Remove from each bird:
 - a. One clean and intact wing (grouse and ptarmigan),
 - b. Tail fan (ONLY grouse), head (ONLY ptarmigan)
- 2. Place the wing and tail/head in a wing bag (available at your local ADF&G office) or other paper bag,
- 3. Record approximate location and date of harvest on the bag, also include contact information if you would like the results of your samples returned,
- 4. Wings can be taken to your nearest ADF&G office at your convenience OR mailed directly to:

Alaska Dept. of Fish and Game
ATTN: Small Game Program
1800 Glenn Hwy, Suite 2

Alaska Dept. of Fish and Game
ATTN: Small Game Program
1300 College Road

Palmer, AK 99645 Fairbanks, AK 99701

(postage paid return envelopes also available at ADF&G offices)

5. The results of your samples will be returned to you quickly and a final report summarizing the status of small game will be sent to you or available online (http://smallgame.adfg.alaska.gov) by early summer for your review.

Your efforts will have a direct impact on understanding the fall harvest composition and age structure of these unique and valuable resources. Thank you!

Unit 21: Middle Yukon drainages into the Yukon River and Arhymot Lake drainages upstream from a line starting at the downriver boundary of Paimiut on the north bank of the Yukon River then south across the Yukon River to the northern terminus of the Paimiut Portage, then south along the Portage to its intersection with Arhymot Lake, then south along the northern and western bank of Arhymot Lake to the outlet at Crooked Creek (locally known as Johnson River); to but not including the Tozitna River drainage on the north bank, and to but not including the Tanana River drainage on the south bank, and excluding the Koyukuk River drainage upstream from the Dulbi River drainage;

Unit 21A: the Innoko River drainage upstream from and including the Iditarod River drainage:

Unit 21B: the Yukon River drainage upstream from Ruby and east of the Ruby-Poorman Road, downstream from and excluding the Tozitna River and Tanana River drainages, and excluding the Melozitna River drainage upstream from Grayling Creek;

Unit 21C: the Melozitna River drainage upstream from Grayling Creek, and the Dulbi River drainage upstream from and including the Cottonwood Creek drainage; Unit 21D: the Yukon River drainage from and including the Blackburn Creek drainage upstream to Ruby, including the area west of the Ruby-Poorman Road, excluding the Koyukuk River drainage upstream from the Dulbi River drainage, and excluding the Dulbi River drainage upstream from Cottonwood Creek;

Unit 21E: the Yukon River and Arhymot Lake drainages upstream from a line starting at the downriver boundary of Paimiut on the north bank of the Yukon River, then south across the Yukon River to the northern terminus of the Paimiut Portage, then south along the Portage to its intersection with Arhymot Lake, then along the northern and western bank of Arhymot Lake to the outlet at Crooked Creek (locally known as Johnson River) drainage, to but not including the Blackburn Creek drainage, and the Innoko River drainage downstream from the Iditarod River drainage.

Fur Animals, Small Game, Unclassified Game, and Deleterious Exotic Wildlife

- If you want to take marmot, marten, mink, muskrat, river otter, or weasel, you must buy a trapping license and follow trapping regulations.
- You may take beaver, coyote, fox, lynx, squirrel, wolf, or wolverine under either a hunting license or a trapping license, but you must follow the seasons, bag limits, and methods and means permitted by that license.
- In Unit 18, lead shot size T (.20" diameter) or smaller is prohibited. Taking game under provisions of either a hunting or trapping license using a shotgun or using loose shot in a muzzleloading firearm is ONLY ALLOWED using nontoxic shot size T (.20" diameter) or smaller, and hunters may not be in immediate possession of lead shot.
- Portions of Units 20, 24, 25, and 26 are within the Dalton Highway Corridor Management Area (DHCMA) and additional restrictions apply. See page 114.

Fur Animals

- Fur animals MAY NOT be taken under the hunting regulations by the following methods:
 - with a dog (except coyote in Unit 20D), trap, snare, net, or fish trap;
 - by disturbing or destroying dens;
 - the same day you have been airborne, unless you are at least 300 feet from the airplane;
 - with a nonresident small game license.

Species, unit, and bag limit	open season
Beaver • Either the meat or hide of beaver must be salvaged.

Aug 10-Mar 31 Units 8, 10, 17, 19, 21-22, 24-25 (except 25C), and in Unit 26B, within the DHCMA and Prudhoe Bay Closed Area: Units 23 and 26 (except in Unit 26B, within the DHCMA and Prudhoe Bay Closed Area): · Including snowshoe and Alaska hare. • Special area restrictions in Unit 14C. Summary available online at http://hunt.alaska.gov under hunting regulations for Hare • Hunters must salvage the hide or meat of Alaska hares taken in Unit 9. Hunters are also encouraged to report harvest of Alaska hares to ADF&G in King Salmon at (907) 246-3340. Units 1-5: Five per day.......Sept 1-Apr 30 Unit 9:

WING COLLECTIONS: Grouse and Ptarmigan Hunters

Unit 14C: Five per day......Sept 1-Apr 30

ADF&G is asking for your help in the collection of wings, tails, and heads from hunter harvested grouse and ptarmigan. These samples allow biologists to better understand sex and age structure of the harvest which is important for managing these valuable resources. If you are interested in helping, see page 114 for more information.

Cormorant (Pelagic and Double-Crested Cormorants only)

Crow

Pika • The hide or meat must be salvaged.

Units 12 and 20E: No limit no closed season Units 1-11, 13-19, 20A, 20B, 20C, 20D, 20F, and 21-26: no open season

Snowy Owl • Lead shot is prohibited in shotguns for all bird hunting in Units 18 and 26.

Feral non-native game birds (Pheasant, Chukar, Quail, Wild Turkey, and Partridge)

• Special area restrictions in Unit 14C. Summary available online at http://hunt.alaska.gov under hunting regulations for small game.

Units 1-26: No limit no closed season

Deleterious exotic wildlife • If unconfined or unrestrained

Unit and bag limit open season

Starling, English Sparrow, Raccoon, Muridae Rodent (true mice, rats, gerbils, and their relatives), Rockdove (pigeon), Belgian Hare, and Eurasian Collared Doves

• Special area restrictions in Unit 14C. Summary available online at http://hunt.alaska.gov under hunting regulations for small game.

Units 1-26: No limit no closed season

Feral Ferret and Feral Swine

• Special area restrictions in Unit 14C. Summary available online at http://hunt.alaska.gov under hunting regulations for small game.

Waterfowl and trapping regulations are published in separate documents. They are printed annually and are available in mid-August at license vendors and ADF&G offices.
