Persons interested can obtain copies of the text of the Alaska Game Law and other Federal laws relating to the protection of wildlife in the Territory by writing to the Fish and Wildlife Service, Juneau, Alaska. Following are extracts from the law that are of general interest and importance to hunters, fishermen, and trappers:

### CITIZENSHIP AND RESIDENCE REQUIREMENTS

Section 3 of the Alaska Game Law defines citizens and specifies residence requirements as follows:

That for the purposes of this act a citizen or a national of the United States who has maintained a bona fide residence in the Territory for a period of twelve months immediately preceding his claim for resident hunting, trapping, fishing, or other privileges under this act, or a foreign-born person not a citizen or national of the United States who has declared his intention to become a citizen of the United States, and who has resided in the Territory for a like period, shall be considered a resident; but if such a foreign-born person shall not have been admitted to citizenship within seven years from the date he declared his first intention to become a citizen, he shall thereafter be deemed to be an alien until admitted to citizenship; *Provided, however*, That whenever the Secretary shall determine the fur resources of Alaska are threatened by hunting or trapping, or from other causes, he may, in his discretion and for such periods as he shall determine, extend the required residence period in the Territory from twelve months to not exceed three years as a prerequisite to obtaining a resident trapping license; a citizen or a national of the United States who has not maintained a bona fide residence in the Territory for a continuous period of twelve months, or for the extended period of three years, as the case may be, immediately preceding his claim for resident privileges shall be considered a nonresident; and a person not a citizen or a national of the United States who is not a resident of the Territory, as defined in this section, shall be considered an alien.

#### ELIGIBILITY FOR RESIDENT TRAPPING LICENSE

A declaration by the Secretary of the Interior on June 8, 1940 (5 F. R. 2297) requires that "citizens of the United States, who are non-residents of the Territory, and foreign born persons and aliens within the meaning of said Alaska Game Law shall have resided in Alaska for a continuous period of 3 years instead of 1 year before being eligible to obtain resident trapping licenses . . ."

### UNLAWFUL TAKING OF ANIMALS, BIRDS, AND GAME FISHES

Section 7 of the Alaska Game Law contains the following regarding the taking of wild animals, birds, and game fishes:

That, unless and except as permitted by this act or by regulations made pursuant to this act, it shall be unlawful for any person to take, possess, transport, sell, offer to sell, purchase, or offer to purchase any game animal, fur animal, game fish, game bird, nongame bird, or any part thereof or any nest or egg of any such bird, or to molest, damage, or destroy beaver, or muskrat houses: *Provided*, That nothing in this act shall be construed to prevent the collection or exportation of such animals, game fishes, birds, parts thereof, or nests or eggs of birds, for scientific or educational purposes, or of live animals, game fishes, birds, or eggs of birds, for propagation or exhibition purposes, under a permit issued by the Director, pursuant to regulations hereinafter authorized to be adopted by the Secretary. Fur or game animals and game birds which escape from captivity, unless recaptured by their owners in accordance

with regulations prescribed by the Secretary, and all fur and game animals and game birds which have been or may hereafter be transplanted, introduced, or reintroduced into the Territory, or any part thereof, are declared to be wild fur or game animals or game birds, as the case may be, and shall be subject to the provisions of this act.

### ALIEN FIREARM, OR HUNTING, LICENSE

Subdivision E, Section 10, of the Alaska Game Law forbids (1) the taking by an alien of wild animals or birds except under an alien special license, and (2) the ownership or possession of a firearm unless he has such a license, and reads as follows:

No alien shall take any of the animals, birds, or game fishes protected by this act, or own or be possessed of a shotgun, rifle, or other firearm, without first having procured an alien special license, except that an alien may take game fishes protected by this act upon first having procured an alien fishing license as herein provided.

### FALSE STATEMENT IN APPLICATION FOR, ALTERATION, LOAN, OR TRANSFER OF LICENSE OR PERMIT

Subdivision J, Section 10, of the Alaska Game Law reads as follows:

Any false statement in an application for a license or permit as to citizenship, place of residence, or other material facts shall render null and void the licenses or permits issued upon it. Any person who shall make any false statements in an application for a license or permit shall be guilty of a violation of this act and upon conviction of any such violation shall be punished as provided in section 15 hereof. No person shall alter, change, loan, or transfer to another any license or permit issued to him in pursuance of this act, nor shall any person other than the one to whom it is issued use such license or permit, and each of such licenses shall expire on the 30th day of June next succeeding its issuance.

## BIRD AND WILDLIFE REFUGES IN ALASKA

On the Alaska bird and other wildlife refuges named below, most of which are administered by the Fish and Wildlife Service through its representatives in Alaska, wild animals and birds are specially protected. In addition, all hunting is prohibited in any national park, monument, or posted national forest area. Certain other areas where birds and animals are protected in the Territory are defined by sections 46.165 to 46.177 and 46.186 to 46.209, inclusive, pages 17-19.

*Aleutian Islands* (established by Executive order of March 3, 1913).—A chain of islands with vegetation characteristic of the treeless Arctic plains, extending westward 1,200 miles from the Alaska Peninsula, including Unimak Island on the east and Attu Island on the west; maintained for the protection of native birds and game animals, the encouragement of fisheries, and the propagation of reindeer and fur animals. Islands usually rocky and some of them covered with a vigorous growth of grass and lichens. Blue foxes are farmed on many. By Executive order of November 23, 1928, the islands of Akun, Akutan, Sanak, Tigalda, Umnak, and Unalaska, including Sedanka or Biorka, and by Executive order of December 19, 1929, portion of Amaknak Island, were eliminated from this reservation and transferred to the jurisdiction of the General Land Office. By Executive order of April 7, 1930, Amak Island, the Sealion Rocks, and a small unnamed island lying southeast of Amak were added to the reservation.

*Bering Sea* (established by Executive order of February 27, 1909).—Includes St. Matthew and Hall Islands and Pinnacle Islet in Bering Sea, about 220 miles north of the Pribilofs. St. Matthew, a jagged straggling reach of bluffs and headlands, connected by bars and lowland spits, has an extreme length of 22 miles, and varies in width from 2 to 3 miles. Hall Island, 3 miles to the west, is separated from St. Matthew by Sarichef Strait. Pinnacle Islet is a narrow rock about 1 mile long and 200 yards wide and rises to an altitude of 900 feet so abruptly that there is scarcely a place for a boat to land. Arctic foxes, represented mainly by the normal phase, which turns white in winter, are found in numbers, some coming from the mainland in winter on the pack ice. The rare and beautiful McKay's snowflake is known to breed nowhere except on this refuge, and the Pribilof sandpiper breeds here more extensively than anywhere else.

*Bogoslof* (established by Executive order of March 2, 1909).—Volcanic islets in Bering Sea, commonly known as the Bogoslof Islands, about 40 miles north of Umnak and Unalaska, of the Aleutian Islands Reservation. Noted for the large colonies of sea lions, and the rocky portion as being the home of millions of murre.

*Chamisso Island* (established by Executive order of December 7, 1912).—A reservation about a mile and a quarter long and a half a mile wide, consisting of Chamisso Island and Puffin and other nearby rocky islets in Kotzebue Sound, 2 miles south of the extremity of Choris Peninsula. One of the most important breeding rookeries of Arctic birds along the northwest coast of Alaska, including horned puffins, Pallas's murre, Pacific kittiwakes, and Point Barrow gulls.

*Curry Bird, Game, and Fish Refuge* (established by Executive order of February 21, 1927).—This area comprises 14 square miles surrounding the Government hotel at Curry, Alaska, as a bird, fish, and game refuge.

*Forrester Island* (established by Executive order of January 11, 1912).—In the Pacific Ocean west of Ketchikan, at the extreme southeastern boundary of Alaska, including Forrester and Lowrie Islands and Wolf and other adjacent rocks. The breeding place of various kinds of sea birds.

*Hazen Bay* (established by Executive order of December 14, 1937).—Situated in Hazen Bay, north of Nelson Island near the north entrance to Baird Inlet, off the west coast of Alaska, and comprising the islands of Nunivakchak and Krige-gag. Established for migratory birds and other wildlife. Black brant and white-fronted, emperor, and little Canadian, or cackling, geese nest on these islands, as

well as swans, glaucous gulls, greater scaup ducks, old squaws, and large numbers of eider ducks.

*Hazy Islands* (established by Executive order of January 11, 1912).—A group of islands in southeastern Alaska, west of Coronation Island and 100 miles north of Forrester. Breeding place for numerous sea birds.

*Kenai National Moose Range* (established by Executive order of December 16, 1941).—An area of 2,000,000 acres on Kenai Peninsula, set aside to protect the natural breeding and feeding range of the giant Kenai moose.

*Kodiak National Wildlife Refuge* (established by Executive order of August 19, 1941).—An area of 1,957,000 acres, set aside to protect the natural feeding and breeding ranges of brown bears and other wildlife on Kodiak and Uganik Islands.

*Nunivak Island* (established by Executive order of April 15, 1929).—Located in Bering Sea, off the west coast of Alaska. Set apart for use in conducting experiments in the crossing and propagation of reindeer and native caribou and also as a preserve and breeding ground for native birds and wild game and fur-bearing animals. A herd of musk oxen, which now numbers about 50 animals, the nucleus of which was reintroduced into Alaska from Greenland in 1930, is now maintained on this refuge. By Executive order of October 22, 1930, Triangle Island and all small unnamed islands and rocks lying adjacent to Nunivak Island were added to this reservation.

*The Pribilof Islands* (established as a reservation by the act of April 21, 1910).—Located in Bering Sea at latitude 57° N. and longitude 170° W., the Pribilof Islands include St. Paul, St. George, Otter, and Walrus Islands, and Sea Lion Rock. All are of volcanic origin and all are relatively small. The entire land area comprises only about 175 square miles. Villages are located on the two largest islands, St. Paul and St. George, with populations of 344 and 193 natives, respectively. In addition there is a small staff of supervisory white employees at each village. No one is permitted to land on any of the Pribilof Islands, except through stress of weather or like unavoidable cause, or by the authority of the Secretary of the Interior. The primary purpose of the reservation is to facilitate management of the Alaska fur-seal herd, but protection is afforded blue foxes and great bird colonies also.

*St. Lazaria* (established by Executive order of February 27, 1909).—At the entrance to Sitka Sound, about 30 miles west of Sitka. The breeding place of certain sea birds.

*Semidi Islands Wildlife Refuge* (established by Executive order of June 17, 1932).—The refuge, which is in the north Pacific Ocean, southeast of the Alaska Peninsula, includes the islands of Aghiyuk, Chowiet, Kateekuk, Anowik, Kilik-tagik, Suklik, Aghik, Aliksemit, and South Island, known as the Semidi Island Group. Colonies of puffins, auklets, and petrels inhabit the refuge.

*Tuxedni* (established by Executive order of February 27, 1909).—Embracing Chisik, Egg, and other small islands in Tuxedni Harbor, Cook Inlet, set aside as a breeding ground for native birds. Within the Southwestern Fisheries Reservation established November 3, 1922.

## NATIONAL PARKS AND NATIONAL MONUMENTS IN ALASKA

*Mount McKinley National Park* (created by act of Congress, February 26, 1917; enlarged January 30, 1922, and March 19, 1932).—Snow-covered Mount McKinley, highest peak in North America, rises to 20,300 feet above sea level, with 17,000 feet above timberline. East and west from its crest lofty, glacier-clad peaks of the Alaska Range extend for many miles, unclimbed and unsurveyed. One hundred and twelve kinds of birds and 35 kinds of mammals inhabit the park. These include grizzly bears, wolverines, red foxes, wolves, beavers, moose, caribou, and mountain sheep. The surfbird and wandering tattler have been found nesting only in Mount McKinley National Park.

*Glacier Bay National Monument* (established by Presidential Proclamation of February 26, 1925; enlarged April 18, 1939).—An extensive region of branching tidal inlets terminating at the foot of great glaciers that descend from mountains clothed in perpetual snow. The southeastern extremity of the monument is covered by a luxuriant post-glacial forest. The remainder is largely ice and barren rock that rises to spectacular heights, reaching a climax at Mount Fairweather, 15,300 feet above sea level. Alaska brown bears, grizzlies, black bears, and the rare glacier bears are present, as well as martens, mink, red foxes, wolverines, mountain goats, Sitka deer, whales, porpoises, and hair seals. Large numbers of waterfowl of many species inhabit the area, including loons, cormorants, geese, king eiders and other ducks, various gulls and shorebirds, murrelets, guillemots, and puffins.

*Katmai National Monument* (established by Presidential Proclamation of September 24, 1918; extended by Presidential Proclamations of April 24, 1931, and August 4, 1942).—The eruption of Mount Katmai on June 6, 1912, created a tremendous volcanic landscape in the area on the Alaska Peninsula between the Savonoski River and Shelikof Strait. Notable was the famous Valley of Ten Thousand Smokes. Although much of the once-violent "steaming" has ceased, a number of fumaroles and several volcanoes are still alive, and the devastated area continues to present an awesome picture. In the northern and western portion of the Monument the snow-covered Aleutian Range with its many glaciers contrasts strikingly with the tundra-lake area, which is the habitat of abundant and diversified wildlife. The Peninsula brown bears, the largest carnivorous mammals on earth, occur here, and moose are numerous. Bands of Grant's caribou occasionally wander through the Monument, and red foxes, wolves, wolverines, otters, martens, mink, and beavers are present. Waterfowl are abundant on the lakes and rivers and in the bays of Shelikof Strait. Ptarmigans and other bird life are found on the tundra or in the forests of stunted spruce. Naknek, Grosvenor, Coville, and other lakes teem with rainbow trout and salmon. The highly colored trout commonly attain lengths greater than two feet. Brooks Lake and its feeder streams within the Monument are the spawning ground of a large percentage of Bristol Bay red salmon, which are of great economic value.
