Wetland Determination Form QA/QC Checklist

This form to be completed before leaving the field site.

Feature ID WPOT1048 Field Target: 162 Date: 6/30/14

For all items not checked, please provide detailed explanation in the notes section of data form.

-pre-map GPL → P401/413

1. Site Description

- ☑ Site description, site parameters and summary of findings are complete?
- ☐ A detailed site sketch is included in logbook?

2. Vegetation

- ☑ At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
- ☐ Vegetation names are entered legibly for all strata present?
- ☐ Cover calculations are complete and correct?
- ☐ All dominant species have been determined and recorded per strata?
- ☐ Indicator status is correct for each species?
- ☐ Dominance Test and Prevalence Index have been completed?

3. Soil

- ☐ Soil profile is complete?
- ☐ Appropriate hydric soil indicators are marked?

4. Hydrology

- ☐ Appropriate hydrology indicators are marked?
- ☐ Surface water, water table, and saturation depths are recorded if present?

5. Functions and Values

- ☐ Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland?

6. Field Logbook

- ☑ Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
- ☐ Each logbook page is initialed and dated?

7. Maps

- ☐ Wetland boundaries have been corrected if necessary?
- ☐ Maps are initialed and dated?

8. Photos

- ☐ Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)?
- ☐ Two photos were taken for each Observation Point (vegetation/site overview)?

WETLAND DETERMINATION DATA FORM

SITE DESCRIPTION				
Survey Type: Centerline___ Access Road (explain)___ Other (explain) X 2000' corridor			Field Target: 157	Map #: 109 Map Date: 5/27/14
Date: 7/8/14	Project Name & No.: Alaska LNG 26221306		Feature Id: W60T1049	
Investigators: Joe Christopher, Zoe Meade, Val Watkins, Abigayle Fisher			Team No.: W60	
State: Alaska	Region: Alaska	Milepost: 107.8 (PH)		
Latitude: 62° 13' 15.61"	Longitude: 150° 14' 05.88"		Datum: WGS84	
Logbook No.: 003	Logbook Page No.: 046	Picture No.: P_ N, S, pit, plug		

SITE PARAMETERS	
Subregion: South central	Landform (hillslope, terrace, hummocks, etc.): Flat
Slope (%): 0 - 2	Local relief (concave, convex, none): concave, slight
Pre-mapped Alaska LNG/NWI classification: ~~Upland~~ PSS4/B	Soil Map Unit Name: N/A
Are climatic/hydrologic conditions on the site typical for this time of year? Yes X No_____ (if no explain in Notes)	Are "Normal Circumstances" present: Yes X No_____ (If no, explain in Notes.)
Are Vegetation_____, Soil_____, or Hydrology_____ Significantly Disturbed?	No X (If yes, explain in Notes)
Are Vegetation_____, Soil_____, or Hydrology_____ Naturally Problematic?	No X (If yes, explain in Notes.)

SUMMARY OF FINDINGS	
Hydrophytic Vegetation Present? Yes X No_____	**Is the Sampled Area within a Wetland?** Yes X No_____
Hydric Soil Present? Yes X No_____	**Wetland Type:** PSS 4/1B
Wetland Hydrology Present? Yes X No_____	Alaska Vegetation Classification (Viereck): IIA3, IIC2

Notes and Site Sketch: Please include Directional & North Arrow, Centerline, Length of feature, Distances from Centerline, Photo Locations, and Survey corridor.

P. 46 for Logbook sketch.

WETLAND DETERMINATION DATA FORM

VEGETATION (use scientific names of plants)

Tree Stratum (Plot sizes: 26')	Absolute % Cover	Dominant Species? (Y/N)	Indicator Status
1. Picea mariana	10	Y	FACW
2.			
3.			
4.			

Total Cover: 10

50% of total cover: 5 20% of total cover: 2

Sapling/Shrub Stratum (26')	Absolute % Cover	Dominant Species? (Y/N)	Indicator Status
1. Rhododendron tomentosum	40	Y	FACW
2. Betula nana	25	Y	FAC
3. Empetrum nigrum	15		FAC
4. Vaccinium oxycoccus	2		OBL
5. Vaccinium vitis-idaea	TR		FAC
6. Chamaedaphne calyculata	7		FACW

Wetland Determination Form QA/QC Checklist

This form to be completed before leaving the field site.

Feature ID: W60T1049 Field Target: 157 Date: 07-08-14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. **Site Description**

   - ☑ Site description, site parameters and summary of findings are complete?
   - ☑ A detailed site sketch is included in logbook?

2. **Vegetation**

   - ☑ At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
   - ☑ Vegetation names are entered legibly for all strata present?
   - ☑ Cover calculations are complete and correct?
   - ☑ All dominant species have been determined and recorded per strata?
   - ☑ Indicator status is correct for each species?
   - ☑ Dominance Test and Prevalence Index have been completed?

3. **Soil**

   - ☑ Soil profile is complete?
   - ☑ Appropriate hydric soil indicators are marked?

4. **Hydrology**

   - ☑ Appropriate hydrology indicators are marked?
   - ☑ Surface water, water table, and saturation depths are recorded if present?

5. **Functions and Values**

   - ☑ Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland?

6. **Field Logbook**

   - ☑ Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
   - ☑ Each logbook page is initialed and dated?

7. **Maps**

   - ☑ Wetland boundaries have been corrected if necessary?
   - ☑ Maps are initialed and dated?

8. **Photos**

- ☑ Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)?
- ☑ Two photos were taken for each Observation Point (vegetation/site overview)?

Wetland Determination Form QA/QC Checklist

This form to be completed before leaving the field site.

Feature ID: W60T1050 Field Target: 158 Date: 7/8/14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. Site Description

- ☑ Site description, site parameters and summary of findings are complete?
- ☑ A detailed site sketch is included in logbook?

2. Vegetation

- ☑ At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
- ☑ Vegetation names are entered legibly for all strata present?
- ☑ Cover calculations are complete and correct?
- ☑ All dominant species have been determined and recorded per strata?
- ☑ Indicator status is correct for each species?
- ☑ Dominance Test and Prevalence Index have been completed?

3. Soil

- ☑ Soil profile is complete?
- ☑ Appropriate hydric soil indicators are marked?

4. Hydrology

- ☑ Appropriate hydrology indicators are marked?
- ☑ Surface water, water table, and saturation depths are recorded if present?

5. Functions and Values

- ☑ Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland?

6. Field Logbook

- ☑ Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
- ☑ Each logbook page is initialed and dated?

7. Maps

- ☑ Wetland boundaries have been corrected if necessary?
- ☑ Maps are initialed and dated?

8. Photos

- ☑ Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)?
- ☑ Two photos were taken for each Observation Point (vegetation/site overview)?

Wetland Determination Form QA/QC Checklist

This form to be completed before leaving the field site.

Feature ID: W60T1053-101 Field Target: 150 Date: 7/9/14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. Site Description

- ☑ Site description, site parameters and summary of findings are complete?
- ☑ A detailed site sketch is included in logbook?

2. Vegetation

- ☑ At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
- ☑ Vegetation names are entered legibly for all strata present?
- ☑ Cover calculations are complete and correct?
- ☑ All dominant species have been determined and recorded per strata?
- ☑ Indicator status is correct for each species?
- ☑ Dominance Test and Prevalence Index have been completed?

3. Soil

- ☑ Soil profile is complete?
- ☑ Appropriate hydric soil indicators are marked?

4. Hydrology

- ☑ Appropriate hydrology indicators are marked?
- ☑ Surface water, water table, and saturation depths are recorded if present?

5. Functions and Values

- ☑ Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland?

6. Field Logbook

- ☑ Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
- ☑ Each logbook page is initialed and dated?

7. Maps

- ☑ Wetland boundaries have been corrected if necessary?
- ☑ Maps are initialed and dated?

8. **Photos**

- ☑ Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)?
- ☑ Two photos were taken for each Observation Point (vegetation/site overview)?

Wetland Determination Form QA/QC Checklist

This form to be completed before leaving the field site.

Feature ID: WeDT1053 Field Target: 2016 Date: 9/4/14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. **Site Description**

   ☑ Site description, site parameters and summary of findings are complete?
   ☑ A detailed site sketch is included in logbook?

2. **Vegetation**

   ☑ At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
   ☑ Vegetation names are entered legibly for all strata present?
   ☑ Cover calculations are complete and correct?
   ☑ All dominant species have been determined and recorded per strata?
   ☑ Indicator status is correct for each species?
   ☑ Dominance Test and Prevalence Index have been completed?

3. **Soil**

   ☑ Soil profile is complete?
   ☑ Appropriate hydric soil indicators are marked?

4. **Hydrology**

   ☑ Appropriate hydrology indicators are marked?
   ☑ Surface water, water table, and saturation depths are recorded if present?

5. **Functions and Values**

   ☑ Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland?

6. **Field Logbook**

   ☑ Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
   ☑ Each logbook page is initialed and dated?

7. **Maps**

   ☑ Wetland boundaries have been corrected if necessary?
   ☑ Maps are initialed and dated?

GL VW

8. **Photos**

☑ Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)?

☐ Two photos were taken for each Observation Point (vegetation/site overview)?

Wetland Determination Form QA/QC Checklist

This form to be completed before leaving the field site.

Feature ID: WJDT1055 Field Target: 209 Date: 9/13/14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. **Site Description**

   ☑ Site description, site parameters and summary of findings are complete?
   ☑ A detailed site sketch is included in logbook?

2. **Vegetation**

   ☐ At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
   ☑ Vegetation names are entered legibly for all strata present?
   ☐ Cover calculations are complete and correct?
   ☐ All dominant species have been determined and recorded per strata?
   ☐ Indicator status is correct for each species?
   ☐ Dominance Test and Prevalence Index have been completed?

3. **Soil**

   ☑ Soil profile is complete?
   ☑ Appropriate hydric soil indicators are marked?

4. **Hydrology**

   ☑ Appropriate hydrology indicators are marked?
   ☐ Surface water, water table, and saturation depths are recorded if present?

5. **Functions and Values**

   ☑ Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland?

6. **Field Logbook**

   ☐ Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
   ☑ Each logbook page is initialed and dated?

7. **Maps**

   ☑ Wetland boundaries have been corrected if necessary?
   ☐ Maps are initialed and dated?

QC VW

8. **Photos**

☑ Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)?

☐ Two photos were taken for each Observation Point (vegetation/site overview)?

I B2
II B2

Notes:

Pockets of standing water around root balls

Field Crew Chief: _____ Field Scientist/Technician _____

Vegetation Classification Data Form

Table I-Alaska vegetation classification to level III

Level I	Level II	Level III
I Forest	A Needleleaf (conifer) forest	(1) Closed needleleaf (conifer) forest (2) Open needleleaf (conifer) forest (3) Needleleaf (conifer) woodland
	B Broadleaf forest	(1) Closed broadleaf forest (2) Open broadleaf forest (3) Broadleaf woodland
	C Mixed forest	(1) Closed mixed forest (2) Open mixed forest (3) Mixed woodland
II Scrub	A Dwarf tree scrub	(1) Closed dwarf tree scrub (2) Open dwarf tree scrub (3) Dwarf tree scrub woodland
	B Tall scrub	(1) Closed tall scrub (2) Open tall scrub
	C. Low scrub	(1) Closed low scrub (2) Open low scrub
	D Dwarf scrub	(1) Dryas dwarf scrub (2) Ericaceous dwarf scrub (3) Willow dwarf scrub
III Herbaceous	A Graminoid herbaceous	(1) Dry graminoid herbaceous (2) Mesic graminoid herbaceous (3) Wet graminoid herbaceous (emergent)
	B Forb herbaceous	(1) Dry forb herbaceous (2) Mesic forb herbaceous (3) Wet forb herbaceous (emergent)
	C Bryoid herbaceous	(1) Mosses (2) Lichens
	D. Aquatic (nonemergent) herbaceous	(1) Freshwater aquatic herbaceous (2) Brackish water aquatic herbaceous (3) Marine aquatic herbaceous

Descriptions of levels I, II, III, and IV follow the classification table.

1a. Trees over 3 meters (10 ft) tall are present and have a canopy cover of 10 percent or more ..... I. Forest 2

1b. Trees over 3 meters (10 ft) tall are absent or nearly so, Less than 10 percent cover. (Dwarf trees, less than 3 meters [10 ft] tall may be present and abundant 7

I. Forest

2a. Over 75 percent of tree cover contributed by needleleaf (conifer) species ..... I.A Needleleaf forest 3

2b. Less than 75 percent of tree cover contributed by needleleaf (conifer) species 4

3a. Tree canopy of 60-100 percent cover ..... I.A.1 Closed needleleaf forest

3b. Tree canopy of 25-59 percent cover ..... I.A.2 Open needleleaf forest

3c. Tree canopy of 10-24 percent cover ..... I.A.3 Needleleaf woodland

4a. Over 75 percent of tree cover contributed by broadleaf species ..... I.B Broadleaf forest 5

4b. Broadleaf or needleleaf species contribute 25 to 75 percent of the **tree cover** 6

5a. Tree canopy of 60-100 percent cover ..... I.B.1 Closed broadleaf forest

5b. Tree canopy of 25-59 percent cover ..... I.B.2 Open broadleaf forest

5c. Tree canopy of 10-24 percent cover ..... I.B.3 Broadleaf woodland

6a. Tree canopy of 60-100 percent cover ..... I.C.1 Closed mixed forest

6b. Tree canopy of 25-59 percent cover. ..... I.C.2 Open mixed forest

6c. Tree canopy of 10-24 percent cover ..... I.C.3 Mixed woodland

7a. Vegetation with at least 25 percent cover of erect to decumbent shrubs or with at least 10 percent cover of dwarf trees (less than 3 meters [10 ft] tall) 8

7b. Vegetation herbaceous (may have up to 25 percent shrub cover) 15

II. Scrub

8a. Vegetation with at least 10 percent cover of dwarf trees ..... II.A Dwarf tree scrub 9

8b. Vegetation with at least 25 percent cover of shrubs and less than 10 percent cover of dwarf trees 10

9a. Dwarf tree canopy of 60-100 percent cover ..... II.A.1 Closed dwarf tree scrub

9b. Dwarf tree canopy of 25-59 percent cover ..... II.A.2 Open dwarf tree scrub

9c. Dwarf tree canopy of 10-24 percent cover ..... II.A.3 Dwarf tree scrub woodland

10a. Shrubs more than 1.5 meters (5 ft) tall ..... II.B Tall scrub 11

10b. Shrubs less than 1.5 meters (5ft) tall 12

11a. Shrub canopy cover greater than 75 percent ..... II.B.1 Closed tall scrub

11b. Shrub canopy cover of 25-74 percent ..... II.B.2 Open tall scrub

12a. Shrubs 20 centimeters to 1.5 meters tall ..... II.C Low scrub 13

12b. Shrubs under 20 centimeters in height ..... II.D Dwarf scrub 14

13a. Shrub canopy cover greater than 75 percent ..... II.C.1 Closed low scrub

13b. Shrub canopy cover of 25-74 percent, or as low as 2 percent if little or no other vegetation cover present ..... II.C.2 Open low scrub

14a. Dryas species dominant in the dwarf shrub layer ..... II.D.1 Dryas dwarf scrub

14b. Ericaceous species dominant in the dwarf shrub layer ..... II.D.2 Ericaceous dwarf scrub

14c. Willow species dominant in the dwarf scrub layer ..... II.D.2 Willow dwarf scrub

III. Herbaceous

15a. Terrestrial vegetation, or if growing in the water, dominated by emergent vegetation 16

15b. Dominant vegetation growing submerged in water or floating on the water surface, but not emerging above the water ..... III.D Aquatic herbaceous 21

16a. Grasses, sedges, or rushes (graminoid) plants dominant ..... III.A Graminoid herbaceous 17

16b. Forbs or bryophytes dominant 18

17a. Grasslands of well-drained, dry sites, such as south-facing bluffs, old beaches, and sand dunes Typically (but not always) dominated by *Elymus* spp., *Festuca* spp., and *Deschampsia* spp ..... III.A.1 Dry graminoid herbaceous

17b. On moist sites, but usually not with standing water. Usually dominated by *Calamagrostis* spp., *Carex* spp. or *Eriophorum* spp.; tussocks often present ..... III.A.2 Mesic graminoid herbaceous

17c. On wet sites, standing water present for part of the year; dominated by either sedges or grasses; includes wet tundra, bogs, marshes, and fens ..... III.A.3 Wet graminoid herbaceous

18a. Vegetation dominated by forbs (broadleaf herbs, ferns, or horsetails) ..... III.B Forb herbaceous 19

18b. Vegetation dominated by mosses or lichens ..... III.C Bryoid herbaceous 20

19a. On dry sites, usually rocky and well drained; mostly tundra sites ..... III.B.1 Dry forb herbaceous

19b. On moist sites but without standing water, mostly within forested areas ..... III.B.2 Mesic forb herbaceous

19c. On wet sites, usually with standing water for part of the year ..... III.B.3 Wet forb herbaceous

20a. Vegetation cover dominated by mosses ..... III.C.1 Bryoid moss

20b. Vegetation cover dominated by lichens ..... III.C.2 Bryoid lichen

21a. Vegetation submerged or floating in fresh water. ..... III.D.1 Freshwater aquatic herbaceous

21b. Vegetation submerged or floating in brackish water ..... III.D.2 Brackish water aquatic herbaceous

21c. Vegetation submerged or floating in salt water ..... III.D.3 Marine aquatic herbaceous

Vegetation Classification Data Form QA/QC Checklist

This form is to be completed before leaving the field site.

Feature ID: WI071057 Field Target: 211 Date: 9/5/14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. **General Information**
   - ☑ Location data recorded?
   - ☑ Photo taken and photo number recorded?
2. **Location Description**
   - ☑ Location of site recorded with enough detail to help relocate?
3. **Common Species**
   - ☑ Scientific name of common species recorded?
   - ☑ Percent cover of dominant structure level noted?
4. **Habitat Description**
   - ☑ Habitat described?
5. **Classification**
   - ☐ All three levels of classification recorded?
6. **Field Log Book**
   - ☑ Field form entries consistent with log book?
   - ☑ Logbook clearly identifies the Field Target ID and Feature ID?

Wetland Determination Form QA/QC Checklist

This form to be completed before leaving the field site.

Feature ID: W60T1058 Field Target: 210 Date: 9/6/14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. **Site Description**

   ☑ Site description, site parameters and summary of findings are complete?
   ☑ A detailed site sketch is included in logbook?

2. **Vegetation**

   ☑ At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
   ☑ Vegetation names are entered legibly for all strata present?
   ☑ Cover calculations are complete and correct?
   ☑ All dominant species have been determined and recorded per strata?
   ☑ Indicator status is correct for each species?
   ☑ Dominance Test and Prevalence Index have been completed?

3. **Soil**

   ☑ Soil profile is complete? NOT NEEDED
   ☐ Appropriate hydric soil indicators are marked?

4. **Hydrology**

   ☑ Appropriate hydrology indicators are marked?
   ☑ Surface water, water table, and saturation depths are recorded if present?

5. **Functions and Values**

   ☑ Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland?

6. **Field Logbook**

   ☑ Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
   ☑ Each logbook page is initialed and dated?

7. **Maps**

   ☑ Wetland boundaries have been corrected if necessary?
   ☑ Maps are initialed and dated?

QC VW

8. Photos

- ☑ Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)?
- ☐ Two photos were taken for each Observation Point (vegetation/site overview)?

Wetland Determination Form QA/QC Checklist

This form to be completed before leaving the field site.

Feature ID: WL0071059 Field Target: 212 Date: 9/6/14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. **Site Description**

   - ☑ Site description, site parameters and summary of findings are complete?
   - ☑ A detailed site sketch is included in logbook?

2. **Vegetation**

   - ☑ At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
   - ☐ Vegetation names are entered legibly for all strata present?
   - ☑ Cover calculations are complete and correct?
   - ☑ All dominant species have been determined and recorded per strata?
   - ☑ Indicator status is correct for each species?
   - ☐ Dominance Test and Prevalence Index have been completed?

3. **Soil**

   - ☑ Soil profile is complete?
   - ☑ Appropriate hydric soil indicators are marked?

4. **Hydrology**

   - ☑ Appropriate hydrology indicators are marked?
   - ☐ Surface water, water table, and saturation depths are recorded if present?

5. **Functions and Values**

   - ☑ Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland?

6. **Field Logbook**

   - ☑ Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
   - ☐ Each logbook page is initialed and dated?

7. **Maps**

   - ☑ Wetland boundaries have been corrected if necessary?
   - ☐ Maps are initialed and dated?

QC
VW

8. Photos

☑ Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)?

☐ ~~Two photos were taken for each Observation Point (vegetation/site overview)?~~

Vegetation Classification Data Form

Site Description		
Date: 9/6/14	Project Name & #: Alaska LNG 26221306	Field Target: 213
Investigators: JL | JA		Feature ID: W60T1060 ~~veg~~
Latitude: 62° 5' 9.51"	Longitude: 150° 12' 46.62"	Datum: WGS84
Logbook #: W40 - 4	Logbook Page #: 17	Picture #: W60T1060_veg_000002 MS

Location Description:

South of FT 212 - Forested Island between permissIE

Common Species Observed (Scientific Name)

Picea Mariana ~40'	
Alnus spp - 6' Tall Closed	
VACCinium (uliginosum) OVAFolium	
Equisetum Arvense	

Percent Cover of Dominant Structure Level:

Habitat Description:

Forested Wetland PFO4/SS1 (B) - pockets of H_2O

Alaska Vegetation Classification: Level I, Level II, Level III

I II	A, B	2, 1

I A2
II B1

Notes:

Trees growing on raised roots, apart to water

Field Crew Chief: _____ Field Scientist/Technician _____

Vegetation Classification Data Form

Table I-Alaska vegetation classification to level III

Level I	Level II	Level III
I. Forest	A. Needleleaf (conifer) forest	(1) Closed needleleaf (conifer) forest (2) Open needleleaf (conifer) forest (3) Needleleaf (conifer) woodland
	B. Broadleaf forest	(1) Closed broadleaf forest (2) Open broadleaf forest (3) Broadleaf woodland
	C. Mixed forest	(1) Closed mixed forest (2) Open mixed forest (3) Mixed woodland
II. Scrub	A. Dwarf tree scrub	(1) Closed dwarf tree scrub (2) Open dwarf tree scrub (3) Dwarf tree scrub woodland
	B. Tall scrub	(1) Closed tall scrub (2) Open tall scrub
	C. Low scrub	(1) Closed low scrub (2) Open low scrub
	D. Dwarf scrub	(1) Dryas dwarf scrub (2) Ericaceous dwarf scrub (3) Willow dwarf scrub
III. Herbaceous	A. Graminoid herbaceous	(1) Dry graminoid herbaceous (2) Mesic graminoid herbaceous (3) Wet graminoid herbaceous (emergent)
	B. Forb herbaceous	(1) Dry forb herbaceous (2) Mesic forb herbaceous (3) Wet forb herbaceous (emergent)
	C. Bryoid herbaceous	(1) Mosses (2) Lichens
	D. Aquatic (nonemergent) herbaceous	(1) Freshwater aquatic herbaceous (2) Brackish water aquatic herbaceous (3) Marine aquatic herbaceous

Descriptions of levels I, II, III, and IV follow the classification table.

1a.	Trees over 3 meters (10 ft) tall are present and have a canopy cover of 10 percent or more	I. Forest 2
1b.	Trees over 3 meters (10 ft) tall are absent or nearly so, Less than 10 percent cover. (Dwarf trees, less than 3 meters [10 ft] tall may be present and abundant	7
I. Forest		
2a.	Over 75 percent of tree cover contributed by needleleaf (conifer) species	I.A Needleleaf forest 3
2b.	Less than 75 percent of tree cover contributed by needleleaf (conifer) species	4
3a.	Tree canopy of 60-100 percent cover	I.A.1 Closed needleleaf forest
3b.	Tree canopy of 25-59 percent cover	I.A.2 Open needleleaf forest
3c.	Tree canopy of 10-24 percent cover	I.A.3 Needleleaf woodland
4a.	Over 75 percent of tree cover contributed by broadleaf species	I.B Broadleaf forest 5
4b.	Broadleaf or needleleaf species contribute 25 to 75 percent of the tree cover	6
5a.	Tree canopy of 60-100 percent cover	I.B.1 Closed broadleaf forest
5b.	Tree canopy of 25-59 percent cover	I.B.2 Open broadleaf forest
5c.	Tree canopy of 10-24 percent cover	I.B.3 Broadleaf woodland
6a.	Tree canopy of 60-100 percent cover	I.C.1 Closed mixed forest
6b.	Tree canopy of 25-59 percent cover	I.C.2 Open mixed forest
6c.	Tree canopy of 10-24 percent cover	I.C.3 Mixed woodland
7a.	Vegetation with at least 25 percent cover of erect to decumbent shrubs or with at least 10 percent cover of dwarf trees (less than 3 meters [10 ft] tall)	8
7b.	Vegetation herbaceous (may have up to 25 percent shrub cover)	15
II. Scrub		
8a.	Vegetation with at least 10 percent cover of dwarf trees	II.A Dwarf tree scrub 9
8b.	Vegetation with at least 25 percent cover of shrubs and less than 10 percent cover of dwarf trees	10
9a.	Dwarf tree canopy of 60-100 percent cover	II.A.1 Closed dwarf tree scrub
9b.	Dwarf tree canopy of 25-59 percent cover	II.A.2 Open dwarf tree scrub
9c.	Dwarf tree canopy of 10-24 percent cover	II.A.3 Dwarf tree scrub woodland
10a.	Shrubs more than 1.5 meters (5 ft) tall	II.B Tall scrub 11
10b.	Shrubs less than 1.5 meters (5 ft) tall	12
11a.	Shrub canopy cover greater than 75 percent	II.B.1 Closed tall scrub
11b.	Shrub canopy cover of 25-74 percent	II.B.2 Open tall scrub
12a.	Shrubs 20 centimeters to 1.5 meters tall	II.C Low scrub 13
12b.	Shrubs under 20 centimeters in height	II.D Dwarf scrub 14
13a.	Shrub canopy cover greater than 75 percent	II.C.1 Closed low scrub
13b.	Shrub canopy cover of 25-74 percent, or as low as 2 percent if little or no other vegetation cover present	II.C.2 Open low scrub
14a.	Dryas species dominant in the dwarf shrub layer	II.D.1 Dryas dwarf scrub
14b.	Ericaceous species dominant in the dwarf shrub layer	II.D.2 Ericaceous dwarf scrub
14c.	Willow species dominant in the dwarf scrub layer	II.D.2 Willow dwarf scrub
III. Herbaceous		
15a.	Terrestrial vegetation, or if growing in the water, dominated by emergent vegetation	16
15b.	Dominant vegetation growing submerged in water or floating on the water surface, but not emerging above the water	III.D Aquatic herbaceous 21
16a.	Grasses, sedges, or rushes (graminoid) plants dominant	III.A Graminoid herbaceous 17
16b.	Forbs or bryophytes dominant	18
17a.	Grasslands of well-drained, dry sites, such as south-facing bluffs, old beaches, and sand dunes. Typically (but not always) dominated by *Elymus* spp., *Festuca* spp., and *Deschampsia* spp.	III.A.1 Dry graminoid herbaceous
17b.	On moist sites, but usually not with standing water. Usually dominated by *Calamagrostis* spp., *Carex* spp. or *Eriophorum* spp.; tussocks often present	III.A.2 Mesic graminoid herbaceous
17c.	On wet sites, standing water present for part of the year; dominated by either sedges or grasses; includes wet tundra, bogs, marshes, and fens	III.A.3 Wet graminoid herbaceous
18a.	Vegetation dominated by forbs (broadleaf herbs, ferns, or horsetails)	III.B Forb herbaceous 19
18b.	Vegetation dominated by mosses or lichens	III.C Bryoid herbaceous 20
19a.	On dry sites, usually rocky and well drained; mostly tundra sites	III.B.1 Dry forb herbaceous
19b.	On moist sites but without standing water, mostly within forested areas	III.B.2 Mesic forb herbaceous
19c.	On wet sites, usually with standing water for part of the year	III.B.3 Wet forb herbaceous
20a.	Vegetation cover dominated by mosses	III.C.1 Bryoid moss
20b.	Vegetation cover dominated by lichens	III.C.2 Bryoid lichen
21a.	Vegetation submerged or floating in fresh water	III.D.1 Freshwater aquatic herbaceous
21b.	Vegetation submerged or floating in brackish water	III.D.2 Brackish water aquatic herbaceous
21c.	Vegetation submerged or floating in salt water	III.D.3 Marine aquatic herbaceous

Vegetation Classification Data Form QA/QC Checklist

This form is to be completed before leaving the field site.

Feature ID: WeT1060 ~~.vtf~~ Field Target: 213 Date: 9/6/14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. **General Information**
   - ☑ Location data recorded?
   - ☐ Photo taken and photo number recorded?
2. **Location Description**
   - ☐ Location of site recorded with enough detail to help relocate?
3. **Common Species**
   - ☐ Scientific name of common species recorded?
   - ☐ Percent cover of dominant structure level noted?
4. **Habitat Description**
   - ☑ Habitat described?
5. **Classification**
   - ☐ All three levels of classification recorded?
6. **Field Log Book**
   - ☐ Field form entries consistent with log book?
   - ☐ Logbook clearly identifies the Field Target ID and Feature ID?

Wetland Determination Form QA/QC Checklist

This form to be completed before leaving the field site.

Feature ID: W60T1061 Field Target: 214 Date: 9/7/14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. **Site Description**

   ☑ Site description, site parameters and summary of findings are complete?
   ☑ A detailed site sketch is included in logbook?

2. **Vegetation**

   ☑ At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
   ☑ Vegetation names are entered legibly for all strata present?
   ☑ Cover calculations are complete and correct?
   ☐ All dominant species have been determined and recorded per strata?
   ☐ Indicator status is correct for each species?
   ☐ Dominance Test and Prevalence Index have been completed?

3. **Soil**

   ☐ Soil profile is complete?
   ☑ Appropriate hydric soil indicators are marked?

4. **Hydrology**

   ☑ Appropriate hydrology indicators are marked?
   ☐ Surface water, water table, and saturation depths are recorded if present?

5. **Functions and Values**

   ☐ Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland?

6. **Field Logbook**

   ☑ Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
   ☑ Each logbook page is initialed and dated?

7. **Maps**

   ☑ Wetland boundaries have been corrected if necessary?
   ☐ Maps are initialed and dated?

GL VW

8. **Photos**

☑ Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)?

☐ Two photos were taken for each Observation Point (vegetation/site overview)?

Wetland Determination Form QA/QC Checklist

This form to be completed before leaving the field site.

Feature ID: W10T10102 Field Target: 215 Date: 9/7/14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. **Site Description**

   - ☑ Site description, site parameters and summary of findings are complete?
   - ☑ A detailed site sketch is included in logbook?

2. **Vegetation**

   - ☑ At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
   - ☑ Vegetation names are entered legibly for all strata present?
   - ☑ Cover calculations are complete and correct?
   - ☑ All dominant species have been determined and recorded per strata?
   - ☑ Indicator status is correct for each species?
   - ☑ Dominance Test and Prevalence Index have been completed?

3. **Soil**

   - ☑ Soil profile is complete?
   - ☑ Appropriate hydric soil indicators are marked?

4. **Hydrology**

   - ☑ Appropriate hydrology indicators are marked?
   - ☑ Surface water, water table, and saturation depths are recorded if present?

5. **Functions and Values**

   - ☑ Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland?

6. **Field Logbook**

   - ☑ Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
   - ☑ Each logbook page is initialed and dated?

7. **Maps**

   - ☑ Wetland boundaries have been corrected if necessary?
   - ☑ Maps are initialed and dated?

QC
VW

8. Photos

☑ Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)?

☑ Two photos were taken for each Observation Point (vegetation/site overview)?

Wetland Determination Form QA/QC Checklist

This form to be completed before leaving the field site.

Feature ID: W600110164 Field Target: 217 Date: 9/7/14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. Site Description

- ☑ Site description, site parameters and summary of findings are complete?
- ☑ A detailed site sketch is included in logbook?

2. Vegetation

- ☑ At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
- ☐ Vegetation names are entered legibly for all strata present?
- ☑ Cover calculations are complete and correct?
- ☑ All dominant species have been determined and recorded per strata?
- ☑ Indicator status is correct for each species?
- ☐ Dominance Test and Prevalence Index have been completed?

3. Soil

- ☑ Soil profile is complete?
- ☐ Appropriate hydric soil indicators are marked?

4. Hydrology

- ☑ Appropriate hydrology indicators are marked?
- ☑ Surface water, water table, and saturation depths are recorded if present?

5. Functions and Values

- ☐ Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland?

6. Field Logbook

- ☐ Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
- ☐ Each logbook page is initialed and dated?

7. Maps

- ☐ Wetland boundaries have been corrected if necessary?
- ☐ Maps are initialed and dated?

GL MW

8. **Photos**

☑ Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)?

☐ Two photos were taken for each Observation Point (vegetation/site overview)?

Vegetation Classification Data Form

Table I-Alaska vegetation classification to level III

Level I	Level II	Level III
I. Forest	A. Needleleaf (conifer) forest	(1) Closed needleleaf (conifer) forest (2) Open needleleaf (conifer) forest (3) Needleleaf (conifer) woodland
	B. Broadleaf forest	(1) Closed broadleaf forest (2) Open broadleaf forest (3) Broadleaf woodland
	C. Mixed forest	(1) Closed mixed forest (2) Open mixed forest (3) Mixed woodland
II. Scrub	A. Dwarf tree scrub	(1) Closed dwarf tree scrub (2) Open dwarf tree scrub (3) Dwarf tree scrub woodland
	B. Tall scrub	(1) Closed tall scrub (2) Open tall scrub
	C. Low scrub	(1) Closed low scrub (2) Open low scrub
	D. Dwarf scrub	(1) Dryas dwarf scrub (2) Ericaceous dwarf scrub (3) Willow dwarf scrub
III. Herbaceous	A. Graminoid herbaceous	(1) Dry graminoid herbaceous (2) Mesic graminoid herbaceous (3) Wet graminoid herbaceous (emergent)
	B. Forb herbaceous	(1) Dry forb herbaceous (2) Mesic forb herbaceous (3) Wet forb herbaceous (emergent)
	C. Bryoid herbaceous	(1) Mosses (2) Lichens
	D. Aquatic (nonemergent) herbaceous	(1) Freshwater aquatic herbaceous (2) Brackish water aquatic herbaceous (3) Marine aquatic herbaceous

Descriptions of levels I, II, III, and IV follow the classification table

1a.	Trees over 3 meters (10 ft) tall are present and have a canopy cover of 10 percent or more	I. Forest 2
1b.	Trees over 3 meters (10 ft) tall are absent or nearly so. Less than 10 percent cover. (Dwarf trees, less than 3 meters [10 ft] tall may be present and abundant	7
I. Forest		
2a.	Over 75 percent of tree cover contributed by needleleaf (conifer) species	I.A Needleleaf forest 3
2b.	Less than 75 percent of tree cover contributed by needleleaf (conifer) species	4
3a.	Tree canopy of 60-100 percent cover	I.A.1 Closed needleleaf forest
3b.	Tree canopy of 25-59 percent cover	I.A.2 Open needleleaf forest
3c.	Tree canopy of 10-24 percent cover	I.A.3 Needleleaf woodland
4a.	Over 75 percent of tree cover contributed by broadleaf species	I.B Broadleaf forest 5
4b.	Broadleaf or needleleaf species contribute 25 to 75 percent of the tree cover	6
5a.	Tree canopy of 60-100 percent cover	I.B.1 Closed broadleaf forest
5b.	Tree canopy of 25-59 percent cover	I.B.2 Open broadleaf forest
5c.	Tree canopy of 10-24 percent cover	I.B.3 Broadleaf woodland
6a.	Tree canopy of 60-100 percent cover	I.C.1 Closed mixed forest
6b.	Tree canopy of 25-59 percent cover	I.C.2 Open mixed forest
6c.	Tree canopy of 10-24 percent cover	I.C.3 Mixed woodland
7a.	Vegetation with at least 25 percent cover of erect to decumbent shrubs or with at least 10 percent cover of dwarf trees (less than 3 meters [10 ft] tall)	8
7b.	Vegetation herbaceous (may have up to 25 percent shrub cover)	15

II. Scrub		
8a.	Vegetation with at least 10 percent cover of dwarf trees	II.A Dwarf tree scrub 9
8b.	Vegetation with at least 25 percent cover of shrubs and less than 10 percent cover of dwarf trees	10
9a.	Dwarf tree canopy of 60-100 percent cover	II.A.1 Closed dwarf tree scrub
9b.	Dwarf tree canopy of 25-59 percent cover	II.A.2 Open dwarf tree scrub
9c.	Dwarf tree canopy of 10-24 percent cover	II.A.3 Dwarf tree scrub woodland
10a.	Shrubs more than 1.5 meters (5 ft) tall	II.B Tall scrub 11
10b.	Shrubs less than 1.5 meters (5 ft) tall	12
11a.	Shrub canopy cover greater than 75 percent	II.B.1 Closed tall scrub
11b.	Shrub canopy cover of 25-74 percent	II.B.2 Open tall scrub
12a.	Shrubs 20 centimeters to 1.5 meters tall	II.C Low scrub 13
12b.	Shrubs under 20 centimeters in height	II.D Dwarf scrub 14
13a.	Shrub canopy cover greater than 75 percent	II.C.1 Closed low scrub
13b.	Shrub canopy cover of 25-74 percent, or as low as 2 percent if little or no other vegetation cover present	II.C.2 Open low scrub
14a.	Dryas species dominant in the dwarf shrub layer	II.D.1 Dryas dwarf scrub
14b.	Ericaceous species dominant in the dwarf shrub layer	II.D.2 Ericaceous dwarf scrub
14c.	Willow species dominant in the dwarf scrub layer	II.D.2 Willow dwarf scrub
III. Herbaceous		
15a.	Terrestrial vegetation, or if growing in the water, dominated by emergent vegetation	16
15b.	Dominant vegetation growing submerged in water or floating on the water surface, but not emerging above the water	III.D Aquatic herbaceous 21

16a.	Grasses, sedges, or rushes (graminoid) plants dominant	III.A Graminoid herbaceous 17
16b.	Forbs or bryophytes dominant	18
17a.	Grasslands of well-drained, dry sites, such as south-facing bluffs, old beaches, and sand dunes. Typically (but not always) dominated by *Elymus* spp., *Festuca* spp., and *Deschampsia* spp.	III.A.1 Dry graminoid herbaceous
17b.	On moist sites, but usually not with standing water. Usually dominated by *Calamagrostis* spp., *Carex* spp. or *Eriophorum* spp.; tussocks often present	III.A.2 Mesic graminoid herbaceous
17c.	On wet sites, standing water present for part of the year; dominated by either sedges or grasses; includes wet tundra bogs, marshes, and fens	III.A.3 Wet graminoid herbaceous
18a.	Vegetation dominated by forbs (broadleaf herbs, ferns, or horsetails)	III.B Forb herbaceous 19
18b.	Vegetation dominated by mosses or lichens	III.C Bryoid herbaceous 20
19a.	On dry sites, usually rocky and well drained; mostly tundra sites	III.B.1 Dry forb herbaceous
19b.	On moist sites but without standing water, mostly within forested areas	III.B.2 Mesic forb herbaceous
19c.	On wet sites, usually with standing water for part of the year	III.B.3 Wet forb herbaceous
20a.	Vegetation cover dominated by mosses	III.C.1 Bryoid moss
20b.	Vegetation cover dominated by lichens	III.C.2 Bryoid lichen
21a.	Vegetation submerged or floating in fresh water	III.D.1 Freshwater aquatic herbaceous
21b.	Vegetation submerged or floating in brackish water	III.D.2 Brackish water aquatic herbaceous
21c.	Vegetation submerged or floating in salt water	III.D.3 Marine aquatic herbaceous

Vegetation Classification Data Form QA/QC Checklist

This form is to be completed before leaving the field site.

Feature ID: WGST1066-14 Field Target: 219 Date: 9/7/14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. **General Information**
   - ☑ Location data recorded?
   - ☑ Photo taken and photo number recorded?
2. **Location Description**
   - ☑ Location of site recorded with enough detail to help relocate?
3. **Common Species**
   - ☑ Scientific name of common species recorded?
   - ☑ Percent cover of dominant structure level noted?
4. **Habitat Description**
   - ☑ Habitat described?
5. **Classification**
   - ☑ All three levels of classification recorded?
6. **Field Log Book**
   - ☑ Field form entries consistent with log book?
   - ☑ Logbook clearly identifies the Field Target ID and Feature ID?

Wetland Determination Form QA/QC Checklist

This form to be completed before leaving the field site.

Feature ID: 4160T1047 Field Target: 221 Date: 9/8/14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. Site Description

☑ Site description, site parameters and summary of findings are complete?
☑ A detailed site sketch is included in logbook?

2. Vegetation

☑ At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
☑ Vegetation names are entered legibly for all strata present?
☑ Cover calculations are complete and correct?
☑ All dominant species have been determined and recorded per strata?
☑ Indicator status is correct for each species?
☐ Dominance Test and Prevalence Index have been completed?

3. Soil

☑ Soil profile is complete?
☑ Appropriate hydric soil indicators are marked?

4. Hydrology

☑ Appropriate hydrology indicators are marked?
☑ Surface water, water table, and saturation depths are recorded if present?

5. Functions and Values

☑ Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland?

6. Field Logbook

☑ Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
☑ Each logbook page is initialed and dated?

7. Maps

☑ Wetland boundaries have been corrected if necessary?
☑ Maps are initialed and dated?

QL
VW

8. Photos

☐ Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)?

☐ Two photos were taken for each Observation Point (vegetation/site overview)?

Wetland Determination Form QA/QC Checklist

This form to be completed before leaving the field site.

Feature ID: W60T1068 Field Target: ~~180~~ 220 Date: 9/8/14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. Site Description

- ☑ Site description, site parameters and summary of findings are complete?
- ☑ A detailed site sketch is included in logbook?

2. Vegetation

- ☑ At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
- ☐ Vegetation names are entered legibly for all strata present?
- ☑ Cover calculations are complete and correct?
- ☑ All dominant species have been determined and recorded per strata?
- ☑ Indicator status is correct for each species?
- ☑ Dominance Test and Prevalence Index have been completed?

3. Soil

- ☑ Soil profile is complete?
- ☐ Appropriate hydric soil indicators are marked? NA

4. Hydrology

- ☑ Appropriate hydrology indicators are marked?
- ☑ Surface water, water table, and saturation depths are recorded if present?

5. Functions and Values

- ☑ Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland?

6. Field Logbook

- ☑ Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
- ☑ Each logbook page is initialed and dated?

7. Maps

- ☑ Wetland boundaries have been corrected if necessary?
- ☐ Maps are initialed and dated?

QC VW

8. **Photos**

- ☑ Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)?
- ☐ Two photos were taken for each Observation Point (vegetation/site overview)?

For all items not checked, please provide detailed explanation in the notes section of data form.

1. **Site Description**

   ☑ Site description, site parameters and summary of findings are complete?
   ☑ A detailed site sketch is included in logbook?

2. **Vegetation**

   ☑ At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
   ☑ Vegetation names are entered legibly for all strata present?
   ☑ Cover calculations are complete and correct?
   ☑ All dominant species have been determined and recorded per strata?
   ☑ Indicator status is correct for each species?
   ☐ Dominance Test and Prevalence Index have been completed?

3. **Soil**

   ☑ Soil profile is complete?
   ☑ Appropriate hydric soil indicators are marked?

4. **Hydrology**

   ☑ Appropriate hydrology indicators are marked?
   ☑ Surface water, water table, and saturation depths are recorded if present?

5. **Functions and Values**

   ☑ Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland?

6. **Field Logbook**

   ☑ Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
   ☑ Each logbook page is initialed and dated?

7. **Maps**

   ☑ Wetland boundaries have been corrected if necessary?
   ☑ Maps are initialed and dated?

QC VW

8. Photos

☑ Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)?

☐ Two photos were taken for each Observation Point (vegetation/site overview)?

Vegetation Classification Data Form

Site Description		
Date: 9/8/14	Project Name & #: Alaska LNG 26221306	Field Target: 225
Investigators: JC, JA		Feature ID: W60T1071
Latitude: 60°45'36.48	Longitude: 150°18'51.27	Datum: WGS84
Logbook #: W60-4	Logbook Page #:	Picture #: W60T1071_001002-W,S,

Location Description:

Terrace Adj to Krumb Rec Area

Common Species Observed (Scientific Name)

Betula Neoalnskanen	Equisetum Sylvaticum
Picea Glauca	Equisetum Arvense
Rosa Acicularis	Ribes Triste
Cornus Canadensis	

Percent Cover of Dominant Structure Level: 60-70%

Habitat Description:

Mixed Forest Upland

Alaska Vegetation Classification: Level I, Level II, Level III

~~I~~	II	C	B	~~3~~	~~2~~

I C3
II B2

Vegetation Classification Data Form

Table I-Alaska vegetation classification to level III

Level I	Level II	Level III
I. Forest	A. Needleleaf (conifer) forest	(1) Closed needleleaf (conifer) forest (2) Open needleleaf (conifer) forest (3) Needleleaf (conifer) woodland
	B. Broadleaf forest	(1) Closed broadleaf forest (2) Open broadleaf forest (3) Broadleaf woodland
	C. Mixed forest	(1) Closed mixed forest (2) Open mixed forest (3) Mixed woodland
II. Scrub	A. Dwarf tree scrub	(1) Closed dwarf tree scrub (2) Open dwarf tree scrub (3) Dwarf tree scrub woodland
	B. Tall scrub	(1) Closed tall scrub (2) Open tall scrub
	C. Low scrub	(1) Closed low scrub (2) Open low scrub
	D. Dwarf scrub	(1) Dryas dwarf scrub (2) Ericaceous dwarf scrub (3) Willow dwarf scrub
III. Herbaceous	A. Graminoid herbaceous	(1) Dry graminoid herbaceous (2) Mesic graminoid herbaceous (3) Wet graminoid herbaceous (emergent)
	B. Forb herbaceous	(1) Dry forb herbaceous (2) Mesic forb herbaceous (3) Wet forb herbaceous (emergent)
	C. Bryoid herbaceous	(1) Mosses (2) Lichens
	D. Aquatic (nonemergent) herbaceous	(1) Freshwater aquatic herbaceous (2) Brackish water aquatic herbaceous (3) Marine aquatic herbaceous

Descriptions of levels I, II, III, and IV follow the classification table.

1a.	Trees over 3 meters (10 ft) tall are present and have a canopy cover of 10 percent or more	I. Forest 2
1b.	Trees over 3 meters (10 ft) tall are absent or nearly so. Less than 10 percent cover. (Dwarf trees, less than 3 meters [10 ft] tall may be present and abundant	7
I. Forest		
2a.	Over 75 percent of tree cover contributed by needleleaf (conifer) species	I.A Needleleaf forest 3
2b.	Less than 75 percent of tree cover contributed by needleleaf (conifer) species	4
3a.	Tree canopy of 60-100 percent cover	I.A.1 Closed needleleaf forest
3b.	Tree canopy of 25-59 percent cover	I.A.2 Open needleleaf forest
3c.	Tree canopy of 10-24 percent cover	I.A.3 Needleleaf woodland
4a.	Over 75 percent of tree cover contributed by broadleaf species	I.B Broadleaf forest 5
4b.	Broadleaf or needleleaf species contribute 25 to 75 percent of the tree cover	6
5a.	Tree canopy of 60-100 percent cover	**I.B.1 Closed broadleaf forest**
5b.	Tree canopy of 25-59 percent cover	**I.B.2 Open broadleaf forest**
5c.	Tree canopy of 10-24 percent cover	I.B.3 Broadleaf woodland
6a.	Tree canopy of 60-100 percent cover	I.C.1 Closed mixed forest
6b.	Tree canopy of 25-59 percent cover	I.C.2 Open mixed forest
6c.	Tree canopy of 10-24 percent cover	I.C.3 Mixed woodland
7a.	Vegetation with at least 25 percent cover of erect to decumbent shrubs or with at least 10 percent cover of dwarf trees (less than 3 meters [10 ft] tall)	8
7b.	Vegetation herbaceous (may have up to 25 percent shrub cover)	15
II. Scrub		
8a.	Vegetation with at least 10 percent cover of dwarf trees	II.A Dwarf tree scrub 9
8b.	Vegetation with at least 25 percent cover of shrubs and less than 10 percent cover of dwarf trees	10
9a.	Dwarf tree canopy of 60-100 percent cover	**II.A.1 Closed dwarf tree scrub**
9b.	Dwarf tree canopy of 25-59 percent cover	**II.A.2 Open dwarf tree scrub**
9c.	Dwarf tree canopy of 10-24 percent cover	II.A.3 Dwarf tree scrub woodland
10a.	Shrubs more than 1.5 meters (5 ft) tall	II.B Tall scrub 11
10b.	Shrubs less than 1.5 meters (5 ft) tall	12
11a.	Shrub canopy cover greater than 75 percent	**II.B.1 Closed tall scrub**
11b.	Shrub canopy cover of 25-74 percent	II.B.2 Open tall scrub
12a.	Shrubs 20 centimeters to 1.5 meters tall	II.C Low scrub 13
12b.	Shrubs under 20 centimeters in height	II.D Dwarf scrub 14
13a.	Shrub canopy cover greater than 75 percent	II.C.1 Closed low scrub
13b.	Shrub canopy cover of 25-74 percent, or as low as 2 percent if little or no other vegetation cover present	II.C.2 Open low scrub
14a.	Dryas species dominant in the dwarf shrub layer	**II.D.1 Dryas dwarf scrub**
14b.	Ericaceous species dominant in the dwarf shrub layer	II.D.2 Ericaceous dwarf scrub
14c.	Willow species dominant in the dwarf scrub layer	II.D.2 Willow dwarf scrub
III. Herbaceous		
15a.	Terrestrial vegetation, or if growing in the water, dominated by emergent vegetation	16
15b.	Dominant vegetation growing submerged in water or floating on the water surface, but not emerging above the water	III.D Aquatic herbaceous 21
16a.	Grasses, sedges, or rushes (graminoid) plants dominant	III.A Graminoid herbaceous 17
16b.	Forbs or bryophytes dominant	18
17a.	Grasslands of well-drained, dry sites, such as south-facing bluffs, old beaches, and sand dunes. Typically (but not always) dominated by *Elymus* spp., *Festuca* spp., and *Deschampsia* spp.	III.A.1 Dry graminoid herbaceous
17b.	On moist sites, but usually not with standing water. Usually dominated by *Calamagrostis* spp., *Carex* spp. or *Eriophorum* spp.; tussocks often present	III.A.2 Mesic graminoid herbaceous
17c.	On wet sites, standing water present for part of the year; dominated by either sedges or grasses; includes wet tundra, bogs, marshes, and fens	III.A.3 Wet graminoid herbaceous
18a.	Vegetation dominated by forbs (broadleaf herbs, ferns, or horsetails)	III.B Forb herbaceous 19
18b.	Vegetation dominated by mosses or lichens	III.C Bryoid herbaceous 20
19a.	On dry sites, usually rocky and well drained; mostly tundra sites	III.B.1 Dry forb herbaceous
19b.	On moist sites but without standing water, mostly within forested areas	III.B.2 Mesic forb herbaceous
19c.	On wet sites, usually with standing water for part of the year	III.B.3 Wet forb herbaceous
20a.	Vegetation cover dominated by mosses	III.C.1 Bryoid moss
20b.	Vegetation cover dominated by lichens	III.C.2 Bryoid lichen
21a.	Vegetation submerged or floating in fresh water	III.D.1 Freshwater aquatic herbaceous
21b.	Vegetation submerged or floating in brackish water	III.D.2 Brackish water aquatic herbaceous
21c.	Vegetation submerged or floating in salt water	III.D.3 Marine aquatic herbaceous

Vegetation Classification Data Form QA/QC Checklist

This form is to be completed before leaving the field site.

W60T107 [illegible] -veg

Feature ID: [illegible] Field Target: 225 Date: 9/8/14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. **General Information**
   - ☑ Location data recorded?
   - ☑ Photo taken and photo number recorded?
2. **Location Description**
   - ☑ Location of site recorded with enough detail to help relocate?
3. **Common Species**
   - ☑ Scientific name of common species recorded?
   - ☑ Percent cover of dominant structure level noted?
4. **Habitat Description**
   - ☑ Habitat described?
5. **Classification**
   - ☑ All three levels of classification recorded?
6. **Field Log Book**
   - ☑ Field form entries consistent with log book?
   - ☑ Logbook clearly identifies the Field Target ID and Feature ID?

Descriptions of levels I, II, III, and IV follow the classification table.

1a. Trees over 3 meters (10 ft) tall are present and have a canopy cover of 10 percent or more ..... I Forest 2

1b. Trees over 3 meters (10 ft) tall are absent or nearly so, Less than 10 percent cover. (Dwarf trees, less than 3 meters [10 ft] tall may be present and abundant 7

I Forest

2a. Over 75 percent of tree cover contributed by needleleaf (conifer) species ..... I.A Needleleaf forest 3

2b. Less than 75 percent of tree cover contributed by needleleaf (conifer) species 4

3a Tree canopy of 60-100 percent cover ..... I.A 1 Closed needleleaf forest

3b Tree canopy of 25-59 percent cover ..... I.A.2 Open needleleaf forest

3c. Tree canopy of 10-24 percent cover ..... I.A 3 Needleleaf woodland

4a Over 75 percent of tree cover contributed by broadleaf species ..... I B Broadleaf forest 5

4b Broadleaf or needleleaf species contribute 25 to 75 percent of the tree cover 6

5a Tree canopy of 60-100 percent cover ..... I B.1 Closed broadleaf forest

5b Tree canopy of 25-59 percent cover ..... I B.2 Open broadleaf forest

5c Tree canopy of 10-24 percent cover ..... I B 3 Broadleaf woodland

6a Tree canopy of 60-100 percent cover ..... I C 1 Closed mixed forest

6b Tree canopy of 25-59 percent cover ..... I.C.2 Open mixed forest

6c Tree canopy of 10-24 percent cover ..... I C 3 Mixed woodland

7a Vegetation with at least 25 percent cover of erect to decumbent shrubs or with at least 10 percent cover of dwarf trees (less than 3 meters [10 ft] tall) 8

7b. Vegetation herbaceous (may have up to 25 percent shrub cover) 15

II Scrub

8a. Vegetation with at least 10 percent cover of dwarf trees ..... II A Dwarf tree scrub 9

8b Vegetation with at least 25 percent **cover of shrubs and less than** 10 percent cover of dwarf trees 10

9a. Dwarf tree canopy of 60-100 percent cover ..... II.A.1 Closed dwarf tree scrub

9b Dwarf tree canopy of 25-59 percent cover ..... II.A.2 Open dwarf tree scrub

9c Dwarf tree canopy of 10-24 percent cover ..... II A 3 Dwarf tree scrub woodland

10a Shrubs more than 1.5 meters (5 ft) tall ..... II B Tall scrub 11

10b. Shrubs less than 1.5 meters (5 ft) tall 12

11 a Shrub canopy cover greater than 75 percent. ..... II.B.1 Closed tall scrub

11 b Shrub canopy cover of 25-74 percent ..... II B.2 Open tall scrub

12a Shrubs 20 centimeters to 1.5 meters tall ..... II.C Low scrub 13

12b Shrubs under 20 centimeters in height ..... II.D Dwarf scrub 14

13a. Shrub canopy cover greater than 75 percent ..... II C.1 Closed low scrub

13b Shrub canopy cover of 25-74 percent, or as low as 2 percent if little or no other vegetation cover present ..... II C 2 Open low scrub

14a. Dryas species dominant in the dwarf shrub layer ..... II.D.1 Dryas dwarf scrub

14b Ericaceous species dominant in the dwarf shrub layer ..... II D.2 Ericaceous dwarf scrub

14c Willow species dominant in the dwarf scrub layer ..... II.D.2 Willow dwarf scrub

III Herbaceous

15a Terrestrial vegetation, or if growing in the water, dominated by emergent vegetation 16

15b Dominant vegetation growing submerged in water or floating on the water surface, but not emerging above the water ..... III.D Aquatic herbaceous 21

16a. Grasses, sedges, or rushes (graminoid) plants dominant ..... III.A Graminoid herbaceous 17

16b Forbs or bryophytes dominant 18

17a Grasslands of well-drained, dry sites, such as south-facing bluffs, old beaches, and sand dunes Typically (but not always) dominated by *Elymus* spp., *Festuca* spp., and *Deschampsia* spp ..... III A.1 Dry graminoid herbaceous

17b On moist sites, but usually not with standing water Usually dominated by *Calamagrostis* spp., *Carex* spp. or *Eriophorum* spp., tussocks often present ..... III A.2 Mesic graminoid herbaceous

17c. On wet sites, standing water present for part of the year; dominated by either sedges or grasses; includes wet tundra, bogs, marshes, and fens ..... III A.3 Wet graminoid herbaceous

18a Vegetation dominated by forbs (broadleaf herbs, ferns, or horsetails) ..... III.B Forb herbaceous 19

18b Vegetation dominated by mosses or lichens ..... III.C Bryoid herbaceous 20

19a On dry sites, usually rocky and well drained; mostly tundra sites ..... III.B.1 Dry forb herbaceous

19b. On moist sites but without standing water, mostly within forested areas ..... III.B.2 Mesic forb herbaceous

19c. On wet sites, usually with standing water for part of the year ..... III.B.3 Wet forb herbaceous

20a Vegetation cover dominated by mosses ..... III.C.1 Bryoid moss

20b Vegetation cover dominated by lichens ..... III.C.2 Bryoid lichen

21a. Vegetation submerged or floating in fresh water. ..... III.D.1 Freshwater aquatic herbaceous

21 b. Vegetation submerged or floating in brackish water ..... III.D.2 Brackish water aquatic herbaceous

21c Vegetation submerged or floating in salt water ..... III D.3 Marine aquatic herbaceous

Wetland Determination Form QA/QC Checklist

This form to be completed before leaving the field site.

Feature ID: WG1CH001 Field Target: CP1 Date: 6/7/14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. **Site Description**

- ☑ Site description, site parameters and summary of findings are complete?
- ☑ A detailed site sketch is included in logbook?

2. **Vegetation**

- ☑ At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
- ☑ Vegetation names are entered legibly for all strata present?
- ☑ Cover calculations are complete and correct?
- ☑ All dominant species have been determined and recorded per strata?
- ☑ Indicator status is correct for each species?
- ☑ Dominance Test and Prevalence Index have been completed?

3. **Soil**

- ☑ Soil profile is complete?
- ☑ Appropriate hydric soil indicators are marked?

4. **Hydrology**

- ☑ Appropriate hydrology indicators are marked?
- ☑ Surface water, water table, and saturation depths are recorded if present?

5. **Functions and Values**

- ☑ Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland?

6. **Field Logbook**

- ☑ Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
- ☑ Each logbook page is initialed and dated?

7. **Maps**

- ☑ Wetland boundaries have been corrected if necessary?
- ☑ Maps are initialed and dated?

8. Photos

☑ Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)?

☐ Two photos were taken for each Observation Point (vegetation/site overview)?

Wetland Determination Form QA/QC Checklist

This form to be completed before leaving the field site.

Feature ID: ~~WG1LH006~~ WG1LH003 KF Field Target: 003 Date: 6/7/14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. **Site Description**

- ☑ Site description, site parameters and summary of findings are complete?
- ☑ A detailed site sketch is included in logbook?

2. **Vegetation**

- ☑ At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
- ☑ Vegetation names are entered legibly for all strata present?
- ☑ Cover calculations are complete and correct?
- ☑ All dominant species have been determined and recorded per strata?
- ☑ Indicator status is correct for each species?
- ☑ Dominance Test and Prevalence Index have been completed?

3. **Soil**

- ☑ Soil profile is complete?
- ☑ Appropriate hydric soil indicators are marked?

4. **Hydrology**

- ☑ Appropriate hydrology indicators are marked?
- ☐ Surface water, water table, and saturation depths are recorded if present?

5. **Functions and Values**

- ☑ Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland?

6. **Field Logbook**

- ☑ Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
- ☑ Each logbook page is initialed and dated?

7. **Maps**

- ☐ Wetland boundaries have been corrected if necessary?
- ☑ Maps are initialed and dated?

8. **Photos**

☑ Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)?

☑ Two photos were taken for each Observation Point (vegetation/site overview)?

Wetland Determination Form QA/QC Checklist

This form to be completed before leaving the field site.

Feature ID: W61 LH005 ~~006~~ Field Target: 005 Date: 6/8/17

For all items not checked, please provide detailed explanation in the notes section of data form.

1. Site Description

- [x] Site description, site parameters and summary of findings are complete?
- [x] ~~A~~ detailed site sketch is included in logbook?

2. Vegetation

- [x] At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
- [x] Vegetation names are entered legibly for all strata present?
- [x] Cover calculations are complete and correct?
- [x] All dominant species have been determined and recorded per strata?
- [x] Indicator status is correct for each species?
- [x] Dominance Test and Prevalence Index have been completed?

3. Soil

- [x] Soil profile is complete?
- [x] Appropriate hydric soil indicators are marked?

4. Hydrology

- [x] Appropriate hydrology indicators are marked?
- [x] Surface water, water table, and saturation depths are recorded if present?

5. Functions and Values

- [x] Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland?

6. Field Logbook

- [x] Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
- [x] Each logbook page is initialed and dated?

7. Maps

- [x] Wetland boundaries have been corrected if necessary?
- [x] Maps are initialed and dated?

8. **Photos**

- [x] Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)?
- [ ] Two photos were taken for each Observation Point (vegetation/site overview)?

Wetland Determination Form QA/QC Checklist

This form to be completed before leaving the field site.

Feature ID: W61 LH014 007 Field Target: 007 Date: 6/8/14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. Site Description

- [x] Site description, site parameters and summary of findings are complete?
- [x] A detailed site sketch is included in logbook?

2. Vegetation

- [x] At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
- [x] Vegetation names are entered legibly for all strata present?
- [x] Cover calculations are complete and correct?
- [x] All dominant species have been determined and recorded per strata?
- [x] Indicator status is correct for each species?
- [x] Dominance Test and Prevalence Index have been completed?

3. Soil

- [x] Soil profile is complete?
- [x] Appropriate hydric soil indicators are marked?

4. Hydrology

- [x] Appropriate hydrology indicators are marked?
- [x] Surface water, water table, and saturation depths are recorded if present?

5. Functions and Values

- [x] Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland?

6. Field Logbook

- [x] Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
- [x] Each logbook page is initialed and dated?

7. Maps

- [x] Wetland boundaries have been corrected if necessary?
- [x] Maps are initialed and dated?

8. Photos

☒ Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)?

☒ Two photos were taken for each Observation Point (vegetation/site overview)?

   - [x] A detailed site sketch is included in logbook?

2. **Vegetation**

   - [x] At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
   - [x] Vegetation names are entered legibly for all strata present?
   - [x] Cover calculations are complete and correct?
   - [x] All dominant species have been determined and recorded per strata?
   - [x] Indicator status is correct for each species?
   - [x] Dominance Test and Prevalence Index have been completed?

3. **Soil**

   - [x] Soil profile is complete?
   - [x] Appropriate hydric soil indicators are marked?

4. **Hydrology**

   - [x] Appropriate hydrology indicators are marked?
   - [x] Surface water, water table, and saturation depths are recorded if present?

5. **Functions and Values**

   - [x] Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland? – Non wetland

6. **Field Logbook**

   - [x] Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
   - [x] Each logbook page is initialed and dated?

7. **Maps**

   - [x] Wetland boundaries have been corrected if necessary?
   - [x] Maps are initialed and dated?

8. Photos

☒ Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)?

☒ Two photos were taken for each Observation Point (vegetation/site overview)?

Vegetation Classification Data Form

Site Description		
Date: 6/9/14	Project Name & #: Alaska LNG 26221306	Field Target: 009
Investigators: K DEGUTIS J Anderson		Feature ID: ~~W61LH015~~ W61LH009
Latitude:	Longitude:	Datum: WGS84
Logbook #: W61-1	Logbook Page #: 10	Picture #: W61LH015_SW, SE
Location Description:		
on edge of burn area, co-located w/survey stake LH-017		
Common Species Observed (Scientific Name)		
VACCINIUM vitis-idaea	Arctous rubra	
VACCINIUM uliginosum		
Rhododendron groenlandicum		
Picea mariana		
Percent Cover of Dominant Structure Level: 134		
Habitat Description:		
Edge of burn area, Picea mariana starting to re-establish. No indications of burn PI-DEGS, drier wetland veg.		
Alaska Vegetation Classification: Level I, Level II, Level III		
IIC1	~~IIB2~~ IA2 W	
Notes:		
Soils do not satisfy histic epipedon (lack 8" SAT organics)		

Field Crew Chief: Kimberly DEGUTIS Fi W61LH009

- only wetland point collected
- no veg point
- veg data is same as on wetland form

Vegetation Classification Data Form

Table I-Alaska vegetation classification to level III

Level I	Level II	Level III
I. Forest	A. Needleleaf (conifer) forest	(1) Closed needleleaf (conifer) forest (2) Open needleleaf (conifer) forest (3) Needleleaf (conifer) woodland
	B. Broadleaf forest	(1) Closed broadleaf forest (2) Open broadleaf forest (3) Broadleaf woodland
	C. Mixed forest	(1) Closed mixed forest (2) Open mixed forest (3) Mixed woodland
II. Scrub	A. Dwarf tree scrub	(1) Closed dwarf tree scrub (2) Open dwarf tree scrub (3) Dwarf tree scrub woodland
	B. Tall scrub	(1) Closed tall scrub (2) Open tall scrub
	C. Low scrub	(1) Closed low scrub (2) Open low scrub
	D. Dwarf scrub	(1) Dryas dwarf scrub (2) Ericaceous dwarf scrub (3) Willow dwarf scrub
III. Herbaceous	A. Graminoid herbaceous	(1) Dry graminoid herbaceous (2) Mesic graminoid herbaceous (3) Wet graminoid herbaceous (emergent)
	B. Forb herbaceous	(1) Dry forb herbaceous (2) Mesic forb herbaceous (3) Wet forb herbaceous (emergent)
	C. Bryoid herbaceous	(1) Mosses (2) Lichens
	D. Aquatic (nonemergent) herbaceous	(1) Freshwater aquatic herbaceous (2) Brackish water aquatic herbaceous (3) Marine aquatic herbaceous

Descriptions of levels I, II, III, and IV follow the classification table.

1a.	Trees over 3 meters (10 ft) tall are present and have a canopy cover of 10 percent or more	I. Forest 2
1b.	Trees over 3 meters (10 ft) tall are absent or nearly so. Less than 10 percent cover. (Dwarf trees, less than 3 meters [10 ft] tall may be present and abundant	7
I. Forest		
2a.	Over 75 percent of tree cover contributed by needleleaf (conifer) species	I.A Needleleaf forest 3
2b.	Less than 75 percent of tree cover contributed by needleleaf (conifer) species	4
3a.	Tree canopy of 60-100 percent cover	I.A.1 Closed needleleaf forest
3b.	Tree canopy of 25-59 percent cover	I.A.2 Open needleleaf forest
3c.	Tree canopy of 10-24 percent cover	I.A.3 Needleleaf woodland
4a.	Over 75 percent of tree cover contributed by broadleaf species	I.B Broadleaf forest 5
4b.	Broadleaf or needleleaf species contribute 25 to 75 percent of the tree cover	6
5a.	Tree canopy of 60-100 percent cover	I.B.1 Closed broadleaf forest
5b.	Tree canopy of 25-59 percent cover	I.B.2 Open broadleaf forest
5c.	Tree canopy of 10-24 percent cover	I.B.3 Broadleaf woodland
6a.	Tree canopy of 60-100 percent cover	I.C.1 Closed mixed forest
6b.	Tree canopy of 25-59 percent cover	I.C.2 Open mixed forest
6c.	Tree canopy of 10-24 percent cover	I.C.3 Mixed woodland
7a.	Vegetation with at least 25 percent cover of erect to decumbent shrubs or with at least 10 percent cover of dwarf trees (less than 3 meters [10 ft] tall)	8
7b.	Vegetation herbaceous (may have up to 25 percent shrub cover)	15

II. Scrub		
8a.	Vegetation with at least 10 percent cover of dwarf trees	II.A Dwarf tree scrub 9
8b.	Vegetation with at least 25 percent cover of shrubs and less than 10 percent cover of dwarf trees	10
9a.	Dwarf tree canopy of 60-100 percent cover	II.A.1 Closed dwarf tree scrub
9b.	Dwarf tree canopy of 25-59 percent cover	II.A.2 Open dwarf tree scrub
9c.	Dwarf tree canopy of 10-24 percent cover	II.A.3 Dwarf tree scrub woodland
10a.	Shrubs more than 1.5 meters (5 ft) tall	II.B Tall scrub 11
10b.	Shrubs less than 1.5 meters (5 ft) tall	12
11a.	Shrub canopy cover greater than 75 percent	II.B.1 Closed tall scrub
11b.	Shrub canopy cover of 25-74 percent	II.B.2 Open tall scrub
12a.	Shrubs 20 centimeters to 1.5 meters tall	II.C Low scrub 13
12b.	Shrubs under 20 centimeters in height	II.D Dwarf scrub 14
13a.	Shrub canopy cover greater than 75 percent	II.C.1 Closed low scrub
13b.	Shrub canopy cover of 25-74 percent, or as low as 2 percent if little or no other vegetation cover present	II.C.2 Open low scrub
14a.	Dryas species dominant in the dwarf shrub layer	II.D.1 Dryas dwarf scrub
14b.	Ericaceous species dominant in the dwarf shrub layer	II.D.2 Ericaceous dwarf scrub
14c.	Willow species dominant in the dwarf scrub layer	II.D.2 Willow dwarf scrub
III. Herbaceous		
15a.	Terrestrial vegetation, or if growing in the water, dominated by emergent vegetation	16
15b.	Dominant vegetation growing submerged in water or floating on the water surface, but not emerging above the water	III.D Aquatic herbaceous 21

16a.	Grasses, sedges, or rushes (graminoid) plants dominant	III.A Graminoid herbaceous 17
16b.	Forbs or bryophytes dominant	18
17a.	Grasslands of well-drained, dry sites, such as south-facing bluffs, old beaches, and sand dunes. Typically (but not always) dominated by *Elymus* spp., *Festuca* spp., and *Deschampsia* spp.	III.A.1 Dry graminoid herbaceous
17b.	On moist sites, but usually not with standing water. Usually dominated by *Calamagrostis* spp., *Carex* spp. or *Enophorum* spp.; tussocks often present	III.A.2 Mesic graminoid herbaceous
17c.	On wet sites, standing water present for part of the year; dominated by either sedges or grasses; includes wet tundra, bogs, marshes, and fens	III.A.3 Wet graminoid herbaceous
18a.	Vegetation dominated by forbs (broadleaf herbs, ferns, or horsetails)	III.B Forb herbaceous 19
18b.	Vegetation dominated by mosses or lichens	III.C Bryoid herbaceous 20
19a.	On dry sites, usually rocky and well drained, mostly tundra sites	III.B.1 Dry forb herbaceous
19b.	On moist sites but without standing water, mostly within forested areas	III.B.2 Mesic forb herbaceous
19c.	On wet sites, usually with standing water for part of the year	III.B.3 Wet forb herbaceous
20a.	Vegetation cover dominated by mosses	III.C.1 Bryoid moss
20b.	Vegetation cover dominated by lichens	III.C.2 Bryoid lichen
21a.	Vegetation submerged or floating in fresh water	III.D.1 Freshwater aquatic herbaceous
21b.	Vegetation submerged or floating in brackish water	III.D.2 Brackish water aquatic herbaceous
21c.	Vegetation submerged or floating in salt water	III.D.3 Marine aquatic herbaceous

Vegetation Classification Data Form QA/QC Checklist

This form is to be completed before leaving the field site.

Feature ID: WELLHOUSE 07 (MA) Field Target: 009 Date: 6/9/14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. **General Information**
   - [x] Location data recorded?
   - [x] Photo taken and photo number recorded?
2. **Location Description**
   - [x] Location of site recorded with enough detail to help relocate?
3. **Common Species**
   - [x] Scientific name of common species recorded?
   - [x] Percent cover of dominant structure level noted?
4. **Habitat Description**
   - [x] Habitat described?
5. **Classification**
   - [x] All three levels of classification recorded?
6. **Field Log Book**
   - [x] Field form entries consistent with log book?
   - [x] Logbook clearly identifies the Field Target ID and Feature ID?

Wetland Determination Form QA/QC Checklist

This form to be completed before leaving the field site.

Feature ID: W61LH~~013~~ 007-010 Field Target: 007 Date: 6/8/14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. Site Description

- [x] Site description, site parameters and summary of findings are complete?
- [x] A detailed site sketch is included in logbook?

2. Vegetation

- [x] At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
- [x] Vegetation names are entered legibly for all strata present?
- [x] Cover calculations are complete and correct?
- [x] All dominant species have been determined and recorded per strata?
- [x] Indicator status is correct for each species?
- [x] Dominance Test and Prevalence Index have been completed?

3. Soil

- [x] Soil profile is complete?
- [x] Appropriate hydric soil indicators are marked?

4. Hydrology

- [x] Appropriate hydrology indicators are marked?
- [x] Surface water, water table, and saturation depths are recorded if present?

5. Functions and Values

- [x] Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland?

6. Field Logbook

- [x] Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
- [x] Each logbook page is initialed and dated?

7. Maps

- [x] Wetland boundaries have been corrected if necessary?
- [x] Maps are initialed and dated?

8. Photos

☑ Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)?

☐ Two photos were taken for each Observation Point (vegetation/site overview)?

Wetland Determination Form QA/QC Checklist

This form to be completed before leaving the field site.

Feature ID: ~~W61LH017~~ W61LH011 Field Target: 011 Date: 6/9/14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. Site Description

- [x] Site description, site parameters and summary of findings are complete?
- [x] A detailed site sketch is included in logbook?

2. Vegetation

- [x] At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
- [x] Vegetation names are entered legibly for all strata present?
- [x] Cover calculations are complete and correct?
- [x] All dominant species have been determined and recorded per strata?
- [x] Indicator status is correct for each species?
- [x] Dominance Test and Prevalence Index have been completed?

3. Soil

- [x] Soil profile is complete?
- [x] Appropriate hydric soil indicators are marked?

4. Hydrology

- [x] Appropriate hydrology indicators are marked?
- [x] Surface water, water table, and saturation depths are recorded if present?

5. Functions and Values

- [x] Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland?

6. Field Logbook

- [x] Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
- [x] Each logbook page is initialed and dated?

7. Maps

- [x] Wetland boundaries have been corrected if necessary?
- [x] Maps are initialed and dated?

8. **Photos**

- ☑ Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)?
- ☐ Two photos were taken for each Observation Point (vegetation/site overview)?

Vegetation Classification Data Form

Site Description		
Date: 6/9/14	Project Name & #: Alaska LNG 26221306	Field Target: 011
Investigators: K DEGUTIS J Anderson		Feature ID: ~~W61LH017~~ W61LH011
Latitude:	Longitude:	Datum: WGS84
Logbook #: W61 - 1	Logbook Page #: 11	Picture #: P-W61LH017_SW, SE

Location Description:

Within seven burn area

Common Species Observed (Scientific Name)

Salix glauca	Equisetum pratense
Betula neoalaskana	
Picea mariana (All ≥12")	
Salix scouleriana	

Percent Cover of Dominant Structure Level: 1460

W61LH011 Both wetland and veg forms filled out for this site

Habitat Description:

former Spruce PSS4 B? wetland, spruce bu... ...most of the organic layer - site now in recovery

Alaska Vegetation Classification: Level I, Level II, Level III

II C 1		

Notes:

See logbook

Field Crew Chief: Kim Degutis

Field Scientist/Technician Jennifer Anderson

Vegetation Classification Data Form

Table I-Alaska vegetation classification to level III

Level I	Level II	Level III
I. Forest	A. Needleleaf (conifer) forest	(1) Closed needleleaf (conifer) forest (2) Open needleleaf (conifer) forest (3) Needleleaf (conifer) woodland
	B. Broadleaf forest	(1) Closed broadleaf forest (2) Open broadleaf forest (3) Broadleaf woodland
	C. Mixed forest	(1) Closed mixed forest (2) Open mixed forest (3) Mixed woodland
II. Scrub	A. Dwarf tree scrub	(1) Closed dwarf tree scrub (2) Open dwarf tree scrub (3) Dwarf tree scrub woodland
	B. Tall scrub	(1) Closed tall scrub (2) Open tall scrub
	C. Low scrub	(1) Closed low scrub (2) Open low scrub
	D. Dwarf scrub	(1) Dryas dwarf scrub (2) Ericaceous dwarf scrub (3) Willow dwarf scrub
III. Herbaceous	A. Graminoid herbaceous	(1) Dry graminoid herbaceous (2) Mesic graminoid herbaceous (3) Wet graminoid herbaceous (emergent)
	B. Forb herbaceous	(1) Dry forb herbaceous (2) Mesic forb herbaceous (3) Wet forb herbaceous (emergent)
	C. Bryoid herbaceous	(1) Mosses (2) Lichens
	D. Aquatic (nonemergent) herbaceous	(1) Freshwater aquatic herbaceous (2) Brackish water aquatic herbaceous (3) Marine aquatic herbaceous

Descriptions of levels I, II, III, and IV follow the classification table.

1a.	Trees over 3 meters (10 ft) tall are present and have a canopy cover of 10 percent or more	I. Forest 2
1b.	Trees over 3 meters (10 ft) tall are absent or nearly so. Less than 10 percent cover. (Dwarf trees, less than 3 meters [10 ft] tall may be present and abundant	7
I. Forest		
2a.	Over 75 percent of tree cover contributed by needleleaf (conifer) species	I.A Needleleaf forest 3
2b.	Less than 75 percent of tree cover contributed by needleleaf (conifer) species	4
3a.	Tree canopy of 60-100 percent cover	I.A.1 Closed needleleaf forest
3b.	Tree canopy of 25-59 percent cover	I.A.2 Open needleleaf forest
3c.	Tree canopy of 10-24 percent cover	I.A.3 Needleleaf woodland
4a.	Over 75 percent of tree cover contributed by broadleaf species	I.B Broadleaf forest 5
4b.	Broadleaf or needleleaf species contribute 25 to 75 percent of the tree cover	6
5a.	Tree canopy of 60-100 percent cover	I.B.1 Closed broadleaf forest
5b.	Tree canopy of 25-59 percent cover	I.B.2 Open broadleaf forest
5c.	Tree canopy of 10-24 percent cover	I.B.3 Broadleaf woodland
6a.	Tree canopy of 60-100 percent cover.	I.C.1 Closed mixed forest
6b.	Tree canopy of 25-59 percent cover.	I.C.2 Open mixed forest
6c.	Tree canopy of 10-24 percent cover	I.C.3 Mixed woodland
7a.	Vegetation with at least 25 percent cover of erect to decumbent shrubs or with at least 10 percent cover of dwarf trees (less than 3 meters [10 ft] tall)	8
7b.	Vegetation herbaceous (may have up to 25 percent shrub cover)	15
II. Scrub		
8a.	Vegetation with at least 10 percent cover of dwarf trees	II.A Dwarf tree scrub 9
8b.	Vegetation with at least 25 percent cover of shrubs and less than 10 percent cover of dwarf trees	10
9a.	Dwarf tree canopy of 60-100 percent cover	II.A.1 Closed dwarf tree scrub
9b.	Dwarf tree canopy of 25-59 percent cover	II.A.2 Open dwarf tree scrub
9c.	Dwarf tree canopy of 10-24 percent cover	II.A.3 Dwarf tree scrub woodland
10a.	Shrubs more than 1.5 meters (5 ft) tall	II.B Tall scrub 11
10b.	Shrubs less than 1.5 meters (5 ft) tall	12
11a.	Shrub canopy cover greater than 75 percent	II.B.1 Closed tall scrub
11b.	Shrub canopy cover of 25-74 percent	II.B.2 Open tall scrub
12a.	Shrubs 20 centimeters to 1.5 meters tall	II.C Low scrub 13
12b.	Shrubs under 20 centimeters in height	II.D Dwarf scrub 14
13a.	Shrub canopy cover greater than 75 percent	II.C.1 Closed low scrub
13b.	Shrub canopy cover of 25-74 percent, or as low as 2 percent if little or no other vegetation cover present	II.C.2 Open low scrub
14a.	Dryas species dominant in the dwarf shrub layer	II.D.1 Dryas dwarf scrub
14b.	Ericaceous species dominant in the dwarf shrub layer	II.D.2 Ericaceous dwarf scrub
14c.	Willow species dominant in the dwarf scrub layer	II.D.2 Willow dwarf scrub
III. Herbaceous		
15a.	Terrestrial vegetation, or if growing in the water, dominated by emergent vegetation	16
15b.	Dominant vegetation growing submerged in water or floating on the water surface but not emerging above the water	III.D Aquatic herbaceous 21
16a.	Grasses, sedges, or rushes (graminoid) plants dominant	III.A Graminoid herbaceous 17
16b.	Forbs or bryophytes dominant	18
17a.	Grasslands of well-drained dry sites, such as south-facing bluffs, old beaches, and sand dunes. Typically (but not always) dominated by *Elymus* spp., *Festuca* spp., and *Deschampsia* spp.	III.A.1 Dry graminoid herbaceous
17b.	On moist sites, but usually not with standing water. Usually dominated by *Calamagrostis* spp., *Carex* spp. or *Eriophorum* spp.; tussocks often present	III.A.2 Mesic graminoid herbaceous
17c.	On wet sites, standing water present for part of the year; dominated by either sedges or grasses; includes wet tundra, bogs, marshes, and fens	III.A.3 Wet graminoid herbaceous
18a.	Vegetation dominated by forbs (broadleaf herbs, ferns, or horsetails)	III.B Forb herbaceous 19
18b.	Vegetation dominated by mosses or lichens	III.C Bryoid herbaceous 20
19a.	On dry sites, usually rocky and well drained; mostly tundra sites	III.B.1 Dry forb herbaceous
19b.	On moist sites but without standing water, mostly within forested areas	III.B.2 Mesic forb herbaceous
19c.	On wet sites, usually with standing water for part of the year	III.B.3 Wet forb herbaceous
20a.	Vegetation cover dominated by mosses	III.C.1 Bryoid moss
20b.	Vegetation cover dominated by lichens	III.C.2 Bryoid lichen
21a.	Vegetation submerged or floating in fresh water	III.D.1 Freshwater aquatic herbaceous
21b.	Vegetation submerged or floating in brackish water	III.D.2 Brackish water aquatic herbaceous
21c.	Vegetation submerged or floating in salt water	III.D.3 Marine aquatic herbaceous

Wetland Determination Form QA/QC Checklist

This form to be completed before leaving the field site.

Feature ID: ~~WG1 LH020~~ WG1 LH012 Field Target: 012 Date: 6/9/14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. Site Description

- [x] Site description, site parameters and summary of findings are complete?
- [x] A detailed site sketch is included in logbook?

2. Vegetation

- [x] At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
- [x] Vegetation names are entered legibly for all strata present?
- [x] Cover calculations are complete and correct?
- [x] All dominant species have been determined and recorded per strata?
- [x] Indicator status is correct for each species?
- [x] Dominance Test and Prevalence Index have been completed?

3. Soil

- [x] Soil profile is complete?
- [x] Appropriate hydric soil indicators are marked?

4. Hydrology

- [x] Appropriate hydrology indicators are marked?
- [x] Surface water, water table, and saturation depths are recorded if present?

5. Functions and Values

- [x] Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland?

6. Field Logbook

- [x] Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
- [x] Each logbook page is initialed and dated?

7. Maps

- [x] Wetland boundaries have been corrected if necessary?
- [x] Maps are initialed and dated?

8. **Photos**

☒ Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)?

☐ Two photos were taken for each Observation Point (vegetation/site overview)?

Wetland Determination Form QA/QC Checklist

This form to be completed before leaving the field site.

Feature ID: ~~W61LH022~~ W61LH014 Field Target: 014 Date: 6/10/14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. Site Description

- [x] Site description, site parameters and summary of findings are complete?
- [x] A detailed site sketch is included in logbook?

2. Vegetation

- [x] At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
- [x] Vegetation names are entered legibly for all strata present?
- [x] Cover calculations are complete and correct?
- [x] All dominant species have been determined and recorded per strata?
- [x] Indicator status is correct for each species?
- [x] Dominance Test and Prevalence Index have been completed?

3. Soil

- [x] Soil profile is complete?
- [x] Appropriate hydric soil indicators are marked?

4. Hydrology

- [x] Appropriate hydrology indicators are marked?
- [x] Surface water, water table, and saturation depths are recorded if present?

5. Functions and Values

- [x] Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland?

6. Field Logbook

- [x] Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
- [x] Each logbook page is initialed and dated?

7. Maps

- [x] Wetland boundaries have been corrected if necessary?
- [x] Maps are initialed and dated?

8. Photos

☒ Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)?

☐ Two photos were taken for each Observation Point (vegetation/site overview)?

This form to be completed before leaving the field site.

Feature ID: ~~W61LH037~~ W61LH016 Field Target: 016 Date: 6/11/14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. Site Description

- [x] Site description, site parameters and summary of findings are complete?
- [x] A detailed site sketch is included in logbook?

2. Vegetation

- [x] At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
- [x] Vegetation names are entered legibly for all strata present?
- [x] Cover calculations are complete and correct?
- [x] All dominant species have been determined and recorded per strata?
- [x] Indicator status is correct for each species?
- [x] Dominance Test and Prevalence Index have been completed?

3. Soil

- [x] Soil profile is complete?
- [x] Appropriate hydric soil indicators are marked?

4. Hydrology

- [x] Appropriate hydrology indicators are marked?
- [x] Surface water, water table, and saturation depths are recorded if present?

5. Functions and Values

- [x] Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland?

6. Field Logbook

- [x] Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
- [x] Each logbook page is initialed and dated?

7. Maps

- [x] Wetland boundaries have been corrected if necessary?
- [x] Maps are initialed and dated?

8. **Photos**

- [x] Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)?
- [ ] Two photos were taken for each Observation Point (vegetation/site overview)?

Wetland Determination Form QA/QC Checklist

This form to be completed before leaving the field site.

Feature ID: W61LH019 ~~W61LH030~~ Field Target: 019 Date: 6/11/14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. **Site Description**

   - [x] Site description, site parameters and summary of findings are complete?
   - [x] A detailed site sketch is included in logbook?

2. **Vegetation**

   - [x] At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
   - [x] Vegetation names are entered legibly for all strata present?
   - [x] Cover calculations are complete and correct?
   - [x] All dominant species have been determined and recorded per strata?
   - [x] Indicator status is correct for each species?
   - [x] Dominance Test and Prevalence Index have been completed?

3. **Soil**

   - [x] Soil profile is complete?
   - [x] Appropriate hydric soil indicators are marked?

4. **Hydrology**

   - [x] Appropriate hydrology indicators are marked?
   - [x] Surface water, water table, and saturation depths are recorded if present?

5. **Functions and Values**

   - [x] Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland?

6. **Field Logbook**

   - [x] Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
   - [x] Each logbook page is initialed and dated?

7. **Maps**

   - [x] Wetland boundaries have been corrected if necessary?
   - [x] Maps are initialed and dated?

8. Photos

☒ Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)?

☐ Two photos were taken for each Observation Point (vegetation/site overview)?

Wetland Determination Form QA/QC Checklist

This form to be completed before leaving the field site.

W61LH021

Feature ID: ~~W61LH029~~ Field Target: 021 Date: 6/11/14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. Site Description

- [x] Site description, site parameters and summary of findings are complete?
- [x] A detailed site sketch is included in logbook?

2. Vegetation

- [x] At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
- [x] Vegetation names are entered legibly for all strata present?
- [x] Cover calculations are complete and correct?
- [x] All dominant species have been determined and recorded per strata?
- [x] Indicator status is correct for each species?
- [x] Dominance Test and Prevalence Index have been completed?

3. Soil

- [x] Soil profile is complete?
- [x] Appropriate hydric soil indicators are marked?

4. Hydrology

- [x] Appropriate hydrology indicators are marked?
- [x] Surface water, water table, and saturation depths are recorded if present?

5. Functions and Values

- [x] Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland?

6. Field Logbook

- [x] Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
- [x] Each logbook page is initialed and dated?

7. Maps

- [x] Wetland boundaries have been corrected if necessary?
- [x] Maps are initialed and dated?

8. **Photos**

- ☑ Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)?
- ☐ Two photos were taken for each Observation Point (vegetation/site overview)?

Wetland Determination Form QA/QC Checklist

This form to be completed before leaving the field site.

Feature ID: W6LH023 Field Target: Ø23 Date: 6/12/14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. Site Description

- ☑ Site description, site parameters and summary of findings are complete?
- ☑ A detailed site sketch is included in logbook?

2. Vegetation

- ☑ At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
- ☑ Vegetation names are entered legibly for all strata present?
- ☑ Cover calculations are complete and correct?
- ☑ All dominant species have been determined and recorded per strata?
- ☑ Indicator status is correct for each species?
- ☑ Dominance Test and Prevalence Index have been completed?

3. Soil

- ☑ Soil profile is complete?
- ☑ Appropriate hydric soil indicators are marked?

4. Hydrology

- ☑ Appropriate hydrology indicators are marked?
- ☑ Surface water, water table, and saturation depths are recorded if present?

5. Functions and Values

- ☑ Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland?

6. Field Logbook

- ☑ Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
- ☑ Each logbook page is initialed and dated?

7. Maps

- ☑ Wetland boundaries have been corrected if necessary?
- ☑ Maps are initialed and dated?

8. **Photos**

- [x] Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)?
- [ ] Two photos were taken for each Observation Point (vegetation/site overview)?

Wetland Determination Form QA/QC Checklist

This form to be completed before leaving the field site.

Feature ID: W61LH024 Field Target: 024 Date: 6/12/14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. Site Description

- ☑ Site description, site parameters and summary of findings are complete?
- ☑ A detailed site sketch is included in logbook?

2. Vegetation

- ☑ At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
- ☑ Vegetation names are entered legibly for all strata present?
- ☑ Cover calculations are complete and correct?
- ☑ All dominant species have been determined and recorded per strata?
- ☑ Indicator status is correct for each species?
- ☑ Dominance Test and Prevalence Index have been completed?

3. Soil

- ☑ Soil profile is complete?
- ☑ Appropriate hydric soil indicators are marked?

4. Hydrology

- ☑ Appropriate hydrology indicators are marked?
- ☑ Surface water, water table, and saturation depths are recorded if present?

5. Functions and Values

- NA ☐ Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland?

6. Field Logbook

- ☑ Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
- ☑ Each logbook page is initialed and dated?

7. Maps

- ☑ Wetland boundaries have been corrected if necessary?
- ☑ Maps are initialed and dated?

8. **Photos**

- ☑ Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)? NA
- ☐ Two photos were taken for each Observation Point (vegetation/site overview)?

Wetland Determination Form QA/QC Checklist

This form to be completed before leaving the field site.

Feature ID: W01LH025 Field Target: 025 Date: 6/14/14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. **Site Description**

- ☑ Site description, site parameters and summary of findings are complete?
- ☑ A detailed site sketch is included in logbook?

2. **Vegetation**

- ☑ At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
- ☑ Vegetation names are entered legibly for all strata present?
- ☑ Cover calculations are complete and correct?
- ☑ All dominant species have been determined and recorded per strata?
- ☑ Indicator status is correct for each species?
- ☑ Dominance Test and Prevalence Index have been completed?

3. **Soil**

- NA ☐ Soil profile is complete?
- ☑ Appropriate hydric soil indicators are marked?

4. **Hydrology**

- ☑ Appropriate hydrology indicators are marked?
- ☑ Surface water, water table, and saturation depths are recorded if present?

5. **Functions and Values**

- NA ☐ Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland?

6. **Field Logbook**

- ☑ Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
- ☑ Each logbook page is initialed and dated?

7. **Maps**

- ☑ Wetland boundaries have been corrected if necessary?
- ☑ Maps are initialed and dated?

8. **Photos**

☑ Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)?

☐ Two photos were taken for each Observation Point (vegetation/site overview)?

Wetland Determination Form QA/QC Checklist

This form to be completed before leaving the field site.

Feature ID: W61LH027 Field Target: 027 Date: 6/14/14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. **Site Description**

   - [x] Site description, site parameters and summary of findings are complete?
   - [x] A detailed site sketch is included in logbook?

2. **Vegetation**

   - [x] At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
   - [x] Vegetation names are entered legibly for all strata present?
   - [x] Cover calculations are complete and correct?
   - [x] All dominant species have been determined and recorded per strata?
   - [x] Indicator status is correct for each species?
   - [x] Dominance Test and Prevalence Index have been completed?

3. **Soil**

   - [x] Soil profile is complete?
   - [x] Appropriate hydric soil indicators are marked?

4. **Hydrology**

   - [x] Appropriate hydrology indicators are marked?
   - [x] Surface water, water table, and saturation depths are recorded if present?

5. **Functions and Values**

   - [x] Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland?

6. **Field Logbook**

   - [x] Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
   - [x] Each logbook page is initialed and dated?

7. **Maps**

   - [x] Wetland boundaries have been corrected if necessary?
   - [x] Maps are initialed and dated?

8. **Photos**

☒ Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)?

☐ Two photos were taken for each Observation Point (vegetation/site overview)?

Wetland Determination Form QA/QC Checklist

This form to be completed before leaving the field site.

Feature ID: W61LH029 Field Target: 036 Date: 6/14/14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. **Site Description**

   - [x] Site description, site parameters and summary of findings are complete?
   - [x] A detailed site sketch is included in logbook?

2. **Vegetation**

   - [x] At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
   - [x] Vegetation names are entered legibly for all strata present?
   - [x] Cover calculations are complete and correct?
   - [x] All dominant species have been determined and recorded per strata?
   - [x] Indicator status is correct for each species?
   - [x] Dominance Test and Prevalence Index have been completed?

3. **Soil**

   - [x] Soil profile is complete?
   - [x] Appropriate hydric soil indicators are marked?

4. **Hydrology**

   - [x] Appropriate hydrology indicators are marked?
   - [x] Surface water, water table, and saturation depths are recorded if present?

5. **Functions and Values**

   - [x] Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland?

6. **Field Logbook**

   - [x] Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
   - [x] Each logbook page is initialed and dated?

7. **Maps**

   - [x] Wetland boundaries have been corrected if necessary?
   - [x] Maps are initialed and dated?

8. **Photos**

☒ Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)?

☐ Two photos were taken for each Observation Point (vegetation/site overview)?

Wetland Determination Form QA/QC Checklist

This form to be completed before leaving the field site.

Feature ID: W61LH030 Field Target: 034 Date: 6/15/14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. Site Description

- ☒ Site description, site parameters and summary of findings are complete?
- ☒ A detailed site sketch is included in logbook?

2. Vegetation

- ☒ At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
- ☒ Vegetation names are entered legibly for all strata present?
- ☒ Cover calculations are complete and correct?
- ☒ All dominant species have been determined and recorded per strata?
- ☒ Indicator status is correct for each species?
- ☒ Dominance Test and Prevalence Index have been completed?

3. Soil

- ☒ Soil profile is complete?
- ☒ Appropriate hydric soil indicators are marked?

4. Hydrology

- ☒ Appropriate hydrology indicators are marked?
- ☒ Surface water, water table, and saturation depths are recorded if present?

5. Functions and Values

- ☒ Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland?

6. Field Logbook

- ☒ Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
- ☒ Each logbook page is initialed and dated?

7. Maps

- ☒ Wetland boundaries have been corrected if necessary?
- ☒ Maps are initialed and dated?

8. **Photos**

☒ Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)?

☐ Two photos were taken for each Observation Point (vegetation/site overview)?

Wetland Determination Form QA/QC Checklist

This form to be completed before leaving the field site.

Feature ID: WOILH031 Field Target: 037 Date: 6/15/14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. Site Description

- ☒ Site description, site parameters and summary of findings are complete?
- ☒ A detailed site sketch is included in logbook?

2. Vegetation

- ☒ At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
- ☒ Vegetation names are entered legibly for all strata present?
- ☒ Cover calculations are complete and correct?
- ☒ All dominant species have been determined and recorded per strata?
- ☒ Indicator status is correct for each species?
- ☒ Dominance Test and Prevalence Index have been completed?

3. Soil

- ☒ Soil profile is complete?
- ☒ Appropriate hydric soil indicators are marked?

4. Hydrology

- ☒ Appropriate hydrology indicators are marked?
- ☒ Surface water, water table, and saturation depths are recorded if present?

5. Functions and Values

- ☒ Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland?

6. Field Logbook

- ☒ Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
- ☒ Each logbook page is initialed and dated?

7. Maps

- ☒ Wetland boundaries have been corrected if necessary?
- ☒ Maps are initialed and dated?

8. **Photos**

☒ Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)?

☐ Two photos were taken for each Observation Point (vegetation/site overview)?

Wetland Determination Form QA/QC Checklist

This form to be completed before leaving the field site.

Feature ID: W61LH033 (W) Field Target: 039 Date: 6/15/14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. Site Description

- [x] Site description, site parameters and summary of findings are complete?
- [x] A detailed site sketch is included in logbook?

2. Vegetation

- [x] At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
- [x] Vegetation names are entered legibly for all strata present?
- [x] Cover calculations are complete and correct?
- [x] All dominant species have been determined and recorded per strata?
- [x] Indicator status is correct for each species?
- [x] Dominance Test and Prevalence Index have been completed?

3. Soil

- [x] Soil profile is complete?
- [x] Appropriate hydric soil indicators are marked?

4. Hydrology

- [x] Appropriate hydrology indicators are marked?
- [x] Surface water, water table, and saturation depths are recorded if present?

5. Functions and Values

- [x] Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland?

6. Field Logbook

- [x] Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
- [ ] Each logbook page is initialed and dated?

7. Maps

- [x] Wetland boundaries have been corrected if necessary?
- [x] Maps are initialed and dated?

8. **Photos**

- [x] Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)?
- [ ] Two photos were taken for each Observation Point (vegetation/site overview)?

Wetland Determination Form QA/QC Checklist

This form to be completed before leaving the field site.

Feature ID: W6|LH034 Field Target: 040 Date: 6/16/14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. Site Description

- ☑ Site description, site parameters and summary of findings are complete?
- ☑ A detailed site sketch is included in logbook?

2. Vegetation

- ☑ At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
- ☑ Vegetation names are entered legibly for all strata present?
- ☑ Cover calculations are complete and correct?
- ☑ All dominant species have been determined and recorded per strata?
- ☑ Indicator status is correct for each species?
- ☑ Dominance Test and Prevalence Index have been completed?

3. Soil

- ☑ Soil profile is complete?
- ☑ Appropriate hydric soil indicators are marked?

4. Hydrology

- ☑ Appropriate hydrology indicators are marked?
- ☑ Surface water, water table, and saturation depths are recorded if present?

5. Functions and Values

- ☑ Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland?

6. Field Logbook

- ☑ Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
- ☑ Each logbook page is initialed and dated?

7. Maps

- ☑ Wetland boundaries have been corrected if necessary?
- ☑ Maps are initialed and dated?

8. **Photos**

- ☒ Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)?
- ☐ Two photos were taken for each Observation Point (vegetation/site overview)?

Wetland Determination Form QA/QC Checklist

This form to be completed before leaving the field site.

Feature ID: WCLLH035 Field Target: 041 Date: 6/16/14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. **Site Description**

   - ☑ Site description, site parameters and summary of findings are complete?
   - ☑ A detailed site sketch is included in logbook?

2. **Vegetation**

   - ☑ At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
   - ☑ Vegetation names are entered legibly for all strata present?
   - ☑ Cover calculations are complete and correct?
   - ☑ All dominant species have been determined and recorded per strata?
   - ☑ Indicator status is correct for each species?
   - ☑ Dominance Test and Prevalence Index have been completed?

3. **Soil**

   - ☑ Soil profile is complete?
   - ☑ Appropriate hydric soil indicators are marked?

4. **Hydrology**

   - ☑ Appropriate hydrology indicators are marked?
   - ☑ Surface water, water table, and saturation depths are recorded if present?

5. **Functions and Values**

   - ☑ Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland?

6. **Field Logbook**

   - ☑ Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
   - ☑ Each logbook page is initialed and dated?

7. **Maps**

   - ☑ Wetland boundaries have been corrected if necessary?
   - ☑ Maps are initialed and dated?

8. **Photos**

- ☑ Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)?
- ☐ Two photos were taken for each Observation Point (vegetation/site overview)?

This form to be completed before leaving the field site.

Feature ID: W61LH036 Field Target: 042 Date: 6/16/14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. Site Description

- ☑ Site description, site parameters and summary of findings are complete?
- ☑ A detailed site sketch is included in logbook?

2. Vegetation

- ☑ At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
- ☑ Vegetation names are entered legibly for all strata present?
- ☑ Cover calculations are complete and correct?
- ☑ All dominant species have been determined and recorded per strata?
- ☑ Indicator status is correct for each species?
- ☑ Dominance Test and Prevalence Index have been completed?

3. Soil

- ☑ Soil profile is complete?
- ☑ Appropriate hydric soil indicators are marked?

4. Hydrology

- ☑ Appropriate hydrology indicators are marked?
- ☑ Surface water, water table, and saturation depths are recorded if present?

5. Functions and Values

- ☑ Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland?

6. Field Logbook

- ☑ Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
- ☑ Each logbook page is initialed and dated?

7. Maps

- ☑ Wetland boundaries have been corrected if necessary?
- ☑ Maps are initialed and dated?

8. **Photos**

- ☒ Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)?
- ☐ Two photos were taken for each Observation Point (vegetation/site overview)?

Wetland Determination Form QA/QC Checklist

This form to be completed before leaving the field site.

Feature ID: W61LW037 Field Target: 043 Date: 6/16/14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. Site Description

- ☑ Site description, site parameters and summary of findings are complete?
- ☑ A detailed site sketch is included in logbook?

2. Vegetation

- ☑ At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
- ☑ Vegetation names are entered legibly for all strata present?
- ☑ Cover calculations are complete and correct?
- ☑ All dominant species have been determined and recorded per strata?
- ☑ Indicator status is correct for each species?
- ☑ Dominance Test and Prevalence Index have been completed?

3. Soil

- ☑ Soil profile is complete?
- ☑ Appropriate hydric soil indicators are marked?

4. Hydrology

- ☑ Appropriate hydrology indicators are marked?
- ☑ Surface water, water table, and saturation depths are recorded if present?

5. Functions and Values

- ☑ Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland?

6. Field Logbook

- ☑ Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
- ☑ Each logbook page is initialed and dated?

7. Maps

- ☑ Wetland boundaries have been corrected if necessary?
- ☑ Maps are initialed and dated?

8. **Photos**

- [x] Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)?
- [ ] Two photos were taken for each Observation Point (vegetation/site overview)?

Wetland Determination Form QA/QC Checklist

This form to be completed before leaving the field site.

Feature ID: W61L4038 Field Target: 044 Date: 6/17/14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. Site Description

- ☑ Site description, site parameters and summary of findings are complete?
- ☑ A detailed site sketch is included in logbook?

2. Vegetation

- ☑ At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
- ☑ Vegetation names are entered legibly for all strata present?
- ☑ Cover calculations are complete and correct?
- ☑ All dominant species have been determined and recorded per strata?
- ☑ Indicator status is correct for each species?
- ☑ Dominance Test and Prevalence Index have been completed?

3. Soil

- ☑ Soil profile is complete?
- ☑ Appropriate hydric soil indicators are marked?

4. Hydrology

- ☑ Appropriate hydrology indicators are marked?
- ☑ Surface water, water table, and saturation depths are recorded if present?

5. Functions and Values

- ☑ Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland?

6. Field Logbook

- ☑ Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
- ☑ Each logbook page is initialed and dated?

7. Maps

- ☑ Wetland boundaries have been corrected if necessary?
- ☑ Maps are initialed and dated?

8. **Photos**

☒ Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)?

☐ Two photos were taken for each Observation Point (vegetation/site overview)?

Wetland Determination Form QA/QC Checklist

This form to be completed before leaving the field site.

Feature ID: WG1LH039 Field Target: 045 Date: 5/27/14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. **Site Description**

- [x] Site description, site parameters and summary of findings are complete?
- [x] A detailed site sketch is included in logbook?

2. **Vegetation**

- [x] At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
- [x] Vegetation names are entered legibly for all strata present?
- [x] Cover calculations are complete and correct?
- [x] All dominant species have been determined and recorded per strata?
- [x] Indicator status is correct for each species?
- [x] Dominance Test and Prevalence Index have been completed?

3. **Soil**

- [x] Soil profile is complete?
- [x] Appropriate hydric soil indicators are marked?

4. **Hydrology**

- [x] Appropriate hydrology indicators are marked?
- [x] Surface water, water table, and saturation depths are recorded if present?

5. **Functions and Values**

- [x] Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland?

6. **Field Logbook**

- [x] Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
- [x] Each logbook page is initialed and dated?

7. **Maps**

- [x] Wetland boundaries have been corrected if necessary?
- [x] Maps are initialed and dated?

8. **Photos**

- ☑ Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)?
- ☐ Two photos were taken for each Observation Point (vegetation/site overview)?

- ☑ Site description, site parameters and summary of findings are complete?
- ☑ A detailed site sketch is included in logbook?

2. Vegetation

- ☑ At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
- ☑ Vegetation names are entered legibly for all strata present?
- ☑ Cover calculations are complete and correct?
- ☑ All dominant species have been determined and recorded per strata?
- ☑ Indicator status is correct for each species?
- ☑ Dominance Test and Prevalence Index have been completed?

3. Soil

- ☑ Soil profile is complete?
- ☑ Appropriate hydric soil indicators are marked?

4. Hydrology

- ☑ Appropriate hydrology indicators are marked?
- ☑ Surface water, water table, and saturation depths are recorded if present?

5. Functions and Values

- ☑ Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland?

6. Field Logbook

- ☑ Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
- ☑ Each logbook page is initialed and dated?

7. Maps

- ☑ Wetland boundaries have been corrected if necessary?
- ☑ Maps are initialed and dated?

8. **Photos**

- [x] Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)?
- [ ] Two photos were taken for each Observation Point (vegetation/site overview)?

WETLAND DETERMINATION DATA FORM

SITE DESCRIPTION			
Survey Type: Centerline X Access Road (explain)____ Other (explain)____		Field Target: 250	Map #: 31 Map Date: 5/27/14
Date: 6/19/14	Project Name & No.: Alaska LNG 26221306		Feature Id: WB1LH044
Investigators: K DeCurtis J Anderson A Fisher			Team No.: WB1
State: Alaska	Region: Alaska	Milepost: 518.15	
Latitude: 63° 56' 48.39"	Longitude: 149° 06' 35.25"		Datum: WGS84
Logbook No.: WB1-1	Logbook Page No.: 50	Picture No.: P_WB1LH044_D.F, Plug, S, E	

SITE PARAMETERS	
Subregion: Interior	Landform (hillslope, terrace, hummocks, etc.): Flat
Slope (%): 1	Local relief (concave, convex, none): None
Pre-mapped Alaska LNG/NWI classification: PSS/1/EM1C	Soil Map Unit Name:
Are climatic/hydrologic conditions on the site typical for this time of year? Yes X No____ (if no explain in Notes)	Are "Normal Circumstances" present: Yes X No____ (If no, explain in Notes.)
Are Vegetation____, Soil____, or Hydrology____ Significantly Disturbed?	No X (If yes, explain in Notes)
Are Vegetation____, Soil____, or Hydrology____ Naturally Problematic?	No X (If yes, explain in Notes.)

SUMMARY OF FINDINGS	
Hydrophytic Vegetation Present? Yes X No____	**Is the Sampled Area within a Wetland?** Yes X No____
Hydric Soil Present? Yes X No____	**Wetland Type:** PF04/SS1B
Wetland Hydrology Present? Yes X No____	Alaska Vegetation Classification (Viereck): IA2, IIB2, IIC1

Notes and Site Sketch: Please include Directional & North Arrow, Centerline, Length of feature, Distances from Centerline, Photo Locations, and Survey corridor.

See logbook WB1-1 page 50 for site sketch & notes

Wetland Determination Form QA/QC Checklist

This form to be completed before leaving the field site.

Feature ID: W6LH044 Field Target: 050 Date: 6/19/14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. Site Description

- [x] Site description, site parameters and summary of findings are complete?
- [x] A detailed site sketch is included in logbook?

2. Vegetation

- [x] At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
- [x] Vegetation names are entered legibly for all strata present?
- [x] Cover calculations are complete and correct?
- [x] All dominant species have been determined and recorded per strata?
- [x] Indicator status is correct for each species?
- [x] Dominance Test and Prevalence Index have been completed?

3. Soil

- [x] Soil profile is complete?
- [x] Appropriate hydric soil indicators are marked?

4. Hydrology

- [x] Appropriate hydrology indicators are marked?
- [x] Surface water, water table, and saturation depths are recorded if present?

5. Functions and Values

- [x] Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland?

6. Field Logbook

- [x] Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
- [x] Each logbook page is initialed and dated?

7. Maps

- [x] Wetland boundaries have been corrected if necessary?
- [x] Maps are initialed and dated?

8. **Photos**

☒ Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)?

☐ Two photos were taken for each Observation Point (vegetation/site overview)?

Wetland Determination Form QA/QC Checklist

This form to be completed before leaving the field site.

Feature ID: W6LH045 Field Target: Ø51 Date: 6/19/14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. **Site Description**

   - ☑ Site description, site parameters and summary of findings are complete?
   - ☑ A detailed site sketch is included in logbook?

2. **Vegetation**

   - ☑ At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
   - ☑ Vegetation names are entered legibly for all strata present?
   - ☑ Cover calculations are complete and correct?
   - ☑ All dominant species have been determined and recorded per strata?
   - ☑ Indicator status is correct for each species?
   - ☑ Dominance Test and Prevalence Index have been completed?

3. **Soil**

   - ☑ Soil profile is complete?
   - ☑ Appropriate hydric soil indicators are marked?

4. **Hydrology**

   - ☑ Appropriate hydrology indicators are marked?
   - ☑ Surface water, water table, and saturation depths are recorded if present?

5. **Functions and Values**

   - ☑ Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland?

6. **Field Logbook**

   - ☑ Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
   - ☑ Each logbook page is initialed and dated?

7. **Maps**

   - ☑ Wetland boundaries have been corrected if necessary?
   - ☑ Maps are initialed and dated?

8. Photos

- [x] Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)?
- [ ] Two photos were taken for each Observation Point (vegetation/site overview)?

Wetland Determination Form QA/QC Checklist

This form to be completed before leaving the field site.

Feature ID: W61LH046 Field Target: 052 Date: 6/27/14

For all items not checked, please provide detailed explanation in the notes section of data form.

1. Site Description

- ☒ Site description, site parameters and summary of findings are complete?
- ☒ A detailed site sketch is included in logbook?

2. Vegetation

- ☒ At least 80% of onsite vegetation has been keyed to species, or collected for later identification?
- ☒ Vegetation names are entered legibly for all strata present?
- ☒ Cover calculations are complete and correct?
- ☒ All dominant species have been determined and recorded per strata?
- ☒ Indicator status is correct for each species?
- ☒ Dominance Test and Prevalence Index have been completed?

3. Soil

- ☒ Soil profile is complete?
- ☒ Appropriate hydric soil indicators are marked?

4. Hydrology

- ☒ Appropriate hydrology indicators are marked?
- ☒ Surface water, water table, and saturation depths are recorded if present?

5. Functions and Values

- ☒ Vegetation, soil, hydrologic variables, and landscape variables complete if site is a wetland?

6. Field Logbook

- ☒ Notes have been recorded at each site, including general description, sketch, and accuracy of pre-mapped wetland boundary as appropriate?
- ☐ Each logbook page is initialed and dated?

7. Maps

- ☒ Wetland boundaries have been corrected if necessary?
- ☒ Maps are initialed and dated?

8. Photos

- ☑ Four photos were taken for each Wetland Determination Data Form (2 vegetation, 1 soil pit, 1 soil plug)?
- ☐ Two photos were taken for each Observation Point (vegetation/site overview)?

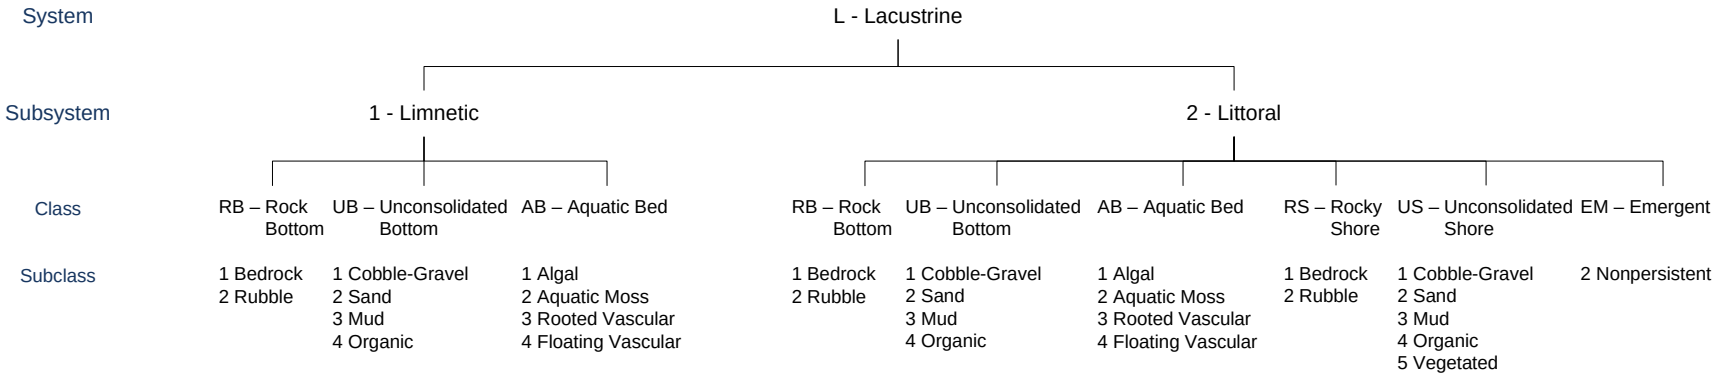
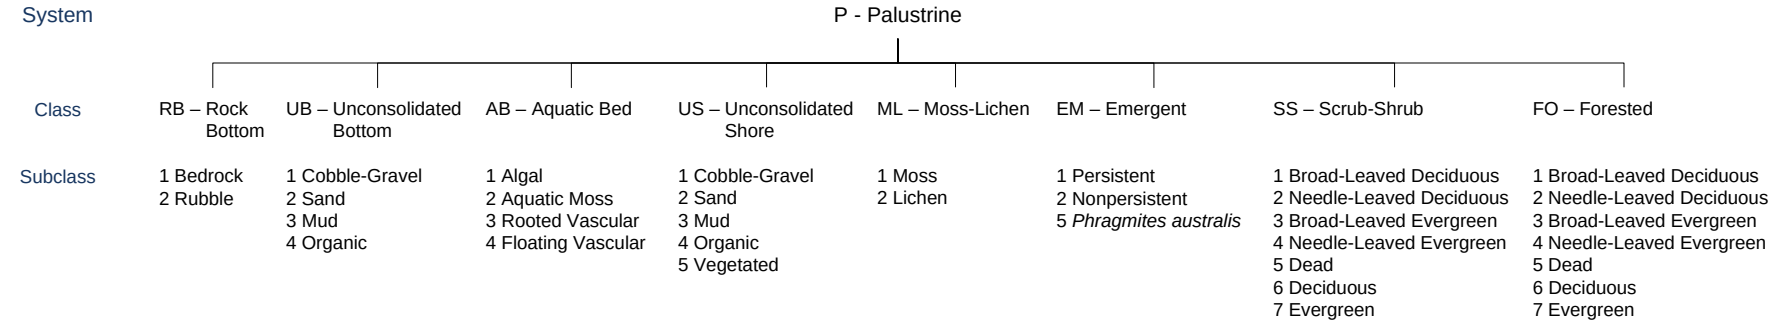
		AB – Aquatic Bed	1 Algal 2 Aquatic Moss 3 Rooted Vascular 4 Floating Vascular
		RS – Rocky Shore	1 Bedrock 2 Rubble
		US – Unconsolidated Shore	1 Cobble-Gravel 2 Sand 3 Mud 4 Organic 5 Vegetated
		EM – Emergent	2 Nonpersistent
	2 – Lower Perennial		
	3 – Upper Perennial		
	4* - Intermittent		
	5* – Unknown Perennial		

* **Intermittent** is limited to the **Streambed** Class;
Unknown Perennial is limited to **Unconsolidated Bottom** Class code **R5UB** only
** **Rock Bottom** is not permitted for the **Lower Perennial** Subsystem;
Streambed is limited to **Tidal** and **Intermittent** Subsystems

WETLANDS AND DEEPWATER HABITATS CLASSIFICATION





MODIFIERS

In order to more adequately describe the wetland and deepwater habitats, one or more of the water regime, water chemistry, soil, or special modifiers may be applied at the class or lower level in the hierarchy. The farmed modifier may also be applied to the ecological system.

Water Regime			Special Modifiers	Water Chemistry			Soil
Nontidal	**Saltwater Tidal**	**Freshwater Tidal**		**Coastal Halinity**	**Inland Salinity**	**pH Modifiers for all Fresh Water**	
A Temporarily Flooded	L Subtidal	S Temporarily Flooded-Tidal	b Beaver	1 Hyperhaline	7 Hypersaline	a Acid	g Organic
B Saturated	M Irregularly Exposed	R Seasonally Flooded-Tidal	d Partly Drained/Ditched	2 Euhaline	8 Eusaline	t Circumneutral	n Mineral
C Seasonally Flooded	N Regularly Flooded	T Semipermanently Flooded-Tidal	f Farmed	3 Mixohaline (Brackish)	9 Mixosaline	i Alkaline	
E Seasonally Flooded/ Saturated	P Irregularly Flooded	V Permanently Flooded-Tidal	h Diked/Impounded	4 Polyhaline	0 Fresh		
F Semipermanently Flooded			r Artificial	5 Mesohaline			
G Intermittently Exposed			s Spoil	6 Oligohaline			
H Permanently Flooded			x Excavated	0 Fresh			
J Intermittently Flooded							
K Artificially Flooded
