Fish Streams Along the Trans-Alaska Pipeline System

BLM-Alaska Open File Report 93
September 2003

U. S. Department of the Interior
Bureau of Land Management

Preface to the Third Edition

This third edition of the *Fish Streams Along the Trans-Alaska Pipeline System* (previously titled TAPS Fish Streams) has been prepared and will be maintained by the Office of Pipeline Monitoring to facilitate the administration of environmental provisions of the Federal Agreement and Grant of Right-of-Way for the Trans-Alaska Pipeline System. Specifically, this report is intended to serve as the source document for periodically updating a list of areas under Federal administration where pipeline activities may have to be restricted to protect fish breeding, spawning and major migration. However, this report is not the Federal Authorized Officer's list required under the Agreement and Grant of Right-of-Way for Trans-Alaska Pipeline, Stipulation 2.5.3, Zones of Restricted Activities. The Stipulation 2.5.3 list will only include streams in areas of Federal pipeline administration and will be separately prepared and issued to the Permittees' agent, Alyeska Pipeline Service Company.

The open file format was chosen to facilitate additions or corrections resulting from any future State, Federal, Alyeska Pipeline Service Company or other studies of pipeline streams. Please direct all correspondence concerning additions/corrections or document requests to:

MP = The distance in miles from Pump Station 1; * Prefix denotes extrapolated mileage not field checked.

AS = Alyeska Pipeline Service Company (G-100 as-builts) alignment sheet number.

STREAM NAME = Adapted from Johnson and Rockwell, 1981. For example: YUKON RIVER denotes a name recognized by the U.S. Geological Survey; (Small or Jackie's CK) denotes a non-USGS recognized popular name; [Snowpad CK denotes a new name used in this list.

COMMENTS = TAPS A/G denotes above-ground pipe mode; TAPS B/G denotes below-ground mode; CMP is a corrugated-metal-pipe or culvert; LWC is a low water crossing; BLOCKPOINT is a physical barrier to vehicle passage; CAUSEWAY, BRIDGE, and PARALLEL are self-explanatory.

FISH SPECIES = see Page ii of iv for explanation of codes.

ADAD = "YES" denotes anadromous fish stream designated by Alaska Dept. Fish and Game.

PERIOD OF SENSITIVITY = C denotes Critical period of fish usage; S denotes Sensitive period of fish usage.

NOTE: UNDERLINING of a stream's period of sensitivity denotes the recommended sensitivity period if fish return in the future.

FIELD STATION = Distance in feet from Pump Station No 1 as estimated in field; * Prefix denotes an extrapolated stationing not field checked.

G-5 = Obtained from selected references (see Page iii of iv) and refers to construction drawings.

MER = Meridian – U is Umiat; F is Fairbanks; C is Copper River.

T = Tier or Township; R = Range; Sec. = Section.

REFERENCE = see page iii of iv.
