

Proposed Donlin Gold Project
Environmental Impact Statement

JAN 14 2014 -13

Water usage

How much water will be used? If recycled, where will the unusable water be stored.

Water is essential for every living being
- Precipitation goes through every form of the chemical process
Mist, liquid & solid.

If you look at the last poster there ~~is~~ are numerous water ways
Water follows the path of least resistance

In time, water will erode even the most impermeable solid object.

Order of Prints for Nikolai

Kuethluk, Ak

Shortcut - Aerial

Erosion Problem

Oxbow Thinning

Upriver from Kuethluk

RECEIVED

JAN 14 2013

N. Ayapans home - before relocation

P. Speins home - during relocation

E. Macger's home - after relocation w/ magivik before

Erosion by school/Teacher house

Cement bank - upper side

Cement bank - lower side

W & S Project ^{water} near ^{watering point} Fr. Stevens

Kuskokwuk Slough, which has become the main channel of the Kuskokwim River, will probably join up with the "shortcut" to become the main channel going right in front of the Kuethluk River.

Barges will contribute to erosion.
