Subject: Scoping Comments for the Proposed Donlin Gold Mine - second email message
Date: Friday, March 29, 2013 8:18:05 AM

I attempted to send an email message with an additional reference: “Nevada Bureau of Mines and Geology, Report 52 Assessment of the Potential for Carbon Dioxide Sequestration by Reactions with Rocks in Nevada, Daniel M. Sturmer, Daphne D. LaPointe, Jonathan G. Price, Ronald H. Hess, 2007; and, Accelerated Carbonation of Brucite in Mine Tailings for Carbon Sequestration, Anna L. Harrison, Ian M. Power, and Gregory M. Dipple, Environmental Science & Technology, 2013.”

This is a large file, 9 MB, and your email system will not accept a file this large.

You can download this report at: <http://www.nbmng.unr.edu/dox/dox.htm>
