**Venue:**

**Submission Text:**

I am against the donlin gold project as the impact to the environment is just too great.leaving toxic water in earthen dams for ever is nonsense.an earthquake is all it would take to destroy the area. destroying pristine areas for one time profits for foreign companies and a few good paying jobs is just not worth it.years down the road the tax payers will have to deal with the mess as the company and it's wages are long gone.if approved the company should have to be able treat all toxic water produced and all harmful chemicals removed including mercury and only clean water returned to its source.if the technology does not exist for that then it should not be approved..
