Submission Text:

The Donlin project should be built as it will provide jobs for generations for the people of the Lower Kuskokwim region. The project is one of the largest and highest grade gold projects in the world and has been operated for many years by two companies - NovaGold and Barrick that have a demonstrated track record of doing things right. These companies have formed a strong partnership and business relationship with both the village and regional Alaska Native Corporations (TKC and Calista). As a result, this mine will create real wealth for the Kuskokwim region and for Alaska. By all means, let's assure ourselves that it is done properly and ensure that the environment will be protected, but there is no reasonable reason not to approve this project.
