PROCEEDINGS

(On record - 9:05 a.m.)

CHAIRWOMAN D. WILLIAMS: Good morning, everyone, my name is Deborah Williams and I've been asked to chair today's meeting and I would like to call the meeting to order at this time. This is the September 4th, 1998 meeting of the Exxon Valdez Oil Spill Trustee Council.

We have representing the Trustees today the following individuals; Michele Brown, Commissioner of Alaska Department of Environmental Conservation; Jim Wolfe, United States Department of Agriculture; Frank Rue, Commissioner of the Alaska Department of Fish and Game; Alex Swiderski representing the Attorney General's office.

MR. SWIDERSKI: Excuse me, Mr. Tillery is here.

CHAIRWOMAN D. WILLIAMS: Oh, Craig is here?

MR. TILLERY: He's here.

CHAIRWOMAN D. WILLIAMS: Oh, sorry, Craig.

Molly told me Alex would be here.

MR. TILLERY: Well, he was.

CHAIRWOMAN D. WILLIAMS: Very good. We have Craig Tillery representing the Attorney General's office; we have Bruce Wright representing the National Marine Fishery Service; and myself, Deborah Williams, representing the Department of Interior.

I would like the Trustees to review the agenda at this

time and I would entertain a motion to approve the agenda.

MS. BROWN: This is Michele Brown, I move to approve the agenda.

CHAIRWOMAN D. WILLIAMS: Thank you. Is there a second?

MR. RUE: I'll second.

CHAIRWOMAN D. WILLIAMS: Are there any recommended changes, additions or deletions to the agenda?

(No audible responses)

CHAIRWOMAN D. WILLIAMS: Hearing none, it has been moved by Michele Brown and seconded by Frank Rue that the agenda be approved as prepared.

We have designated at 9:15 a public comment period, it's a little before 9:15, but let's go ahead and see who we have who would like to give public comment pertinent to the issue in front of us today. And the issue in front of us today is Eyak's Humpback Creek Hydroelectric Project proposal as it affects the proposed acquisition.

Are there any public members who would like to speak to Eyak's Humpback Creek Hydroelectric Project proposal?

MS. OBERMEYER: Am I the only person here for public comment, Ms. Williams? Theresa Obermeyer. Am I the only one? I guess I would then come for....

MS. McCAMMON: There may be somebody on line, just....

MS. OBERMEYER: Oh, sure, whatever.

MS. McCAMMON: There may be someone from

3 Cordova also.

1.4

line.

CHAIRWOMAN D. WILLIAMS: Okay, Ms. Obermeyer, you can proceed and, please, if you could, keep your comments relevant to the item in front of the Trustee Council today.

MS. OBERMEYER: You know, wouldn't it be nice, Ms. Williams, were I to have learned all that you know about our state. I find all of it very interesting. But, Ms. Williams, you see for me, I have had to make a career for the last six years of defending myself against fabricated charges by an entire judic -- State judiciary and Federal judiciary and an Alaskan Bar Association.

CONFERENCE OPERATOR: I do have Walt Ebell on

MS. McCAMMON: Thank you.

MS. OBERMEYER: And so how much time would I have, Ms. Williams? I was not even certain today you, madam, as Harvard law [sic], understand the issues that we have been raising for 14 and a half years. The rhetorical question, Ms. Williams, is how could any of this have been possible? How could it be that on Friday, September 4th, 1998, I am facing another trial? Would you (phone beep) Ms. Williams?

CONFERENCE OPERATOR: Excuse me, I do have Barry Roth on line.

MS. OBERMEYER: Well, madam, I'm making public comment, if you'll forgive me. And how much time do I have,
Ms. Williams?

CHAIRWOMAN D. WILLIAMS: We were hoping to keep public comments to two minutes.

MS. OBERMEYER: Okay. Well, let me just invite you, Ms. Williams, and I am very sincere about this. One thing I say is, please, at any time knock on my door and see what kind of person that I am. I am a decent person that is a college administrator with a Ph.D. that is a 53-year-old-professional. I have been assaulted, receiving the most serious injury of my life on February 20th, 1998 at the Anchorage Hilton. Without any provocation I was knocked out cold, waking up in a pool of blood and having to have seven stitches in the back of my head.

And I do have a great joke. I'm not sure if I told you, Ms. Williams, two jokes. One is, even my six brothers didn't knock me out cold so that I woke up in a pool of blood and had to have seven stitches. And I might have even told the joke previously. My other one, Ms. Williams, is there are those that say I already have brain damage, but I could have had brain damage. The most serious injury of my life. Would you like to have been treated this way, Ms. Williams?

And I also say to my husband, what man would be knocked out cold? This is blatantly because I'm a woman, that all of

this has happened.

But would you allow me, I want to make sure, next Wednesday morning at 10:00 o'clock, that is on September the 9th, we have Judge Joannides, I mean it's comical, she's supposed to be a judge? I don't believe so.

And, Mr. Tillery, are you on line? Is Mr. Tillery on line? I assume you are. You know, Mr. Tillery, I sincerely apologize because you see it's all so unseemly, do you think I'm having fun being knocked out cold? And all of you are highly paid, I, ladies and gentlemen, gave up a paying job to help our children get a good education, and this is the result. I mean it's so outrageous it defies any logic or any civility.

And I would really field, if anyone would have a question. You know, I started asking, does anybody know how to read? I mean I'm sitting here right now with the ALR bound volume that has caused all of this, but it should have been over so many years ago. Fourteen and a half years, it's so outrageous.

And so did you have a question, Ms. Williams?

CHAIRWOMAN D. WILLIAMS: Do any of the Trustee

Council members have a question for Ms. Obermeyer?

(No audible responses)

CHAIRWOMAN D. WILLIAMS: I do not believe we do today, Ms. Obermeyer, but we thank you very much for testifying.

MS. OBERMEYER: Wait. And I hope I speak the English language, I'm beginning to question whether or not I even speak the English language. Well, have a great day.

CHAIRWOMAN D. WILLIAMS: Thank you very much,

Mrs. Obermeyer.

Is there anyone else who would like to present public comment at this time? What other sites do we have on line? Do we have any remote sites on line?

MS. McCAMMON: We do have Cordova on line.

CHAIRWOMAN D. WILLIAMS: Very good. Is there anybody in Cordova who wishes to testify?

MR. ROBERTS: Yes. My name is Jim Roberts, I'm the General Manager of Cordova Electric Cooperative.

CHAIRWOMAN D. WILLIAMS: Please, Mr. Roberts, if you would proceed.

MR. ROBERTS: I'm not sure of what information that the Council has in front of them. I thought maybe what I could do is just go over a brief history of the situation that we're in at this present time.

CHAIRWOMAN D. WILLIAMS: We would appreciate that.

MR. ROBERTS: A couple of years ago we had a flood down here, a hundred-year flood, and it caused some damage to an existing dam at Humpback Creek, it's a log crib dam. And it fell under the FEMA for getting some funding to

repair it. We did the temporary repairs and then we've had quite a bit of problem trying to get the permanent repairs done. Basically the engineers came up with some ideas that were not real practical as far as the contractors being able to do the work the way the engineers wanted to, so it drug out for a while. And where we're at now is that the design that they're looking at doing is basically putting a false front on the existing dam, using logs.

So there's quite a few logs that are required that we weren't aware of until here just recently. But we're in a time crunch on this whole thing, we need about 160 logs and with the funding available to do the repairs we can't afford to bring them in from anywhere, so we were trying to get them, you know, close to the site where we could utilize them right there.

CHAIRWOMAN D. WILLIAMS: Very good. Is there anything else you wish to say, Mr. Roberts, or are you prepared for questions?

MR. ROBERTS: I'm prepared for questions, ma'am.

CHAIRWOMAN D. WILLIAMS: Very good. Trustee Council members, do you have questions of Mr. Roberts?

MR. RUE: This is Frank Rue, I've got one.

CHAIRWOMAN D. WILLIAMS: Yes, please.

MR. RUE: Yeah, Mr. Roberts, this is Frank Rue at Fish and Game. My question would be, if, as you put in the

new logs, is there any concern that the old dam will sort of have a catastrophic failure and then knock out the new logs or anything like that? Or do you have a plan for dealing with that?

MR. ROBERTS: What we're looking at doing is they're going to build up in front of it in stages and they'll put log cribbing in and then behind the old dam it's all filled with gravel and stuff, and we got equipment up there, we can push gravel over and fill up the new one as they build it and that will make it stable and it will be tied into the old one.

MR. RUE: I got you. Okay, good.

CHAIRWOMAN D. WILLIAMS: Mr. Roberts, this is
Deborah Williams and I do have a few questions. I'm looking at
the resolution and paragraph number four in the resolution
talks about a skyline yarding system. And the sentence says "A
skyline yarding system will be used to yard logs from the north
side of the Humpback Creek drainage, and a double drum yarder
will be placed by helicopter on a hill approximately 100 feet
above the site on the south side." Could you interpret that
for us?

MR. ROBERTS: Yes. Basically what they use in logging is like a skyline and it's a cable stretched between two points and what they can do is they can hook onto equipment, logs, whatever and move it up, down, sideways, anywhere along where those cables are strung. And considering

the location of where this dam is down in a canyon, the contractors felt that this was the most cost effective way to pick the logs and actually put them in place.

1.7

CHAIRWOMAN D. WILLIAMS: Is this methodology what we might called selective harvesting of trees or is it more akin to clear cutting?

MR. ROBERTS: I am not sure. I think what they're doing is they're trying to pick out -- you know, we need certain size trees and I think they're doing selective cutting up there. I think that Gary Squires of Wilson Construction and Steve Babler of the Forest Service are on line here also in Cordova and they might be able to address that a little further.

CHAIRWOMAN D. WILLIAMS: Okay. Can either of you gentlemen address that?

MR. DOIG: This is Clair Doig, I can address that.

CHAIRWOMAN D. WILLIAMS: Oh, Clair, that would be great.

MR. DOIG: Actually there -- it's going to be small clear-cut patches. When talking with Gary on the site, I asked that they do it more in corridors rather than one, you know, completely clear-cut area, but it may not be possible just because of the way -- when you're using a skyline system you aren't clear above, you know, the surrounding trees, the

skyline will probably be strung 20 to 30 feet up in existing trees, and that's not over the tops of the other trees. So you would get your line snarled. But they can do, possibly, somewhat of a corridor-type yarding to restrict where they actually do have to cut. And they do have the possibility of doing some side blocking on that, too. It's small timber up there, it's all second growth timber that's grown up since they've built the first dam, you know, so I -- you know, it's not going to be as much as an impact as, you know, if you're thinking about a normal commercial harvest operation.

1.2

MR. WOLFE: Clair, we were talking earlier, this is partially in response to Deborah's question, this will be full suspension, though, of the material across the drainage and down into the site, right?

MR. DOIG: That's right. We talked about that on the site and, you know, to the extent that they can do it, but the ground that they're getting the logs off of is -- slopes towards -- you know, it's a fairly gentle sloping towards the ravine and then when you get to the edge of the ravine it's almost vertical. You know, it's a very steep ravine in there, so, you know, if for -- back at the back end of things there may not be full suspension, but probably by the time they get halfway down the slope it will be.

MR. WOLFE: One other question. Before you get into the over steepened slopes, though, would that be suspended?

MR. DOIG: Yes, yes.

MR. WOLFE: Yeah, okay. What about -- Deborah was asking about partial clearing, it was my understanding it probably would be almost clear cutting two to three acres.

MR. DOIG: Yeah, that's what I'm saying, you know, but they -- you know they have some ability on the edges of the areas that they're harvesting to go back into it, you know, to side block timber towards the skyline, you know, so that -- you know, conceivably they can reduce the impact so it won't be -- you know, they'll be selected on -- selective logging on the end of it. In other words, kind of feathering the openings.

MR. WOLFE: Okay.

CHAIRWOMAN D. WILLIAMS: Okay. Another question for Mr. Roberts. Again, looking at our draft resolution, we -- at the very end, we talk about a potential compensation. We say "the purchase price for the acquisition of the Lands shall be reduced by the value of the timber removed from the Site as may be determined by any compensation Eyak receives from the Cordova Electric Cooperative in the form of cash and/or credit toward its utility billing, less Eyak's costs." What sense do we have of the amount of cash and/or credit Cordova Electric Cooperative might be paying Eyak? And how do we think that would compare with costs?

MR. ROBERTS: Well, I haven't received anything

from Eyak as to what, you know, what the worth is. What Brian Lettich, who's the General Manager of Eyak and I had talked about was in the range of 12 to 25,000, in that range and we have not agreed upon whether it would be an exchange of services or cash or what, that's something that both our Board of Directors will have to address.

CHAIRWOMAN D. WILLIAMS: Okay. And, Clair, do we have a sense of how much this will cost?

MR. DOIG: I really don't. What I determined on -- being on the site, it was more practical to come back out there and tally the trees that they actually cut rather than try to take an, you know, estimated guess at it while I was out there, but I think it'll be within the range that Mr. Roberts mentioned.

MR. RUE: Madam Chair.

CHAIRWOMAN D. WILLIAMS: Yes, Mr. Rue.

MR. RUE: If you're finished that line of questioning, I have a question.

CHAIRWOMAN D. WILLIAMS: Great.

MR. RUE: It's a procedural one. Does everyone have the resolution before them to look at? I'm not sure we've introduced it officially.

CHAIRWOMAN D. WILLIAMS: We have not.

MR. RUE: Okay.

CHAIRWOMAN D. WILLIAMS: Does everyone

have....

MR. RUE: Should we before we -- I've got a question relating to the resolution also.

CHAIRWOMAN D. WILLIAMS: Certainly.

MR. RUE: Why don't I ask it, I guess. I'm concerned that we not artificially limit what goes on out there. For instance, in the first paragraph we say "prohibit development on the Lands prior to closing, with the exception of harvesting of 160", I realize it's going to be -- do we want to talk about logs or trees and what if they need 161 logs? I mean -- I guess I would ask Clair or folks if that would constrain them unnecessarily, talking about 160 logs versus some number of trees. Does that give you enough leeway, I quess, to get the job done?

MR. WOLFE: That's a good point, Frank.

MR. DOIG: Yeah, maybe we should.....

MR. RUE: Well, that's the question whenever they have the chance to look at it, I want to make sure we don't artificially constrain what goes on out there.

MR. WOLFE: Yeah, I agree.

MR. DOIG: Yeah, I -- this is Clair. I was just trying to figure out what -- you know, I know you want to put some sideboards on it, maybe you want to address it by, say, two to three acres or something like that. You know, there's probably going to be more trees cut than logs utilized

and the number of logs to be utilized is estimate -- you know, just an estimate at this time, so.....

MR. RUE: Okay. In the preamble we talk about some clearing of second-growth hemlock will occur at the sight. Additionally -- so there's allowed for some clearing of hemlock. "Additionally, it is expected that 160 logs of 20 to 30 feet in length, approximately 80 to 100 trees will be needed to construct the replacement dam." So the preamble gives a fair amount of latitude because it's approximate kind of language.

MR. DOIG: Right.

MR. RUE: But then when we do the therefore, we say -- we're quite specific about what gets to get taken so, anyway, a thought for folks to ponder.

CHAIRWOMAN D. WILLIAMS: Okay, very good. Are there any other questions of Mr. Roberts?

MR. WRIGHT: Yes, this is Bruce Wright, Madam Chair, I have a question.

CHAIRWOMAN D. WILLIAMS: Yes, Bruce.

MR. WRIGHT: The first dam was built in 1904 and so that dam has existed now for 98 years; is that correct? Or 94?

MR. ROBERTS: I believe it was built in 1908, but, yeah.

MR. WRIGHT: And do we expect this next dam to

last 90 years?

 $$\operatorname{MR}.$$ ROBERTS: Given the conditions up there, I don't see why not.

MR. WRIGHT: I just wanted to know if I had to deal with this issue again in a couple of years. I guess not.

MR. ROBERTS: No, no.

MR. WRIGHT: That's all I have.

CHAIRWOMAN D. WILLIAMS: Very good.

MR. TILLERY: Deborah.

CHAIRWOMAN D. WILLIAMS: Yes.

MR. TILLERY: This is Craig Tillery.

CHAIRWOMAN D. WILLIAMS: Craig.

MR. TILLERY: Just one quick question for Eyak.

Are they comfortable with the requirement that they replant

trees as required by the Forest Service?

MR. DOIG: This is Clair. There's no need to replant trees, the trees that we're cutting are second growth, there's an adequate seed source up there, natural regeneration is adequate, you know, totally adequate.

MR. TILLERY: Well, actually that was kind of my thought, particularly if it's a small cut and I was wondering, there is a provision here that says "Eyak shall also agree to replant trees in the area if requested to do so by the Forest Service." I.....

MR. LOGAN: Madam Chair, this is the Forest

Service, we're on line.

CHAIRWOMAN D. WILLIAMS: Yes, please, would you like to respond?

MR. LOGAN: Yes, I would. We have Gary Squires, Steve Babler and Dan Logan here. I agree with what Clair said, regeneration isn't a problem, we usually have a stocking minimum requirement that we have. I doubt if that'll be the case on this one, I think it will regenerate fine.

MS. McCAMMON: Could you please identify yourself?

MR. LOGAN: This is Dan Logan and on our line here we have Gary Squires from Wilson Construction, Steve Babler from the Forest Service and myself, Dan Logan, from the Forest Service.

CHAIRWOMAN D. WILLIAMS: Okay. Thank you, Dan.

MR. WOLFE: Deborah, this is Jim.

CHAIRWOMAN D. WILLIAMS: Yes, Jim.

MR. WOLFE: I think Maria's intent or the resolution's intent, though, is if, by some reason or other, it didn't naturally regenerate that we would go in and replant or that Eyak would go in and replant. So maybe it should say something a little different, but I don't think you would disagree with that, I think we all agree that natural regeneration would probably adequate there, but just in case it isn't, there should be some clause.

MR. TILLERY: Madam Chair.

CHAIRWOMAN D. WILLIAMS: Yes, Mr. Tillery.

MR. TILLERY: I guess then for Clair, with those explanations are you comfortable with having a provision like that in the agreement?

MR. DOIG: Yeah, as long as there's nothing that requires us to do it. I mean, you know, you're talking about -- you know, under the Forest Practices Act, we have basically five years. I don't think that that's going to be a problem, you know, I think, you know, within three years you'll have brush that you can't even walk through up there, so -- or regeneration, at least, that you can't even walk through.

MR. WOLFE: So if natural regeneration hasn't occurred in five to seven years?

MR. DOIG: Well, even five years is fine.

MR. RUE: I'm not sure why we need it if we got it in another place, like the Forest Practices Act.

MR. DOIG: Yeah. I mean, you know, the fact of the matter is it isn't going to be a problem, so.....

MR. WOLFE: I don't think so either. Frank, do you think we can just drop the clause if it's in the Forest Practices Act?

MS. McCAMMON: Madam Chair, this is Molly
McCammon, can I ask a clarifying question about that?

CHAIRWOMAN D. WILLIAMS: Yes, Ms. McCammon.

MS. McCAMMON: Are these lands part of the timber-only conservation easement or are they lands that would be acquired by the government in fee?

MR. DOIG: Timber-only conservation easement.

MS. McCAMMON: All right. So they still remain in Eyak's ownership?

MR. DOIG: That's right.

MR. WOLFE: That's correct.

MS. McCAMMON: Thank you.

CHAIRWOMAN D. WILLIAMS: All right. Again, we can -- when we actually put the resolution on the table, we can start talking about amendments. We are still in public comment period, this has been a good one. Are there any other questions of Mr. Roberts?

MR. WOLFE: I have a question for Mr. Logan or the other Forest Service people that were there.

Jim, I look forward to entertaining that question once we determine whether there are any further questions of Mr. Roberts. Are there any further questions of Mr. Roberts?

(No audible responses)

CHAIRWOMAN D. WILLIAMS: Okay. Thank you very much, Mr. Roberts, and I know you'll standby in case we have further questions as we discuss the resolution itself.

MR. ROBERTS: Thank you very much.

CHAIRWOMAN D. WILLIAMS: Thank you. Is there 1 any further public comment at this time? 2 (No audible responses) 3 CHAIRWOMAN D. WILLIAMS: Is there any further 4 5 public comment in Cordova? (No audible responses) 6 CHAIRWOMAN D. WILLIAMS: Is there any further 7 public comment in Anchorage? 8 (No audible responses) 9 We also have Homer on the line. MS. McCAMMON: 10 11 CHAIRWOMAN D. WILLIAMS: Oh, is there anyone who wishes to testify in Homer? 12 13 MS. BRODIE: Hi, this is Pamela Brodie, I'm on for listen only, thank you. 14 CHAIRWOMAN D. WILLIAMS: Thank you. Are there 15 any other sites on line and anyone who wishes to testify? 16 17 (No audible responses) CHAIRWOMAN D. WILLIAMS: Okay, hearing none, we 18 will now close the public comment period. And thank you very 19 much for those of who did testify. 20 That brings us to the third item on the agenda, which 21 22 is the resolution and the issue of Eyak's Humpback Creek Hydroelectric Project. I would entertain a motion with respect 23 24 to the resolution that is in front of us, which I believe everyone should have revised draft version number two. 25

Ms. McCammon, is that the resolution everyone has in 1 front of them? 2 MS. McCAMMON: It should be, yes. 3 CHAIRWOMAN D. WILLIAMS: Okay. And it should 4 5 say revised 9/3/98. MR. RUE: Madam Chair. 6 CHAIRWOMAN D. WILLIAMS: Yes, Mr. Rue. 7 MR. RUE: The draft I have before me says 8 "Revised Draft 9/3/98", there's no..... 9 CHAIRWOMAN D. WILLIAMS: Yes, I believe that's 10 the one we all have. 11 MS. McCAMMON: Okay. 12 MR. RUE: Okay. 13 CHAIRWOMAN D. WILLIAMS: 14 Okay. 15 entertain a motion regarding the resolution. 16 MR. WOLFE: Madam Chair, for purposes of discussion, I would move that we adopt the resolution, this 17 draft, 9/3/98. 18 19 CHAIRWOMAN D. WILLIAMS: Very good. Is there a second? 20 21 MS. BROWN: Second. This is Michele Brown. 22 CHAIRWOMAN D. WILLIAMS: Okay. It has been moved by Mr. Wolfe and seconded by Ms. Brown that the Trustee 23 Council adopt the resolution regarding Eyak's Humpback Creek 24 Hydroelectric Project, entitled "Revised Draft 9/3/98." 25

open up this motion for discussion. Is there discussion?

MR. WOLFE: Madam Chair.

1.8

MR. RUE: Madam Chair.

CHAIRWOMAN D. WILLIAMS: Ms. McCammon, would you like to give us a brief overview?

MS. McCAMMON: I would defer to the Forest Service on this, Jim Wolfe.....

CHAIRWOMAN D. WILLIAMS: Very good.

MS. McCAMMON:since I've been out of the office the last couple of days.

CHAIRWOMAN D. WILLIAMS: Okay. Very good.

Jim, if you'd like to give us a brief overview.

MR. WOLFE: I can do that. We kind of got somewhat of an overview of what's being proposed at this point in time. I'm not sure we need any more on that end of it, unless somebody has some additional questions on that end of it.

My overview would be, our people have been out to the site with the corporation folks to look at the site and basically our determination is that -- and Dan or Steve could probably do this better than I, but we've determined that there are no eagle nests within a short distance of it, there are no anadromous fish streams involved, except in the intertidal reaches of the drainage. And it didn't look -- and our folk were -- generally didn't feel like the impact from the harvest

of the trees would have any impact on the EVOS restoration objectives. And it wasn't clear that that was what they had found but I would ask the question of either Dan or Steve if that was their conclusion?

CHAIRWOMAN D. WILLIAMS: Yes, please. Dan or Steve, if you could respond to Mr. Wolfe's inquiry. And the inquiry.....

MR. LOGAN: Madam Chair, this is Dan Logan, we concur with what Jim Wolfe said. We reviewed it during the week, there is no eagle nest trees in that area, there's no issues with anadromous streams and we feel that the proposal that's given is reasonable.

CHAIRWOMAN D. WILLIAMS: Okay. And so you would agree that it will not have any adverse impacts on the restoration attributes of this land?

MR. LOGAN: Yes, that's correct.

CHAIRWOMAN D. WILLIAMS: Okay. Maria, would you be willing to add a sentence to the resolution that would reflect that?

MR. WOLFE: Maria is not in, but we were already talking about adding a clause to that effect somewhere in the front end of it.

CHAIRWOMAN D. WILLIAMS: Good. Barry, are you on the line now?

MR. ROTH: Yes, I am.

CHAIRWOMAN D. WILLIAMS: Could you, while we're talking, quickly draft up a sentence that is faxed to the Trustee Council?

MR. ROTH: Sure.

1.

1.0

CHAIRWOMAN D. WILLIAMS: Thank you.

MR. RUE: Madam Chair, this is Frank Rue, I have a proposed amendment.

CHAIRWOMAN D. WILLIAMS: Yes, please, Mr. Rue.

MR. RUE: I would propose amending item (A)1, under the therefore, so that it would read "1) prohibit development on the Lands prior to closing, with the exception the harvesting of," delete 160 logs, insert trees "from the site," and then insert after the word site, "necessary for the construction of a replacement dam." So it doesn't -- so that if they get out there and they need, you know, 161 logs we haven't created a problem, but it's only those necessary for the construction of the replacement dam.

CHAIRWOMAN D. WILLIAMS: Okay.

MR. WOLFE: Very good.

CHAIRWOMAN D. WILLIAMS: Do the Trustee Council members feel comfortable with that modification? Anyone have concerns with that amendment?

MR. WRIGHT: Is there a limitation at all here, Frank?

MR. RUE: Only the "necessary for

construction." 1 So they can take a thousand trees MR. WRIGHT: 2 if they feel like it's necessary? 3 MR. RUE: Yeah. Which I doubt they will. 4 MR. WOLFE: Okay. 5 I mean I don't know, if there's MR. RUE: 6 another way folks want to limit it, that's fine. 7 MR. ROTH: Well, they have to pay for them to 8 Eyak, so there's an incentive not to take superfluous trees. 9 CHAIRWOMAN D. WILLIAMS: Okay. 10 MR. DOIG: Plus where you going to take them? 11 12 MR. WOLFE: I still have one other question for -- and I should have asked this when the person from Chugach 13 [sic] Electric was on the line. Is he still on the line? 14 CHAIRWOMAN D. WILLIAMS: Mr. Roberts? 15 MR. ROBERTS: Yes, I am. 16 MR. WOLFE: Before you start any construction 17 you have to get an approved plan. A plan approved by the State 18 and/or FERC, do you not? 19 MR. ROBERTS: Not to my knowledge for this. 20 21 MR. WOLFE: Is that right? MR. RUE: I think that's correct. 22 23 MR. WOLFE: Is this what's called a low hazard structure, then? 25 MR. ROBERTS: Yes, this is not an integral part

of the existing hydroelectric site.....

MR. WOLFE: Okay.

MR. ROBERTS:but if the old dam and gravel up there washes out, it would take out a portion of our pen stock for our existing project.

MR. WOLFE: Okay. That's fine.

CHAIRWOMAN D. WILLIAMS: I have a question, and that is with respect to the subsection five under therefore. I quess it's the very last numbered subsection in the resolution. And I'm particularly interested in Barry's thoughts or other people's thoughts about this. It says "the purchase price for the acquisition of the Lands shall be reduced by the value of the timber removed from the site" which makes sense. But then it has "less Eyak's costs" and that doesn't seem intuitively obvious for me. We are paying for timber rights, there is going to be less timber on this land than we thought we were buying. I don't see the relevance of Eyak's cost to determining how much the Trustee Council should pay for the timber costs. And so I question whether we should have the phrase "less Eyak's costs" in this resolution and as part of the compensation for allowing these 100 or so trees to be removed.

Or, Ms. McCammon. If anyone would like to respond to that, I just simply don't see the logic of it.

MR. WOLFE: Deborah, if I could respond

partially?

CHAIRWOMAN D. WILLIAMS: Yes.

MR. WOLFE: Some of that language, I think, is from the Bomb Point language dealing with the timber on the conservation easement there. And it was assumed that the land owner would do some oversight and provide -- have some investment in providing oversight of the harvest activity that's going on, and that's what that relates to, in my opinion, anyway.

MS. LISOWSKI: Madam Chairman.

CHAIRWOMAN D. WILLIAMS: Yes.

MS. LISOWSKI: This is Maria Lisowski.

CHAIRWOMAN D. WILLIAMS: Yes, Maria.

MS. LISOWSKI: And the intent behind that language is, as we understood it, Eyak was going to have negotiations with the cooperative of what compensation they would receive from the cooperative for the value of the timber. As part of that, they would be negotiating some value for Eyak's costs associated with administering this particular activity. And I think the intent there was not that we recoup whatever that administrative cost to Eyak would be, but simply the value of the actual timber removed.

MR. WOLFE: But that still doesn't answer the question about the Eyak costs.

MS. LISOWSKI: Well, the Eyak costs is the

costs of whatever they would be charging the cooperative to cover their particular costs for administering this activity out there.

MR. WOLFE: Okay. That's kind of what I was trying to say, yeah. For providing (indiscernible - interrupted).....

MR. RUE: Madam Chair.

MR. WOLFE:identifying the trees, yeah.

CHAIRWOMAN D. WILLIAMS: Mr. Rue.

MR. RUE: Madam Chair, this is Frank Rue, and since I didn't get a second to my amendment, can I quickly finish it? Okay?

CHAIRWOMAN D. WILLIAMS: Yeah.

MR. RUE: It's still open, I assume.

CHAIRWOMAN D. WILLIAMS: There was no objection to your amendment.

MR. RUE: Oh. Well, actually I wanted to -- I was going to go with it, so if you don't mind?

CHAIRWOMAN D. WILLIAMS: Oh, okay, we'll go back.

MR. RUE: Okay. Let me go back to that and say -- instead of just saying trees, how about approximately 80 to 100 trees necessary? So we repeat it's approximately, so you have a sense of how large this is. And then delete item four, Eyak shall also agree to replant. I think that's unnecessary

given, one, the natural conditions around Cordova for restocking. And two, I believe, the Forest Practices Act, I believe, requires this to be restocked at a certain level within five years.

CHAIRWOMAN D. WILLIAMS: Okay. Let me tell you what I'd like to do. Let's -- we'll go back and address the modification to (A)1, but I'd like to finish five before we go to four.

MR. RUE: Okay.

CHAIRWOMAN D. WILLIAMS: So do all the Trustee Council members feel comfortable with the amendment that (A)1 would now read, under Mr. Rue's amendment "prohibit development on the Lands prior to closing, with exception of the harvesting of approximately 80 to 100 trees from the site necessary for the construction of replacement dam."

MR. WOLFE: I'm fine with that.

CHAIRWOMAN D. WILLIAMS: Okay, good. All right, let's go back to five then and then we will do number four. Let me say, in the first instance, I don't understand why we'd even deduct administrative costs from this, but let me ask a clarify question. Who is actually paying for the harvesting of the trees themselves? I guess I was under the impression from the comment we had earlier that Eyak was paying for the harvesting of the trees and I had a sense from Clair, and I'll forward for any better sense of this. I had a sense

from Clair that Eyak would be paying for the harvesting of the trees and that that cost would be approximately the same as the value of the trees.

2.0

And maybe, Clair, if you could discuss this?

MR. DOIG: Okay, I'll discuss that and then I
got to run to get on my plane before it leaves.

CHAIRWOMAN D. WILLIAMS: Okay.

MR. DOIG: Eyak is not paying for the harvest of the trees. All Eyak would be charging would be, you know, basically what would be comparable to fair market value for that timber. In other words, the net value of the trees after the harvesting costs.

CHAIRWOMAN D. WILLIAMS: And who is harvesting the trees?

MR. DOIG: It'll be the contractor for CEC.

CHAIRWOMAN D. WILLIAMS: I see.

MR. DOIG: And that's -- Gary Squires is the superintendent on that project. The costs -- the Eyak costs we're talking about is my time and whatever else, supervision time.

CHAIRWOMAN D. WILLIAMS: And what would you estimate that to be in terms of total costs for Eyak?

MR. DOIG: Eyak's costs are probably going to be in the neighborhood of \$2,500-4,000, depends if I have to make another trip out there or something like that.

CHAIRWOMAN D. WILLIAMS: Would it be a problem if Evak were not compensated for its costs in.....

2.2

MR. DOIG: Well, Eyak's getting compensated by CEC for those costs. I think the intent of the resolution was to talk about the value of the trees that it's getting compensated for from CEC. So, basically, none of this would ultimately end up costing Eyak anything.

CHAIRWOMAN D. WILLIAMS: Okay.

MR. ROTH: Well, let me ask the question this way.

CHAIRWOMAN D. WILLIAMS: Yes, Barry.

MR. ROTH: And if I understand that, then -there's two elements to what you're saying CEC is going to
compensate you for, one is the value of trees and the other is
the Eyak cost component. So all we're saying is that the
purchase -- well, wouldn't work then to say the purchase price
shall be reduced by the value of the timber removed as
determined by compensation Eyak receives from CEC for the value
of trees. I mean if we limit it -- association gets the value
of trees, drop the cost element, is all you're trying to do.

CHAIRWOMAN D. WILLIAMS: Yeah, I would like to drop "less Eyak's costs" out of this clause at which I'm looking.

MR. ROTH: Yeah, yeah, that works.

CHAIRWOMAN D. WILLIAMS: That works, okay,

good.

11.

MR. WOLFE: Say that again.

MR. DOIG: But you're not making it any different, so if the semantics are better....

MR. ROTH: Well, before it said -- before it looked and said -- it got confusing to some of us, I guess, because it read....

MR. DOIG: Either way is the same thing, it's fine by me.

MR. ROTH: Yeah. I mean it's just the value of the trees, it's the amount that is compensated there and that you've already indicated there is real value there and it's going to be counted and so that -- you know, so the Council is not asked to subsidize anything, and that's fine. It was just that it got confusing when the cost, you know, was mentioned because it's really -- the only reason you were mentioning it's -- the total compensation is the value of the tree, plus the value of Eyak's administrative costs associated with it. And all we're asking for is adjusting it by the value of the trees, so we don't need to mention the administrative costs.

CHAIRWOMAN D. WILLIAMS: Correct.

MR. WOLFE: All right.

CHAIRWOMAN D. WILLIAMS: That sounds good.

MR. WOLFE: Did you pick up that, Margaret?

Whew.

CHAIRWOMAN D. WILLIAMS: Maria?

MS. LISOWSKI: Well, the only question I would have is if you delete "less Eyak's costs" if you're saying the compensation that Eyak receives is the value of the timber and I don't think that that's correct.

CHAIRWOMAN D. WILLIAMS: Basically we....

MR. ROTH: How about, the purchase price for the acquisition of Lands shall be reduced....

CHAIRWOMAN D. WILLIAMS: By the value of the timber.

MR. ROTH:by the value received by Eyak from CEC for the value of the timber?

CHAIRWOMAN D. WILLIAMS: Right. That's right.

MS. LISOWSKI: Did you guys catch that in Anchorage, since you'll be making the corrections to the.....

MS. McCAMMON: Yes, we caught it.

MS. LISOWSKI: Okay.

CHAIRWOMAN D. WILLIAMS: Okay, very good. So that would be the proposed second amendment, which I believe we can do in five by just simply taking out the last clause which is "less Eyak's costs" because then we are -- purchase price is reduced by the value of the timber removed, period. Value of timber removed is going to be something that will be quantified in the cost washout.

MR. WOLFE: Okay.

1	CHAIRWOMAN D. WILLIAMS: Okay. Is there any
2	objection to that second amendment?
3	(No audible responses)
4	CHAIRWOMAN D. WILLIAMS: Very good.
5	MR. RUE: So you put a period after the word
6	"site" in the first sentence? Is that what you're doing, Madam
7	Chair?
8	CHAIRWOMAN D. WILLIAMS: I was going to put it
9	after the word "billing".
10	MR. RUE: Billing, okay.
11	CHAIRWOMAN D. WILLIAMS: But it would be
12	well, what do people think?
13	MR. WOLFE: I would put it after billing.
14	CHAIRWOMAN D. WILLIAMS: Okay.
15	MR. RUE: Okay.
16	MS. McCAMMON: Madam Chair, can I just restate
17	it?
18	CHAIRWOMAN D. WILLIAMS: Well, actually I like
19	your idea better, Frank. I like putting the word after the
20	word "site" if people feel comfortable with that.
21	MR. WOLFE: It will work, the other is just an
22	explanation of how we determined that.
23	CHAIRWOMAN D. WILLIAMS: Right.
24	MR. WOLFE: Yeah.
25	MR. RUE: That's fine.

MR. WOLFE: Okay.

CHAIRWOMAN D. WILLIAMS: Okay. Actually if we do it after billing, should we may be -- may be determined by the compensation Eyak receives for the timber? And then that will wash out the -- Eyak's costs. Okay, so this is what I would propose. Subsection five be amended to read "the purchase price for the acquisition of the Lands shall be reduced by the value of the timber removed from the Site as may be determined by any compensation Eyak receives for the timber from the Cordova Electric Cooperative in the form of cash and/or credit toward its utility billing." Period. We feel comfortable with that?

(No audible responses)

CHAIRWOMAN D. WILLIAMS: That does it for me.

Barry? Maria?

1.9

MR. ROTH: Fine. Fine with me.

MS. LISOWSKI: Fine.

CHAIRWOMAN D. WILLIAMS: Okay, excellent.

Okay. Are there any other questions or comments about the amendment to subsection five?

(No audible responses)

CHAIRWOMAN D. WILLIAMS: Let's move to subsection four. Frank, why don't you go ahead and restate your comment and then I'm sure Mr. Wolfe has a response.

MR. RUE: I would propose deleting section

four. I believe that, given the conditions in Cordova, stocking is not a problem, maybe overstocking is a problem from a forester's perspective.

MR. WOLFE: Yeah.

MR. RUE: So I think it's unnecessary. Now maybe you don't need to delete it because the Forest Service won't ask them to do anything, but I think it's cleaner to just say it's not an issue.

CHAIRWOMAN D. WILLIAMS: Jim.

MR. WOLFE: I'm okay, that's fine.

CHAIRWOMAN D. WILLIAMS: I guess I would tend to keep it in. I guess if, you know, no harm, no foul, and one who believes, you know, in global warming and everything else. We really don't know what's going to be happening in the next several years. I just don't see any harm in keeping it in and it sounds as if Eyak did not have a problem in keeping it in. And I'd feel more comfortable keeping it in.

MR. WOLFE: Then if you're going to keep it in, then it needs to be revised, Deborah, just briefly.

CHAIRWOMAN D. WILLIAMS: Okay.

MR. WOLFE: So it could be revised to say, Eyak shall also agree to replant trees in the area where timber was removed from the Site, if requested -- no, if natural regeneration does not occur within a five to seven year period, if requested to do so by the Forest Service.

MR. RUE: That's a double deal.

MR. WOLFE: Yeah.

CHAIRWOMAN D. WILLIAMS: How about -- I hate to put -- I hate to think if natural regeneration doesn't occur in five to seven years that you would not. How about, if natural regeneration does not occur within a five to seven year period and when requested to do so by the Forest Service?

MR. WOLFE: That's better.

CHAIRWOMAN D. WILLIAMS: Okay.

MR. WOLFE: Did you capture that, Molly?

MS. McCAMMON: Yes, I did.

MR. WOLFE: Very good.

CHAIRWOMAN D. WILLIAMS: Okay. So four would be amended to read "Eyak shall also agree to replant trees in the area where timber was removed from the Site, if natural regeneration does not occur within a five to seven year period, and when requested to do so by the Forest Service."

MR. RUE: I don't what to nitpick but why five to -- I mean, geez. It's like five to seven is -- why don't we say seven?

CHAIRWOMAN D. WILLIAMS: Okay, I think that's right.

MR. RUE: I think the Forest Practice requires five, but that's all right.

CHAIRWOMAN D. WILLIAMS: All right.

MR. RUE: I'm not going to quibble. 1 MS. McCAMMON: So it would be within seven 2 years? 3 CHAIRWOMAN D. WILLIAMS: Within a seven year 4 period, right. 5 MR. WOLFE: Yeah. That's just terminology that 6 we normally use, but..... 7 MR. RUE: Okay. 8 MR. WOLFE:that's fine, seven is fine. 9 CHAIRWOMAN D. WILLIAMS: Right. 10 MR. RUE: Does Eyak have any problems with 11 that? Is Clair still here? 12 MR. WOLFE: I think Clair's on a plane right 13 14 now. MR. RUE: I would assume he doesn't because 15 this is a lot of ifs. 16 CHAIRWOMAN D. WILLIAMS: Right. 17 18 MR. RUE: Probably won't happen. CHAIRWOMAN D. WILLIAMS: Right. Well, let's 19 20 hope it doesn't happen, if it..... MR. RUE: That's fine. 21 22 CHAIRWOMAN D. WILLIAMS:don't have natural regeneration our climate is more confused than we are 23 predicting right now. 24 25 MR. RUE: Actually opening up the second growth

will probably be kind of good for it, if it's small enough. 1 MR. WOLFE: That's true. 2 CHAIRWOMAN D. WILLIAMS: All right. 3 MR. RUE: Okay. 4 CHAIRWOMAN D. WILLIAMS: Are there any other 5 questions, comments, proposed amendments on the resolution? 6 MR. ROTH: Madam Chair. 7 CHAIRWOMAN D. WILLIAMS: Oh, yes. 8 MR. ROTH: I faxed to Molly, I don't know if 9 she got it yet, the sentence you asked me to draft. 10 CHAIRWOMAN D. WILLIAMS: Excellent, thank you, 11 Barry. Molly, do you have it? 12 MS. McCAMMON: No, we'll go get it. 13 14 CHAIRWOMAN D. WILLIAMS: Thank you. MR. WOLFE: Can you read it for us, Barry? 15 CHAIRWOMAN D. WILLIAMS: 16 17 MR. ROTH: Yeah, I just stuck in as in the - on page two as item number seven "U.S. Forest Service personnel 18 have examined the Site and determined that under terms and 19 conditions provided herein, the proposed activity will not 2.0 affect the recovery of the injured EVOS resources." 21 22 MR. WOLFE: Sounds good. 23 CHAIRWOMAN D. WILLIAMS: Sounds good. Anyone have any comments about that? 24 MR. ROTH: And I defer to Maria whether that's 25

"effect" with and E or an A. 1 MS. LISOWSKI: 2 MR. RUE: E. Vote on that, can we vote on 3 that. 4 5 CHAIRWOMAN D. WILLIAMS: Yeah, really. MR. ROTH: I wrote it with an E, but Molly, she 6 7 usually finds..... MR. WOLFE: Keeps you straight? 9 MR. ROTH: Point -- keeps me straight. MS. McCAMMON: I think it's an A, but we'll 10 11 check. MS. LISOWSKI: 12 I concur. 13 MR. MYERS: We have the electronic document. 14 CHAIRWOMAN D. WILLIAMS: Okay. 15 MS. McCAMMON: Madam Chair, I have one 16 more.... MR. RUE: Are we ready for the question or 17 18 what.... MS. McCAMMON:minor amendment. 19 20 CHAIRWOMAN D. WILLIAMS: Great. 21 MS. McCAMMON: And that's on number six, even 22 though I can't make an amendment, just to note a technical 23 change, it's the Alaska Division of Emergency Service, not the Alaska Department. 24

CHAIRWOMAN D. WILLIAMS: Okay. All right.

25

there any other questions, comments, or proposed amendments from the Trustee Council?

MR. WRIGHT: Madam Chair, just a question.

This is Bruce Wright. We don't have any timing limitations on when these activities can take place in this resolution at all. And it appears that their funding runs out in early October, and that would be fine if the project's complete by then. My concern is if they get an exemption or an extension of the project that then takes this project into the spring -- and this might be one of those streams that's used by harlequin ducks, which is a species of concern for us, so I don't know how best to address this in the resolution, but I think somehow we should put an end date for when these activities are completed.

CHAIRWOMAN D. WILLIAMS: Okay. Mr. Roberts, are you still with us?

MR. ROBERTS: Yes, I am, ma'am.

CHAIRWOMAN D. WILLIAMS: Very good. Would you feel comfortable with stating somewhere in the resolution that this activity will be completed in this calendar year?

MR. ROBERTS: I guess I would defer that question to Gary Squires of Wilson Construction.

CHAIRWOMAN D. WILLIAMS: Okay. Mr. Squires.

MR. LOGAN: Mr. Squires just left.

MR. RUE: Oh, great.

MR. ROBERTS: I would assume that they would be able to do it within that time frame, by the end of the year.

MR. WOLFE: What is the time frame that we can expect the harlequin ducks, if there were any, to be on that stream, do you know? Does anybody know?

MR. LOGAN: We haven't observed any -- this is Dan Logan with the Forest Service in Cordova. We haven't observed any harlequin ducks at that site. If they were using it for nesting it would be from about May through the end of June.

MR. GIBBONS: Dan, this is Dave Gibbons, isn't the harlequin duck nesting related to anadromous fish streams?

MR. LOGAN: Yes, it is. We -- that's why I say we haven't observed any on the Site.

MR. GIBBONS: (Indiscernible - simultaneous speech) not an anadromous fish stream, other than the mouth.

MR. LOGAN: That's right, they would be out at the mouth and the intertidal. I don't think they would be nesting in this site that we surveyed.

MR. ROTH: I guess, Madam Chair, let me point out that item three on page three "Eyak shall require the implementation of the mitigation measures identified in the resolutions and any reasonable measures the Forest Service or ADF&G may request while present at the Site." So I mean that would, I think, give -- even if they were -- it doesn't look

like the problem is there anyway but even if they find a problem on site, then, you know, the Forest Service and ADF&G have the means and Eyak is obliged to, you know, mitigate. So I think they can deal with it and it shouldn't impact the harlequin, not only because it's not likely to be there, but they have the means, if something arises, to deal with it.

MR. WRIGHT: Actually, I think that's a very good point and this probably covers my concern.

CHAIRWOMAN D. WILLIAMS: Okay. Thank you very much, Bruce. Any other questions, comments or proposed amendments?

(No audible responses)

2.2

CHAIRWOMAN D. WILLIAMS: All right. Hearing none, I will ask the Trustee Council to vote on the resolution as amended. And, to remind the Trustee Council, we have amended the word "Department" to be "Division" in item six in the preface. We have amended section one after the therefore clause and section four and section five.

All in favor of the resolution, as amended, please indicate by saying aye.

MS. McCAMMON: Madam Chair.

CHAIRWOMAN D. WILLIAMS: Ms. McCammon.

MS. McCAMMON: You've also added a new section seven on this, too.

CHAIRWOMAN D. WILLIAMS: Oh, yes, thank you

very much. And we have added a new section seven to the preface. Thank you very much. Okay, all in favor of adopting the resolution, as 3 4 amended, indicate by say aye. IN UNISON: Aye. 5 CHAIRWOMAN D. WILLIAMS: All opposed? 6 (No opposing responses) 7 CHAIRWOMAN D. WILLIAMS: The amended resolution 8 passes unanimously. Ms. McCammon, are there any other issues that need to 10 be discussed at this time? 11 MS. McCAMMON: No, there are not. 12 CHAIRWOMAN D. WILLIAMS: Okay, hearing none, I 13 will entertain a motion to adjourn. 14 MR. RUE: So moved. 15 MR. WOLFE: And seconded. 16 17 CHAIRWOMAN D. WILLIAMS: Okay, it's been moved 18 by Mr. Rue and seconded by Mr. Wolfe to adjourn. All in favor indicate by saying aye. 19 IN UNISON: Aye. 20 CHAIRWOMAN D. WILLIAMS: Opposed? 21 (No opposing responses) 22 CHAIRWOMAN D. WILLIAMS: All right. And our 23 next meeting, Ms. McCammon is September.... 24 l

MS. McCAMMON:

29th, in Juneau.
