## MEMORANDUM

TO: Trustee Council Members

FROM: Eric Myers, *EM* Director of Operations

DATE: October 31, 1996

SUBJECT: Nominations for the Public Advisory Group

The second term of the Public Advisory Group ended October 1996. Please find attached information regarding nominations to serve on the Public Advisory Group.

Twenty nine nominations were received in response to the solicitation for candidates. This included a request for nominations published in nine spill-area community newspapers in August, as well as a flyer mailed to approximately 2,150 Alaska addresses on the Trustee Council mailing list.

Enclosed you will find the nominations and letters of support that were received. Fifteen members of the current Public Advisory Group reapplied (only the Commercial Fishing and Forest Products representatives are not seeking reappointment). Fourteen additional nominations have been received in support of new candidates.

Immediately following this memo is a summary chart that identifies each nominee and the interest group seat they are seeking to represent. Current PAG members are identified by an "O" in the table. Please note that, in some cases, individuals are being nominated as candidates eligible for more than one interest group seat.

If you have any questions concerning this information, please let me know.

July 12, 1994

Jim Ayers  
Executive Director  
Exxon Valdez Oil Spill Trustee Council  
645 G Street, Suite 401  
Anchorage, AK 99501

Dear Jim:

Pursuant to Molly McCammon's letter to June 8, 1994 regarding nominations for the next two year term to the EVOS-PAG, please consider this letter as my request for re-nomination to the interest position of Sport Hunting and Fishing.

A biographical outline should be in the EVOS files. I meet all of the concerns of the conflict of interest section.

Sincerely,

  
Rupe Andrews

RESUME OF: RUPERT E. ANDREWS

ADDRESS: 9416 Long Run Drive  
Juneau, Alaska 99801

PHONE: (907) 789-7422 Home

AGE: 63 BIRTHDATE: September 18, 1929

SPOUSE: Genevieve Frances Andrews

CIVIC  
ORGANIZATIONS: Juneau Rotary Club (Member 1972)

PROFESSIONAL  
ORGANIZATIONS: American Institute of Fishery Research  
Biologists. (1973-1976 District Director)  
Western Association of Fish and Wildlife  
Agencies.

OTHER  
ORGANIZATIONS: Alaska Rifle and Pistol Association  
Juneau Rifle and Pistol Club  
Territorial Sportsmen of Juneau  
Sitka Sportsmen (Life Member)  
Alaska Outdoor Council (President,  
1984-1986)  
National Rifle Association (Life Member)  
Ducks Unlimited  
Federation of Fly Fishermen  
Juneau Trapshooting Club (Board of  
Directors)  
Alaska Waterfowl Association  
  
Southeast Representative on the Governor's  
Outdoor Recreational Advisory Committee  
1991 to present.

RECREATIONAL  
ACTIVITIES:

Certified Shooting Counselor and  
Instructor; Downhill skiing; Hunting;  
Sport Fishing; Trapshooting.

MILITARY  
SERVICE:

Four years, four months U.S. Coast Guard.  
Honorable Discharge. Service Dates- Oct. 4,  
1946 to January 21, 1951. Held rate of EM  
2/c Tel.

EDUCATION:

Attended the University of Idaho 1952-1956  
and graduated with a Bachelor of Science  
degree from the College of Forestry with a  
major in Fishery Management.

Attended Oregon State University 1956-1958.  
Received a Master of Science degree in  
Fishery Management.

WORK EXPERIENCE:

My professional work experience includes several years  
with the U.S Fish and Wildlife Service and 23 years with  
the Alaska Department of Fish and Game as a sport fish  
biologist and the last 13 years as Director of the Sport Fish  
Division, retiring in 1982.

From 1984 until October of 1991, I was employed as the  
Field Representative for the National Rifle Association for  
the State of Alaska. I served a hunting membership of  
25,000 members as field representative and was the  
registered lobbyist for NRA during my employ where I worked  
on pro-hunting legislation.

GENERAL INFORMATION

The following organizations would and do endorse me for  
appointment to the Public Advisory Oilspill Group; the  
Alaska Outdoor Council, contact President Scott Bothwell,  
Box 81434, Fairbanks, AK 99708; phone- (907) 479-2074; and  
the Alaska Waterfowl Association, President John Hendrickson  
3105-A Lakeshore Drive, Suite 102, Anchorage, AK 99503,  
phone (907) 243-3235.

I can make unique contributions to this advisory group based on my 35 years experience with fish and wildlife resource management and the user groups that harvest them. I serve on the Governor's state-wide Outdoor Recreational Advisory Committee, currently in my second year of appointment and have a broad working knowledge of all outdoor recreational activities within the State. In my position as Director, Sport Fish Division, ADF&G, I have a particularly sound institutional background in the areas that were effected by the Exxon oil spill, of the sport fishing resources and user levels. As former NRA statewide field representative, I can bring a knowledge of hunting activities and hunter participation in the effected areas based on my years of representing the membership that utilize those areas. I have a professional background in renewal resources and a lay person, hands-on, practical experience as well. Additionally, I am completely retired and have the time and energy to devote to this committee.

As requested in the Trustee's solicitation for nominees the answer to all four questions relating to oil spill claims or vested interest in any claims or actions of the Trustee Council that would bear on any financial condition of myself, spouse, family or friends is no to all of them. My only reason for submitting this nomination is that I believe I have a particularly unique set of qualifications, a deep felt citizens interest in the future of Alaska and its citizens and resources and the time to devote to this committee on a full time basis if need be.

TRUSTEE COUNCIL

Sent via facsimile 907-276-7178

Dear Ms. McCammon:

The Cordova District Fishermen United (CDFU) Board of Directors are pleased to support the nomination of Torie Baker for appointment to the Public Advisory Group (PAG). Ms. Baker is currently a director on the CDFU board and has held this office for the past six years.

If appointed, Torie will bring a cache of local knowledge to the PAG as her activities have included co-chairing the Prince William Sound Ecosystem Research Group, the Prince William Sound Economic Development Council and second vice-president of CDFU. As a director Torie is motivated, responsible and willing to go the extra mile when representing the commercial fishing industry. As a person she is thoughtful, dependable and genuinely concerned with the environment and those around her.

CDFU highly recommends the appointment of Ms. Torie Baker to the PAG as she will be a great asset to the program. If you have any questions, please do not hesitate to call myself or one of the directors at the CDFU office. Thank you for your consideration.

Sincerely,  
CORDOVA DISTRICT FISHERMEN UNITED

## Nomination Information for Public Advisory Group/Commercial Fishing Seat:

Torie Baker  
PO Box 1159  
Cordova, AK 99547

Phone: 907-424-3820  
Fax: 907-424-5303  
email: vsvnb@cwolf.alaska.edu

Alaskan resident: 10 years  
Occupation: Commercial fisherman, PWS. Herring, salmon, halibut

Education: University of Washington  
Speech Communications, B.A., 1980

I have been a resident of PWS/Alaska since 1987, having made my home in Cordova. I have held a herring pound permit since 1988 and a salmon drift permit since 1994. I own and operate my own fishing vessel and have participated in herring and salmon gillnet, seine and setnet operations beginning in 1988. I have also participated in the Bristol Bay salmon gillnet fishery in 1994.

Since 1990, I have been sales manager for Eyak Packing Co., a 15 year old custom smokehouse and cannery in Cordova. This is a mail order business for Copper River salmon products with customers worldwide.

In 1990 I was elected to represent the PWS herring pound fisheries on the board of Cordova District Fishermen United. I have served twice as vice president of the board and am currently serving my sixth term on the CDFU board. In this capacity I have represented PWS fishing interests in many venues including the Alaska state legislature, gear regulation negotiations with the ADFG, gear representative to the Board of Fish, co-chair of the PWS Fisheries Ecosystem Research Group in 1993-94, the PWS Economic Development Council, and United Fishermen of Alaska.

I am also serving my third year on KCHU-Valdez public radio board of directors as a regional representative.

From 1991-1995, I did seasonal summer field work for the Alaska Department of Fish and Game. I was involved in a number of projects in PWS and along the Kuskokwim River and Bering Sea coast including herring and salmon test fishing and weir management projects, genetic data collecting, and stomach content analysis work.

My ten years involvement in commercial fishing has taken me into many facets of the industry. I feel that I bring a well rounded perspective to the Public Advisory Group and would like the opportunity to contribute to EVOS programs and goals over the next 2 years. EVOS programs have had a very large impact on PWS and the entire spill impacted region and there is still much prioritizing and work which needs to be done.

Conflict of Interest/PAG  
for Torie Baker

1. Do you, your spouse, children, any relative with whom you live or your employer have, or are you defending, a claim filed before any court or administration tribunal based upon damages caused by the Exxon Valdez oil spill?

Answer: Yes

2. Do you, your spouse, children, any relative with whom you live or your employer own any property or interest in property which has been, or is likely to be, proposed for acquisition by the Trustee Council?

Answer: No

3. Have you, your spouse, children, any relative with whom you live or your employer submitted, or likely will submit, a proposal for funding by the Trustee Council; or be a direct beneficiary of such a proposal?

Answer: No

4. Do you know of any other potential actions of the Trustee Council or the PAG to have a direct bearing on the financial condition of yourself, you spouse, children, other relative with whom you live or your employer?

Answer: No. Only as restoration projects effect commercial fishing in PWS

I would like to be considered for term three of the PAG. Please use the information I've already submitted. Thanks

NOV 17 1994

EXXON VALDEZ OIL SPILL  
TRUSTEE COUNCIL

November 14, 1994

Molly McCammon, Director of Operations  
Exxon Valdez Oil Spill Trustee Council Restoration Office  
645 G Street, Suite 401  
Anchorage, Alaska 99501

Dear Ms. McCammon,

This letter follows my October 31 response to your call for applications to serve on the Oil Spill Public Advisory Group. I would be honored to serve on the PAG, and have enclosed my resume for your consideration. I believe the work of the PAG and the Trustee Council is very important, both for its direct impact on the restoration of the spill area, and through this effort, its contribution to the state's economic health and quality of life. I also have a particular fondness for Prince William Sound and the coasts of Kenai, Kodiak and Southwest Alaska. I think this area, which I've visited by plane, boat, skis and kayak, is among the most remarkable in Alaska.

I believe my 15 years experience in land planning, resource management and socio-economic analysis would make me a valuable member of the PAG. Particular skills I can offer to the Public Advisory Group are listed below:

*Regional Environmental Planning* - I have extensive experience in natural resource and environmental planning, which will help me better respond to issues related to the effects of the spill on resources and services. I'm very interested in the natural sciences and actually enjoy reading and discussing technical material that many people might find a bit dry.

*Land Planning/Real Estate Development* - Over the last 7 years, I've worked in land planning and real estate development. I have gained a strong understanding of the design, financial and political processes required to get houses, stores, roads, parks, stream restoration projects, etc. developed and paid for.

*Tourism and Recreation* - Much of my recent work in Alaska has focused on tourism and recreation, which gives me a strong base of knowledge about trends in resident and visitor recreation activity throughout the state, including the oil spill area.

*Project and Budget Management* - Throughout my career I've been responsible for guiding large scale, complicated planning processes. I have developed and implemented clear responses to muddy, complex problems, and become skilled at setting budget priorities and policy direction amid competing public and private objectives. I've also worked extensively with public groups on planning and resource management issues.

I am seeking this position on the PAG as a general public, "at-large" member, without a link to a specific interest group. My intent would be to participate from a perspective that, I believe, represents the views of many Alaskans. This perspective is based on the recognition that the state is entering a time of profound

challenges, and that there is a resultant need for both great vigor and great care in how we manage the state's resources, both natural and financial, to create a more sustainable economy and a better place to live and visit.

I returned to Alaska last fall after a seven year absence. It's great to be back but I feel a real urgency to try to contribute to solving the many challenges I see facing the state. The restoration of the spill area's fish and wildlife populations, their habitat and associated human uses would be a satisfying context in which to work on these goals.

Thank you for your consideration. Please call if you have further questions or need additional information.

Sincerely,

A handwritten signature in cursive script, appearing to read "Chris Beck".

Chris Beck

## CHRISTOPHER BECK

### PROFESSIONAL EXPERIENCE

**Christopher Beck & Associates** Anchorage - 1993-present

*Principal* Own and operate consulting business providing solutions to public and private clients in the fields of land use, tourism and resort planning, and urban design. Current projects include work promoting and guiding tourism in Bristol Bay, and assessing the financial feasibility of the proposed Hatcher Pass Ski Resort.

**PBR** San Francisco - 1989-1993

*Director* Managed land planning, market assessment, resort and urban design projects.

**Summer/Part Time Positions (during graduate school)** Berkeley/San Francisco 1988-89

Roberta Mundie & Associates: conducted urban design, market research of small downtowns.

Jerry Gast & Associates: prepared village center design guidelines, park and land use plans.

Michael Southworth, U.C. Berkeley: surveyed 50 urban design plans & guidelines from around the U.S.

Angus McDonald & Assoc.: analyzed service needs, fiscal impacts of land use and recreation plans.

**Alaska State Department of Natural Resources** Anchorage - 1979-1986

*Senior planner* Managed land planning projects throughout Alaska. Conducted over 50 public meetings and hearings; developed land management solutions to satisfy demands of competing interest groups.

**Gruen Gruen + Associates** San Francisco - 1978-79

*Research Assistant* Evaluated the social and economic impacts of public land use policy.

### EDUCATION AND HONORS

Master of City and Regional Planning, Master of Landscape Architecture, University of California, Berkeley - 1989. Thesis, Big Fun in Small Towns, explored the ingredients for success in small downtowns.

Bachelor of Environmental Design, University of Colorado, Boulder, 1976.

Awards - 1994 Anchorage Design Forum: Imagine Anchorage Design Award; 1986 Honor Award:

American Society of Landscape Architecture, Alaska Chapter (for Susitna Area Plan); 1989 Outstanding

Teaching Assistant, U.C. Berkeley Department of City Planning; 1988 Thomas Church Design Award; 1988 Newhouse/U.C. Berkeley Fellowship.

Teaching experience - Guest lecturer at University of California on urban design, master planned communities and water management. Guest lecturer at University of Alaska on regional planning. Currently teach astronomy in University of Alaska Community Education program.

SUBJECT **POTENTIAL CONFLICT OF INTEREST-  
PUBLIC ADVISORY GROUP**

**NOTES**

I reviewed the conflict of interest criteria sent by Cheri Womac December 7 and do not have conflicts in any of the categories listed:

- No claims by self, family or employer related to Exxon Valdez spill.
- No property has been or proposed to be acquired by Trustee Council.
- No submission of proposal for funding by the Trustee Council, nor direct benefits from such a proposal.
- Know of no other potential actions of the Trustee Council or PAG which have a direct bearing of financial condition of self, family or employer.

Please call if I may be of further assistance.

August 1, 1994

Trustee Council  
645 "G" Street  
Anchorage AK 99501

Gentlemen:

I would like to apply to be reappointed to the Public Advisory Group, representing environmental interests. My specific qualifications are as follows:

Biographical sketch:

Pamela Brodie  
Sierra Club  
241 E. 5th Avenue, Suite 205  
Anchorage AK 99501  
276-4048; fax 258-6807

I have a Bachelor's degree in Anthropology and a Master of Library Science degree, both from the University of California, Berkeley (1971 and 1973, respectively). I also have the educational equivalent of a bachelor's degree in Biology, plus some graduate courses, from UCLA (1976-1979). I worked as a librarian at the Santa Monica Public Library in California (1973-1976). Since 1979, I have worked for a number of environmental organizations in a variety of capacities involving communications with the members, other organizations, government representatives, and the public.

I moved to Alaska in 1989, driving off the ferry on March 20 -- four days before the Exxon Valdez ran aground. Soon afterwards, I went to Valdez and worked as a volunteer briefly in the otter and bird rescue centers. I returned to Anchorage, and became co-coordinator of the Oil Spill Volunteer Response Center, an information hotline set up jointly by the Sierra Club Alaska Chapter, the Alaska Center for the Environment, and Greenpeace. This position involved working for approximately 80 hours per week as a volunteer, coordinating other volunteers who staffed telephones to provide information to people who were calling in around the clock from around the world. Later in the summer, this became a paid position, as the Response Center contracted with the State and federal governments to provide information and to coordinate the volunteer efforts at the rescue centers and elsewhere. In 1990, I began working for the Sierra Club Alaska Office, with oil spill restoration as my top priority issue.

I have attended nearly every meeting of the Trustee Council and the PAG, since their inceptions, and have read many of the documents produced by and for these organizations.

Demonstrated knowledge of the region, peoples or principal economic and social activities of the area affected by the T/V

Exxon Valdez oil spill, or expertise in public lands and resource management:

I have lived in Homer (1989-1990) and own property there. I have traveled to Valdez, Cordova, Seward, Whittier, Kodiak, and Afognak Island, and have friends in most of these communities. I have taken a fact-finding cruise with the Trustee Council and PAG in Prince William Sound. I have worked well with organizations representing other interests such as commercial fishing, sport fishing, Natives, conservation, and recreation. During fifteen years of environmental work, I have participated in an advocacy role in public land and resource management issues.

Identification of relationship with a principle interest:

I would like to continue to represent the environmental interest group, and would coordinate closely with the other environmental organizations involved with this issue.

Identification of some of the groups recommending my appointment:

Alaska Center for the Environment  
Alaska Rainforest Campaign  
American Rivers  
Natural Resources Defense Council  
Sierra Club  
Sierra Club Legal Defense Fund  
Southeast Alaska Conservation Council  
Trustees for Alaska  
The Wilderness Society

Unique contributions to the Public Advisory Group

I am deeply dedicated to this issue, and have been involved in it as intensively and as extensively as any other environmental activist. I work well with other activists in my interest group, as well as with activists in other interest groups. I have an educational background in biology. I have a pragmatic approach to problem solving.

Answers to conflict of interest questions:

- 1) No.
- 2) No.
- 3) No. The Sierra Club has submitted proposals for habitat acquisition, but these would not benefit us financially.
- 4) No.

Sincerely,

*Pamela Brodie*

Pamela Brodie  
Alaska Rainforest Coordinator

**Sheri Buretta**

October 21, 1996

Executive Director  
Exxon Valdez Oil Spill Trustee Council  
Restoration Office  
645 G Street  
Anchorage, AK 99501

Dear Sir or Madam;

I am respectfully submitting my application to become a member of the Exxon Valdez Oil Spill Public Advisory Group.

I feel that I would be a benefit to the group because of my affiliation with the village of Tatitlek. My mother was born and raised there, I have traveled there many times and am currently working for the Non Profit Chugachmiut. My position is ANA Project Coordinator, which involves traveling to each of the seven communities in the Chugach Region to assist and develop the administrative and accounting infrastructure, working with the Tribal Councils. By being a shareholder I have a definite tie to the region and its future. I feel that by participating with this group I would be better informed to educate and pass information to the people within the region.

I also researched and wrote a term paper about the economic impact of the spill on three communities near the spill, (Valdez, Cordova and Tatitlek), while recently attending college in Florida.

I have served on the Public Advisory Group over the last year and have tried to represent the concerns that I have heard in the communities regarding issue that effect them locally, i.e.; subsistence, land sale, environmental, forestry.

Thank you for your time and consideration of my application. Please feel free to contact me if you have any further questions.

Sincerely,

Sheri (Randazzo) Buretta  
Ph# 907-333-3774

December 5, 1995

Exxon Valdez Oil Spill Trustee Council  
Molly McCammon  
Executive Director  
Restoration Office  
645 G Street  
Anchorage, AK 99501

Dear Ms. McCammon

On behalf of Chugach Heritage Foundation, I would like to express support for the nomination of Sheri Buretta for appointment to the Exxon Valdez Oil Spill Public Advisory Group, replacing Chugach region resident Martha Vlasoff.

Sheri expresses qualifications that would benefit the Exxon Valdez Oil Spill Public Advisory Group with her ability to give an open minded outlook from a shareholder of the region's point of view. She also has experience in dealing with the issues of the people of the area. The importance of the position is evident to her as she is concerned with learning more about the issues that the Trustee Council faces. She would be a good source of information to the People of the Chugach Region by helping them to understand the issues at hand.

Please feel free to contact me if you have any further questions.

Sincerely,

*Lora I. Johnson*  
Dr. Lora I. Johnson, Secretary  
Chugach Heritage Foundation Trustees

December 5, 1995

Molly McCammon  
Exxon Valdez Oil Spill Trustee Council  
Restoration Office  
645 G Street  
Anchorage, AK 99501

Dear Molly;

I understand that position that Martha Vlasoff held will be vacant and a replacement is needed. I am familiar with some of the issues and would like to submit my application to become a member of the Exxon Valdez Oil Spill Public Advisory Group, public at large.

I feel that I would be a benefit to the group because of my affiliation with the village of Tatitlek. My mother was born and raised there and I have traveled there many times. My mother and father both worked during the cleanup for Veco. My brother also worked for Veco as of the youngest foreman and is currently working for SFRVS in Valdez.

While attending college in Florida I researched and wrote a term paper about the economic impact of the spill on three communities near the spill, (Valdez, Cordova and Tatitlek).

I and am currently working for the non profit organization serving the Chugach Region, Chugachmiut. My position is ANA Project Coordinator working with the Tribal Councils to assist and develop the administrative and accounting infrastructure by traveling to each of the seven communities. As a shareholder I have a definite tie to the region and its future. I feel that participating with this EVOS PAG I would be better prepared to inform and educate the people of the region.

Thank you for your time and consideration of my application. Please feel free to contact me if you have any further questions.

Sincerely,

*Sheri Buretta*

Information Packet

Nominees for membership to the Public Advisory Group should provide the following information:

- A biographical sketch (education, experience, address, telephone);
- Information about the nominee's knowledge of the region, peoples or principal economic and social activities of the area affected by the T/V Exxon Valdez oil spill, or expertise in public lands and resource management;
- Information about the nominee's relationship/involvement (if any) with the principal interest to be represented;
- A statement explaining any unique contributions the nominee will make to the Public Advisory Group and why the nominee should be appointed to serve as a member; and
- Any additional relevant information that would assist the Trustee Council in making a recommendation.

Conflict of Interest

Public Advisory Group members and their alternates are chosen to represent a broad range of interests. It is possible that action could be taken by the Public Advisory Group when one or more of the members have a direct personal conflict of interest which would prejudice and call into question the entire public process. To avoid this eventuality and to enable the Trustee Council to choose appropriate individuals as members and/or alternates to members, it is necessary that each nominee provide the following information with their information packet. If the answer to any of these questions is yes, please provide a brief explanation of your answer. A yes will not necessarily preclude any nominee from being appointed to serve on the Public Advisory Group.

- Do you, your spouse, children, any relative with whom you live or your employer have, or are you defending, a claim filed before any court or administrative tribunal based upon damages caused by the T/V Exxon Valdez oil spill? No
- Do you, your spouse, children, any relative with whom you live or your employer own any property or interest in property which has been, or is likely to be, proposed for acquisition by the Trustee Council? No
- Have you, your spouse, children, any relative with whom you live or your employer submitted, or likely will submit, a proposal for funding by the Trustee Council? No
- Do you know of any other potential actions of the Trustee Council or the Public Advisory Group to have a direct bearing on the financial condition of yourself, your spouse, children, other relative with whom you live or your employer? No

---

October 8, 1996

Executive Director  
Exxon Valdez Oil Spill Trustee Council  
6445 G Street  
Anchorage, Alaska 99501

We would like to nominate the following individual for membership on the Exxon Valdez Oil Spill Public Advisory Group.

## ALEX CHARTIER

Born and raised in Colorado, Alex moved to Alaska in 1972. She lived in the Cook Inlet area for several years before settling in Seldovia in 1977. Alex and her husband, Dave, have built a home near Powder Island where they have forged a self-sufficient subsistence lifestyle in raising their family of four children. The Chartiers have their own hydro-electric plant and are accomplished farmers, besides running a highly successful setnet operation.

Alex will bring this lifestyle quality and a wealth of experience in fishing and living from these waters for the past nearly 20 years to the council's Public Advisory Group. Recently, Alex began work in an environmental school project for Seldovia. This is an extension of the home-schooling which she has done with each of her children off and on through their lives. The school will focus on a local stream's natural environment and learning conservation practices for living. Alex has stayed well informed on local issues regarding the heightened awareness brought about by the spill.

Being honest, fair and conscientious, Alex would prove a valuable addition to the Public Advisory Group. She has our whole-hearted endorsement.

Her background qualifies her to represent subsistence, commercial fishing, conservation, commercial tourism, environmental, or a member of the public at large.

Sincerely,

Karl Pulliam

INTEREST:**

Currently involved in ongoing Exxon litigation as a  
commercial fisherman and property owner (Chrome Bay).

**Dave Cobb**

OFFICE OF THE MAYOR

August 20, 1996

RECEIVED  
AUG 28 1996

EXXON VALDEZ OIL SPILL  
TRUSTEE COUNCIL

Mrs. Molly McCammon, Executive Director  
EVOS Trustee Council  
645 "G" Street  
Anchorage, AK 99501

RE: Endorsement for Dave Cobb

Dear Mrs. McCammon:

At the August 19, 1996, regular meeting of the Valdez City Council, Dave Cobb's application for appointment to the Public Advisory Group was unanimously endorsed. The City Council wholeheartedly supports involvement in the Public Advisory Group.

Thank you for consideration given his application. If you need anything further from Council, please advise.

Sincerely,

John L. Harris, Mayor  
CITY OF VALDEZ

JLH/jdf

TO: PAG nomination file

FROM: Cherri Womac  
Administrative Assistant

SUBJECT: Update Dave Cobb's nominee information.

DATE: October 21, 1996

Dave Cobb was elected Mayor of the City of Valdez. The Valdez City Council still supports his nomination for and participation in the Public Advisory Group..

Name: Dave Cobb  
Address: 869 Cottonwood Drive  
Valdez, AK 99686  
(907) 835-2637 (h)  
(907) 835-4874 (w)  
Birthplace: Tacoma, WA  
DOB: 5/29/44  
Age: 52

---

I have been involved with fisheries and wildlife for the past 29 years in Alaska, Montana, and Washington State. I worked for the State of Montana, Department of Fish and Game for 12 years as an Assistant Biologist and Fish Culturist. I received a Bachelor's of Science Degree from the College of Great Falls with an emphasis in Fisheries Biology. The majority of my course work was done at Montana State University while employed with the Department of Fish and Game.

My family and I moved to Valdez, Alaska in June of 1982 where I began working for Valdez Fisheries Development Association. Valdez Fisheries Development Association is a private, non-profit aquaculture association, which raises and releases Pink, Chum, Coho, and King Salmon for utilization by the commercial fishermen and sport fishermen of Prince William Sound. For the past 14 years I have held the positions of: Fish Culturist, Assistant Hatchery Manager, Maintenance and Purchasing Manager, Special Projects Manager, and I am presently the Business manager.

I have been directly involved with a multitude of fisheries issues since arriving in Valdez in 1982 and continue to stay involved and abreast of new issues. I was the Assistant Hatchery Manager during the Exxon spill in 1989 and worked closely with Exxon Corporation in providing facilities for rehabilitation of sea otters. I have a good working knowledge of the damage done in Prince William Sound by the oil spill and the restoration efforts undertaken by the EVOS trustees. I am a member of the Prince William Sound Committee to Restore the Sound Group.

I am serving on the Valdez City Council, having been elected in 1993 for my first term. I was elected by the Valdez City Council to fill this position upon certification by the EVOS trustees.

I feel that I can continue to make a positive contribution to the Public Advisory Group. I bring a diverse background and knowledge to the PAG that could only help the continuity already in place. I have a working knowledge of the concerns of the fishermen in Prince William Sound and the citizens of Valdez. One of my strongest assets is that I have no axe to grind, nor am I part of any litigation against Exxon Corporation or the EVOS trustees.

August 20, 1996

D. Cobb

Page 2

---

Conflict of Interest

1. I do not have, nor do any of my relatives have, any claims filed before any court or administrative tribunal based upon damages caused by the T/V Exxon Valdez oil spill.
2. I do not own property or an interest in property which has been or is likely to be proposed for acquisition by the Trustee Council, nor do any relatives of mine.
3. My employer has submitted proposals for funding by the Trustees Council, however, none of these proposals were considered for funding. Nevertheless, Valdez Fisheries Development Association may, at some time in the future submit a proposal for consideration.
4. I know of no other potential actions of the Trustee Council or Public Advisory Group that will have a direct bearing on the financial condition of myself, spouse, children, relative, or employer.

I am submitting this information as requested to be included in my file for consideration by the Trustee Council.

Respectfully,

Dave Cobb

Valdez City Councilman

DC/jdf

Chip Dennerlein

## National Parks and Conservation Association

October 15, 1996

Molly McCammon, Executive Director  
EVOS Trustee Council  
645 G St., Suite 401  
Anchorage, Alaska 99501-3451

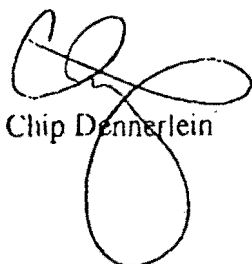

Dear Molly:

I understand my term appointment as a member of the Public Advisory Group (PAG) is at an end and the Council will be making new appointments very shortly. The purpose of this letter is to advise you of my interest and willingness to serve another term as a member of the PAG.

I recently spoke with several PAG members and others in the conservation community who urged me to submit my name for reappointment. My only reservation stems from the fact that (because of unexpected travel) I was unable to attend several PAG meetings. I have followed the restoration work program and tried to participate fully in review and discussion of the issues. I am most interested in seeing some of the major pending habitat acquisition efforts through to successful completion.

I believe I can continue to play a positive role as member of the PAG and will make a concerted effort to attend upcoming meetings. However, if there are other qualified individuals interested in the "conservation" slot and/or you see a benefit in getting a new face on the PAG, I will certainly support your decision to provide someone else with the opportunity to serve. In such case, I am also willing to serve as an "alternate". In any case, I hope to continue to work with you and the staff on some of the acquisition issues we discussed last week while traveling to D.C.

Sincerely,

Chip Dennerlein

REF ID: A61107

Chip Dennerlein  
1627 W. 14th Ave.  
Anchorage, Alaska 99501  
278-3420

Alaska Regional Director, National Parks and Conservation Association (1993-present)  
Regional Director for 350,000 member national organization dedicated to protection, preservation and public appreciation of the National Park system. Responsible for oversight of 13 National parks throughout Alaska comprising more than one half the U.S. national park acreage. Extensive work with National Park Service, other federal agencies, congress, state of Alaska, Alaska Native corporations, the visitor industry and other national environmental groups.

Natural Resource Consultant, Anchorage Alaska (1988-1993)

Private natural resource consultant specializing in Alaska and federal land and resource management policy. Represented and advised private and public sector clients, including major work with Alaska Native corporations, on wide range of resource issues. Substantial contact with U.S. Congress, Alaska Legislature, all state and federal resource management agencies, and major state and national environmental and industry groups.

Executive Manager for Intergovernmental Affairs, Municipality of Anchorage (1985-88)

Cabinet level position for municipality. Responsible for city relations with the State of Alaska, the U.S. Government, other cities and major private sector interests. Direct representation of Anchorage in the State Legislature and coordinator of Congressional and Federal agency representation.

Executive Manager for Public Services, Municipality of Anchorage (1982-85)

Cabinet level position for municipality. Responsible for administration and policy leadership for six city departments including Public Works, Transit, Parks and Recreation. Emphasis was on land use, transportation, private development and public recreation during period of most rapid growth in Anchorage history.

Director, Alaska State Park System (1979-82)

Managed 3.2 million acre Alaska State Park system ranging from urban to wilderness parks. Emphasis on policy development, acquisition, establishment and start-up of numerous new units. Served on Board of Directors of National Association of State Park Directors. Carried out cooperative park and resource programs with U.S. agencies, and federal and provincial governments of Canada.

Special Assistant to the Commissioner of Natural Resources, State of Alaska (1976-79)

Responsible for a variety of land and resource issues, state land selections, negotiations with Alaska Native corporations, work with environmental and development interests. Extensive work on the Alaska National Interest Lands Conservation Act (ANILCA) in Washington, D.C.

20 year Alaskan, prior experience in private business.

Dear Cheri Womac,

Please consider me as applying for renomination to the Public Advisory Group.

Recent whale strandings in Turnagain Arm, and use of materials from the Restoration by teachers at Dimond High School, have reminded me of my interests in the spill effected areas and of the many friendships and connections made through being a member of the PAG. I am also interested in the progress on the Seward Sealife Center and the use of the encumbered funds.

I would therefore like to be considered for renomination.

Thankyou

October 12, 1996

Exxon Valdez Oil Spill Trustee Council  
645 G St., Suite 401  
Anchorage, AK 99501

Dear Trustee Council members:

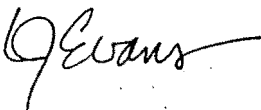

My first involvement with the *Exxon Valdez* oil spill was as a citizen volunteer, working in the animal rescue centers in Valdez in the days and weeks immediately following the accident. I would like to return to that citizen volunteer role in service to the Trustee Council and the citizens of Alaska and the spill-affected communities, as a Public At Large representative on the Public Advisory Group.

During the early days of spill response and cleanup, through the damage assessment and then restoration phases of response to the oil spill, I have had the privilege and honor to come to know a great many people in the communities affected by the spill. Either through personal visits or on official business, I have spent time in almost all of the affected communities, including Akhiok, Chenega, Chignik Bay, Chignik Lagoon, Homer, Karluk, Kenai, Kodiak, Larsen Bay, Old Harbor, Ouzinkie, Port Lions, Seldovia, Tatitlek, Seward, Whittier and of course Valdez, where my husband and I were living and working at the time of the spill. The only affected communities I've never visited are Nanwalek, Port Graham, Perryville and Ivanof Bay, though I've spoken with people from each of those places. On numerous occasions I worked closely with local residents and officials to organize public meetings, to disseminate information to citizens and to solicit their comments on a variety of documents and subjects relating to response and restoration. Through this process I've had the good fortune to make many friends throughout the region. I've listened to people's concerns, answered many of their questions, and passed on information about the issues that were important to the citizens of the area to state and federal agencies, and to the Trustee Council. I have friends and acquaintances who work or have strong interest in each of the twelve principal interests represented on the Public Advisory Group, and we have discussed their concerns and their priorities on many occasions.

I've discussed the idea of my serving on the PAG with some past members, including Pam Brodie and John French. In all cases the response has been strong encouragement.

I feel that I have a unique contribution to offer to the Public Advisory Group and to the Trustee Council because of my involvement with the spill since the very day of its occurrence. Although I've never been in a role to *make* policy decisions, I have served as a conduit to carry information and opinions about policies and recommendations back and forth to the citizens and to the agencies involved. In the process I've learned a great deal about the concerns and priorities of both. I offer to the citizens of the spill region and to the Trustee Council the knowledge and experience I've gained in the hope that I might be able to use that knowledge to continue to serve in a useful capacity.

Very sincerely yours,

L.J. Evans  
P.O. Box 80073  
Fairbanks, Alaska 99708  
907/455-4864

## **SUMMARY**

- Extensive experience working with the public as a representative of corporate, non-profit and government organizations in progressively responsible professional positions requiring excellent written and oral communication skills.
- Experienced in serving as a spokesperson to the public, local and national press, writing for publication, producing printed materials and serving as an information resource for press and public on complicated, sometimes controversial issues.

## **EMPLOYMENT HISTORY**

### *University of Alaska Fairbanks, Fairbanks, Alaska*

#### **Publications Assistant, University Relations (July 1996 – Present)**

- Write, design, and produce printed materials for internal and external distribution to serve communication needs for the University. Producing materials for distribution via the World Wide Web and Internet.

### *Exxon Valdez Oil Spill Trustee Council, Anchorage, Alaska*

#### **Information Specialist (December 1991 - May 1996)**

- Provided timely, accurate information about activities and policies of the Trustees regarding restoration projects undertaken or planned to mitigate injuries sustained from the *Exxon Valdez* oil spill to national, international, and local media, academia, educators and the general public.
- Wrote, designed, produced, and distributed printed materials for internal and external audiences.
- Organized logistics for public meetings as small as a few people and conferences with several hundred participants.

### *Alaska Department of Environmental Conservation, Valdez and Anchorage, Alaska*

#### **Information Officer (June 1989 - December 1991)**

- Served as spokesperson to press and public for the State of Alaska on the *Exxon Valdez* oil spill, produced written materials, news releases, and other materials for the press and other agencies. Wrote and produced weekly, then monthly newsletters for the information of residents of spill affected communities, organized community public meetings, prepared reports summarizing public comments.

### *Alaska Photographic Center, Anchorage, Alaska*

#### **Director (March 1990 - January 1994)**

- Served four years as volunteer director of Alaska's only statewide fine art photography organization.

### *Bird Rescue Center, International Bird Rescue Research Center, Valdez, Alaska*

#### **Expediter/General Assistant (March through June, 1989)**

- As a volunteer and later as staff, assisted with oiled bird rehabilitation efforts following the *Exxon Valdez* oil spill, arranged logistics. Organized volunteers, assisted with public information and record-keeping, and coordinated with other groups such as ADEC, USF&WS, & Exxon.

### *Prince William Sound Community College, Valdez, Alaska*

#### **Adjunct Faculty and Educational Writer (1988 - 1989)**

- Taught college courses in photography, sociology (drug and alcohol education), and electronic mail as adjunct University of Alaska faculty.
- Wrote, designed and produced a procedures manual for adjunct faculty.

L.J. Evans • P.O. Box 80073, Fairbanks, AK 99708 • 907/455-4864

*Sitka Photography Workshop, Sitka, Alaska*

**Coordinator (1987 & 1988)**

- Volunteer coordinator for week-long photography workshops in 1987 and 1988.
- Successfully sought grant funding to assist with expenses both years.

*Alaska Raptor Rehabilitation Center, Sitka, Alaska*

**Newsletter Editor (1986 - 1988)**

- Volunteer editor and graphic artist for quarterly newsletter; occasionally served as PIO.

*Sitka Council on Alcoholism and Other Drug Abuse, Sitka, Alaska*

**Prevention/Education Coordinator (January 1986 - June 1988)**

- Developed, coordinated, and presented substance abuse information and prevention programs for adults and youth in the community.

*Arthur Andersen & Co, St. Charles, Illinois*

**Instructional Design Intern (June 1985 - September 85)**

- Assisted in development, writing, pilot testing, evaluation and revisions of management development training programs. Graduate student summer job.

*Arizona State University, Tempe, Arizona*

**Graduate Assistant (Fall and spring semesters 1983-1985)**

*Keyes Fiber Company, Stamford, Connecticut*

**Manager Employee Communications (1982 - 1983)**

- Developed communication program for 3,000 employees in U.S. and Europe.

*Nabisco Brands Research and Development Center, Wilton, Connecticut*

**Non-Exempt & Benefits Administrator (1978 - 1982)**

- Recruited non-exempt employees; administered benefits programs; produced quarterly newsletter; coordinated community and recreational programs; prepared EEO reports.

**EDUCATION**

Bachelor of Science, Sacred Heart University, Fairfield, CT, 1983, Psychology

Master of Education, Arizona State University, Tempe, AZ, 1985, Educational Technology

October 12, 1996

EXXON VALDEZ OIL SPILL  
TRUSTEE COUNCIL

To whom it may concern:

As per your August flyer soliciting nominations for the Public Advisory Group to the Trustee Council, I submit my application. I have enclosed my resume and suggest that based on the information therein, I could represent the sport hunting/fishing, conservation, or science/academic principal interests or the public-at-large. I am retired from full time employment but maintain an active interest in veterinary medicine, wildlife management and ecology, and business as a consultant with the International Wildlife Veterinary Service, Inc. My varied background, training and years of experience will be beneficial to the Trustee Council as a member of the Public Advisory Group.

I have been on your mailing list for some time and have followed events from the very beginning when I served as a representative for the Alaska Department of Fish and Game Division of Wildlife Conservation at Valdez to:

- a. Insure proper specimen care and tissue sampling.
- b. Provide wildlife-related advice on oil cleanup activities.
- c. Answer questions from the press, agencies and public.
- d. Provide logistic coordination for supplies and equipment.
- e. Provide intra and interagency coordination.
- f. Provide continuity for the division in the overall departmental response to the oil spill disaster.

I have also enclosed my response to the conflict of interest statements. Please contact me if you need an expanded version of my resume or have other concerns or questions.

Sincerely,

  
Albert W. Franzmann

### Conflict of Interest

Public Advisory Group members and their alternates are chosen to represent a broad range of interests. To avoid any conflict of interest, please include answers to the following questions with your application, along with a brief explanation if appropriate. A yes answer will not necessarily preclude any nominee from being appointed to the PAG.

- Do you, your spouse, children, any relative with whom you live or your employer have, or are you defending, a claim filed before any court or administrative tribunal based upon damages caused by the *Exxon Valdez* oil spill? **No**
- Do you, your spouse, children, any relative with whom you live or your employer own any property or interest in property which has been, or is likely to be, proposed for acquisition by the Trustee Council? **No**
- Have you, your spouse, children, any relative with whom you live or your employer submitted, or likely will submit, a proposal for funding by the Trustee Council; or be a direct beneficiary of such a proposal? **No**
- Do you know of any other potential actions of the Trustee Council or the Public Advisory Group to have a direct bearing on the financial condition of yourself, your spouse, children, other relative with whom you live or your employer? **No**

*Alfred W. Frauman*

*3 Sept 96*

## CURRICULUM VITAE

**Name:** Albert Wilhelm Franzmann

**Address:** P.O. Box 666, Soldotna, Alaska 99669

**Phone:** (907) 262-4107 **FAX:** (907) 262-4107

**Born:** July 19, 1930

**Family:** Donna (wife, born-1932); Karl (son, born-1955);  
Louise (daughter, born-1959)

**Education:** Public and High School, Butler County, Ohio  
D.V.M. 1954 Ohio State University  
Ph.D. 1971 University of Idaho (Forest Science) -  
Wildlife Option.

**Experience:** Raised on midwest farm and worked on farms and  
(general) ranches during summers until 1954.

1954-1956 Captain, U.S. Air Force Veterinary Corps.  
Base Veterinarian at McConnell Air Force Base,  
Wichita, Kansas.

1956-1959 Partnership in general practice of  
veterinary medicine, Tiffin, Ohio. Operated beef  
feed lot, animal hospital, and food animal practice.

1959-1968 Owned and operated food animal veterinary  
practice in Hamilton, Ohio. Owned and lived on a  
farm and raised livestock and horses.

1968-1972 N.D.E.A. Research Fellow, University of  
Idaho. Conducted research in environmental  
physiology and ecology of bighorn sheep in the U.S.  
and Canadian Rocky Mountain states and provinces.

1972-1987 Wildlife Research Biologist, Alaska  
Department of Fish and Game. Director of the Kenai  
Moose Research Center, Soldotna, Alaska. Principal  
Research Associate, Institute of Arctic Biology,  
University of Alaska; Affiliate Associate Professor  
of Wildlife Management, University of Alaska.

1978-1983 Sec/Treas, Great North Enterprises, Inc.  
Distributors in Alaska for Muskol Products.

1986-1988 Board of Directors, The Hamilton Tool  
Co., Hamilton, Ohio

1992-1995 Vice-Chairman, Alaska Board of Game

**Experience (continued).**

1971-present Photography - 104 published photographs  
(App. III)

1987-1994 Wildlife Veterinary Consultant; Board  
of Directors International Wildlife Veterinary  
Service, Inc.; Principal Research Associate,  
Institute of Arctic Biology; University of  
Alaska; Adjunct Associate Professor of Wildlife  
Biology, University of Alaska.

Present - Wildlife Veterinary Consultant; Board  
of Directors International Wildlife Veterinary  
Service, Inc.; Board of Directors Alaska Outdoor  
Council; Board of Directors Alaska Fish and Wildlife  
Conservation Fund; Associate Editor for ALCES.

**Professional Organizations:**

The Wildlife Society (Certified Wildlife Biologist)

Northwest and Alaska Chapters of the Wildlife Society

Wildlife Disease Association

American Association of Wildlife Veterinarians (Founder)

World Association of Wildlife Veterinarians (Organizer)

American Association of Zoo Veterinarians

American Veterinary Medical Association

World Association of Veterinarians

International Association for Bear Research and Management

IUCN/SSC Deer Specialist Group

IUCN/SSC Bear Specialist Group

IUCN/SSC Veterinary Specialist Group

Alpha Gamma Rho (Agriculture)

Alph Psi (Veterinary Medicine)

**Honoraries/Awards:**

1947 National Honor Society.

1953 Phi Zeta National Veterinary Medicine Honorary.

**Honoraries/Awards (continued):**

- 1954 Gamma Award - Outstanding Senior Veterinary Medicine Student, Ohio State University.
- 1964 Contribution as panelist in Therapeutic Experiences Department in Modern Veterinary Practice (Jan).  
Editors award for best contribution.
- 1968 National Defense and Education Act Fellowship.
- 1968 National Wildlife Federation Fellowship.
- 1969 Xi Sigma Pi National Forestry Honorary.
- 1970 Phi Sigma National Biological Sciences Honorary.
- 1971-1980 Photography awards (App. III)
- 1972 New Zealand National Research Advisory Council Post Doctoral Research Fellowship.
- 1973 Listed in Who's Who in the West, America (1976),  
Veterinary Medicine and Science (1987), World (1990).
- 1975 Appointed Affiliate Associate Professor of Wildlife Biology, University of Alaska, Fairbanks.
- 1979 BIG GAME OF NORTH AMERICA was added to CHOICE magazine's list of Outstanding Academic Books.  
(Moose chapter, A.W. Franzmann)
- 1980 BIG GAME OF NORTH AMERICA was selected by the Wildlife Society's Publications Award Committee for the Special Group Recognition Award (Moose chapter, A.W. Franzmann)
- 1983 Honorary membership in "Asociatiei Generale a Vinatorilor si Pescarilor Sportivi" in Romania.
- 1983 Distinguished Moose Biologists Award, 19th North American Moose Conference, Prince George, B.C., Canada.
- 1984 Appointed Principal Research Associate, Institute of Arctic Biology, University of Alaska, Fairbanks.
- 1987 Einarsen Award, Northwest Section of The Wildlife Society in recognition of long-standing unselfish dedication and professionalism to wildlife resources.
- 1988 Appointed to IUCN/SSC Deer Specialist Group
- 1990 Honorary Diplomat American College of Zoological Medicine (ACZM).

**Honoraries/Awards (continued):**

- 1991 Appointed to IUCN/SSC Bear Specialist Group
- 1992 The Kenai Moose Research Center was awarded the Group Achievement Award by The Wildlife Society for outstanding achievements benefitting wildlife and objectives of the Society (Director from 1972-1987).
- 1996 Appointed to IUCN/SSC Veterinary Specialist Group
- 1996 Emeritus Award from the Wildlife Disease Association - In recognition for meritorious contributions to the study and understanding of diseases of wildlife.

**Boards, Commissions, Trusteeships, and Councils:**

- 1971-1975 Board of Trustees and Vice-president of Institute for Research on Animals Threatened with Extinction.
- 1978-1983 Board of Directors and Secretary/Treasurer of Great North Enterprises, Inc. (Distributors of Muskol Products)
- 1979-1987 Member of Advisory Council of the American Association of Wildlife Veterinarians (AAWV).
- 1980-1983 Wildlife Disease Association Council member
- 1981-1982 Chairman of Advisory Council of the American Association of Wildlife Veterinarians (AAWV).
- 1986-1988 Board of Directors of the Hamilton Tool Company, Hamilton, Ohio (Manufacturers of web-fed presses and collators for graphic arts production).
- 1986-1989 Member of the Resource Council of the Food and Drug Administration Center for Veterinary Medicine, Washington, D.C.
- 1986 Elected to Board of Directors of the International Wildlife Veterinary Service, Inc., a non-profit California consulting corporation composed of veterinarians with expertise in captive and free-ranging wildlife.
- 1987-1991 Served on Board of Consultants to the Delta Society.
- 1991-1993 Appointed to Citizens Advisory Council for the Alaska Exploration and Production Division of Conoco Inc., a Dupont Company.

#### Boards, Commissions, Councils, Trusteeships (continued):

1991-1993 Scientific Advisor to Facultad de Ciencias Exactas y Naturales y Agrimensura (FACENA) at Universidad Nacional del Nordeste at Corrientes, Argentina.

1992-1995 Appointed to the Alaska Board of Game by Governor Walter Hickel. Vice-Chairman 1993-95.

1996 Elected to Board of Directors of the Alaska Outdoor Council.

1996 Elected to Board of Directors of the Alaska Fish and Wildlife Conservation Fund.

1996 Associate Editor for ALCES.

#### University Appointments:

1975-1994 Affiliate Associate Professor of Wildlife Biology, University of Alaska, Fairbanks.

1979 Outside Thesis Examiner for the Department of Biology, Lakehead University, Thunder bay, Ontario, Canada.

1987-1992 Principle Research Associate, Institute of Arctic Biology, University of Alaska, Fairbanks.

#### Editorial Boards:

1970-1974 Editorial Board for DVM Magazine (a news magazine for veterinarians).

1976-1980 Editorial Board for Proceedings of the North American Moose Conference and Workshop.

1981-1996 Editorial Review Board for ALCES (professional journal of moose biology)

1990-1992 Editorial board for FACENA (Argentine journal of natural science and agriculture).

1987-1996 Earthwatch Peer Reviewer for the Center for Field Research, Watertown, MA.

1996 Associate Editor for ALCES.

#### Publications:

1970-present. 16 book chapters or monographs; 71 professional journal articles (senior author of 30); 31 proceedings articles (senior author on 15); 21 editorials, popular articles or abstracts;

### **Invited Lectures, Seminars, and Courses:**

During my career I have given invited lectures, seminars and courses at a variety of institutions in the states of Alaska, Idaho, Washington, Oregon, Wisconsin, New Hampshire, Virginia, Colorado, Minnesota, Arizona, and Nevada; the Canadian provinces of Alberta, Manitoba, Quebec, Saskatchewan, Newfoundland, New Brunswick, Nova Scotia, Ontario, British Columbia and the Yukon Territories; the countries of India, Nepal, Argentina, Sweden, China, Poland, and Indonesia. (See Appendix I and II)

### **Consultancies:**

1972 Consultant to National Elk Refuge, Jackson, Wyoming, on blood chemistry of elk in relation to feeding practices.

1972 Consultant to Utah Department of Natural Resources on monitoring mammalian physiology.

1980 Consultant to Government of Newfoundland on their ungulate research program on Annette Island.

1982 Consultant to Government of India at the Kanha National Park Workshop on Techniques in Wildlife Research and Management.

1982 Consultant to Royal Chitwan National Park, Nepal, on radiotelemetry of gharial.

1984 Wildlife veterinary consultant appointed by the Food and Agriculture Organization (FAO) of the United Nations to the Government of India to assist in establishing the Wildlife Institute of India (WII) at Dehra Dun (6 months). Objectives were to: (1) Provide assistance in setting up the new animal health course in the post-graduate diploma program, (2) Initiate a program for health monitoring in the national parks of India, and (3) Assist in establishing a wildlife capture and translocation unit.

1985 Field veterinary consultant for Project Rhino. Four female Indian rhinoceros were captured at Royal Chitwan Park, Nepal and translocated to Dudwa National Park, India.

1986 Consultant to SMITHSONIAN magazine on article about the life history and biology of moose.

1987-1990 Consultant to the Delta Society - an international organization involved in relationships between people, animals, and the living environment.

1988 Consultant to New Hampshire Fish and Game Department on moose management and research.

Consultancies (continued):

1988-1989 Consultant to Special program for the Improvement and Development of Ecological Research (SPIDER) in Argentina; a project of the Argentine National Scientific and Technical Research Council (CONICET) (6 months in Argentina).

1989 Consultant to private reserve (Reserva El Bagual), Formosa, Argentina, on research and program development. Alberto and Claudia Yanosky were biologists in residence.

1989 Consultant to the Alaska Department of Fish and Game to the Exxon Valdez Oil Spill Response team. Duties assigned:

- . Insure proper specimen care and tissue sampling.
- . Provide wildlife-related advice on oil cleanup activities.
- . Answer a wide variety of questions from the public, press, and other activities.
- . Provide logistics coordination for supplies, equipment, and information
- . Provide wildlife related intra and interagency coordination

1990 Large mammal consultant to Koncor Forest Products Company, Anchorage, Alaska.

1990 Cooperator and consultant through International Wildlife Veterinary Service, Inc. (IWVS) to Zimbabwe Department of Parks and Wildlife Management on the black rhinoceros translocation program; to the South African Parks Board at Kruger N.P.; to the game capture unit of Namibia Department of Nature Conservation at Etosha N.P.

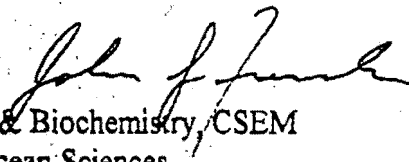

1991 Consultant to World Wide Fund for Nature (WWF) Indonesia Programme at Wasur National Park, Irian Jaya, Indonesia on a component of WWF 4553 project (The Development of Wasur National Park) entitled Wild Deer Management in the Wasur National Park. The consultancy goal was to survey the Merauke deer populations and then design and initiate a long-term monitoring system that will provide data for management of the deer and the native habitat.

1993 Consultant to the U.S. Fish and Wildlife Service and the Wildlife Institute of India (WII) to the August, 1993, Grantsmanship/Planning Workshop at the WII at Dehra Dun, India, relative to assessing the WII program in wildlife depredation, capture, and translocation for the second five year "WII/FWS Collaborative Program".

**John French**

## MEMORANDUM

To: Cherri Womac, EVOS

From: John S. French, Professor   
Department of Chemistry & Biochemistry, CSEM  
School of Fisheries and Ocean Sciences  
Department of Resource Management, SALRM

Date: October 9, 1996

Re: Application for third term on EVOS-PAG

This FAX is to confirm my interest in being appointed to a third term as the Science/Academic representative on the EVOS - Public Advisory Group. Most of the information in my previous application is still accurate. I have provided a few additions and corrections below.

I am no longer the Director of the UAF-Fishery Industrial Technology Center. I have been relocated to the main UAF campus in Fairbanks, AK. I am a Professor with a split appointment between the Biochemistry & Molecular Biology Program in the College of Science, Engineering & Mathematics, the Fisheries Technology Program in the School of Fisheries and Ocean Sciences, and the Natural Resources Management Program in the School of Agriculture and Land Resources Management. That's enough to make anyone schizophrenic. I am still involved in research, teaching and public service.

My address, etc., in Fairbanks are as follows:

Mailing:      Work:      Department of Chemistry and Biochemistry  
                                P.O.Box 756160  
                                Fairbanks, AK 99775

                 Home:      P.O.Box 82341  
                                Fairbanks, AK 99708

Telephone:    Work:      (907) 474-1875

                 Home:      (907) 455-8530

FAX:          Work:      (907) 474-5101

                 Home:      (907) 455-8530

e-mail:        ffjsf@aurora.alaska.edu

## BIOGRAPHICAL SKETCH

NAME: John Storrs French  
Fishery Industrial Technology Center  
University of Alaska Fairbanks  
900 Trident Way  
Kodiak, AK 99615

TELEPHONE: (907) 486-1505  
BITNET: FFJSF@ALASKA  
FAX: (907) 486-1540

### EDUCATION:

Oberlin College, Oberlin, OH, A.B. (Chemistry), 1971  
University of Michigan, Ann Arbor, MI, Ph.D. (Biological Chemistry), 1979  
University of California, Berkeley, CA, Postdoctoral Research (Biochemistry), 1979-1980

### SCIENTIFIC EMPLOYMENT:

United States Peace Corps, SMJK Gajah Berang, Melaka, Malaysia  
Volunteer, Secondary School Math and Chemistry Teaching, 1971-1973

University of California, Berkeley, CA  
Postgraduate Research Biochemist, Department of Biochemistry, 1979-1980

University of Alaska Anchorage, College of Arts and Sciences,  
Department of Chemistry, Anchorage, AK  
Assistant Professor, Biochemistry, 1980-1985

University of Alaska Fairbanks, School of Fisheries and Ocean Sciences,  
Fishery Industrial Technology Center, Kodiak, AK  
Associate Professor, Seafood Biochemistry, 1985-1992  
Professor, Seafood Biochemistry, 1992-present  
Interim Director, 1992-present

### RESEARCH INTERESTS:

Molecular factors determining the gelation and functional properties of myofibrillar proteins from *Theragra chalcogramma*

Use of existing unit operations to develop more efficient, cost effective methods for optimum manufacturing of minced and surimi-based seafood products.

Variation of seafood quality in response to oceanographic and environmental changes, especially factors related to the following:

The biochemical and rheological properties of myofibrillar proteins.

The composition and stability of North Pacific fishery products and oils.

The properties and function of the microsomal cytochrome P-450 monooxygenase systems with respect to aquatic toxicology.

**FUNDED PROJECTS RELATED TO THE EXXON VALDEZ OIL SPILL OR METABOLISM OF HYDROCARBONS RELATED TO CRUDE OIL:**

1. "Chemical and Immunochemical Comparison of the Liver Microsomal Polynuclear Hydrocarbon Metabolizing Systems of Rabbits and Coho Salmon." 1981. UAA Faculty Development Grant: \$4,234.
2. "Identification and Metabolism of Mutagenic and Co-mutagenic Compounds in Water Soluble Oil Fractions" with J.M. Kennish and J.P. Harrington. 1982-1983. Alaska Council on Science and Technology: \$47,000.
3. "Characterization of Hydrocarbon Metabolism by Liver Microsomal Monooxygenases in Prince William Sound Salmon." 1982. UAA Faculty Development Grant: \$3,698.
4. "Function and Regulation of Liver Microsomal Monooxygenase Components in Pacific Salmon." 1983. UAA Faculty Development Grant: \$4,000.
5. "Metabolism of Aromatic and Aliphatic Hydrocarbons by Pacific Salmon." 1984. UAA Faculty Development Grant: \$4,500.
6. "Subsistence Foods Sampling Program". 1990. RSA with Division of Subsistence, Alaska Department of Fish and Game: \$23,000.
7. "Induction of Indicator Proteins in Fish Exposed to Crude Oil on Rocks". 1990-1991. a sub-task of the NRDA Costal Habitat Study (U.S. Forest Service): \$39,000.

**SELECTED PUBLICATIONS ON HYDROCARBON METABOLIZING SYSTEMS:**

5. "Geographic Variation of PSMO Components in Sockeye Salmon Liver Microsomes". International Symposium on Responses of Marine Animals to Pollution, Woods Hole, Massachusetts. 1983.
6. "Characterization of Cytochrome P-450 Dependent Monooxygenase Components in Pacific Salmon". American Chemical Society-Northwest Regional Meeting, Moscow, Idaho. 1984.
7. "Stabilization and Characterization of Cyclohexane Metabolizing System in Coho and Sockeye Salmon". International Symposium on Microsomes and Drug Oxidations, Brighton, England. 1984.
8. "Oxygenation Reactions of Aliphatic and Aromatic Hydrocarbons Catalyzed by Cytochromes P-450". Alaska Science Conference, Anchorage, Alaska. 1984.
9. "Cytochromes P-450 in Liver Microsomes of Five Pacific Salmon Species" and "Metabolic Conversion of Cyclohexane by Pacific Salmon". International Symposium on Responses of Marine Animals to Pollution, Plymouth, England. 1985.
10. "Update on Effects of Oil Spilled by the Exxon Valdez on Subsistence Foods". Pacific Fisheries Technologists, Portland, Oregon. 1990.

**TEACHING EXPERIENCE:** Courses Taught at University of Alaska

1. General Chemistry (CHEM 105-106, 105L-106L)
2. Survey of Chemistry (CHEM 120, 120L)
3. Elementary Biochemistry (CHEM 121, 121L)
4. Introduction to Seafood Science and Nutrition (FISH 261)
5. Ocean Classroom (BIOL 293)
6. Principles of Biochemistry (CHEM 441-442, 441L-442L)
7. Biology/Chemistry Seminar (BIOL/CHEM 491)
8. Individual Research (CHEM 498)
9. Metabolism & Fate of Anthropogenic Compounds (CHEM 641)
10. Enzyme Structure and Mechanism (CHEM 642)
11. Structure and Function of Proteases (FISH 693)
12. Isolation and Characterization of Proteases (FISH 693)
13. Individual Research (CHEM 698)

## PROFESSIONAL SERVICE, AWARDS AND MEMBERSHIPS:

Alaska Section-American Chemical Society  
Membership Chairman, 1982-1986  
Section President, 1983-1984

Pacific Fisheries Technologists  
Alaska Representative, Executive Committee, 1989

U.S. Coast Guard Auxiliary, Flotilla 2-10  
Vice-Flotilla Commander, 1987  
Flotilla Commander, 1988-89, 1992-93  
Flotilla Staff Officer, Public Education, 1988-present

### Awards:

University of Alaska Presidents Report, 1985 and 1986  
University of Alaska-FITC Outstanding Employee, 1986  
University of Alaska Meritorious Incentive Award, 1989

### Memberships: (date membership started)

American Chemical Society (1980):  
Division of Biological Chemistry  
Division of Environmental Chemistry  
Division of Agricultural and Food Chemistry  
International Union of Pure and Applied Chemistry  
affiliate member (1988)  
Institute of Food Technologists (1985)  
Muscle Foods Division  
Seafood Technology Division  
Pacific Fisheries Technologists (1984)  
American Fisheries Society (1982)  
International Society for the Study of Xenobiotics (1982)  
Society of Environmental Toxicology and Chemistry (1989)

NOMINATION OF JOHN S. FRENCH TO PUBLIC ADVISORY GROUP  
for the  
EXXON VALDEZ OIL SPILL TRUSTEE COUNCIL

Dr. French is a twelve year resident of Alaska, and a seven year resident of Kodiak. He owns houses in Kodiak and Homer and has conducted research projects in Prince William Sound, Cook Inlet and the Kodiak archipelago. He is a Professor of Seafood Biochemistry and Interim Director of the University of Alaska Fairbanks' Fishery Industrial Technology Center (FITC) in Kodiak. In this capacity he works with fishermen and seafood processors throughout Alaska. The FITC conducts research, training and technology transfer activities in fish harvesting and seafood processing science and technology. Directly or indirectly, this industry effects the lives of most people living in the area effected by the Exxon Valdez oil spill. During the oil spill Dr. French worked with fishing organizations, processors, National Marine Fisheries Service, Alaska Departments of Fish and Game and Environmental Conservation to develop rational management strategies for fisheries (especially salmon) in the spill effected area.

Dr. French's academic and research training and experience is a very unusual combination of biochemistry, biochemical toxicology, fisheries and food science. As such he brings a unique perspective to many of events which occurred during and in the three years since the oil spill. His original research on the structural organization of the liver enzyme system which is responsible for the initial metabolism of hydrocarbons has gained international recognition. More recently he has studied the hydrocarbon metabolizing systems in Pacific Salmon, including a comparative study of sockeye salmon from different geographical areas, including Prince William Sound. His current studies on seafood include evaluating the effects of environmental variation on seafood quality and safety.

Since all commercial fisheries which were threatened with potential tainting of products by the spilled oil were closed (salmon and herring fisheries), Dr. French's efforts were concentrated on subsistence foods and assistance to local organizations and government. He coordinated work with Alaska Department of Fish and Game, Subsistence Division and Kodiak area communities to collect samples of subsistence foods from traditional use areas. He was appointed to the national Toxicological Experts Panel for Evaluation of subsistence foods from the oil spill area. This committee provided advice to the State Epidemiologist, the Oil Spill Health Task Force, and NOAA. It also produced a set of recommendations for response to future oil spills. Dr. French often represented the FITC on the Kodiak Island Borough oil spill response group. In this role he developed and presented information on such issues as clean up methods, effects of temperature on oil composition, or bioremediation agents. He continues to serve on the Borough advisory group.

Dr. French directed a number of small, unfunded research activities to assess the scope of the oil spill. The only NRDA project he worked on was part of the large Coastal Habitat study the University of Alaska Fairbanks, School of Fisheries and Ocean Sciences did under contract with the U.S. Forest Service. This subtask helped assess the impacts of

crude oil exposure on intertidal fish.

Dr. French has associations with the following Principal Interests:

1. Science/academic: Research, teaching and administration
2. Commercial fishing: Principal constituent of University activities
3. Subsistence: Evaluation of subsistence foods, Toxicological Expert Panel, Oil Spill Health Task Force
4. Local Government: KIB oil spill response/restoration advisory group
5. Recreational User: Property owner and recreational user of lands in Kodiak and Homer areas
6. Environmental: Literature searches/advice for Trustees for Alaska and Sierra Club Legal Defense Fund

645 G Street  
Anchorage, AK 99501

RECEIVED  
JUL 27 1994

EXXON VALDEZ OIL SPILL  
TRUSTEE COUNCIL

22 July 1994

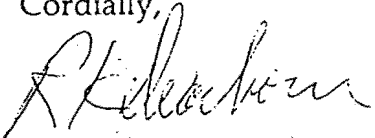

Dear Mr. Ayers:

Reappointment of a science/academic seat on the Public Advisory Group:

I wish to recommend the reappointment of Dr. John French for his expiring seat on the EVOS PAG. As a member of the Executive Committee of the School of Fisheries and Ocean Sciences and having had faculty experience on both the Anchorage and Fairbanks campuses of the University of Alaska System, John has acquaintance with and knowledge of many of human resources that the Trustees might want to tap in their deliberations of restoration and recovery issues resulting from the EVOS spill. He is also one of very few University faculty members who resides within the oilspill affected area and therefore has special interest and awareness of the issues before the Trustee Council. John has done an excellent job of keeping the University administration abreast of the issues before the Trustee Council and the PAG and is an ideal choice for maintaining a partnership between agency scientists and those within the university.

I encourage his reappointment.

Cordially,

R. K. Dearborn  
Director

Dear Mr. Ayers,

The Kodiak Chamber of Commerce wishes to express it's support for the reappointment of Dr. John French to the seat he presently holds on the Exxon Valdez Oil Spill Public Advisory Group. Dr. French is the Director of the Fishery Industrial Technology Center in Kodiak. He sits as a member of the Executive Committee of the University of Alaska School of Fisheries and Ocean Sciences. He also has faculty experience on both the Anchorage and Fairbanks campuses of the University of Alaska System.

Dr. French has acquaintance with and knowledge of many human resources that the Trustees might wish to call on for information in their deliberations of restoration and recovery issues resulting from the oil spill. He is a knowledgeable member of the largest community in the affected spill area, sitting on various local Boards and committees. He has a special awareness and interest in the issues being discussed by the Trustees, particularly as they impact the Kodiak community and the villages of Kodiak Island.

Dr. French has done a superb job representing our community on the EVOS PAG. The Kodiak Chamber of Commerce believes he will continue his excellent representation of the interests of Kodiak on the Trustee Council. For these reasons, we urge you to reappoint Dr. French to the seat he currently holds. Your careful attention and thoughtful consideration of this request is sincerely appreciated.

  
Wayne A. Stevens  
Executive Director

Dear Council members:

The Kodiak Island Borough strongly supports the renomination of Dr. John French, Director of the University of Alaska Fisheries Industrial Technology Center (FITC) in Kodiak for a position on the Council's Public Advisory Group.

Dr. French has served as a member of this group for the past two years and brings a wealth of knowledge and experience concerning the Exxon-Valdez oil spill and the Council's ongoing restoration plans. It is absolutely essential that some continuity be maintained with this group since the entire membership is expiring at the same time. Dr. French can help assure that restoration efforts continue in a direction which will provide the most effective results. Thank you for considering Dr. French for continuation with the Public Advisory Group.

Sincerely,

KODIAK ISLAND BOROUGH

EXXON VALDEZ OIL SPILL  
TRUSTEE COUNCIL

Dear Trustee Council Restoration Office:

Please accept my name in nomination for membership on the Public Advisory Group to the Exxon Valdez Oil Spill Trustee Council. I believe I am qualified for membership under the category of public-at-large or as a representative of the following user groups: local government, recreation user or sport hunting/fishing.

My background and expertise as public policy analyst, land and resource manager, and director of two state land management agencies and a municipal department provide the background to help advise the Council on a wide range of issues. I am particularly versed in land settlement agreements and land valuation practices, having served as the primary negotiator for the state during the completion of several complex land deals. I have also reviewed several hundred land appraisals for the State of Alaska and am generally familiar with land values statewide, particularly rural lands and resources.

During the initial two years of the Exxon Valdez aftermath, I directed the state agency within the Department of Natural Resources that was responsible for clean-up permitting and a portion of the damage assessment work. More recently, I served as Chair of the South Slough National Estuarine Research Reserve Management Commission in Charleston, Oregon, where I led a group of scientists and researchers responsible for completing baseline research studies in a pristine estuarine area.

I have attached a resume for your information. Please don't hesitate to call on me if I can be of assistance.

Cordially,

Gary Gustafson

## SUMMARY

Gary Gustafson is an experienced public administrator who has served as the director of major land management agencies in two states (Alaska and Oregon) as well as at the local level (Anchorage). He is a progressive and innovative leader who has consistently produced results within the team concept. Gary has been a elected city mayor and the president of a national organization. He has served on numerous Boards and Commissions and has worked extensively with the Alaska and Oregon State Legislatures and the U.S. Congress.

## WORK EXPERIENCE

**Executive Director, Heritage Land Bank, Municipality of Anchorage, Alaska (June, 1995 to present).** Responsible for all real estate management functions for over 12,500 acres of municipal land within one of the largest geographic municipalities in the country. Included in the land portfolio are a wide variety of residential, commercial, industrial, and recreational properties. Makes land available for a wide variety of municipal purposes and functions, including sales, exchanges, leases and easements. Manages the \$5 million Heritage Land Bank Fund and reports directly to mayor and municipal manager. Regularly works with Anchorage Assembly, Community Councils and interest groups.

**Director, Division of State Lands, State of Oregon (August, 1992 to June, 1995).** Managed cabinet level agency in Oregon state government, responsible for 2.5 million acres of state land and resources, including timber, minerals, and oil and gas. Reported directly to State Land Board, composed of Governor, Secretary of State, and State Treasurer. Provided natural resource policy advice to Governor. Responsible for 65 employees and biennial budget of \$8.5 million. Represented agency before state legislature, interest groups and other agencies. Managed \$305 million Common School Fund to benefit Oregon's school beneficiaries. Served as Deputy Director of agency (July, 1991 to August, 1992) before becoming Director.

**Elected President of the Western States Land Commissioners Association (1994-95).** This organization is composed of the elected and appointed state land commissioners from 23 western and mid-west states. During term as president, Gary often traveled to Washington, DC to meet with administration officials, members of Congress, and interest groups. Regularly testified before Congress regarding issues of related to land and natural resources. Also served as Vice-President of the Association for 1993-94 term.

Elected Mayor of the City of Turner, Oregon (1995-96), a community of 1,500 located adjacent to Salem, the state capital. As mayor, Gary served as the CEO of the city, overseeing all city services and serving as the chair of a seven member City Council. Gary resigned in June, 1995 in order to accept a new job in Alaska. Prior to election as Mayor, Gary served as Chairman of the Turner Planning Commission (1992-94).

Director, Division of Land and Water Management, Department of Natural Resources, State of Alaska (June, 1988 to July, 1991). Gary administered a 220+ employee division responsible for the management of 85 million acres of state land and resources throughout Alaska. Also included responsibility for all state water resources, including navigable waterways. Provided natural resource policy advice to the Governor and Natural Resources Commissioner. Prepared and administered annual agency budget of approximately \$12 million. Also responsible for state oversight of the Alyeska Pipeline as well as all surface authorizations related to the Prudhoe Bay Oilfield on Alaska's North Slope. Involved with Department of Natural Resources' initial response to the Exxon Valdez Oil Spill, including permit authorizations and damage assessment.

Various Positions, Department of Natural Resources, State of Alaska (May, 1981 to June, 1988). Gary served as the Chief of Land Management, the Policy and Procedure Manager, and the Manager of Land Entitlement/Exchanges for the Division of Land and Water Management. Spent several months in Washington, DC lobbying Congress on behalf of State of Alaska to oppose land exchange involving oil and gas rights in ANWR.

Project Manager, Environmental Services, Ltd., Anchorage, Alaska (March, 1981 to May, 1981). Worked to prepare Coastal Zone Management Plans for the City of Nome and the City of Wrangell, Alaska.

Land Use Consultant, Corvallis, Oregon (August, 1979 to March, 1981). Provided land use planning assistance to local governments throughout Oregon.

Field Representative, Department of Land Conservation and Development, State of Oregon (March, 1976 to July, 1979). Worked with local governments on Oregon Coast and in Southern Oregon to comply with Statewide Planning Goals and Guidelines.

Associate Planner, Marion County, Salem, Oregon (September, 1973 to March, 1976). Provided land use planning and zoning administration assistance to county and cities.

To: Exxon Valdez Oil Spill Trustee Council  
Subject: membership on Public Advisory Group.

A I received in past few days an unsolicited notification that you are seeking nominations from qualified individuals to serve on The Public Advisory Group. I may have some qualifications of interest to you.

B B.S. U.A.F. 1947, Masters in Hosp Admin from Baylor Univ school of Business Administration 1967-8, MD Univ Wisconsin 1951.

C Post graduate Academic Experience an academic year as grad. asst. & research, dept of zoology Univ. of Hawaii after graduation from U.A.F., Internship at Dupler Gen'l Hosp, Honolulu 1951-2. Partial Residency Ophthalmology, Walter Reed Hosp DC 1954-55, Full Residency OB-gyn 1957-8-9 Letterman Gen'l Hosp. San Francisco (associated w Stanford + Cal. Med Schools) a one yr fellowship in OB gyn Pathology at the AFIP Washington DC 1961, then position as an Associate Prof. in the med school Univ. of Hawaii training native islanders in Micronesia 1971-2.

D Significant Positions of Responsibility. Retired from Army Medical Department as a full Colonel 1970. Positions of increasing responsibility in the clinical area & was then sent off in the staff & command path. Commander or deputy C.O. of hospitals of increasing size including Barnett Army Hospital at Fort Wainwright. Medical Advisor to armed Forces of Iran 1968-9, medical Professional Services advisor to armed forces of Korea 69-70 - also Deputy Surgeon 8th US Army and the United Nations Command.

Since Retirement I've done Private Practice F.B.K.S & here; was medical Director for Alyeska for 5 yrs during construction, Consultant to them following that for about 18 mos after construction as a medical advisor for Workers Compensation. I went to Saudi Arabia in 1980 for 1 1/2 yrs as the medical Director of a large construction project building a new city for 60,000 inhabitants. Returned to Alaska went to work as a physician at API for a while & was then asked to go to Juneau as deputy Commissioner for Health in Dept. of Health & Social Services during Sheffield Admin. - stayed for a short time & then returned to API. In 1986 I was asked to become the Director of API to help them secure accreditation & medical certification. I retired shortly after these were accomplished.

E Why me? After 5-6 years dealing with the oil industry I have a pretty good idea of how they think & work. I was a lessee of a sailboat to the Alaska Wilderness Sailing Safaris for about 10 yrs and feel that I know quite well <sup>how</sup> people in that industry feel. I have sailed in the sound myself quite extensively. I have involvement to either the Oil or Tourism industries at this time, and can answer no! not emphatically to the conflict of interest questions. I believe I might bring a background of the scientific methods of problem solving and seek to have the ability to bring disparate groups together cordially.

## **Conflict of Interest**

Public Advisory Group members and their alternates are chosen to represent a broad range of interests. To avoid any conflict of interest, please include answers to the following questions with your application, along with a brief explanation if appropriate. A yes answer will not necessarily preclude any nominee from being appointed to the PAG.

- Do you, your spouse, children, any relative with whom you live or your employer have, or are you defending, a claim filed before any court or administrative tribunal based upon damages caused by the *Exxon Valdez* oil spill? *No* *get*
- Do you, your spouse, children, any relative with whom you live or your employer own any property or interest in property which has been, or is likely to be, proposed for acquisition by the Trustee Council? *No* *get*
- Have you, your spouse, children, any relative with whom you live or your employer submitted, or likely will submit, a proposal for funding by the Trustee Council; or be a direct beneficiary of such a proposal? *No* *get*
- Do you know of any other potential actions of the Trustee Council or the Public Advisory Group to have a direct bearing on the financial condition of yourself, your spouse, children, other relative with whom you live or your employer? *No* *get*

Dear Ms. McCammon,

EXXON VALDEZ OIL SPILL  
TRUSTEE COUNCIL

On behalf of the AWRTA Board of Directors, I highly recommend Eleanor Huffines to fill either the commercial tourism or recreation user seats on the Public Advisory Group. Eleanor has been a member of our Board of Directors since 1994, and has been an active participant in the myriad of issues in which AWRTA has been involved.

She brings a thoroughness and consistent attitude toward her advocacy of our member's needs. Eleanor brings a sense of professionalism and tact to all of her efforts, and can contribute the same to the Advisory Group. In all of her work, Eleanor has demonstrated a concern for the diverse perspectives that make up our membership and has attempted to encompass them in her work on behalf of AWRTA. We all feel that her nomination would be beneficial to the Trustee Council's efforts. With these factors in mind, AWRTA can wholeheartedly endorse Eleanor's active participation in the EVOS Public Advisory Group. If you have further questions or would like more information, don't hesitate to call.

Sincerely,

*Steve Behnke*

Re: Public Advisory Group Alternate Letter of Intent

It is with great pleasure that I submit my request for consideration as Nancy Lethcoe's alternate for the EVOS Public Advisory Group. My commitment to the restoration effort stems from my personal and professional involvement with Prince William Sound since 1988. The enclosed resume summarizes my historical involvement in Alaska land management and public policy initiatives but I will highlight my recent involvement specifically in Prince William Sound.

The National Outdoor Leadership School (NOLS) has been operating kayaking courses on Prince William Sound since 1972. As a NOLS instructor, I have gained an intrinsic understanding of both the ecosystem and use patterns of Prince William Sound. After the oil spill, I felt obligated to extend my effort beyond the realm of education. As the NOLS Alaska Public Policy Coordinator, I have been proactive in the management of Prince William Sound with the U.S. Forest Service, Alaska Department of Natural Resources, Prince William Sound Aquaculture, Alaska Wilderness Recreation & Tourism Association and Chenega Village Corporation.

Despite my concentration on Prince William Sound, I am aware of concerns facing other communities within the affected oil spill area. The combination of my experiences will enable me to effectively participate in decisions relating to the planning, evaluation, allocation of funds and injury assessment for the entire oil spill recovery area.

Thank you for your consideration and I look forward to hearing from you.

Sincerely,

Eleanor Huffines

Conflict of Interest

Public Advisory Group members and their alternates are chosen to represent a broad range of interests. It is possible that action could be taken by the Public Advisory Group when one or more of the members have a direct personal conflict of interest which would prejudice and call into question the entire public process. To avoid this eventuality and to enable the Trustee Council to choose appropriate individuals as members and/or alternates to members, it is necessary that each nominee provide the following information with their information packet. If the answer to any of these questions is yes, please provide a brief explanation of your answer. A yes will not necessarily preclude any nominee from being appointed to serve on the Public Advisory Group.

- Do you, your spouse, children, any relative with whom you live or your employer have, or are you defending, a claim filed before any court or administrative tribunal based upon damages caused by the T/V Exxon Valdez oil spill? No Eleanor Huffines 1-11-96
- Do you, your spouse, children, any relative with whom you live or your employer own any property or interest in property which has been, or is likely to be, proposed for acquisition by the Trustee Council? No Eleanor Huffines 1-11-96
- Have you, your spouse, children, any relative with whom you live or your employer submitted, or likely will submit, a proposal for funding by the Trustee Council; or be a direct beneficiary of such a proposal? Yes Eleanor Huffines 1-11-96
- Do you know of any other potential actions of the Trustee Council or the Public Advisory Group to have a direct bearing on the financial condition of yourself, your spouse, children, other relative with whom you live or your employer? No Eleanor Huffines 1-11-96

As the Public Policy Coordinator for the National Outdoor Leadership School I was involved in the 1995 Work Plan Project Proposal # 95002, the Leave No Trace Educational Program: Reducing Human Impact to Assist Long Term Ecosystem Recovery. The three phases of the Leave No Trace Program for Prince William Sound were designed to reduce impacts of recreation users on recovering resources. The effect of increased and concentrated recreational use could be mitigated through education using common themes and valid research. The proposal was denied due to an inadequate link to restoration. Since the original funding request, NOLS and the US Forest Service have pursued other funding sources and there are no plans to resubmit the request to the Trustee Council in the future.

TRUSTEE COUNCIL

Re: Nomination of Jim King for PAG

Dear Ms. McCammon:

On behalf of the Pacific Seabird Group (PSG), I take great pride in nominating Jim King of Juneau for another term on the Exxon Valdez oil spill Public Advisory Committee (PAG). Jim has had a long and distinguished career in natural resource management in Alaska, and was one of the founders of PSG some 25 years ago. Jim has been a hard-working member of the PAG during the past four years, and has diligently studied the materials, attended meetings and participated in discussions. Because of his extensive background in the issues that the PAG addresses and his deep knowledge of the issues involved in the EVOS Trust Fund, we hope that the Trustee Council will appoint him to another term.

As you know, PSG is an international organization that was founded in 1972 to promote knowledge, study and conservation of Pacific seabirds. We have taken an exceptional interest in the expenditure of funds from the EVOS trust fund, and thank the Trustee Council for this and other opportunities to lend our collective expertise and views on these important issues. Please call me at (202) 778-2240 if you have any questions regarding this nomination.

Sincerely,

*Craig S. Harrison*

9/23/96

Dear Trustee Council Members,

I do have time to serve a third term on the EVOS, PAG. I recognize there may be benefit to retaining some continuity with the past Groups. I also recognize the benefit to bringing in new personalities with new perspectives and that my "seat" may be needed for others. So I stand available for whatever is most useful.

It has been a rewarding experience working with the Council, the Staff and the other members of the PAG and I thank all for that.

Sincerely,

James G. King

*James G King*

Exxon Valdez Oil Spill Trustee Council  
645 "G" Street  
Anchorage, Alaska 99501

7/24/92

Dear Sir,

As a nominee to the Exxon Valdez Oil Spill Public Advisory Group this is my response to your letter of 7/21/92 regarding possible conflicts of interest.

For your questions number one, two and four my answer is an unqualified no.

For question three, I am employed on an intermittent basis by the US Fish and Wildlife Service (USFWS) and by Alaska Biological Research Inc. (ABR), both organizations that have been involved in oil spill related studies in Prince William Sound and might possibly be in the future.

I retired from USFWS in 1983 after some 33 years involved with bird studies in Alaska. I receive an annuity based on about half my former salary. Since that time I have remained active in Alaskan bird studies on a part time basis.

In 1984 I was given a permanent position with USFWS as a "rehired annuitant". This means that I can be employed for short term projects without filling out additional employment forms. My pay is based on my pre-retirement grade minus the amount of my annuity, calculated on a daily basis. I have averaged about a months work per year for USFWS.

During the same period I have averaged about a months work per year for ABR mostly doing aerial bird surveys.

I did not work on any Oil Spill projects.

I have also done some small projects for LGL Inc. ARCO Alaska Inc. and Coeur Alaska Inc.

These projects while providing a little handy cash, are not my primary source of income. The primary purpose is to stay current on the ornithological scene in Alaska as I have been doing for more than forty years. I am not interested in any great increase in employment.

Otherwise I or none of my family have employment with organizations that might be submitting proposals to the Trustee Council.

Sincerely,

*James G. King*

#### Awards:

- 1959: USFWS, monetary award for Rampart Dam study, duck band
- 1972: USFWS, monetary award for initial reports on possible refuges. These were established by The ANILCA legislation.
- 1972: National Wildlife Federation, Alaska Wildlife Conservationist of the Year.
- 1973: USFWS, Superior Service Award.
- 1978: National Audubon Society, Citation for Meritorious Service in the Conservation of Alaskan Wildlife.
- 1980: The Wildlife Society, Certified Professional Biologist.
- 1983: US Dept. of Interior, Meritorious Service Award.
- 1988: Safe Pilot Award, USFWS, 33 years & 5,000 hours w/o accident.
- 1989: Honorary Doctor of Humanities Degree, U. of AK, Southeast.
- 1989: Chevron Conservation Award, Volunteer Category, With Mary Lou King.

#### Positions, elected or appointed:

- 1962-64: Member Bethel Fire Dept.
- 1968-90: Member, City of Juneau Parks and Recreation Advisory Committee (past chairman).
- 1973-77: Board Member, Alaska Conservation Society.
- 1978-79: Editor, Pacific Seabird Group Bulletin.
- 1978: Conference Chairman. Sixth Conference of the Trumpeter Swan Society, Anchorage, AK.
- 1983: President, Alaska Chapter of The Wildlife Society.
- 1984-90: Member, Juneau Area State Parks Advisory Board, (Two State Parks created in Juneau as result of this committees work).
- 1985: Board Member, Territorial Sportsmen.
- 1987: Co-chair, concurrent session #8, Arctic Waterfowl, at the Symposium on Ecology and Management of Breeding Waterfowl, Winnipeg, Manitoba, Canada, Aug. 18-22.
- 1989: Chairman of Board, American Bald Eagle Research Institute. University of Alaska Southeast.
- 1989: President, The Trumpeter Swan Society, 3800 County Road 24, Maple Plain MN. 55359.

#### Professional & Ornithological Memberships:

American Ornithologists' Union, Ducks Unlimited, International Crane Foundation, National Audubon Society, National Wildlife Federation, Nature Conservancy, Northwest Bird & Mammal Society, Pacific Seabird Group, Trumpeter Swan Society, Point Reyes Bird Observatory, Wildfowl Trust, Wildfowl Trust of North America, Wildlife Refuge Association, Wildlife Society.

Over a period of several years, involving a number of people, resulted in identification of the dividing line between the Pacific and Central Flyway nesting sub-populations, their distribution and mortality rates)

1967. Proposed Waterfowl Study on Nelson Island Reindeer Ranges. (Major funding for this was from BIA. The Clarence Rhode staff did the work. Was used as background material for adding parts of Nelson Island to Clarence Rhode NWR in 1968.)

1968. The Birds of Bristol Bay, A Challenge For American Ornithologists. Written by King, read by Dr. Calvin Lensink to the Annual Conference of the American Ornithologists' Union, Fairbanks, May, 1968. (This resulted, in part, in a resolution adopted by the AOU calling for restrictions on oil development in Bristol Bay)

1968. Trumpeter Swan Survey, Alaska, 1968. (The actual tally of 2,844 trumpeters in Alaska was important in the decision to remove this species from the threatened list opening the way for propagation and transplants)

1968. Migratory Bird Populations of Coastal Alaska That Might Be Affected by Oil Development. Memo to Regional Director, Bureau of Commercial Fisheries. (This was prepared by request and used in a lengthy letter from Interior Secretary, Stewart Udall to the Western Oil and Gas Association cautioning them about damaging biological resources Alaska. The letter was sent in April, 1968. It was reprinted in the record of Senate hearings on the confirmation of Walter Hickel as Secretary of Interior.)

1968. Seabird Studies in Alaska. A draft proposal. (Prepared at request of Ray Woolford in anticipation that eventually funding would become available - as it did. This was the first recent proposal dealing with a need for seabird studies.)

1968. Letter to Ralph S. Palmer regarding emperor geese and other waterfowl. (Material included in Handbook of North American Birds published in 1976.)

1969. Statement signed by the Regional Director opposing a highway routing through the Mendenhall wetland waterfowl hunting area. (As a result of this testimony at a March 25, hearing the highway was routed nearer the edge of the hunting area)

1969. Memo to the Regional Director proposing a six man waterfowl survey program in Alaska.

1969. An evaluation of the D H Beaver for waterfowl surveys. Memo to the Area Director. (This was used in development of a turbo beaver with better visibility and range that has enhanced the ability of the waterfowl project to do wide ranging surveys since the late seventies.)

1969. King, J. G. and Don McKnight. A Water Bird Survey in Bristol Bay and Proposals for Future Studies. (Techniques developed here were useful in planning and developing surveys done in the mid 1970's in connection with outer continental shelf oil leasing studies)

1970. Man, Birds and Arctic Alaskan Development. Report to Dave

1972. Alaska Trumpeter Swans. A progress report for the second Trumpeter Swan Society Conference. Suggested resolving the question of whether two races exist before using Alaska swans for midwest transplants. (Some studies on this have been funded but results are still inconclusive.)

1972. Estuarine Areas Suitable for Inclusion in the National Wildlife Refuge System or a Suitable State-Federal Management and Development Agreement. (Sent to Congressman Dingell by the Area Director.)

1972. Peak Waterfowl Populations as an Indicator of Potential for Beneficial Management Opportunities of Alaskan Waterfowl Habitat. (Used in evaluation of new National Wildlife Refuges.)

1972. Historical Review of the Federal Government Efforts for Wildlife Conservation in Alaska. Suggests that Federal successes in the restoration of furbearers, some fish, some big game and some marine mammals in Alaska be written up so the public would better understand what the USFWS has to offer. (No action yet)

1973. The Koyukuk National Wildlife Refuge. An evaluation report under ANCSA. (Refuge was established)

1973. Alaska Department of Fish and Game Proposal for Swan Seasons in Alaska. (An evaluation resulting in this proposal being turned down)

74. Migratory Bird Population Management. Paper read at Alaska Area conference January 7-11. Suggests study needs.

1974. Alaska Pelagic Bird Observations and a Data Bank Proposal. Paper presented at the first annual meeting of Pacific Seabird Group, Seattle, December 6-8. Paper reviews a method for seabird surveys, based on established aerial methods, developed in 1971 during a cruise on the Coast Guard icebreaker GLACIER. (Technique subsequently used extensively during outer continental shelf seabird studies)

1974. The Impact on Birds from Proposed Oil and Gas Leasing on the Outer Continental Shelf. A summary report on the Interior Draft EIS showing numerous deficiencies.

1974. A Marine Bird Conservation Act. A draft prepared for consideration by Sierra Club and Audubon. (Funding of seabird studies by NOAA negated need for this)

1974. Outer Continental Shelf and Coastal Marine Bird Studies. A first draft. The subsequent team efforts led to a proposal that was funded under NOAA for 1.2 million dollars for the first year)

1974. Career Development and Tenure. Describes conflict between professional objectives and the Service program for career development and suggests studies directed at a more professional approach to personnel management. (Widely distributed but no action)

74. Reviews of ANCSA refuge proposal for Selawik, Koyukuk, Yukon-Charley and Yukon-Kuskokwim National Forest and their draft EIS.

1975. Comments on the Avifaunal Section, Department of Navy Draft EIS on Exploration NPR-4, Alaska, Zone A. These included a cursory band

1983. A Management Plan for Trumpeter Swans of the Cook Inlet Basin. With Bruce Conant. (Alaska Departments of Fish & Game and Natural Resources have used this to set up swan nesting reserves that are closed to private acquisition or any kind of development)

1983. An Atlas of Coastal and Lacustrine Habitats in Alaska, Calculated From 1:63,360 Maps. With Karen Bollinger. In prep.

1984. Managing To Have Wild Trumpeter Swans in a Country Exploding With People. Paper presented at 9th Trumpeter Swan Society Conference, West Yellowstone, Montana, Sept. ( Proposes population goals of 160 thousand rather than the 10 thousand recommended by the Pacific Flyway Council's Management Plan.)

October 8, 1996

Executive Director  
Exxon Valdez Oil Spill Trustee Council  
6445 G Street  
Anchorage, Alaska 99501

We would like to nominate the following individual for membership on the Exxon Valdez Oil Spill Public Advisory Group.

### HENRY KROLL

Hank was born in Seldovia and raised in the Cook Inlet area. His father homesteaded a remote site in Tuxedni Bay on Cook Inlet's west side. He wears many hats, as a commercial fisherman, wilderness lodge owner, operator of a mining claim in Nuka Bay, subsistence life-style advocate and currently the director of the Seldovia Historical Museum.

Hank maintains an active political interest and is very verbal in offering advice, constructive criticism, or potential ideas or solutions on any issue where he has acquired information. He is not hesitant in "bucking the establishment" if he feels a necessary perspective is missing. This past summer Hank's boat was used as a charter vessel for an RCAC environmental monitoring project in the Inlet. He has stayed informed on issues affecting the people of this area following the spill.

In nominating Hank Kroll for this seat on the Public Advisory Group, we feel he would make an excellent representative of either the subsistence, commercial fishing, tourism, or public at large member seats.

Sincerely,

Karl Pulliam  
SOS Team

# Nomination for Public Advisory Group

EXXON VALDEZ OIL SPILL (907) 278-1513  
TRUSTEE COUNCIL

August 1, 1994

EVOS Trustee Council  
645 "G" Street  
Anchorage, Alaska 99501

Dear Sirs:

I wish to be considered for appointment to the *Exxon Valdez* Oil Spill Public Advisory Group as a representative for the public-at-large.

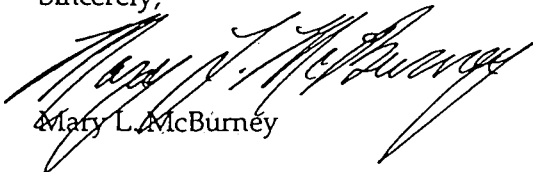

I have been an active participant on the PAG as an alternate member representing commercial fishing interests and I regularly follow the process and actions of the EVOS Trustee Council.

As a former resident of Cordova, I'm well acquainted with the geography, resources and communities of Prince William Sound and the spill-impacted region. I have an extensive background dealing with issues surrounding the *Exxon Valdez* oil spill, first as a legislative aide to Senator Mike Szymanski and Representative Gene Kubina and most recently as executive director for Cordova District Fishermen United.

I maintain close ties to Prince William Sound — I commercial fish, hunt, hike, kayak and sport-fish throughout the region and I'd appreciate an opportunity to continue to serve on the PAG. I have a strong commitment to public participation in the EVOS Trustee Council process and I believe my background and multiple-usage of Prince William Sound resources would make me an effective representative for the interests of the public-at-large.

I appreciate your consideration of my appointment and look forward to continuing as an active member of the public advisory group.

Sincerely,

Mary L. McBurney

EVOS Trustee Council  
645 "G" Street  
Anchorage, Alaska 99501

Dear Sirs:

In compliance with policies governing the Public Advisory Group, I wish to disclose the following information regarding conflicts of interest:

1) Do you, your spouse, children, any relatives with whom you live or your employer have, or are you defending, a claim filed before any court or administrative tribunal based upon damages caused by the T/V Exxon Valdez oil spill?

No.

2) Do you, your spouse, children, any relative with whom you live or your employer own any property or interest in property which has been, or is likely to be, proposed for acquisition by the Trustee Council?

No.

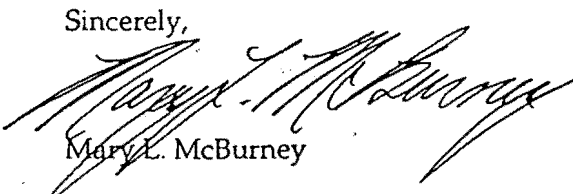

3) Have you, your spouse, children, any relative with whom you live or your employer submitted, or likely will submit, a proposal for funding by the Trustee Council; or be a direct beneficiary of such a proposal?

*I am a board member of the Prince William Sound Science Center (PWSSC) which has received Trustee Council funding for the Sound Ecosystem Assessment (SEA) program. The SEA initiative is a multi-year program and the PWSSC will be submitting project proposals for funding.*

4) Do you know of any other potential actions of the Trustee Council or the Public Advisory Group to have a direct bearing on the financial condition of yourself, your spouse, children, other relative with whom you live or your employer?

No.

Sincerely,

  
Mary L. McBurney

## Objective:

Professional position in government or private organization dealing with public policy issues.

## Professional Experience:

### Bering Sea Fishermen's Association — Information Specialist

Conducting research on fisheries issues related to the Western Alaska Community Development Quota Program. Writing and producing a monthly newsletter with a circulation of 3500. Designing and producing brochures and informational materials for residents of CDQ communities.

### Cordova District Fishermen United — Executive Director

Responsible for the administration and daily operation of a private non-profit fisheries association. Analyzed and responded to regulatory proposals and policy decisions related to commercial fisheries, resource conservation, and environmental recovery from the Exxon Valdez oil spill. Drafted position papers and presented testimony in public hearings, meeting and forums. Produced newsletters and press releases and published critical issue action alerts. Communicated with press and media representatives through press releases and interviews. Acted as liaison between the Board of Directors and state and Federal regulatory agencies.

### Alaska State Legislature — Legislative Aide

Researched resource and local government issues. Wrote briefing and position papers and press releases. Drafted legislation, resolutions and citations. Presented testimony before legislative committees. Assisted constituents with problems concerning state government. Maintained communications with constituents through newsletters, public meetings and special issue mailings. Worked closely with legislators, agency heads and their staffs. Served as committee staff to the House State Affairs Committee, Senate Community and Regional Affairs Committee and Senate International Trade and Tourism Committee.

### KLAM Radio — Station/Program Manager

Managed the day-to-day operations of a small local radio station. Wrote and produced local news broadcasts, commercials and interview programs.

### Carrie McLain Museum — Museum Director

Managed a local history museum in Nome, Alaska. Developed exhibits and produced interpretive texts for museum displays. Wrote grants and prepared annual budget. Implemented a database system for documenting and managing photo archives and artifact collections. Conducted research to document historic structures and prepared nominations to the National Register of Historic Places. Coordinated development of a conceptual plan for the City's Rocker Gulch park. Wrote and produced a walking tour brochure of historic sites and buildings in Nome.

### Carrie McLain Museum — Curator of Education

Coordinated and produced educational programs for public schools and the general public on Eskimo material culture. Co-produced a workshop series for adults with the Kawerak Adult Basic Education Program on Eskimo art and culture. Created elementary level curriculum kits. Conducted research and produced interpretive signage for the City's historic park and walking tour.

---

### **Pacific Science Center — Science Interpreter**

Presented educational programs for a large urban science and technology museum. Developed and produced demonstrations on physics, astronomy and the environment for the general public and special audiences. Prepared programs on Kwakiutl Indian art and culture. Assisted with instruction of teachers' in-service workshops on anthropology. Supervised and scheduled staff and coordinated science demonstration areas.

### **Education:**

#### **University of Washington, Seattle, Washington**

- ❖ Received Bachelor of Arts Degree in Anthropology, 1981
- ❖ Graduate course work in Public Administration
- ❖ Supplementary course work in museum education, collections management and artifact conservation

#### **University of Alaska, Anchorage**

- ❖ Course work toward the degree of Master of Public Administration

### **Other Experience & Associations:**

- ❖ Owner, Working Title Consulting, specializing in producing desktop publications
- ❖ Vice Chairman, Board of Directors, Prince William Sound Science Center
- ❖ Past Chairman, City of Cordova Personnel Board
- ❖ Alternate Member, EVOS Public Advisory Group, Commercial Fisheries Seat
- ❖ Past Alternate Member, ADF&G Citizens Advisory Committee for Federal Legislation Re-authorizations
- ❖ Member, United Fishermen of Alaska
- ❖ Crewmember, F/V Valiant Maid

August 1, 1994

James R. Ayers  
Executive Director  
Exxon Valdez Oil Spill Restoration Office  
645 "G" Street, Suite 401  
Anchorage, Alaska 99501-3451

SUBJ: Public Advisory Group -- PAG  
Reappoinment Request

Dear Mr. Ayers:

I have attached copies of papers submitted with my application when first made two years ago, for the purpose or reapplying for appointment to the PAG.

I have expanded representation to members of the Public at Large through membership in the Alaska State Chamber of Commerce, the Wasilla Chamber of Commerce, and the Anchorage Chamber of Commerce, in addition to the Alaska State Food Bank, for which organization I serve on the Executive Committee and as Secretary. I regularly give reports to these and the other groups to which I belong as well as seeking their input on matters of interest and import to them and the Trustee Council.

It would seem practical to use my first two years of experience as a PAG member to sharpen my value to it in the coming two years. Accordingly, I herewith apply for reappointment by the Secretary.

Very truly yours,

Vern C. Mc Corkle  
8817 Arlene Street  
Anchorage, AK 99502

D A T A S H E E T

Vern C. McCorkle  
8811 Arlene Street  
Anchorage, Alaska 99502  
276-4373/o or 243-3627-r

SUBJECT: Public Advisory Group, Exxon Valdez Oil Spill Trustee  
Council--Public At Large Representative

The following information is submitted in accordance with your  
Notice to Concerned Citizens dated September 1, 1992:

TO: EXXON VALDEZ OIL SPILL TRUSTEE COUNCIL

FROM: VERN C. McCORKLE

BIOGRAPHICAL SKETCH: I first came to Alaska in Territorial days  
as a member of the U.S. Navy, stationed at Kodiak. That was in  
1954. With the Navy I worked in operations and communications at  
Kodiak, Chiniak, Dutch Harbor, Barrow, and Nome. After college and  
working as editor of the Alcoa News, an international publication  
of the Aluminum Company of America in Pittsburgh, I later served as  
regional administrator of Community Action programs in Virginia,  
West Virginia, Ohio, the District of Columbia and Washington State.

Between 1978 and 1990 I served as City Manager for Seldovia,  
Saint Paul, Anderson, and Haines, Alaska. While at Seldovia I was  
a founding member of the COOK IN REG'L. CIT. ADVISORY COUNCIL and  
served as Chairman of the By Laws and Executive Director Search  
Committees. Currently I am publisher of the Alaska Business Monthly  
magazine.

I was a very active RCAC member and since leaving Seldovia, I  
have not had an opportunity to continue my interest in the activi-  
ties and goals of the council and see working with the EVOSTC as a  
way to become actively involved in the public service and policy  
work surrounding the Oil Spill.

INTEREST GROUP: I seek an appointment as a Citizen At Large member.  
I am not a member of nor actively engaged in activities of any of the  
other designated interest groups. My long service in public policy  
for Alaskan municipalities and people affords expertise the PAG may  
need in developing its own policy and taking effective actions.

I do not seek this appointment as a professional representative  
of the press, but, as a concerned citizen with unique professional  
experience which will assist the EVOSTC in fulfilling its goals.

CONFLICT OF INTEREST: I do not have any connection to, financial  
claim against, nor membership in any group which may be involved in  
the affairs of the EVOSTC except for the General Public, whom I seek  
to serve at large.

Respectfully submitted,

*Vern McCorkle*

25 October 1996

Molly McCammon, Exec Dir  
Exxon Valdez Oil Spill Trustee Council  
645 G Street  
Anchorage, AK 99501

  
Dear Ms. McCammon:

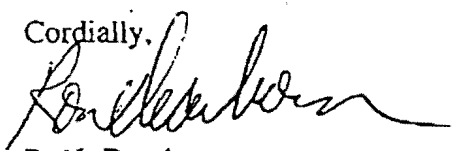

I am writing to encourage your selection of Charles P. Meacham for membership on the Public Advisory Group, EVOS Trustee Council.

Chuck recently retired after twenty years of distinguished service with the Alaska Department of Fish and Game and has remained active in resource issues. I have known Chuck for most of the 11 years I have been resident in Alaska. During that time we have shared the agenda for numerous meetings throughout Alaska. Chuck has been a very active and effective proponent for resources and for resource users throughout our acquaintance.

As director of the Alaska Sea Grant Program, I frequently call on Chuck to bring me abreast of issues, to clarify approaches by the state, user groups, or out of state interests in a variety of resource issues, or to merely give me a factual perspective on the status of a fishery. I was fortunate to have him serve on the Alaska Regional Marine Research Board. His active participation and diligence in serving on that board made a tremendous difference in what we were able to accomplish. I suspect his valuable participation on that board is an excellent indicator of the service you could expect from Chuck on the PAG.

I was pleased to hear that he had volunteered his time to help the Trustee Council. I very much recommend that you take advantage of this opportunity to access his knowledge and experience.

Cordially,

  
R. K. Dearborn  
Director

School of Fisheries and Ocean Sciences

**UNIVERSITY OF ALASKA FAIRBANKS**

P.O. Box 757220 Fairbanks, Alaska 99775-7220

22 October 1996

Molly McCammon, Executive Director  
Exxon Valdez Oil Spill Trustee Council  
645 G Street, Suite 401  
Anchorage, Alaska 99501-3451

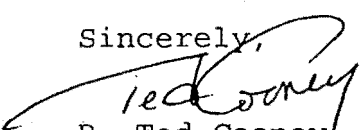

Dear Molly,

It is my understanding that Mr. Chuck Meacham (Alaska Department of Fish and Game) has expressed interest in participating on the EVOS Trustee Council Public Advisory Group. This correspondence supports his candidacy.

I have known Chuck for nearly 20 years. Among other things he was instrumental in bringing the University and Fish and Game together for a cooperative fisheries and oceanographic study of Prince William Sound before the oil spill. He is a superb biologist and careful administrator with a genuine interest in resource protection (fisheries) and the well-being of all end users. Chuck has the ability to both see and promote common sense solutions to complex problems.

I have always enjoyed working with Chuck when the occasion arose, and I am confident that he will make substantial contributions to the work of the PAG. In my judgment, his involvement will benefit the goals of the Council, the injured resources, and the public. I urge that you give his interest in this matter your most careful consideration.

Sincerely,

Anchorage, Alaska 99501

Dear Ms McCammon,

I wish to express my enthusiastic and unconditional support for the appointment of Mr. Charles P. (Chuck) Meacham, Jr. to a seat on the Public Advisory Group to the Exxon Valdez Trustees.

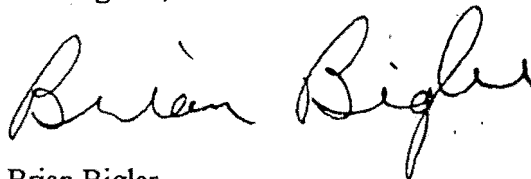

I have known Mr. Meacham for the past 17 years, and I know few people of such uncommon professional, ethical, and moral, character. Mr. Meacham will bring to the Advisory Group his more than 25 years of practical experience with marine resource management and a sensitivity for continued conservation of these valuable Alaskan assets.

Mr. Meacham has regularly demonstrated a level-headed, thoughtful and unbiased capability to understand all sides of an issue. As management of resources under the purview of the Trustee Council is considered, it is imperative to have the type of representation that Mr. Meacham offers.

Besides my own, the appointment of Chuck Meacham enjoys support from all sectors of the commercial fishing industry. The fishing industry needs fully credentialed appointments to the Public Advisory Group to the Exxon Valdez Trustees.

I appreciate your interest and respectfully recommend that you help move Chuck Meacham's appointment forward quickly.

Best regards,

Brian Bigler

EXXON VALDEZ OIL SPILL  
TRUSTEE COUNCIL

Dear Trustees:

This is a letter of support for the appointment of Charles P. Meacham to the Exxon Valdez Oil Spill Public Advisory Group. Chuck was the Fisheries Program Manager for ADF&G's natural resource damage assessment program in the first two years after the spill. In those chaotic times, he was responsible for getting a number of fish and shellfish projects into the field. Considering that no one had anticipated this spill, he had an important leadership role in an intense effort to build a program from nothing. I watched him deftly work with other agencies' managers, the project investigators, the Chief Scientist and peer reviewers and the lawyers to advance the trustees' knowledge in productive ways. His people skills are immense. I count him as the best supervisor I ever had, though I only worked for him for six months until his obvious talents resulted in promotion to deputy commissioner. His institutional knowledge of those times is very important to the restoration efforts we are now making. Following his promotion, he would nevertheless stop in once in awhile to see how EVOS restoration was progressing. He remained interested and he is interested still. When someone offers a gift of time, knowledge and talent like this, the trustees would be well advised to take it.

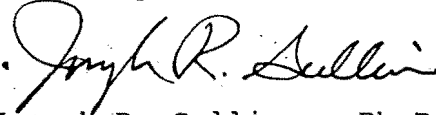

It is not just Chuck's oil spill experience which makes him valuable as a PAG member. He has a long history of involvement with the commercial fisheries of this area and Alaska, enjoying a long and profitable career with ADF&G and for the past two years as a fisheries consultant. In particular, he was the regional research biologist for the Commercial Fisheries Division immediately prior to joining the spill effort and has the capacity to professionally critique many of the proposed projects upon which the PAG makes recommendations to the Trustee Council.

Finally, Chuck is a good and decent man, a quality that is important but usually cannot be deciphered from an application. He is one of those people who can see everything, overlook a great deal and change what he can. His pleasant demeanor and ability to

get along with and charm everyone he meets does not mean that he is unaware of the contentious issues that surround the expenditure of EVOS moneys. I think you will find he is a realist, but one who will help the PAG examine the questions that need to be asked about projects and make wise informed recommendations to the Trustee Council.

I strongly recommend the Trustee Council appoint Chuck Meacham to the Public Advisory Group. You have an opportunity here to acquire in Chuck assets that have not been available in the recent history of the PAG.

Sincerely,

A handwritten signature in cursive script, reading "Joseph R. Sullivan".

ALASKA CHAPTER

October 23, 1996

Ms. Molly McCammon  
(Fax 907) 276-7178  
Executive Director  
Exxon Valdez Oil Spill Trustee Council  
645 G Street  
Anchorage, Alaska 99501

Dear Ms. McCammon:

I am writing on behalf of the Alaska Chapter of the American Fisheries Society relative to membership on the Public Advisory Group (PAG) of the Exxon Valdez Oil Spill Trustee Council. The Alaska Chapter requests that you seriously consider the appointment of a professional fisheries biologist with experience in Alaska to the PAG.

By way of background, the Alaska Chapter was established 23 years ago and is composed of about 350 members. Membership includes fishery professionals from throughout state government, federal government, academia, and the private sector (consultants, fishermen, processors, etc.). Our chapter is a member of the North American Fisheries Society, which celebrated its 125<sup>th</sup> year in 1995, and is now 8,850 members strong.

Although we do not endorse any qualified fisheries professional over another, we are aware that at least one professional fisheries biologist has expressed a willingness to volunteer his time to the PAG-Chuck Meachum. As we don't have the list of applicants, other equally qualified members may have applied as well and we would be willing to provide comments concerning their proven competence as a fisheries professional. However, Chuck Meachum is highly qualified and should be considered. He is familiar with the areas affected by the oil spill and will be able to provide a reasonable public voice concerning future EVOS Trustee Council activities. He is a founding member of the Alaska Chapter and a life member of the American Fisheries Society. He currently serves as the chair of the past president's committee and continues to be an active chapter participant.

Sincerely,

Dana Schmidt  
President, Alaska Chapter of the American  
Fisheries Society

RECEIVED  
OCT 30 1996

Dear Ms. McCammon,

EXXON VALDEZ OIL SPILL  
TRUSTEE COUNCIL

I am writing on behalf of the Prince William Sound Aquaculture Corporation in support of Chuck Meacham for appointment to the Public Advisory Group to the Exxon Valdez Oil Spill Trustee Council.

- While I am sure that there are a number of good candidates interested in volunteering their time, Chuck clearly has academic, professional, and public service credentials to do an excellent job. As other strong candidates become known, our association will inform you of them, as well.

Chuck, probably qualifies for most of the 17 seats being filled. However, his well rounded background is ideal for one of the five public at large seats. He would also make an especially good representative for the science/academic seat or conservation seat.

Chuck spent considerable time in Prince William Sound when he was Regional Supervisor with Commercial Fisheries Division, ADF&G, and during the first years after the oil spill as Fisheries Program Manager for oil spill studies. His first-hand knowledge of Prince William Sound (and the other spill affected areas) will certainly be of help to the other advisors and the Trustees.

Sincerely,

Howard Ferren  
Interim CEO  
PWSAC

Ms. Molly McCammon  
Executive Director  
Exxon Valdez Oil Spill Trustee Council  
645 G Street  
Anchorage, Alaska 99501

Dear Ms. McCammon:

I am interested in volunteering for appointment to the Exxon Valdez Oil Spill Trustee Council Public Advisory Group. Please consider me for any vacant position for which you feel I qualify. My resume is attached.

I retired from the Alaska Department of Fish and Game in 1995, after 21 years of service. I began as a recruit biologist and retired as deputy commissioner. During my career, I was directly involved with the Exxon Valdez oil spill and served as fisheries program manager for the department's oil spill studies. I am personally familiar with the Prince William Sound, Cook Inlet, and Kodiak areas.

While I am presently involved as a private consultant, I have an abundance of discretionary time which I would enjoy donating to address Alaska natural resource issues. I have lived in Alaska since 1956. I plan to live in Alaska for the rest of my life and want it to be a good place for my family and me to live.

I have reviewed the attached conflict of interest questions and to the best of my knowledge have no conflicts.

Sincerely,

Charles P. Meacham

**Information Packet**

Nominees for membership to the Public Advisory Group should provide the following information:

- A biographical sketch (education, experience, address, telephone, fax);
- Information about the nominee's knowledge of the region, peoples or economic and social activities of the area affected by the *Exxon Valdez* oil spill, or expertise in public lands and resource management;
- Information about the nominee's relationship/involvement (if any) with the principal interest to be represented;
- A statement explaining any unique contributions the nominee will make to the Public Advisory Group and why the nominee should be appointed to serve as a member;
- Any additional relevant information that would assist the Trustee Council in making a recommendation; and
- Answers to the conflict of interest questions listed below.

**Conflict of Interest**

Public Advisory Group members and their alternates are chosen to represent a broad range of interests. It is possible that action could be taken by the Public Advisory Group when one or more of the members have a direct personal conflict of interest which would prejudice and call into question the entire public process. To avoid this and to enable the Trustee Council to choose appropriate individuals as members and/or alternates to members, it is necessary that each nominee provide the following information with their information packet. If the answer to any of these questions is yes, please provide a brief explanation of your answer. A yes will not necessarily preclude any nominee from being appointed to serve on the Public Advisory Group.

- No* • Do you, your spouse, children, any relative with whom you live or your employer have, or are you defending, a claim filed before any court or administrative tribunal based upon damages caused by the *Exxon Valdez* oil spill?
- No* • Do you, your spouse, children, any relative with whom you live or your employer own any property or interest in property which has been, or is likely to be, proposed for acquisition by the Trustee Council?
- No* • Have you, your spouse, children, any relative with whom you live or your employer submitted, or likely will submit, a proposal for funding by the Trustee Council; or be a direct beneficiary of such a proposal?
- No* • Do you know of any other potential actions of the Trustee Council or the Public Advisory Group to have a direct bearing on the financial condition of yourself, your spouse, children, other relative with whom you live or your employer?

EXXON VALDEZ OIL SPILL  
TRUSTEE COUNCIL

Dear Sir:

This responds to your recent flyer soliciting nominations for the Public Advisory Group of the Exxon Valdez Oil Spill Trustee Council. I believe that my background and experience would be an asset to the Council in its deliberations, and hereby nominate myself. Enclosed is my curriculum vitae.

In 1986 I retired from my position as a fishery research biologist with the National Marine Fisheries Service. I have continued to be professionally active as a self-employed consultant on fisheries and environment, and as a volunteer with several public natural resource interest groups.

I have closely followed events subsequent to the Exxon Valdez spill and am personally familiar with the areas affected by the spill, especially Prince William Sound, where I supervised a pink salmon ecological research program at Olsen Bay for several years in the 1960s. I also managed the research on crude oil toxicity at the National Marine Fisheries Auke Bay Laboratory in the 1970s and 1980s, until my retirement. (See the penultimate reference in the list of publications in my curriculum vitae.)

I consider myself an open-minded environmentalist; and am a long-time member of the Nature Conservancy, National Parks and Conservation Association, Natural Resources Defense Council, Audubon Society, and others. I have also served terms as elected chief executive of the two professional fisheries organizations in Alaska (American Fisheries Society and American Institute of Fishery Research Biologists).

In answer to the conflict of interest questions posed in the nomination flyer:

\* Neither I, nor any relative, nor anyone with whom I have a professional or business relationship, is involved in Exxon Valdez claims.

\* Neither I, nor any relative, nor anyone I know, has any interest in property being considered by the Council.

\* Neither I, nor any relative, nor anyone I know, has any beneficial interest in funding of projects approved by the

Council. (My former employer, National Marine Fisheries, has submitted research proposals for funding, but I no longer have any connection with that agency.)

\* I know of no potential actions of the Council that would benefit me or any relative (although I own 183 shares of Exxon common stock which I inherited in 1992).

I have lived and worked in Alaska for nearly forty years, have traveled extensively throughout the State during my thirty plus years of employment, and continue to be active in outdoor recreational activities. Interest categories for which I consider myself qualified are:

- \* environmental
- \* sport hunting/fishing
- \* conservation
- \* recreation users
- \* science/academics

I am also familiar with some aspects of aquaculture and commercial fishing, but not from first-hand experience.

If additional information is required, please feel free to call. My telephone is (907) 789-7876.

Sincerely yours,

A handwritten signature in cursive script, reading "Theodore R. Merrell".

Theodore R. Merrell

## CURRICULUM VITAE

Theodore R. Merrell  
3240 Fritz Cove Road  
Juneau, AK 99801

Tel: (907) 789-7876

### EXPERIENCE

- May 1987 to present      Self-employed consultant, fisheries and environment. Examples: contract with Coffman Associates, Airport Consultants, to prepare environmental chapter for Juneau International Airport 20-Year Master Plan (1987); advisor to Sierra Club Legal Defense Fund on Environmental Impact Statement for Quartz Hill Molybdenum Mine in Misty Fiords National Monument (1989); advisor to National Park Service and National Marine Fisheries Service on marine litter surveys at eight National Seashores (1989).
- 1971-1986      National Marine Fisheries Service, Auke Bay Fisheries Research Laboratory. Manager, Habitat Investigations. Directed research on effects of logging and marine pollution on fish and their environment; staff of 20-30, budget about \$1 million a year. Retired May 1986 after 32 years of federal service (including 3 years with military during World War II).
- 1958-1971      National Marine Fisheries Service, Auke Bay Fisheries Research Laboratory. Chief, Salmon Ecology Investigations. Directed research on habitat requirements of salmon.
- 1962-1963  
(5 months)      Bureau of Commercial Fisheries, Washington, D.C. Acting Chief, Branch of Anadromous Fisheries for national fishery programs. Temporary assignment.
- 1956-1958      National Marine Fisheries Service, Juneau, Alaska. Project supervisor, Bristol Bay Red Salmon Ecological Research.
- 1949-1956      Oregon State Fish Commission, Clackamas, Oregon. Fishery biologist. Directed research on effects of dams on Columbia River salmon runs.
- 1947  
(summer)      Minnesota Conservation Department, St. Paul, Minnesota. Lake survey crew.
- 1943-1946      U.S. Army Field Artillery. Active duty Southwest Pacific, New Guinea and Philippine Islands.

PROFESSIONAL RECOGNITION AND APPOINTMENTS	Listed in American Men and Women of Science, national directory of scientists.
	Certified Fishery Scientist, American Fisheries Society.
1990 to present	Member, Juneau Area State Parks Advisory Board; co-chair, 1992-93.
1989	Chairman, Governor's Task Force on Finfish Farming in Alaska.
1988 to 1991 <del>present</del>	Member of Board, Juneau Economic Development Council, representing environmental viewpoint.
1985 May-June	U.S. Exchange Scientist to USSR: Advisor to Soviet scientists on high seas salmon migrations, Siberia and aboard Soviet research vessel, North Pacific Ocean.
1982	Chairman, Alaska Working Group on Cooperative Forestry-Fisheries Research, an organization of federal and state agencies, and private industry, which sets research priorities and coordinates field activities of participating organizations.
1977	Member, Ecological Reserve Working Committee, Southeastern Alaska Regional Task Force.
1976	President, American Fisheries Society, Alaska Chapter.
1973	Chairman, Interagency Fish and Wildlife Technical Committee, Marine Section, Trans-Alaska Pipeline.
1971	Member, Committee Science Natural Areas, Alaska.
1970	Member, Governor's Task Force, Oil Pollution.
1969	Member, R and D Subcommittee, Alaska Oil Pollution Task Force.
1967-1974	U.S. Department of Commerce, Research Coordinator with Atomic Energy Commission. Advisor on effects of underground nuclear weapons tests on marine resources at Amchitka Island, Alaska.
1966-1967 (3 months)	U.S. Exchange Representative to United Kingdom Antarctic Expedition. Appointed by U.S. State Department and National Science Foundation. Awarded Antarctic Service Medal.

# CITY OF CORDOVA

October 17, 1996

Executive Director  
EVOS Trustee Council  
Restoration Office  
645 G. Street, Suite 401  
Anchorage, AK 99501-3451

Re: Letter of Recommendation to Appoint Scott Novak to  
Local Government Seat, Public Advisory Group

Dear Ms. McCammon:

The Cordova City Council unanimously endorses Councilmember Scott Novak's application for the Local Government seat on the EVOS Public Advisory Group.

The City Council urges you to consider Cordova's nominee. Cordova needs to have a voice on this Advisory Group as we were one of the most adversely affected communities during the 1989 oil spill.

If you need additional information, please contact Mayor Margy K. Johnson at 424-3272 or 424-6280.

Your appointment of Mr. Novak to the Local Government Seat is appreciated.

Sincerely,

Lynda Plant  
City Clerk

cc: Mayor Margy K. Johnson

Re: Public Advisory Group

Please accept my name as a nominee for the local government seat on the E.V.O.S. public advisory group.

I am a twenty five year resident of the community of Cordova and a member of the Cordova City Council. My education includes three years of college towards a degree in physics along with a number of community college courses including the study of real estate law and business law.

My knowledge of the region comes from a variety of experiences over the past twenty five years. These include three years as an employee of the Alaska Dept. of Fish and Game in the mid 1970's as a research assistant aboard the research vessel Montague. Three years as owner and operator of a 110 foot charter vessel used in Prince William Sound to support research by a variety of state and federal agencies during the D-2 land studies of the late 1970's. Eight years as a permit holder and commercial fisher in P.W.S. Eleven years as a Cordova business owner operating a retail heating fuel business. Additionally, I have served Cordova as a volunteer in a number of elected positions on utility boards, fishing organizations and city council. In total I have accumulated twenty years of service on boards and councils including four years as public co-chair of the Alaska Coastal Policy Council.

I am asking to be appointed to the seat representing local government. My relationship to this interest is my current position on the Cordova City Council where I am serving my second term. At our last council meeting the Mayor appointed me as the City Council's representative to the Trustee Council. The intent of this appointment was that I was to be the one council member who would follow the work of the Trustee Council so we could have a local person who would be well informed.

The contributions that I could make to the Public Advisory Group would be a historic understanding of the region from a variety of experiences. My twenty years of service to the community and a good understanding of the public process should help the Advisory Group function smoothly. I have been many times elected by my community and twice appointed by an Alaska Governor to represent the public. I believe this makes a positive statement about my credibility as a public servant.

I am just completing four years of service on the Alaska Coastal Policy Council. I asked not to be appointed to a third term because I wanted to get involved with the work of the Trustee Council. During my time on the Coastal Policy Council I stressed the need

Public Advisory Group

Letter of Intent

Page 2

for long term planning and the importance of looking at the big picture when trying to find solutions. I place a lot of emphases on being consistent in our thinking and being honest in setting our goals. I would sincerely like the opportunity to be a part of the Public Advisory Group.

I have read the four questions on conflict of interest and I do not have any conflicts. I have a conflict of interest statement on file with the Alaska Public Offices Commission.

Respectfully,

Scott Novak

# COASTAL CURRENTS

ACMP Assessment Bulletin

October 1996

## Assessment Recommendations Approved by Council

On October 3, the Coastal Policy Council acted on 30 recommendations to alter and improve the ACMP. This Council action represents a milestone for the ACMP Assessment. As Jeff Bush, Deputy Commissioner of Commerce and Economic Development notes, "It is very exciting to see the Assessment project coming together after many complex and controversial questions have been debated and carefully analyzed." "The recommendations of the Council represent the culmination of a year and a half of dedicated work by a lot of people," adds Scott Novak, Council member from Cordova.

Some of the recommendations will lead to statutory and regulatory changes; others will spur administrative action and good will on program changes. "I am optimistic that these changes will bring us the balance and efficiency that we are seeking for our coastal program," remarks Scott Novak. "And equally significant," adds Jeff Bush, "I believe this process, involving all interested parties, has reopened communication and trust between the state, local districts and municipalities, potential developers, and affected citizens."

- See pages 3 and 4 for a complete listing of all the approved recommendations -

Council discussion highlighted the critical role that the enforceable policies guidelines will play in improving coastal district plans which are the building blocks of the ACMP.

Several Council members viewed the recommendations relating to plan improvements as the core of all the Assessment recommendations. In fact, the Council expanded the plan improvement recommendations by including the plan requirement suggestions advanced by the Department of Community and Regional Affairs. (See related article on page 5.)

Several Assessment recommendations focused on expanding the voice range of the coastal districts through "local knowledge" and "public need." Recommendations directing statutory changes will allow districts to delegate ACMP planning and implementation similar to that allowed under Title 29 and clarify responsibilities and relationships among boroughs, CRSAs and cities. The Council action also directed the Municipal District Committee to consider new approaches for districts to decide consistency on local projects.

The recommendations relating to streamlining petitions and elevations received considerable attention by the Council. After much discussion, the Council opted not to eliminate "B1" petitions at this time. Instead, they directed staff to examine petitions in the context of eliminating appeal redundancy or duplication across parallel processes of state resource agencies and associated statutes. After moving to accept the recommendations relating to program enforcement, the Council formally approved the Assessment recommendations by adopting Resolution 96-1 (see page 2).

## Resolution 96-1

## ALASKA COASTAL POLICY COUNCIL

Approving the Recommendations from the  
Alaska Coastal Management Program Assessment

- WHEREAS, The ACMP has been in place for seventeen years and there has been considerable change in the ACMP;
- WHEREAS, The Knowles Administration seeks ways to streamline government and achieve greater budget efficiency;
- WHEREAS, Coastal Districts wants more local influence in the ACMP consistency reviews of coastal development projects;
- WHEREAS, State agencies want local governments to assume more responsibility for ACMP implementation and enforcement;
- WHEREAS, The ACMP Assessment has generated lively, solution-oriented group discussions by an among affected parties since January 1994;
- WHEREAS, Public review and comment has been received on these key Assessment Reports:
- ACMP Assessment Component: "Implementation of District Coastal Management Plans" Final Report by Patrick Galvin, Consultant; Nov. 1995
  - A Discussion Draft of Potential ACMP Improvements by the Division of Governmental Coordination; March 1996
  - "Title 29/46 Recommendations to CPC Steering Committee" by Title 29/46 Committee; May 1996
  - Coastal Policy Council Report on the ACMP Assessment, by Assessment Steering Committee, August 1996;
- WHEREAS, The Assessment Steering Committee, a subcommittee of state and local representatives of the Council, advanced recommendations to the Council after listening to all perspectives and discussing the issues;

NOW, THEREFORE, BE IT RESOLVED, that the Alaska Coastal Policy Council accepts the recommendations contained in the report, Coastal Policy Council Report on the ACMP Assessment as modified by Council action on October 3, 1996, and directs the Division of Governmental Coordination to proceed with appropriate actions, including legislative and regulatory drafting for implementing these recommendations.

PUBLIC ADVISORY GROUP

RECEIVED  
SEP 3 1996

EXXON VALDEZ OIL SPILL  
TRUSTEE COUNCIL

EVOS Executive Director,

Hello my name is Paul Panamarioff and I am from Ouzinkie Alaska.

I am currently Ouzinkie Tribal Councils President plus the Administrator and the City of Ouzinkie Council Member.

I am a past KIHA Commissioner and RATNET Board Member.

I have some experience with EVOS. I have been involved with the Draft of Protocols for Indigenous and local knowledge Research in the EVOS Restoration Process, and I am involved in our Clam Restoration.

I believe that since I have been involved with EVOS in the past and I still do have interests in the EVOS Program, that I would be a good candidate to serve on the Public Advisory Group.

I am a Commercial Fisherman, Subsistence User and I am concerned about our environment.

I believe in Commercial Tourism for the future years to come. I am involved in our local Governments.

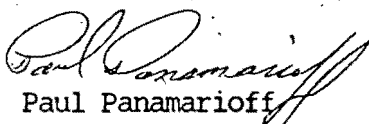

1. Yes, we do have our claim filed before the court for damages caused by the Exxon Valdez Oil Spill.

2. No, I nor my family own any or interest in any property proposed for acquisition by the Trustee Council.

3. Yes, Ouzinkie Tribal Council has a Clam Restoration proposal for funding possibly for next year (1997).

4. No, no actions of the Trustee Council or Public Advisory Group have a direct bearing of my financial conditions.

sincerely

  
Paul Panamarioff

Dear Ms. McCammon,

Based on the low number of village applicants to the Public Advisory Group (PAG) I am requesting that you submit my previous application for the next two-year term on the PAG. Ms. Womac said that this is an acceptable procedure.

Thank you and if it is the Council's desire to choose me as a PAG member I would once again be honored. Please call if you need additional information.

Sincerely,

  
Brenda Schwantes

**Goals:** Continue education, independent business owner.

Brenda L. Schwantes  
Kodiak Area Native Association  
402 Center Avenue  
Kodiak, Ak 99615

In 1989 I began employment with the Kodiak Area Native Association. My job was created as a result of the Exxon Valdez oil spill. My experience as the Oil Spill Coordinator and member of the Oil Spill Health Task Force gives me first hand knowledge of how the spill affected individuals as well as agencies. In addition to acting as the Coordinator for KANA, in 1990 I accepted the position of the Tribal Operations Coordinator. In that position, which I am currently employed, I interact with Tribal and City Governments. My interaction has given me insight into the strengths and needs of the Kodiak region. Other experience includes overseeing the mariculture project based in Akhiok, managing the Village Public Safety Officer Program, Housing Improvement Program, and dealing with subsistence issues.

Additionally, I am a descendant of the Aleut people. Our family continues to subsist off moose, deer, fish, shellfish, berries and vegetables from our garden. I understand and appreciate the subsistence lifestyle.

The following information is supplied in response to the conflict of interest questions. Since 1989 I have been a member of a group that has filed a claim before the court which is based upon damages caused by the Exxon oil spill. I am enrolled to the Kodiak Tribal Council.

I do not have any interest in property which has been proposed for acquisition by the Trustee Council, nor does any family member or relative.

My employer, Kodiak Area Native Association, has submitted a proposal to the Trustee Council. The proposal to build a cultural and heritage museum has been funded.

I do not know of any potential actions of the Trustee Council or Public Advisory Group that might have a direct bearing on the financial condition of myself or anyone related to me. Thank you for considering my resume for nomination or appointment to the Public Advisory Group.

Stacy Studebaker

**KODIAK AUDUBON SOCIETY  
PO BOX 1756

**RECEIVED**  
OCT 15 1996

**EXXON VALDEZ OIL SPILL  
TRUSTEE COUNCIL**

**Executive Director  
Exxon Valdez Oil Spill Trustee Council  
645 G Street  
Anchorage AK 99501**

**To the Executive Director:**

Kodiak Audubon Society is pleased to nominate Stacy Studebaker to the *Exxon Valdez* Oil Spill Public Advisory Group.

Perusal of Stacy's enclosed biographical sketch should answer any questions the Trustee Council may have concerning her qualifications.

Stacy has been a resident of Kodiak since 1980. Her professional life as a high school teacher and her personal life has been characterized by her concern for the natural habitat of the Kodiak area.

She is in a position to make a unique contribution to the Public Advisory Group due to her vast knowledge of the Kodiak area, her active role as a public parks advocate and volunteer, and her formal scientific background. Due to the experience Stacy acquired in the process of nominating Kodiak's Termination Point area to the Council for small parcel acquisition, she has a basic knowledge of your goals and procedures.

Thank you for your consideration of this most worthy candidate for the Public Advisory Group.

*Mary Forbes*

**BACKGROUND and EXPERIENCE**

**A. Education (Formal and Continuing)**

1971 - Bachelor of Science Degree - University of Colorado, Boulder

1979 - Masters in Science Teaching and Environmental Education

Antioch New England, Keene, New Hampshire

Additional courses beyond degrees:

1. Emergency Medical Training-1982 Kodiak College
2. Biology and Ecology of Marine Invertebrates-1984 University of Alaska,  
Seward Marine Center
3. Flora and Fauna of New Zealand-1985-Goddard College
4. Geothermal Energy in New Zealand-1985-Goddard College
5. Techniques of Taxidermy-1985-Kodiak College
6. Shellfish Aquaculture-1987 UAA, Kodiak
7. Chemistry Workshop-1988 UAF, Homer
8. Whales and Marine Mammals-1989 UAA, Kodiak
9. Ecology and Economy of Marine Pollution-1989 UAA, Kodiak
10. Development of Critical Thinking Skills/Global Survival-1989  
South Central Learning Academy, Univ. of AK Anchorage
11. Mushrooms of Kodiak-1990 UAA, Kodiak
12. Fishes-1991 UAA, Kodiak
13. Heat Effects on Proteins-1992 UAF
14. Teacher Seismology Workshop-1994 UAF

**B. Teaching Experience:**

1. 1971-National Park Service, Yosemite National Park  
Historical Interpreter/Educator
2. 1971-1976-Yosemite Institute, Environmental Educator  
A non-profit school dedicated to developing environmental awareness  
among school children who attended for week-long programs in  
outdoor science. (September-June)
3. 1973-1976 (Summers) Glacier Bay National Park, Alaska  
Park Naturalist/Environmental Education
4. 1977 (Summer) Katmai National Park, Alaska  
Researcher/Environmental Education  
National Park Service Cooperative Park Studies Unit
5. 1978(Summer)Katmai National Park, Alaska, Park Ranger-Naturalist

6. 1980-present - Kodiak Island Borough School District
  1. Gifted and Talented Program Teacher (1980-1984)  
Kodiak Middle School and Kodiak High School
  2. Science Teacher(1984-present) Kodiak High School  
Courses Taught: Earth Science, Biology, Botany,  
Environmental Studies
7. 1982-1992 UAA, Kodiak Part time faculty - botany

C. Activities (Professional and Community):

1. Academic Coach (1980-present) Kodiak High School.  
Future Problem Solving-State Champions 1984  
Knowledge Masters-State Champions 11 times during last 9 yrs.  
Introduced both programs to school district
2. Science Fair Coordinator (1988-1994) Kodiak High School  
Introduced this activity to Kodiak High School  
My students have consistently placed 1st, 2nd, and 3rd locally as well  
as in top places at state wide Science Fair.  
1992-My students won the award for Best High School at the Alaska  
State Science Fair
3. 1994-Earth and Sky-Public Radio Contest for student science reporting.  
One of my students placed first in this National Competition.
4. 1992-present: Creator, producer, writer and host of *MY GREEN EARTH*,  
an award winning, national and international weekly radio show on  
the environment for kids eight through eighty.  
Broadcast weekly via NPR satellite uplink to 40+ stations nationally and  
via short-wave radio to 60+ countries
6. 1985-present; Kodiak School District Science Curriculum Committee.
7. 1995-1996 Organized Science travel trips with groups of high school  
students to Oregon and the Grand Canyon
8. 1992-Alaska Summer Industrial Fellowship for Teachers  
Funded by: AK Science & Technology Foundation  
Fisheries Industrial Technology Center, Univ. of AK Kodiak
9. Publications:
  1. Plant Lore of an Alaskan Island Botanical Editor (1985)
  2. Journal of Aquatic Food Product Technology Co-author (1994)  
"Color Changes During Thermal Processing Of Pacific Chum  
Salmon"
  3. Journal of Food Quality Co-author (1993)  
"Hydrothermal Processing of Pacific Chum Salmon"
  4. The Ishmael Companion Classroom Notes from Teachers (1995)
  5. Life On The Island(1990) and Sometimes A Great Ocean (1993)  
Music recordings on cassette and CD of my original  
music/lyrics with my band, WATERBOUND

10. Community Service Oriented activities

Near Island Trail Committee, Trident Basin Aesthetics Committee, KMXT Public Radio volunteer, Kodiak State Parks Advisory Board Member and Volunteer, Alaska Aerospace and Development Corp. Community Advisory Board Member, State Parks Marine Recreation Projects Committee, Kodiak Island Borough volunteer to assist in acquisition of new State Parks including Shuyak and Termination Point through the EXXON Valdez Trustee Council, Audubon Board Member, Alaska State finalist for the Presidential Award for Excellence in Science Teaching sponsored by the National Science Foundation

Conflict of Interest?

I filled out the paper work to nominate Termination Point for the small parcel aquisition process which also involved getting the signature of owner (Leisnoi Inc.) and rallying local support. I am not a Leisnoi share holder so the only direct benefit for myself would be the satisfaction of saving 1000 acres of beautiful, forested land from clearcutting.

In the same spirit, I have also been a local activist for the North Afognak and Shuyak Island lands aquisition by the Trustee Council.

Additional relevant information:

Background in professional environmental education work, public lands and resource management (NPS), conservation, academic scientific experience, as well as familiarity with the EXXON Trustee Council.

Kodiak resident for 17 years, and have worked with many groups in the community.

Ongoing scientific research in Seafood Technology and in Paralytic Shellfish Poisoning with Fishery Industry Technology Center.

## DEMONSTRATED KNOWLEDGE AND EXPERTISE OF CHARLES W. TOTEMOFF

### KNOWLEDGE OF THE AFFECTED REGION

Charles W. Totemoff lived in Chenega Bay from 1983 through 1992. Seven years ago the *Exxon Valdez* Oil Spill drastically altered his lifestyle. Rather than take a passive role throughout the Oil Spill clean-up and restoration activities, Mr. Totemoff opted for involvement. He coordinated clean-up efforts in and around Western Prince William Sound. Mr. Totemoff has also participated and continues to participate on various committees and organizations formed during the response effort.

Mr. Totemoff possesses a unique understanding of the spill affected regions. He has coordinated scientific research and spill related activities and continues to work with other spill affected communities to involve them in the restoration effort.

### KNOWLEDGE OF THE AFFECTED PEOPLES AND ECONOMIC AND SOCIAL ACTIVITIES OF THE AFFECTED AREAS

Chenega peoples are historically resource dependent peoples. They hunt, fish, trap and gather foodstuffs from the waters and lands around their village. Since the Oil Spill, the subsistence way of life has changed dramatically for those villages in spill affected regions. Hunting and fishing takes place forty to fifty miles from home. This great distance takes the people away from the villages to areas thought to be free from contamination.

However, the suspicion of contamination is still high. The Native people know the migratory habitats of all the animals. They fear eating contaminated resources. The habits of the people are not as communal anymore as there are fewer resources available to share. There are also limited opportunities for teaching or passing on of traditional knowledge of food gathering or preparation when most of this activity takes place further away from the villages.

Charles W. Totemoff has direct experience with the changes in the economic and social activities caused by the Oil Spill in the affected regions and his ability to communicate this experience to those outside his village is invaluable. His personal experience with the families of his community and interaction with members of other heavily impacted villages have greatly contributed to his knowledge of the effects that the Spill has had on the affected peoples, economies and social activities.

## CHARLES W. TOTEMOFF RELATIONSHIP AND INVOLVEMENT WITH PUBLIC ADVISORY GROUP PRINCIPAL INTERESTS

### NATIVE LANDOWNERS

As a life-long rural Alaska resident, Charles W. Totemoff has had extensive experience in Native land ownership. Mr. Totemoff is a respected member of the Native community and is well suited to accurately and fairly represent the vital interests of the Native landowner on the Exxon Oil Spill Public Advisory Group.

### FOREST PRODUCTS

Chenega Corporation is a primary timber holder in the spill affected area and is also one of the owner-villages of Koncor Forest Products Company. Mr. Totemoff has had intensive involvement with Alaska's forest products industry through corporate timber ownership and his present position as a Board of Director of Koncor Forest Products.

### COMMERCIAL FISHING

Many Chenega villagers rely on commercial fishing as the primary source of their income. As the Oil Spill had such a direct impact on the ability to commercially fish and on the areas available to fish, Mr. Totemoff has had an opportunity to experience directly the effects of the Oil Spill on the commercial fishing industry. Charles W. Totemoff has also commercially fished in Prince William Sound during his ten years of living there.

### CONSERVATION

Charles W. Totemoff's cultural beliefs include the belief that there are diverse groups of peoples that live in Alaska that are separated by culture, traditions and lifestyles. However, for hundreds of years these peoples have lived in balance with Nature in a caretaker fashion. There is a respect by the peoples for their environment. Conservation of Alaska's environmental resources is a vital part of this belief.

### LOCAL GOVERNMENT

Charles Totemoff moved to Chenega Bay in 1983, prior to the village rebuilding where he worked with various agencies on the development of the new community. He has served as the tribal administrator and chairman for the Chenega Bay IRA Council. Additionally, he has helped coordinate master plans for development for the village of Chenega Bay.

As President and C.E.O. of Chenega Corporation, Mr. Totemoff is intimately involved with a locally-run and locally-elected governmental body. He serves as President of Chenega Corporation and has served as the Chairman of the Chenega Bay IRA Council.

#### ENVIRONMENTAL

Charles W. Totemoff was responsible for the Chenega Bay response effort during the *Exxon Valdez* Oil Spill clean-up. Also, through his positions as Corporation President and C.E.O. and IRA Council Chairman, Mr. Totemoff has participated in bio-remediation programs and scientific testing on oiled lands.

#### SUBSISTENCE

Chenega peoples are historically resource dependent peoples. They hunt, fish, trap and gather food from the waters and lands around their village. Since the Oil Spill, the subsistence way of life has changed dramatically for Chenega Bay and many other villages. Charles Totemoff's direct involvement with Native community members who rely on a predominantly subsistence lifestyle is invaluable experience that can be acquired only by a person who is a part of that lifestyle.

#### SCIENCE/ACADEMIC

As President & C.E.O. of Chenega Corporation, Charles W. Totemoff has helped with spill clean-up, bio-remediation programs and scientific testing on oiled lands. He has extensive experience in working with Federal, State and private sector scientists and academic advisors.

**NATIVE LANDOWNERS PRINCIPAL INTEREST**  
**NOMINEE CHARLES W. TOTEMOFF CONTRIBUTION STATEMENT**

**LIFETIME NATIVE LANDOWNER EXPERIENCE**

It seems all too often that decisions are made for Alaska's Native landowners who were affected by the spill rather than with them. Charles W. Totemoff brings a lifetime of Alaskan Native landowner experience as well as recent "hands-on" experience of the spill from clean-up to subsistence to planning for the future. His wealth of knowledge and ability to communicate and cooperate with other spill affected landowners will be a tremendous asset to the Public Advisory Group. Mr. Totemoff brings to the Trustee Council an opportunity to hear directly from those people who were and remain the most severely impacted by the spill.

**DIRECT AND ON-GOING EXPERIENCE WITH SPILL AFFECTED AREAS**

Chenega Bay was one of the most severely impacted areas of the spill. Evidence of the spill remains on the beaches and perhaps most importantly, in the minds and hearts of their people. As a member of Chenega Corporation, Mr. Totemoff has been an instrumental participant in the study and restoration of these spill affected areas. Mr. Totemoff will bring the ability to experience first-hand exactly how the spill has impacted and continues to impact the Native landowners of Alaska.

**AN ALASKAN NATIVE PERSPECTIVE**

It is essential that the Public Advisory Group continue to have representation from the Native community. An Alaskan Native perspective, especially a perspective from a spill impacted area, gives the Trustee Council and the Public Advisory Group an inside understanding of how the Native people view their lands. With much discussion centering around possible Native land acquisition, a person with the ability to represent these landowners becomes critical. It is hoped that Mr. Totemoff will be again be selected as that person.

## CHARLES W. TOTEMOFF CONFLICT OF INTEREST STATEMENT

Do you, your spouse, children, any relative with whom you live or your employer have or are you defending, a claim filed before any court or administrative tribunal based upon damages caused by the Exxon Valdez oil spill? Yes. Charles W. Totemoff is a member of the class of Natives who have sued Exxon Corporation and related defendants in Federal District Court. That action was recently settled in the approximate amount of \$20 million. Charles W. Totemoff's employer, Chenega Corporation, also has an action for damages caused on account of the Exxon Valdez Oil Spill pending in Alaska Superior Court.

Do you, your spouse, children, any relative with whom you live or your employer own any property or interest in property which has been, or is likely to be, proposed for acquisition by the Trustee Council? Yes. Chenega Corporation, the employer of Mr. Totemoff, is presently negotiating with the United States Forest Service and the Exxon Valdez Oil Spill Trustee Council for the sale of property and interests in property.

Have you, your spouse, children, any relative with whom you live or your employer submitted, or likely will submit, a proposal for funding by the Trustee Council? Yes. Charles W. Totemoff's employer, Chenega Corporation has recently proposed a beach treatment project with AEDC which was funded by the Trustee Council. There may or may not be future submissions or proposals by Chenega Corporation funded by the Trustee Council.

Do you know of any other potential actions of the Trustee Council or Public Advisory Group to have a direct bearing on the financial condition of yourself, your spouse, children, any relative with whom you live or your employer? No.

Howard Valley

I was Born September 7, 1948 in Kodiak and raised first 7 years of on Afognak Island in a logging camp owned by my father. That logging operation with associated sawmill and planer was washed away in the Good Friday earthquake and tsunami of 1964. I spent the Summers from the time I was 6 years old till I left for college commercial salmon and crab fishing around Afognak and Kodiak Island. Graduated from Kodiak High School in Kodiak and attended one year of college before joining the Navy in 1968. Spent 2 years in Japan of which 6 months were spent in Vietnam. After the service spent one and a half years with father starting a logging operation on Afognak Island, at location of previous logging and sawmill operation. Managed and operated virtually all phases of operation from road building to scaling and rafting. Worked as operating engineer from 1973 to summer of 1975 on road projects in Kodiak and in Valdez working on road to terminal and the pipe yard for the Alaska Pipeline. After that went to flight school and completed private, instrument, commercial, float, multi-engine land, and flight instructor ratings. Then flew commercially from 1977 through 1988 racking up about 8,000 hours in Anchorage, McGrath, and Kodiak Island areas. From October of 1988 through June of 1996 worked full time for Afognak Native Corporation as lands manager, systems manager, and directly involved in Timber Sales, Inventory control, and as a Director of Afognak Native Corporation from 1982 to present. I am a native shareholder in the Koniag Regional Corporation and of Afognak Native Corporation. I am the chairman of the planning and zoning committee for Afognak Native Corporation and have been Chairman since April of 1985 of the Afognak Joint Venture, which is currently in negotiations with the EVOS Trustees for the acquisition of a portion of its land. I am currently the Chairman and Chief Operating Officer of the Afognak Joint Venture.

Spent various times King Crab fishing around Kodiak Island as I grew up and 1978-1980 fished full

time, year around, around Kodiak Island and from Swishak to Castle Cape, South of Chignik. Spring of 1973 spent Tanner Crab fishing out of Cordova around Hinchinbrook Island and harvesting herring row from kelp. From May of 1980 - October 1988 flew commercially out of Kodiak to all villages in the Kodiak Archipelago and also hunters into remote areas around Afognak and Kodiak Island. Also owned my own supercub from 1978 through 1985 which I used to go hunting and fishing around Afognak and Kodiak during free time and herring spotting in the Togiak Fishery.

- Yes my employer is a member of a class action suit against Exxon for damages cause by the Exxon Valdez oil spill.
- The corporations with which I work, Afognak Joint Venture and Afognak Native Corporation, are responsible for the management of over 300,000 acres of land on Afognak and the North end of Kodiak Island and both have been actively logging since the late 80's.
- No spouse, children or any relative with whom I live or my employer have submitted, or are likely to submit a proposal for funding by the Trustee Council; nor will be a direct beneficiary of such a proposal?
- I do know of any other potential actions of the Trustee Council, other than the above mentioned acquisitio, of the Trustee Council or the Public Advisory Group to have a direct bearing on the financial condition of myself, spouse, children, or other relative with whom I live or my employer.

Howard W. Valley

October 14, 1996

Executive Director  
Exxon Valdez Oil Spill Trustee Council  
Restoration Office  
645 G Street  
Anchorage, AK 99501

Dear Sir or Madam;

I am submitting my application to become a member of the Exxon Valdez Oil Spill Public Advisory Group.

I feel that my involvement with this particular group would be very resourceful because I am from the Chugach Region, Nanwalek. I have lived in the village now for the last twenty years. I have worked in the educational field for the past 5 years and decided to work for the Nanwalek I.R.A. Council as the Natural Resource Specialist/EVOS Community Facilitator to assist on creating Land usage and ownership of land, Traditional Resource Harvest Data Collection, and working under the direction of the Nanwalek I.R.A. Council. I feel by being involved with this group I would become very resourceful to the community and we as the community would become educated.

I became a P.R.W. (professional rock wiper), during the Vecco days. Actually most of the community did also.

I am very outgoing, truly love to learn, willing to work with many types of people, and pretty easy going.

Thank you for your time and consideration of my application. Please feel free to contact me if you have any questions.

Sincerely,

*Nancy Yeaton*

October 31, 1994

Executive Director,  
Exxon Valdez Oil Spill Trustee Council  
645 G Street, Ste. 401  
Anchorage, Alaska 99501-3451

Dear Sir or Madan,

Please consider this to be an expression of my interest  
in serving on the Public Advisory Group.

I have had considerable experience in shellfish aquaculture.  
My son and I operated the Alaska Sea Ranch near Ketchikan.  
I am also an investor in a hatchery and shellfish farm in  
Washington State.

Sincerely,

  
Gordon J. Zerbetz

Conflict of Interest

Public Advisory Group members and their alternates are chosen to represent a broad range of interests. It is possible that action could be taken by the Public Advisory Group when one or more of the members have a direct personal conflict of interest which would prejudice and call into question the entire public process. To avoid this eventuality and to enable the Trustee Council to choose appropriate individuals as members and/or alternates to members, it is necessary that each nominee provide the following information with their information packet. If the answer to any of these questions is yes, please provide a brief explanation of your answer. A yes will not necessarily preclude any nominee from being appointed to serve on the Public Advisory Group.

- Do you, your spouse, children, any relative with whom you live or your employer have, or are you defending, a claim filed before any court or administrative tribunal based upon damages caused by the T/V Exxon Valdez oil spill? *no*
- Do you, your spouse, children, any relative with whom you live or your employer own any property or interest in property which has been, or is likely to be, proposed for acquisition by the Trustee Council? *no*
- Have you, your spouse, children, any relative with whom you live or your employer submitted, or likely will submit, a proposal for funding by the Trustee Council; or be a direct beneficiary of such a proposal? *no*
- Do you know of any other potential actions of the Trustee Council or the Public Advisory Group to have a direct bearing on the financial condition of yourself, your spouse, children, other relative with whom you live or your employer? *no*

*No to all above.*
