**RESOLUTION OF THE  
EXXON VALDEZ OIL SPILL TRUSTEE COUNCIL**

We, the undersigned, duly authorized members of the *Exxon Valdez* Oil Spill Trustee Council ("Council"), after extensive review and after consideration of the views of the public, find as follows:

1. The owners of the Patson small parcel, KEN 1034, have offered to sell said parcel for the price of \$450,000;
2. An appraisal of the parcel has been approved by the state and federal review appraisers, and the fair market value of the parcel as determined by the appraisal is equal to or greater than the appraisal;
3. As set forth in Attachment A, Restoration Benefits Report for KEN 1034, if acquired, this small parcel has attributes which will restore, replace, enhance and rehabilitate injured natural resources and the services provided by those natural resources, including important habitat for several species of fish and wildlife for which significant injury resulting from the spill has been documented. Acquisition of this small parcel will assure protection of 76.33 acres including approximately 1500 feet of linear shoreline along the Kenai River. The parcel contains important riparian habitat such as low, overhanging grassy banks for fish rearing, extensive wetlands for maintaining water quality, and forested uplands. The parcel provides restoration benefits for pink salmon, sockeye salmon, coho salmon, and dolly varden.
4. Existing laws and regulations, including but not limited to the Alaska Forest Practices Act, the Alaska Anadromous Fish Protection Act, the Clean Water Act, the Alaska Coastal Management Act, the Bald Eagle Protection Act and the Marine Mammal Protection Act, are intended, under normal circumstances, to protect resources from serious adverse effects from activities on the lands. However, restoration, replacement and enhancement of resources injured by *Exxon Valdez* oil spill ("EVOS") present

a unique situation. Without passing judgment on the adequacy or inadequacy of existing law and regulations to protect resources, scientists and other resource specialists agree that, in their best professional judgment, protection of habitat in the spill area to levels above and beyond that provided by existing laws and regulations will have a beneficial effect on recovery of injured resources and lost or diminished services provided by these resources;

5. There has been widespread public support for the acquisition of lands within Alaska as well as on a national basis;

6. The purchase of this parcel is an appropriate means to restore a portion of the injured resources and services in the oil spill area. Acquisition of this parcel is consistent with the Final Restoration Plan;

7. The purchase of small parcels is an appropriate means to restore a portion of the injured resources and services in the oil spill area.

THEREFORE, we resolve to provide funds for the State of Alaska to purchase all the seller's rights and interests in the small parcel KEN 1034 and to provide funds necessary for closing costs recommended by the Executive Director of the Trustee Council ("Executive Director"), and approved by the Trustee Council and pursuant to the following conditions:

(a) the amount of funds (hereinafter referred to as the "Purchase Price") to be provided by the Trustee Council to the State of Alaska shall be four hundred fifty thousand dollars (\$450,000) for small parcel KEN 1034;

(b) authorization for funding for any acquisition described in the foregoing paragraph shall terminate if a purchase agreement is not executed by July 15, 1999;

(c) disbursement of these funds by the District Court;

(d) a title search satisfactory to the State of Alaska and the United States is completed, and the

seller is willing and able to convey fee simple title by warranty deed;

(e) no timber harvesting, road development or any alteration of the land will be initiated on the land without the express agreement of the State of Alaska and the United States prior to purchase;

(f) a hazardous materials survey satisfactory to the State of Alaska and United States is completed;

(g) compliance with the National Environmental Policy Act; and

(h) a conservation easement on parcel KEN 1034 shall be conveyed to the United States which must be satisfactory in form and substance to the United States and the State of Alaska Department of Law.

It is the intent of the Trustee Council that the above referenced conservation easement will provide that any facilities or other development on the foregoing small parcel shall be of limited impact and in keeping with the goals of restoration, that there shall be no commercial use except as may be consistent with applicable state or federal law and the goals of restoration to prespill conditions of any natural resource injured, lost, or destroyed as a result of the EVOS, and the services provided by that resource or replacement or substitution for the injured, lost or destroyed resources and affected services, as described in the Memorandum of Agreement and Consent Decree between the United States and the State of Alaska entered August 28, 1991 and the Restoration Plan as approved by the Trustee Council.

By unanimous consent, following execution of the purchase agreement between the seller and the State of Alaska and certification by the Executive Director that the executed purchase agreement is in accordance with the foregoing terms and conditions, we request the Alaska Department of Law and the Assistant Attorney General of the Environment and Natural Resources Division of the United States

Department of Justice to petition the District Court for disbursement of the joint settlement funds in the above certified amount.

Such amount represents the only amount due under this resolution to the sellers by the State of Alaska to be funded from the joint funds in the District Court Registry, and no additional amounts or interest are herein authorized to be paid to the sellers from such joint funds.

Approved by the Council at its meeting of July 1, 1998 held in Juneau and Anchorage, Alaska, as affirmed by our signatures affixed below:

---

JIM WOLFE  
Regional Forester Trustee Representative  
Alaska Region  
USDA Forest Service

---

BRUCE M. BOTELHO  
Attorney General  
State of Alaska

---

DEBORAH L. WILLIAMS  
Special Assistant to the  
Secretary for Alaska  
Department of the Interior

---

STEVEN PENNOYER  
Director, Alaska Region  
National Marine  
Fisheries Service

---

FRANK RUE  
Commissioner  
Alaska Department of  
Fish and Game

---

MICHELE BROWN  
Commissioner  
Alaska Department of  
Environmental Conservation

Attachment: A - Restoration Benefits Report

## PWS 1034: Patson Parcel

---

<b>Acreage:</b> 76.33	<b>Rank:</b> PMSC
<b>Sponsor:</b> ADNR	<b>Appraised Value:</b> \$600,000
<b>Owner:</b> Ms. Ellen L. Patson	
<b>Location:</b> Outside the City of Soldotna at Kenai River Mile 24.	

---

**Parcel Description.** The parcel is located at Kenai River Mile 24.5, just outside the City of Soldotna on the south side of the river. Funny River Road provides the only vehicle access to lands on the south side of the river. This parcel is located approximately 2.5 miles down Funny River Road from the intersection with the Sterling Highway.

The parcel is a large undeveloped tract of land situated in close proximity to the City of Soldotna. As such, it provides an opportunity to protect important upland and riparian habitats that are rapidly being lost to increasing urban expansion and private development. To date, development along the Funny River road has been constrained due to limited access. However, if a proposed Funny River bridge is constructed, a significant increase in new development could be expected. The extensive uplands on the parcel make it a prime candidate for subdivision development. Furthermore, sportfishing continues to increase in the middle reach of the Kenai River resulting in more trespass and streambank damage. The EVOS Trustee Council has been pro-active in protecting Salamatof Native Association lands a short distance upstream of the parcel. Acquisition of the parcel would supplement and enhance those protection benefits.

**Restoration Benefits.** Public ownership of this parcel will protect habitat for injured resources such as pink salmon, sockeye salmon and Dolly Varden. Benefits also extend to equivalent or replacement species such as: chinook salmon, coho salmon, moose, bear and a variety of passerine bird species. Service values such as recreation/tourism will also benefit if compatible access can be provided and important resource habitats protected.

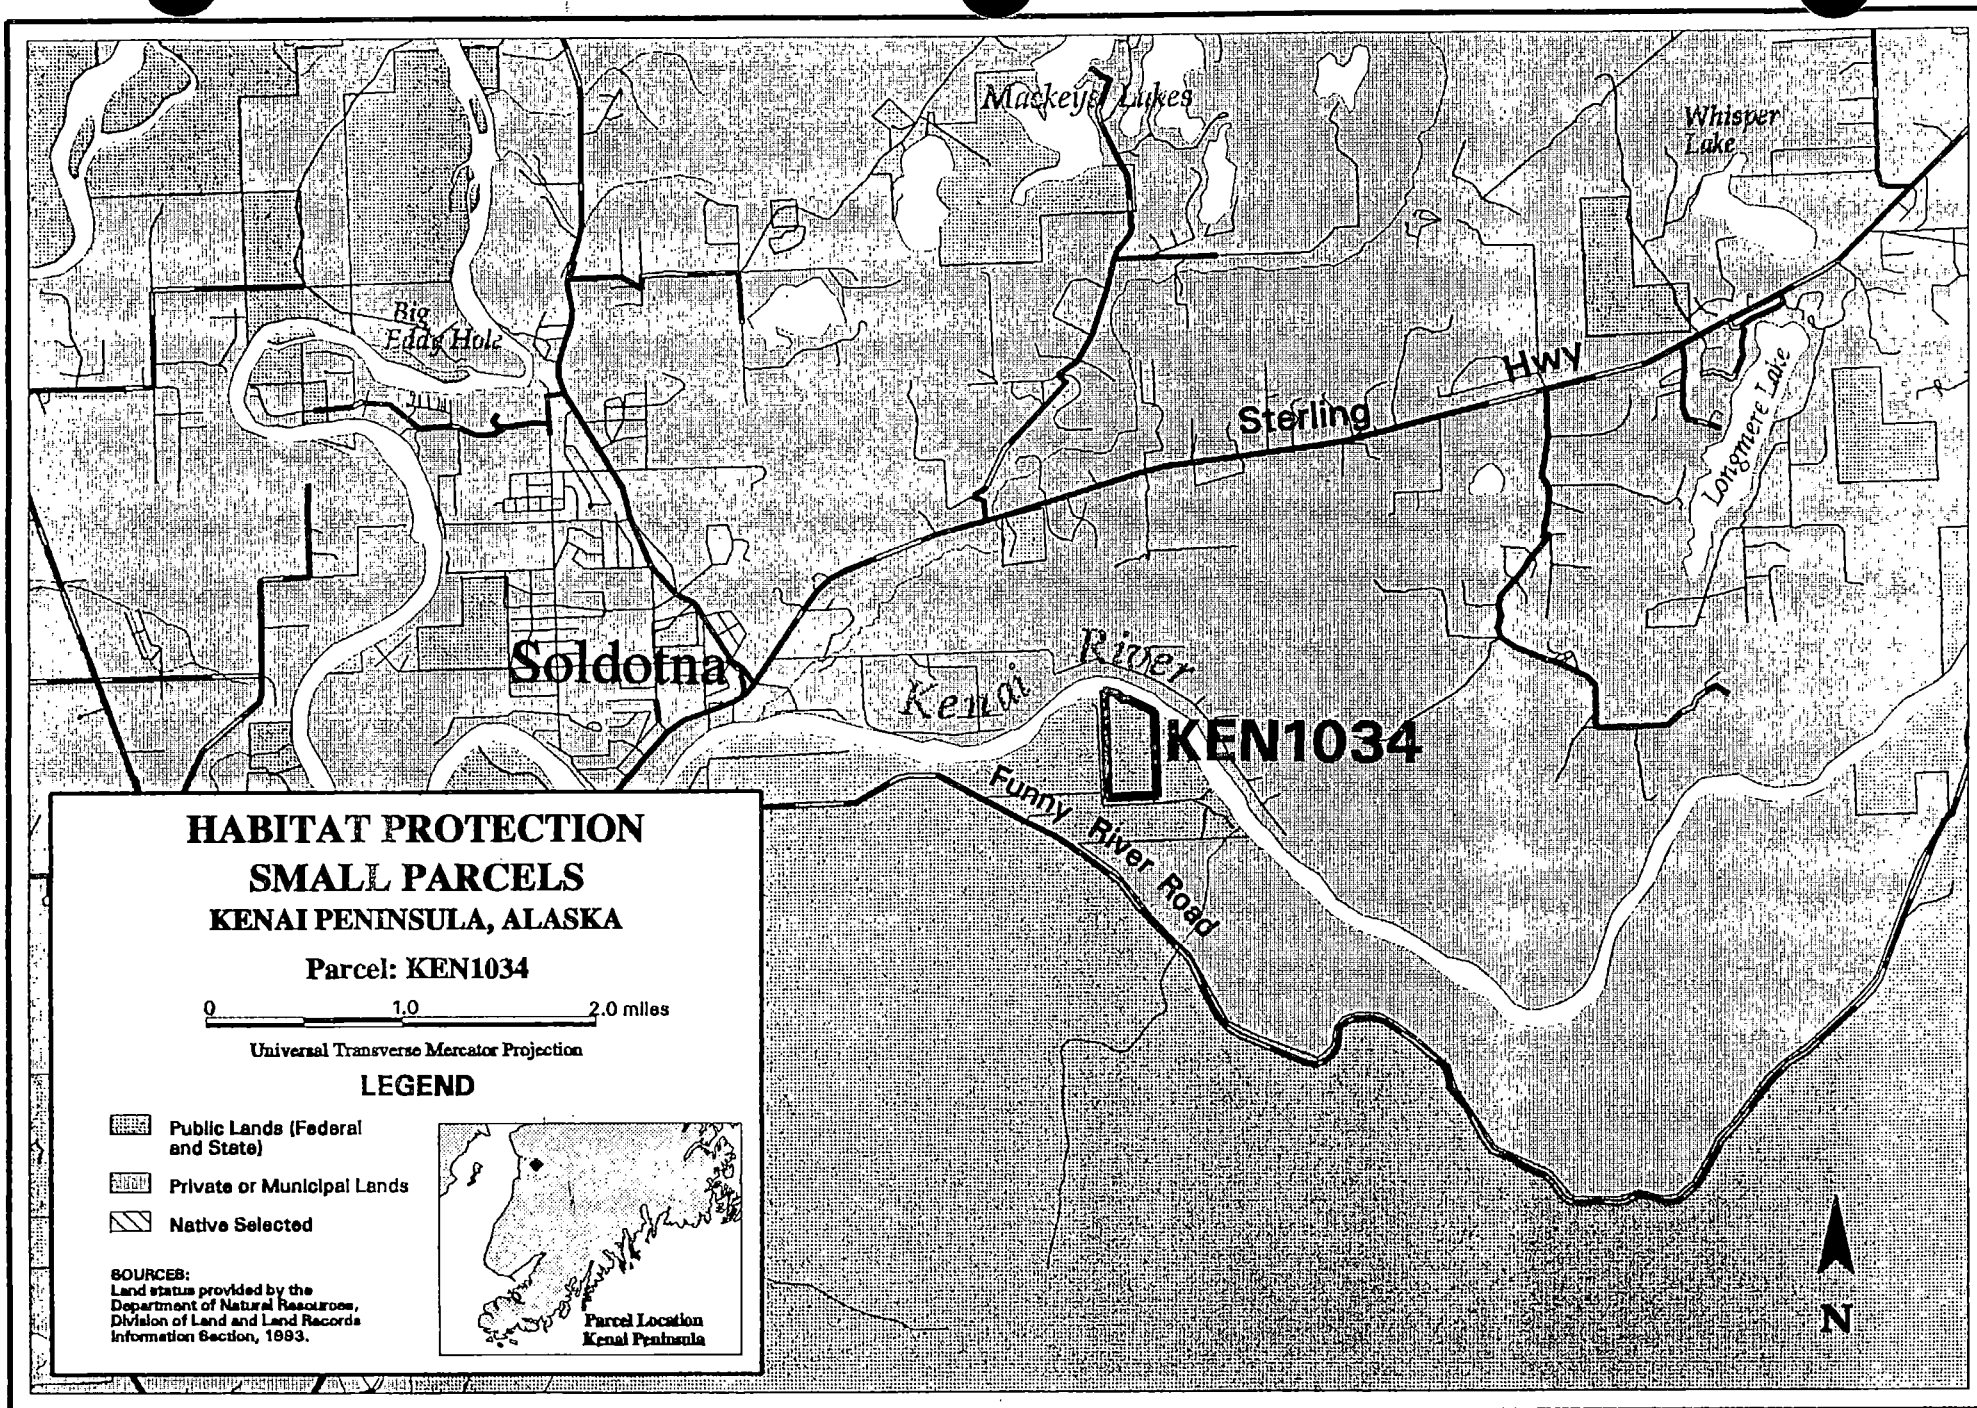

Key habitats and other attributes of this parcel include the following:

- Protects important riparian habitats such as low, overhanging grassy banks for fish rearing; extensive wetlands for maintaining water quality, flood control and recharge; forested uplands for large and small terrestrial mammals.
- Provides enhanced management ability to condition use, enforce trespass and protect streambanks.
- Acquisition of this parcel will protect approximately 1,500 linear feet of river bank.
- Strategic enhancement for other EVOS acquisitions and an urban development buffer that will increase in restoration value as more wild lands are subdivided or otherwise cleared.

This parcel was ranked at the top of the low category (18) and scored the same as a number of other small parcels which have been identified as Parcels Meriting Special Consideration. The State feels that the parcel provides comparable benefits for injured resources and services.

**Appraised Value.** The appraised value of this parcel is \$600,000. The highest and best use of this parcel is for development as a residential subdivision.

**Proposed Management.** State Parks and ADF&G would manage the parcel to protect riparian habitat and as appropriate provide for recreational opportunities.

From: Bob Spies, Chief Scientist

Re: Emergency Funding Request

In the FY99 Invitation, recognizing the importance of obtaining better acoustic target strength values for several fish species including Pacific herring and sandlance, we invited proposals to carry out this work. Correct target strength values are necessary to interpret the acoustic data being gathered in a variety of Trustee Council funded scientific studies. Currently, the biologists in APEX, for instance, are using total acoustic backscatter as an index to fish biomass. Without the correct target strengths there is the possibility of making substantial errors in estimating fish biomass by acoustical methods, especially when there are multiple species present.

The need for these data is program-wide. We have, therefore, not asked any one of the projects we are supporting to do this calibration work on its own, but would sponsor an independent study to obtain this information. We have received a proposal from Jay Kirsch of the Prince William Sound Science Center in direct response to our identified need—"FEATS: Fundamental estimations of acoustic target strength" (99468). The proposal has received our preliminary endorsement in the FY99 Workplan process. We recommended a one-year project for \$150K. The work, if approved by the Trustee Council, would start early in 1999. Waiting until 1999 will slow the process of data analysis, interpretation and dissemination of study results in a variety of projects, including the multi-investigator APEX program. This will have serious consequences for publication and dissemination of the results from these studies. I am therefore requesting a special allocation from the Trustee Council to start this work this summer—essentially starting the project proposed for 1999 immediately. A significant portion of the work could be initiated this summer for a cost of \$90K by Mr. Kirsch. Attached is a memo from Mr. Kirsch outlining in detail what could be done this field season. The total cost of his project in FY98 and FY99 would then not exceed the \$150K recommended for the FY99 work. It is my understanding that this project could be funded through the NOAA BAA process.

cc: B. Wright  
T. Cramer

Please note: the amount requested for  
FY 98 is now only \$19.0.

## MEMO

TO: Stan Senner, EVOSTC  
FROM: Jay Kirsch, PWSSC  
DATE: June 30, 1998  
RE: FEATS FY98 work

We have reviewed our schedule and budget for FY98, and have split the tasks between FY98 and FY99.

In summer 1998 we will design, construct (contract), and test a preliminary support structure using PWSSC personnel part-time, and local fabricators. The components to tether the fish and to lower a transducer to depth will not be included in this structure until early 1999. An underwater video camera and video frame grabber will be specified and purchased.

In October 1998 the field experiments will take place. Only non-spawning fish can be measured, as spawning takes place in spring. Only herring can be measured, as (to the best of our knowledge) sandlance can only be caught during summer. Fish will be caged only, not tethered, so fish orientation can not be controlled, only monitored. The transducer will only be able to operate at the surface, not deep, so assessment of depth dependence will be limited.

In November and December 1998 data processing and analysis will be conducted, so that by mid-December 1998 a preliminary TS equation for herring will be available, and sent to PWS researchers. In January 1999, we will write a preliminary report describing the methods and results.

In Spring 1999 we will measure pre-spawning herring, with more depth and orientation information. In Summer 1999, we will measure and describe sandlance TS. By September 1999 we will have finished all experiments and drafts of the manuscripts.

  
Jay Kirsch, co-P.I.
