Dear Exxon Valdez trustee Council

Since the Exxon oil spill there was less fish with less fish there was less jobs, since mariculture there was more jobs. More villages, more villages have more money. The oil spill hurt us ~~and~~ in subsistence fishing jobs we ate cereal a lot from Exxon but thanks for providing food for us. It killed a lot of animals. Are village needs jobs.

Sincerely

Arthur Kompkoff

This oil spill has effected our community
really bad. How our animals were killed and we, us
were out of our wildmeats we need our meat
and Yes I do, we do support our oyster farm.

From,
Anna Gregorick

RECEIVED

Dear Exxon Valdez Trustee Council, the oil spill has effected my life and others around me. My life in many ways, the wild life wont like it was the same as not here like they were six years ago and the fish and the birds arent here like they were then.

I support the Chugach Region village mariculture project because I will need money for college and lots of other things.

Dear Exxon Trustee

we would like your help on
what the oil spill has done
to the environment and the village
it killed all the animals like
fish when the oil spill happened their
was a poor fishing year when that
happened and the prices of fish dropped
and the boats all of down here they
could not even pay off their bills for
the summer and it killed off many
sources of animals like sea otter,
seal, sea lion, ducks, geese,
seagulls, and I hardly see these
animals around I see some of them
but not all of them. so we would
like your help and the village would
like it to.

Thank's
Allen

I think the Exxon oil spill effected
us by killing all the animals
we eat. I think that's the only way
it effected us because the Island
was blocking the oil from coming
into our village. And the wind
blew it into Chenega. But when it hit
Chenega it effected them from
going swimming and they weren't
able to eat any sea food for
awhile either.

Dear Exxon Valdez Trustee Council

The oil spill effected ^{us} we are fishermen and we have been fishing for 5 years and the oil have shut down fishing for a few years.

I think the oysters should stay so some of the people could have jobs to get money so they could support there family.

Sincerely yours

Duke Anderson

The oil spill effected ~~us~~ Killing
most of our animals. And it effected
my family. how did it effect my
family? my Parents were in and
out of our house. The Year of
1989 I missed my Parents alot when
I walked down the beach I
saw thick black stuff on the
ROCKS. The oil spill effected
the environment, the comitee. The
important People.

The oil spill effected us
alot of ways. It took away
of the animals that we do
hunt. It also effected more body's
then ours. It effected the animals
the most. From then the village has
an oyster farm it helps with our
jobs and with the money. We feel
that we need the Oyster Farm for
the future kids.

DEAR EXXON VALDEZ TRUSTEE

The Oil Spill really effected
this hole village because OVER
Of the animals. Are totally gone
but I wish the stupid Oil Spill never
even happened. It is all Exxon
valdez's fault nobody nobodys
fault. but Exxons and that Hazelwood
who you guys didn't even check if he
was drinking you don't know how hard
it is in the small villages. So you got
to find out how it effected us.

Anchorage, AK. 99501

RECEIVED
DEC 08 1992

Dear Sirs:

EXXON VALDEZ OIL SPILL
TRUSTEE COUNCIL
ADMINISTRATIVE RECORD

I am a resident of the Village of Tatitlek, which is located in Prince William Sound, just four miles from Bligh Reef, where the Exxon Valdez ran aground. Our village has been impacted heavily by the oil spill both economically and culturally, and we feel that we deserve a portion of the oil spill restoration funds because our subsistence resources have been severely damaged, our commercial fishing jobs that we depend on so heavily for our annual incomes are questionable and our shellfish beds have been drastically affected.

Recently, our village began an oyster farming operation, with funding provided by the Tatitlek Mariculture Project. Our goal for this project is to make it self-sustaining, so that it may provide long term employment opportunities for our residents and to provide an alternate subsistence resource for the many resources that have been damaged by the oil spill. The Chugach Region Mariculture Project (93019) and the Bivalve Shellfish Hatchery & Research Center (93020) are essential in order for us to reach our goal of having a self-supportive project that will serve our community for generations to come.

We are also supportive of the following projects: Subsistence Restoration Project (93017), Habitat Use, Behavior, & Monitoring of Harbor Seals in Prince William Sound (93046) and the Chenega Chinook & Coho Salmon Release Program (93016)

We urge the support of the above listed projects, they mean so much to our community, both culturally and economically.

Thank you very much.

Sincerely,

Roselene Vlasoff
