Question #1: _____

Question #2: _____

Question #3: _____

Question #4: _____

Dear Trustee Council member,

I am a member of Mt. Marathon Native association and I reside in Seward. I work for the Seward Fisheries, this past year the amount of work available was very limited and I believe that it was due to a short annual run of fish possibly due to the Exxon oil spill almost 4 years ago. Being in Seward with little or no work is economically poor. I feel personally that anything that would produce more jobs in Seward would be a blessing. The Chugach Region Mariculture Project (93019) and the Bivalve Shellfish Hatchery and Research Center (93020) are very important to Seward's economy. We also support the Subsistence Restoration Project (93017) Habitat use, behavior, & monitoring of harbor seals (93046) and Chum, Chinook and Coho Salmon release Project (93016). We urge you to support our projects.

Thank you
Steven + Sharon Colcland

Question #4: _____

Om

Dear Trustee Council Member.

93325068

I am a member of the Mt. Marathon Native Association and live in the Seward area, which was affected by the oil spill both economically and culturally. I feel a portion of the Restoration money should be given to the people of the Chugach Region. and to restore the Sound. Our jobs were taken away so was our fishing. So I give my support to the Chugach Region Mariculture project. (93019) & the Bivalve shellfish Hatchery and Research center (93020) are important to us. So I support all the projects this has to offset most let's get some money going out of all this. we haven't got any \$ any sums, \$200. here \$200 here don't cut it. so let's get Exxon to pay up or go to court.

Sincerely
Leo A. Kurnak III

Dear Tunuk Council Member,

As a resident in Seward, having lived here during the oil spill and its aftermath, I am concerned about the lack of projects directed at the affected areas.

We strongly support the shellfish hatchery in Seward and would ask that extraordinary consideration be taken to find funding for this project. We also support the Subsistence restoration project, Habitat use, Behavior & Monitoring of Harbor Seals in PWS. + Chenequa Chinook & Coho Salmon Release Project.

Sincerely

Maranna & Duane Hill

93019 and 93020 very important.

Dear Trustee Council Member

I am a member of the Mt. Marathon Native Assoc. and live in Seward which was affected by the oil spill both economically and culturally. We feel a portion of the restoration money should be used to restore lost shellfish opportunities. Our subsistence foods were taken away and our fishing jobs vanished until who knows when.

The Chugach Region Mariculture Project (93019) and the Bivalve Shellfish Hatchery and Research Center (93020) are very important to us. We also support these projects: Subsistence Restoration Project (93017), Habitat use, Behavior, and Monitoring of Harbor Seals in the Prince William Sound (93046), and Chenega Chinook and Coho Salmon Release Project (93016)

We urge you to help support our projects.

Sincerely,

Mark Ronne

Mt Marathon Native Assoc.
Member

#2 Restore clams at Dog Fish and Passage Island.

93325073

November 20, 1992

Exxon Valdez Oil Spill
Public Information Center
645 G. St.
Anchorage, AK 99501

Dear Trustee Council Member,

Q#2 I am writing to you regarding some traditional subsistence area which were destroyed by the oil spill at Windy Bay. I understand there is no money available for restoration of lost resources which were affected by the oil spill. We feel nothing can replace the clam loss at Windy Bay and would like to pursue clam restoration at Dog Fish and Passage Island which is located between Port Graham and Nanwalek.

Please consider our proposal because we would like to help our village by providing job opportunities, subsistence foods and economic development to our residents. We also support the following projects: Chugach Region Mariculture Project (93019), the Bivalve Shellfish Hatchery and Research Center (93017), Habitat use, Behavior and Monitoring of Harbor Seal in Prince William Sound (93046) and Chenaga Bay Chinook and Coho Salmon Release Program (93016). (93026)

The people of the Chugach Region are all working for our projects to be self sustaining and are counting on this money to reach this point.

We urge you to help support our projects. Please, Please do!

Sincerely,

Ben Meganack Sr

Anchorage, AK 99501

Dear Trustee Council Member:

I am writing to you regarding some traditional subsistence areas which were destroyed by the Oil Spill at Windy Bay. I understand there is money available for restoration of lost resources which were affected by the oil spill. We feel nothing can replace the ~~clam~~ loss at Windy Bay and would like to pursue clam restoration at Dogfish & Passage Island which is located between Port Graham and Nanwalek. Q#2

Please consider our proposal because we would like to help our village by providing job opportunities, subsistence foods, and economic development to our residents.

We also support the following projects: Chugach Region Mariculture Project (93019), The Bivalve Shellfish Hatchery and Research Center (93020), Subsistence Restoration Project (93017), Habitat Use, Behavior, & Monitoring of Harbor Seals in Prince William Sound (93046), & Chenega Bay Chinook and Coho Salmon Release Program (93016).

The people of the Chugach Region are all working for our projects to be self-sustaining and are counting on this money to reach this point. We urge you to help support our projects.

Sincerely,

Elenore Mc Muller

Port Graham

EXXON VALDEZ OIL SPILL
PUBLIC INFORMATION CENTER
645 G STREET
ANCHORAGE, ALASKA

Dear Trustee Council Members,

I am a resident, and the Chief of the Native Village of Nanwalek. I am writing to you on behalf of the Nanwalek Traditional Council.

Since the EXXON VALDEZ OIL SPILL, we had lost our confidence of gathering our native foods, and we are trying to get back into our ways of life on the beaches surrounding us. It has been really rough for us, because of the impacts of the oil spill affecting our lives as subsistence users. The people of Nanwalek rely heavily on gathering native foods, especially in the winter months. That is when jobs are scarce, and the next place to look for food is on our beaches.

The people and the Nanwalek Traditional Council are supporting the Chugachmiut's Natural Resource Department in getting restoration funds for a possible clam reseed on Passage Island or Dog Fish Bay, where there was lots of clams. Q#2

Please consider our needs. Subsistence is very important to the people of Nanwalek.

Sincerely,

Vincent Kvasnikoff, NTC Chief.

The Governing Body
of the Native Village of:
NANWALEK

Restore clams at Dogfish Bay and Passage Island.

93325085

November 20, 1992

Dear Trustee Council members,

I am writing to you in regards to funds available to restore our subsistence foods.

I am the village chief's wife, and I am a subsistence user. I

I am in support of the Chugachmiut Natural Resource Department's proposal ~~by the~~ request on our behalf. *

Since the 1989 oil spill there has been a feeling of lost heritage, "The Way of Life", ~~Subsistence Gathering~~ ^{Natural} food. I urge you to support our subsistence life style, and consider the ~~Natural~~ Chugachmiut Natural Resources Department's Proposal. It is for us.

Sincerely,

Natacia Kwasnikoff

* Restore clams at
Dogfish Bay +
Passage Island.

Exxon Valdez Oil Spill
Public Information Center
645 G. Street
Anchorage, AK 99501

Dear Trustee Council Member,

This letter is in regards to restoring some of the traditional subsistence area that were impacted on destroyed by the Exxon Valdez Oil Spill in the Chugach Region. I understand there is money available to help restore some of the fisheries. As no amount of money can replace what has already been lost or damaged, help to restore the fisheries can help us to start enjoying and subsisting on foods that were here before. And no money can replace the pain that people has had of eating foods that was impacted by the oil spill, a man made disaster.

But by trying to restore the fisheries in our areas, maybe life will have a chance to get back to the way it was and to pass on the traditional ways once again, ways that has always been so important. Maybe in some way it will ease the pain that we all have endured. See our environment, foods and way of life changed.

This is why I support Chugachmiut, 3300 C "Street Anchorage, AK, 99503; Natural Resource Department in seeking funding from the Exxon Valdez Oil Spill Restoration Fund. The following projects are all important in restoring and building the Mariculture in the Chugach Region. The projects are as follows:

- ① Chugach Region Mariculture Project (93019) II
- ② The Bivalve Shellfish Hatchery and Research Center (93020)
- ③ Subsistence Restoration Project (93017)
- ④ I also would like to support two additional projects in our areas.

A) Clam restoration on Passage Island, Port Graham, Nauyasak, Port Clatsam, or Dogfish Bay.

B) Nauyasak ^{Salmon} Sockeye Enhancement Program.

With the support of monies from the Exxon Oil Spill Restoration Fund, we can become self sustaining as we all work together to reach this goal. We urge you to help support our projects.

Sincerely,

Carol Kvasnickoff

Dear Trustees Council Members,

I am a resident of Nanwalek, and I am writing to you in regards of supporting Chugachmunt's Natural Resource Department in obtaining restoration funds for a possible clam bed on Passage Island as in Dog Flat Bay.

Q# Since the Oil Spill I had lost confidence with gathering my native foods, I feel the same way today, but I am trying to gain it back. It is not the same anymore, but if we receive funds to plant clams, maybe my confidence will come back. This is very important, and we are relying on you for this purpose.

Please consider my letter of support, your funds will help us get some of our subsistence foods back.

Thank You,
James Krasnikoff

Dear Sirs,

I have been
hunting and fishing
all my life. I
couldn't believe the
destruction that the
Valdez Oil Spill caused
to the birds and animals
in Prince William Sound.

I hope you find
out from the letters
that we local people
are writing that we
are and were affected
by the Oil Spill more
than anyone else.

We could use this
funding from the
settlement to help the
oyster project and the

93019

93020 Bivalve Shell fish hatchery
and also for other
projects which will
directly help our village.

Thank you,
Norman A. Vlasoff

Egdon Valdez Oil Spill Trustee Council
645 G Street
Anchorage, Alaska, 99501

Dear Trustee Council Member,

I have been living
here in Tatitlek now for
13 years. I moved here
from Cordova after I
married my husband
Norman (Middy) Vlasoff.

My family are
all commercial fishermen
and I was raised to
live off the land
smoking salmon and
putting up all of Gods
bounty for people who
live here in Prince William
Sound.

I had had a
confidence in our way
of life that no urban

person living off the supermarkets of the city could understand. We have to hunt and fish and store up what we get from the land. We don't have the luxury of just running down to the store to replenish our supply. Sometimes we can't even get to town for supplies in the winter because of storms ect.

Our lives are dependent on what God provides to the hunters and their charity for the extended families here in Tatitlek and also those who no longer live here but have moved to the cities. It is a privilege to live this way of life.

I can't put into words how much the Valdez Oil Spill grieved my heart. All I can compare it to what the Jewish people must have felt to see their families die before their eyes.

Economically we are still being affected since most of our families are fishing every year all their life. Since the Oil Spill the price for pink salmon has bottomed out and some people here locally stand to loose their fishing boats. That's why this Oyster Farm Project is so important to our local economy. The Chugach Region Mariculture Project (93019)

and the Bivalve Shellfish Hatchery and Research Center (93020) are very important to us as we employ so many local people from the Alutiq Pride Oyster Farm and the people have year around jobs. The Bivalve Shellfish Hatchery is needed so we don't have to send for oyster spat from Washington and California and is good for the whole state of Alaska, besides benefitting us here in Chugach Region.

In closing I would like to Thankyou for your support of our people here in Prince William Sound. I'm sorry I didn't send my opinions in before this time but I

hope you help us
here in the village
as we are the people
who are the most
affected by the oil
spill and every thing
the oil spill has
caused here.

Sincerely
Martha Olasoff

 Anchorage, Alaska 99501

Dear Trustee Council Member;

I work for the Iñupiat Mariculture Project in Iñupiat and request that the funding for this Project be continued. We have a quality product and we're proud of our subsistence in producing it.

Because of the oil spill, we've been affected both economically & culturally. We feel that we deserve a portion of the restoration monies due to our subsistence foods having taken away and our fishing jobs gone.

The Chugach Region Mariculture Project (93019) & the Gwiner Shellfish Hatchery & Research Center (93120) are very important to us if not vital. We depend on these projects for job opportunities in our villages, because there are very few job openings. We urge you to help support these Projects.

We also support the Subsistence Restoration Project (93017) Habitat use, Behavior & Monitoring of Harbor Seals in the Gwiner Wm. Sound (93046) & Chenequa Chinook & Coho Salmon Release Program (93016).

Sincerely,

Claren Allen

NOV. 9, 1992

Dear Trustee;

I am currently a resident of
TATitlek Community

I feel our Village & the environment has been destroyed due to the Exxon Oil Spill..... Our local wild-life is slowly deteriorating..... Not to mention "Commercial fishing" which is at its lowest ever!!..... Meaning "No Jobs".

We feel we deserve a portion of the restoration money due to our shell-fish beds being destroyed, and our subsistence foods taken away.

The Chug. Reg. Mariculture Proj. (93019) and the Bivalve Shellfish Hatchery & Res. Center (93020) are very important to us. We are working for our project to be self-sustaining & are counting on this money to reach this point. We urge you to help support our project.

Sincerely,

Regina & Bob Christma

Anchorage - Al - 99501

Dear Trustee Council member.

I live here in Tatitleh for the last 20 yrs -
I was here when the oil spill happen just 5 miles away
from here = we watched what's happenin to our subsistence
foods not only to our subsistence foods but to our life
style = our commercial fishing has been destroyed our
boats have gone = we have boys that don't like school
anymore - ~~now~~ so our people are suffering from that
oil spill = all our young people that want to make
their homes here = can't because they can't make a living.
We're trying to build some thing here for the future
The mariculture is very important to our future

93019

Sincerely
Doris Kump Hoff

93019 + 93020 very important

Nov 9th, 1992

Dear Trustee Council

I am an elder in the village of Tatitlek and our village was heavily impacted by the Oil Spill, both economically & culturally. We feel we deserve a portion of the restoration money due to our shellfish beds being destroyed, subsistence foods taken away, and our fishing jobs vanishing until who knows when.

The Chugach Region Mariculture Project (93019) & The Bivalve Shellfish Hatchery & Research Center (93020) are very important to us. There are very few jobs & these projects present job opportunities for our village. Further, the oysters are nutritious & give us a taste of some of our subsistence foods which were lost due to the oil spill.

We are working for our project to be self-sustaining & are counting on this money to reach this point. We urge you to help support our projects.

Sincerely,
Edward J. Megoroff

93325096
(TatHeK)

Nov. 9, 1992

Dear Trustee Council Member

I am writing this letter on concerns for the oyster projects we are doing in Tatitlek. If we don't get the help from the oil spill money we may not make it. Being as the spill effected our resource of food we need something to make up for it. We need the jobs for the community to put food on the table and clothes on our kids.

The Ghugach Region Mariculture Project (93019) and the Bivalve Shellfish Hatchery and Research Center (93020) are very important to us. There are very few jobs and these projects present job opportunities for our village. Further the oysters are nutritious and give us a taste of some of our subsistence foods which were lost due to the oil spill.

We are working for our project to be self-sustaining and are counting on this money to reach this point. We urge you to help support our project.

We also support these projects Subsistence Restoration Project (93017) Habitat use, Behavior & Monitoring of Harbor Seals in Prince William Sound (93046) & Chenega Chinook & Coho Salmon Release Program (93016)

Sincerely
Elizabeth A Hunt

Dear Trustee Council Member:

Since my family was relocated to Tatitlek after the "64" earthquake, I've lived here and worked on parttime jobs. I am currently working for the Tatitlek Mariculture Project. In order for us to make this project successful - we need help with funding.

The Valdez Oil Spill has made a definite impact on us economically and culturally. It all but wiped out our fishing industry and other seafoods that we subsist on. We feel that you can allot us a portion of your restoration money in order to keep our aquaculture project going fulltime.

93019

#2 Need jobs for villiage.

93325101
(Tatitlek)

Dear Exxon Valdez trustee Council...

Since the Exxon oil spill there was less fish with less fish than
was less jobs, since ⁹³⁰¹⁹ mariculture there was more jobs for
more villages, more villages have more money. The oil spill
hurt us ~~and~~ in subsistence fishing. Jobs we ate cereal
a lot from Exxon but thanks for providing food for us
It killed a lot of animals. Are village needs jobs.

Sincerely

Arthur Kompkoff

93019 - oyster project will eventually
help fund college.

And

Dear Exxon Valdez trustee council the oil spill has effected my life and others around me. My life has changed in many ways, the wild life isn't like it was. the deer and here like they were six years ago and the fish even the birds aren't here like they were then.

I support the Chugach Region village mariculture project because I will need money for college and lots of other things.

#2 would like help for the environment and the village.

93325/04
(Tatitlek)

Q#2 Dear Exxon Trustee Council
we would like your help on
what the oil spill had done
to the environment and or village
it killed all the animals like
fish when the oil spill happened their
was a poor fishing year when that
happened and the prices of fish dropped
and the boats all of down here they
could not even pay off their bills for
the summer. and it killed off many
sources of animals like sea otter,
seal, sea lion, ducks, geese,
seagulls, and I hardly see these
animals around I see some of them
but not all of them, so we would
like your help and the village would
like it to.

Thank's
Allen

The oil spill affected Tatitlek because it killed the animals
they eat.

93325/06
(Tatitlek)

Dear Exxon Valdez Trustee Council,

I think the Exxon oil spill effected us by killing all the animals that we eat. I think thats the only way it effected us because the Island was blocking the oil from coming into our village. And the wind blew it into Chenega. But when it hit Chenega it effected them from going swimming and they weren't able to eat any sea food for awhile either.

★ The oil spill affected the environment and her family.

93325108
(TatHeK)

Dear EXXON Valdez TrustEE Council, 11-

The oil spill effected us by Killi
most of our animals. And it effected
my family. Now did it effect my
family? my Parents were in and
out of our house. The Year of
1989 I missed my Parents alot wh-
d walked down the beach and
saw thick black stuff on the
ROCKS. the oil spill effected
the environment, the comitee. The
important people.

93325112
(tatitlek)

Dear Exxon Valdez Trustee Council,

NOV. 9, 1992

The oilspill effected us by killing most of our animals. We weren't able to eat sea, otters, clams, cockles and other animals from the sea. It effected our parents alot. My parents were always being called out. How it effected our community by too many people from all over came to interview us. We didn't like it very much.

Dear Trustee Council.

cause of the oil spill we couldn't go swimming.

and we couldn't go skiff riding.

and it killed all the animals.

no more fishing jobs.

and no more seafoods.

and no more hunting.

Dear Trustee Council

Because of the oil spill there was no sea food. Lots of are parents had to go away. And we had to stay with different people. We could not swimming. We could not eat animals. No skifrideing. It lost lots of jobs. Nobody could go hunting. I'm in 3rd grade. We support the oyster farming project.

November 9, 1992

Exxon Valdez Oil Spill Settlement Trustee Council
645 G Street
Anchorage, AK. 99501

Dear Sirs:

I am a resident of the Village of Tatitlek, which is located in Prince William Sound, just four miles from Bligh Reef, where the Exxon Valdez ran aground. Our village has been impacted heavily by the oil spill both economically and culturally, and we feel that we deserve a portion of the oil spill restoration funds because our subsistence resources have been severely damaged, our commercial fishing jobs that we depend on so heavily for our annual incomes are questionable and our shellfish beds have been drastically affected.

Recently, our village began an oyster farming operation, with funding provided by the Tatitlek Mariculture Project. Our goal for this project is to make it self-sustaining, so that it may provide long term employment opportunities for our residents and to provide an alternate subsistence resource for the many resources that have been damaged by the oil spill. The Chugach Region Mariculture Project (93019) and the Bivalve Shellfish Hatchery & Research Center (93020) are essential in order for us to reach our goal of having a self-supportive project that will serve our community for generations to come.

We are also supportive of the following projects: Subsistence Restoration Project (93017), Habitat Use, Behavior, & Monitoring of Harbor Seals in Prince William Sound (93046) and the Chenega Chinook & Coho Salmon Release Program (93016).

We urge the support of the above listed projects, they mean so much to our community, both culturally and economically.

Thank you very much.

Sincerely,

Roselene Vlasoff

Anchorage, AK. 99501

Dear Sirs:

I am a resident of the Village of Tatitlek, which is located in Prince William Sound, just four miles from Bligh Reef, where the Exxon Valdez ran aground. Our village has been impacted heavily by the oil spill both economically and culturally, and we feel that we deserve a portion of the oil spill restoration funds because our subsistence resources have been severely damaged, our commercial fishing jobs that we depend on so heavily for our annual incomes are questionable and our shellfish beds have been drastically affected.

Recently, our village began an oyster farming operation, with funding provided by the Tatitlek Mariculture Project. Our goal for this project is to make it self-sustaining, so that it may provide long term employment and nutrition for the community and to provide an alternative resource for the many resources that have been damaged by the oil spill. The Chugach Region Mariculture Project (93019) and the Bivalve Shellfish Hatchery & Research Center (93020) are essential in order for us to reach our goal of having a self-supportive project that will serve our community for generations to come.

We are also supportive of the following projects: Subsistence Restoration Project (93017), Habitat Use, Behavior, & Monitoring of Harbor Seals in Prince William Sound (93046) and the Chenega Chinook & Coho Salmon Release Program (93016).

We urge the support of the above listed projects, they mean so much to our community, both culturally and economically.

Thank you very much.

Sincerely,

Kenneth W. Delanoff

Anchorage, AK. 99501

Dear Sirs:

I live and work in the Village of Tatitlek in Prince William Sound, just four miles from Bligh Reef, where the Exxon Valdez ran aground. Our village has been impacted by the oil spill both economically and culturally. We feel very strongly that we are entitled to a portion of the oil spill restoration funds due to our subsistence resources being severely impacted, our commercial fishing jobs (that we depend on heavily for our annual incomes) being questionable indefinitely, and our shellfish beds being drastically affected.

I am an employee of the Tatitlek Mariculture Project and would like funding for this project to be continued. Our goal for this project is to make it self-sustaining so that it may provide long term employment opportunities in our village, and to provide an alternate subsistence resource for the resources that have been damaged by the oil spill. Funding of the Chugach Region Mariculture Project (93019) and the Bivalve Shellfish Hatchery & Research Center (93020) is: essential for us to reach this goal.

Please support the funding of the Chugach Region Mariculture Project and the Bivalve Shellfish Hatchery & Research Center Project, they mean very much to our village.

We also support the Subsistence Restoration Project (93017), the Habitat Use, Behavior, & Monitoring of Harbor Seals in FWS (93046) and the Chenega Chinook and Coho Salmon Release Program (93016).

Thank you very much.

Sincerely,

Brian Zacher

Dear Sirs:

I live and work in the Village of Tatitlek in Prince William Sound, just four miles from Bligh Reef, where the Exxon Valdez ran aground. Our village has been impacted by the oil spill both economically and culturally. We feel very strongly that we are entitled to a portion of the oil spill restoration funds due to our subsistence resources being severely impacted, our commercial fishing jobs (that we depend on heavily for our annual incomes) being questionable indefinitely, and our shellfish beds being drastically affected.

I am an employee of the Tatitlek Mariculture Project and would like funding for this project to be continued. Our goal for this project is to make it self-sustaining so that it may provide long term employment opportunities in our village, and to provide an alternate subsistence resource for the resources that have been damaged by the oil spill. Funding of the Chugach Region Mariculture Project (93019) and the Bivalve Shellfish Hatchery & Research Center (93020) is essential for us to reach this goal.

Please support the funding of the Chugach Region Mariculture Project and the Bivalve Shellfish Hatchery & Research Center Project, they mean very much to our village.

We also support the Subsistence Restoration Project (93017), the Habitat Use, Behavior, & Monitoring of Harbor Seals in FWS (93046) and the Chenega Chinook and Coho Salmon Release Program (93016).

Thank you very much.

Sincerely,
Maxine Totenoff

Dear Sirs:

I am a resident of the Village of Tatitlek, which is located in Prince William Sound, just four miles from Bligh Reef, where the Exxon Valdez ran aground. Our village has been impacted heavily by the oil spill both economically and culturally, and we feel that we deserve a portion of the oil spill restoration funds because our subsistence resources have been severely damaged, our commercial fishing jobs that we depend on so heavily for our annual incomes are questionable and our shellfish beds have been drastically affected.

Recently, our village began an oyster farming operation, with funding provided by the Tatitlek Mariculture Project. Our goal for this project is to make it self-sustaining, so that it may provide long term employment opportunities for our residents and to provide an alternate subsistence resource for the many resources that have been damaged by the oil spill. The Chugach Region Mariculture Project (93019) and the Bivalve Shellfish Hatchery & Research Center (93020) are essential in order for us to reach our goal of having a self-supportive project that will serve our community for generations to come.

We are also supportive of the following projects: Subsistence Restoration Project (93017), Habitat Use, Behavior, & Monitoring of Harbor Seals in Prince William Sound (93046) and the Chenega Chinook & Coho Salmon Release Program (93016).

We urge the support of the above listed projects, they mean so much to our community, both culturally and economically.

Thank you very much.

Sincerely,

David Totemoff Jr.
