EXXON VALDEZ OIL SPILL
TRUSTEE COUNCIL
ADMINISTRATIVE RECORD

Dear Trustee Council Member,

I am writing to you regarding some traditional subsistence area which were destroyed by the oil spill at Windy Bay. I understand there is no money available for restoration of lost resources which were affected by the oil spill. We feel nothing can replace the clam loss at Windy Bay and would like to pursue clam restoration at Dog Fish and Passage Island which is located between Port Graham and Nanwalek.

Please consider our proposal because we would like to help our village by providing job opportunities, subsistence foods and economic development to our residents. We also support the following projects: Chugach Region Mariculture Project (93019) the Bivalve Shellfish Hatchery and Research Center (93017) Habitat use, Behavior and Monitoring of Harbor Seal in Prince William Sound (93046) and Chenaga Bay Chinook and Coho Salmon Release Program (93016).

The people of the Chugach Region are all working for our projects to be self sustaining and are counting on this money to reach this point.

We urge you to help support our projects. Please, Please do!

Sincerely,

Steve A. Anahonak

PUBLIC INFORMATION CENTER
645 G STREET
ANCHORAGE, ALASKA

Dear Trustee Council Members,

I am a resident, and the Chief of the Native Village of Nanwalek. I am writing to you on behalf of the Nanwalek Traditional Council.

Since the EXXON VALDEZ OIL SPILL, we had lost our confidence of gathering our native foods, and we are trying to get back into our ways of life on the beaches surrounding us. It has been really rough for us, because of the impacts of the oil spill affecting our lives as subsistence users. The people of Nanwalek rely heavily on gathering native foods, especially in the winter months. That is when jobs are scarce, and the next place to look for food is on our beaches.

The people and the Nanwalek Traditional Council are supporting the Chugachmiut's Natural Resource Department in getting restoration funds for a possible clam reseed on Passage Island or Dog Fish Bay, where there was lots of clams.

Please consider our needs. Subsistence is very important to the people of Nanwalek.

Sincerely,

Vincent Kvasnikoff, NTC Chief.

EXXON VALDEZ OIL SPILL
JURIST COUNCIL
ADMINISTRATIVE RECORD

Dear Trustee Council Member,

This letter is in regards to restoring some of the traditional subsistence area that were impacted on destroyed by the Exxon Valdez Oil Spill in the Chugach Region. I understand there is monies available to help restore some of the fisheries. As no amount of money can replace what has already been lost or damaged, help to restore the fisheries can help us to start enjoying and subsisting on foods that were here before. And no money can replace the fear that people has had of eating foods that was impacted by the oil spill, a manmade disaster.

But by trying to restore the fisheries in our areas, maybe life will have a chance to get back to the way it was and to pass on the traditional ways once again, ways that has always been so important. Maybe in some way it will ease the pain that we all have endured see our environment, foods and way of life changed.

Carol Kvasnickoff
P.O. Box 8006
Nauyasak, AK 99603

This is why I support Chugachmint, 3300 C "Street Anchorage AK, 99503; Natural Resource Department in seeking funding from the Exxon Valdez Oil Spill Restoration Fund. The following projects are all important in restoring and building the mariculture in the Chugach Region. The projects are as follows: 1:

- ① Chugach Region Mariculture Project (93019), II
- ② The Bivalve Shellfish Hatchery and Research Center (93020)
- ③ Subsistence Restoration Project (93017)
- ④ I also would like to support two additional projects in our areas.

(A) Clam restoration on Passage Island, Port Graham, Nauyasak, Port Chatham, or Dagfish Bay.

(B) Nauyasak ^{Salmon} Seakey Enhancement Program.

With the support of monies from the Exxon Oil Spill Restoration Fund, we can become self sustaining as we all work together to reach this goal. We urge you to help support our projects.

Sincerely,

Carol Kvasnickoff

VALDEZ OIL SPILL
JOYCE COUNCIL
ADMINISTRATIVE RECORD

Dear Sirs,

I have been hunting and fishing all my life. I couldn't believe the destruction that the Valdez Oil Spill caused to the birds and animals in Prince William Sound.

I hope you find out from the letters that we local people are writing that we are and were affected by the Oil Spill more than anyone else.

We could use this funding from the settlement to help the Oyster project and the

Bivalve Shell fish hatchery
and also for other
projects which will
directly help our village.

Thank you,
Thomas F. Vlasoff

Eppon Valdez Oil Spill Trustee Council
645 G Street

Anchorage, Alaska, 99501

Dear Trustee Council Member,

I have been living here in Tatitlek now for 13 years. I moved here from Cordova after I married my husband Norman (Middy) Vlasoff.

My family are all commercial fishermen and I was raised to live off the land smoking salmon and putting up all of Gods bounty for people who live here in Prince William Sound.

I had had a confidence in our way of life that no urban

person living off the
supermarkets of the
city could under-
stand. We have to
hunt and fish and
store up what we get
from the land. We
don't have the luxury
of just running down
to the store to replenish
our supply. Sometimes
we can't even get to
town for supplies in
the winter because of
storms ect.

Our lives are dependent
on what God provides to
the hunters and their
charity for the extended
families here in Tatitlek
and also those who
no longer live here but
have moved to the cities.
It is a privilege to live
this way of life.

I can't put into words how much the Valdez Oil Spill grieved my heart. All I can compare it to what the Jewish people must have felt to see their families die before their eyes.

Economically we are still being affected since most of our families are fishing every year all their life. Since the Oil Spill the price for pink salmon has bottomed out and some people here locally stand to loose their fishing boats. That's why this Oyster Farm Project is so important to our local economy. The Chugach Region Mariculture Project (93019)

and the Bivalve Shellfish Hatchery and Research Center (93020) are very important to us as we employ so many local people from the Alutiq Pride Oyster Farm and the people have year around jobs. The Bivalve Shellfish Hatchery is needed so we don't have to send for oyster spat from Washington and California and is good for the whole state of Alaska, besides benefitting us here in Chugach Region.

In closing I would like to Thankyou for your support of othr people here in Prince William Sound. I'm sorry I didn't send my opinions in before the time but I

hope you help us
here in the village
as we are the people
who are the most
affected by the oil
spill and every thing
the oil spill has
caused here.

Sincerely
Martha Vlasoff

Dear Trustee Council Members;

I work for the Littleh Mariculture Project in Littleh and request that the funding for this project be continued. We have a quality product and we're proud of our endeavors in producing it.

Because of the oil spill, we've been affected both economically & culturally. We feel that we deserve a portion of the restoration monies due to our subsistence foods being taken away and our fishing jobs gone.

The Chugach Region Mariculture Project (93019) & the Bristol Bay Shellfish Harvesting & Research Center (93120) are very important to us if not vital. We depend on these projects for job opportunities in our villages, because there are very few job openings. We urge you to help support these projects.

We also support the Subsistence Restoration project (93017). Habitat use, Behavior & Monitoring of Harbor Seals in the Prince of Wales Sound (93046) & Chukotka Chinook & Coho Salmon Release Program (93016).

Sincerely,
