MASTERWORK TECHNICAL WRITING AND PUBLISHING CAPABILITIES

MASTERWORK TECHNICAL SPECIALIZES in the production of a wide range of technical documents including:

- Operating and Maintenance Manuals
- Impact Statements
- Safety Manuals
- Project Plans
- Training Manuals
- Grant Applications
- Drawings and diagrams on CAD
- Informations Systems and Networks
- Reports

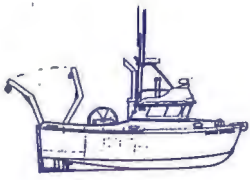

SERVICES

- Vessel Surveys
- Marine Damage Assessments
- Restoration of Mechanical Antiques
- Marine Charters
 - Science
 - Salvage
 - Exploration
- Engineering Models and Prototypes

MASTERWORK TECHNICAL has the CAPACITY to produce documents in any popular word processing and/or desk top publishing program. Masterwork can produce drawings in Auto Cad and has the capacity to scan existing hard copy. Masterwork staff can program and manage data base systems. Masterwork staff members have notebook/laptop computers and can work in the field, in the clients facilities or in the Masterwork office in Eagle River. Masterwork will produce final documents in hard copy and/or electronic media.

MASTERWORK TECHNICAL STAFF have academic training in several disciplines and have crossed trained in computer skills and technical writing. The college disciplines include: Marine Sciences, Engineering, English, Education, and Biology. Masterwork Staff are experienced researchers. One of our staff members is the best proof reader and document layout person in the area. Masterwork is very experienced at tailoring documents for the needs of the final user and working with clients to develop document programs. Masterwork is accustomed to working with firm deadlines and budgets.
