EARTHTRUST™

Restoration Planning Working Group,
437E St., Suite 301,
Anchorage, AK 99501.

25th February 1991

Dear Sir/Madame,

I am writing as the Communications Coordinator for Earthtrust's Gulf Wildlife Campaign. Earthtrust is committed to assisting in whatever way possible in the rescue of marine animals effected by the destruction in the Gulf.

In the winter issue of Earth Island Journal I read an article by Bruce Goldstein titled: "The Folly of the Exxon Valdez Cleanup". This article addresses what to do to clean up oilspills and what not to do. It seems that an unfortunate aspect of human nature is that we don't readily learn from our (many) mistakes. At Earthtrust we know it's important to listen to the people who have had direct experience dealing with the aftermath of oilspills so that we can learn from that experience and do the best we can in a difficult situation.

We have a team of field representatives in the Gulf at present working with the authorities to assess the situation. Any information or contacts, you can give us would be very helpful. Please keep in touch and keep up the good work.

Yours sincerely,

Susan Somerville

Oil Spill Restoration Planning Office
437 E. St., Suite 301
Anchorage, AK 99501

Dear Sir/Madame:

I am sorry it has taken so long to get around to acknowledging your recent mailing of the notice of the draft 1991 Restoration Work Plan from the Federal Register. We do appreciate having it. I would also like to take this opportunity to let you know that anything that your office puts out in the future would be much appreciated by our patrons.

Thank you for your consideration.

Sincerely,

Andrew F. Johnson
State and Local Documents Librarian

Dear Herb:

I was pleased that we found the opportunity to discuss our new responsibilities and activities with respect to the EXXON Valdez oil spill, and I look forward to future interactions. I think it would be an excellent idea, when you have time, to meet with our interagency working group. We meet routinely every two weeks in Anchorage at our office located at 437 E Street (Suite 301). Give me a call when you anticipate being in Anchorage and I will arrange a convenient time for us to meet.

Please find enclosed several documents that review both past and proposed future restoration activities. The "pink" document presents both the 1991 plan for damage assessment as well as restoration. The March 1st Federal Register Notice, however, covers the proposed 1991 restoration plans in more detail. The 1990 Progress report provides more of the "philosophy" of restoration but also summarizes the first year of RPWG activities.

Yours very truly,

John A. Strand,
Restoration Manager

Mr. Stan Senner
Oil Spill Restoration
Working Group
Box 101193
Anchorage, AK 99510

817 Orleans Drive
Grand Island, NE 68803
April 14, 1991

Dear Mr. Senner:

I am doing a report on the EXXON Valdez Oil Spill for my 4th grade reading class. I would appreciate some information on the impacts of the oil spill on wildlife and the environment of Prince William Sound. I am especially interested in any facts and figures you might have about how large the oil spill was (how many gallons were spilled), how many marine animals and birds died, and other similar information. I recently heard that the EXXON corporation was fined a large sum of money for what they did to the environment. Do you have any information on the fine and also how the money will be spent to try to repair the environment?

Do you know if any articles have been published in magazines that have color pictures of the oil spill? If so I would appreciate a copy of these articles.

The deadline for my report is April 26, 1991, so any information you could send me before the deadline would be appreciated very much.

Thank you so much for your offer to help me.

Sincerely yours,

Elizabeth Fontanez

Dear Concerned Citizen:

Based on your past interest in the planning of restoration following the Exxon Valdez Oil Spill, we are enclosing, for your information, a copy of this recent notice announcing a draft 1991 Restoration Work Plan. The Restoration Planning Work Group is interested in your continued input in this process and look forward to receiving your comments. On behalf of the Work Group, we appreciate your interest.

DEPARTMENT OF FISH AND GAME

Dear Governor's Office,

I am a graduate student in the Marine Affairs Department of the University of Rhode Island, a resident of Valdez, Alaska and a property owner in Prince William Sound. I read with interest a recent article in the New York Times in which it was mentioned that Governor Hickel intends to promote the creation of a national marine sanctuary in Prince William Sound. I heartily support this idea, and intend to write a paper on the subject for one of my courses.

I would appreciate any information you could give me on the current efforts of the Governor's office to effect this project.

Sincerely,

Vince Kelly

RE: Notice of intent to prepare restoration work plan for Prince William
Sound and the Gulf of Alaska

Dear Mr. Senner:

Please forward to us upon your receipt one copy of the long-term restoration plan and the 1991 work season program for areas in Prince William Sound and the Gulf of Alaska that remain contaminated with oil from the Exxon Valdez spill.

If you should have any questions, or need any additional information, please contact my Secretary, Susan Booth, at (415) 935-9920.

Thank you in advance for your cooperation.

Sincerely,

ENTRIX, INC.

Anchorage, AK 99501

Dear Brian and Sandy:

Thank you for attending our meeting on Wednesday, December 12th and updating us on restoration events to come.

I have attached a list of all the CRRC members so that they may each receive a copy of the draft report of the 1991 Restoration Work Plan that you indicated would be out in January. If it is easier to send all the copies to me, I can distribute them to the members.

After we have had a chance to review the report, we would very much welcome the opportunity to have you attend our next CRRC meeting in early February and discuss the projects with you.

Sincerely,

Tasha Chmielewski,
Natural Resources Planner

SUBJECT: Referral of Public Inquiries

FROM: Director
Public Information Center, PM 211B

TO: Robert Burd, Deputy Regional
Administrator, Region 10, Seattle, WA 98101

We are forwarding the attached inquiries to your office for appropriate action. These inquiries cannot be processed by the Public Information Center (PIC) because we do not have appropriate materials with which to respond. We would be happy to work with you to develop a form letter so that PIC can respond to similar inquiries in the future. If you are unable to respond to these inquiries, please send them on to the appropriate person or return them to us.

If you have any questions or concerns about this referral or about PIC, please call me at (8) 475-7751. Thank you for your help.

United States Environmental Protection Agency
Restoration Planning Work Group
Washington, D.C. 20460

Dear Working Group:

This letter refers to the August 1990 Progress Report, "Restoration Planning Following the Exxon Valdez Oil Spill." I refer especially to page six, "Definition of Restoration."

I realize that the definitions are given in the law. Nonetheless, they contain at least one logical flaw and since that particular flaw, which I wish to discuss here, affects the success of recovery efforts, it is well that the flaw be widely understood. To compensate for the flaw, different values could be attached to the three "restoration" actions: 1) direct restoration, 2) replacement, 3) acquisition of equivalent resources.

The third "restoration" action, acquisition of equivalent resources, is the one I wish to address. This would be a logical restoration action if several to many assumptions are met. One would be that there is an infinite supply of the equivalent resources. This is obviously not a valid assumption. Another might be, "if you are practical," there is more of the equivalent resource than the world needs. That implies a value judgment that cannot be supported by fact. In light of our increasing recognition of the global impacts of local events and of Gaia related events, such an assumption is highly suspect.

In sum, acquisition of equivalent resources does nothing to restore. All it does is, hopefully, reduce the rate of loss of those resources elsewhere in the future. That is useful, but it only slows the downward conservation spiral and it is not restoration. It's time to stop pretending that it is.

Therefore, I suggest that for the purpose of deciding an appropriate action, multipliers be given to the three "restoration" actions. I further suggest that acquisition of equivalent resources be given a multiplier approaching zero.

United States Environmental Protection Agency

Page 2

October 18, 1990

The argument against this develops when almost nothing can be done to help "nature" restore the oil affected areas and organisms anyhow, so in the long run we will save more by using the money to protect other areas against similar insults. If that proves to be true, a depressing but real possibility, then I would agree; but it certainly could not be restoration and it should not be advertised as restoration to the public.

As a final comment, the multiplier for replacement should be smaller than that for direct restoration: you do replacement if direct restoration won't work or is extremely expensive.

I realize that I may be saying things you already know, but I hope the suggestion for the use of multipliers will open a way to stay within the law while doing a better job of real restoration.

Thank you for the opportunity for input and my congratulations for the way you have been seeking and interpreting public comment.

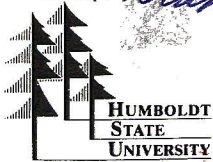

Sincerely yours,

A handwritten signature in blue ink, reading "Archie S. Mossman". The signature is fluid and cursive, with the first name "Archie" being more prominent.

INTELLIGENCE REPORT

FROM THE DESK OF: Karen Fine Coburn, Publisher

DB - 12/24

MAILED - 12/27

Dear Colleague,

For thirteen years, oil spill professionals in more than fifty different countries around the globe have been relying on the **Oil Spill Intelligence Report** for timely, exclusive, international coverage of oil spill events and developments.

Why?

Because in a field where timely response is everything, professionals like yourself cannot afford anything less than weekly, detailed, on-scene reports.

That's why we now offer **Oil Spill Intelligence Report** by fax and why we provide you with the

please continue . . .

OSIR Hotline.

And it's the reason we spend the bulk of every subscription dollar we receive from you on communications -- on the phone calls, faxes, telexes and wire services necessary to track the news worldwide. Day and night our reporters are busy contacting our network of spill experts and reporters worldwide to bring you the latest news and follow-ups of spills and spill developments.

When an oil spill strikes, The Wall Street Journal, The New York Times, The Times of London, CBS News, Time Magazine, ABC News, US News & World Report, Cable News Network, Toronto Globe and Mail, The Washington Post, USA Today, The Economist, National Public Radio, and -- most important -- the oil spill community worldwide turn to the **Oil Spill Intelligence Report** for the latest news, details and analysis.

We also provide you with in-depth Special Reports, the Oil Spill Control Directory, and special supplements on key issues -- all free as part of your subscription -- to give you comprehensive information on the tougher problems and issues facing the oil spill community,

Although the oil spill prevention and control field has advanced, many challenges remain. We want to help you meet these challenges and we're sure we can. In fact, if you are not completely satisfied with the **Oil Spill Intelligence Report**, we will give you a complete refund on your subscription, no questions asked.

So please, return the offer form today and put us to the test. The **Oil Spill Intelligence Report** has assisted spill professionals worldwide for more than a decade. It's time we began serving you.

Sincerely,

Karen Fine Coburn

Publisher and Founding Editor

Oil Spill Intelligence Report

oil spill INTELLIGENCE[®] REPORT

An International Newsletter from Cutter Information Corp. Published Weekly Since 1978.

Weekly, International Information To Put You At The Forefront Of Spill Response

Dear Oil Spill Professional,

When incidents like the Exxon Valdez spill strike, your very specialized job requires more information than most sources can provide. **You need details** — the **most up-to-date** oil spill news and information.

How can you gain access to the kind of detail you need — and **only** the detail important to you as an oil spill prevention/control/cleanup professional? — through the *Oil Spill Intelligence Report*. Weekly issues report every major oil spill in the world — the origin, cleanup and control efforts, plus what went right and what wrong in the contingency response.

More important, our global network of spill experts and skilled reporters follows each spill event from beginning to end including environmental impacts and damage assessment ... no matter how long it takes.

As a subscriber, you will have instant access to this exclusive information. And, spill reports are only the beginning. Since 1978 the *Oil Spill Intelligence Report* has been known for its timely and comprehensive coverage of worldwide developments in contingency planning, spill legislation, regulation, litigation, scientific research, cleanup and control, contracts, and conferences and publications.

This is information unavailable elsewhere.

Exclusive information ... provided by our on-the-scene contacts worldwide. It is relied on by executives in government and the private sector — spill response coordinators, emergency response personnel, environmental affairs officers, coast guard officers, oil company executives, tanker owners, cleanup equipment manufacturers, salvage operators, shipping and barge companies, marine insurers, attorneys, and national and international regulatory, research and advisory groups ... **in more than fifty nations around the world.**

Regardless of what your specialty might be in the field of oil spills, the *Oil Spill Intelligence Report* is the **only** international news source you can use at once to make

please continue

smart decisions based upon reliable, up-to-the-minute information.

Here, just as an example, is the kind of coverage you will receive in issues of the weekly, international *Oil Spill Intelligence Report*:

- ✓ **Every Major Oil Spill Worldwide.** Cause, location, date, time ... amount of oil, grade, total potential spillage ... cleanup procedures underway ... vessels involved, registry, ownership ... environmental impacts ... resulting litigation and claims.
- ✓ **Litigation.** Notice of important investigations and public hearings. Updates on liability claims, court actions and insurance settlements.
- ✓ **Legislation, New Regulations.** Worldwide coverage of international and U.S. spill legislation. Advance alerts, analysis and interpretation of new protocols. News of regulations as they happen — actions affecting your plans and decisions.
- ✓ **Spill Control and Prevention: Equipment and Services.** New methods and products for recovery/disposal of oil ... spill detection programs ... results of operational tests.
- ✓ **Scientific Research.** News of current research, results and funding.
- ✓ **Contingency Planning and Spill Response.** Which regions are planning major capital outlays for control, recovery, and prevention systems. New plans — how they work, factors relative to timing and location of sites.
- ✓ **Calendar of Spill Conferences, Seminars, Workshops, Publications.** Advance notice of meetings worldwide including dates, sponsors, program synopsis, registration details. Complete international listings of recent publications — content summaries, and details on where to obtain copies.

All of these subjects — plus more — will be tracked and reported to you instantly in issues of the weekly *Oil Spill Intelligence Report*. *Oil Spill Intelligence Report's* editorial team is backed by a global network of on-scene contacts who track down the news worldwide to inform you of developments ... as they happen — fast news and analysis you can use at once to meet the demands of every spill development.

What's more, as part of your subscription you will receive special bulletins on late-breaking developments, supplements on important topics, access to the *Oil Spill Intelligence*

Report Document Service, free copies of the annual summary of oil spill statistics, and the annual *International Oil Spill Control Directory*, plus the *OSIR Hotline* — direct access to the editorial staff of the *Oil Spill Intelligence Report* to help you with your individual information needs and to answer questions.

Each week, delivered to your desk, you will receive accurate, timely, objective oil spill information from around the world. Authoritative reports you can use right away, to help you and your organization ...

- ✓ avoid and prevent oil spills and losses
- ✓ respond faster and more effectively to spills when they occur
- ✓ minimize cleanup costs and environmental damage
- ✓ protect your organization's reputation
- ✓ take advantage of the latest developments in spill cleanup and control products and services
- ✓ avoid non-compliance fines and costly damage suits
- ✓ keep abreast of spills around the world as they happen, where your products and expertise may be required
- ✓ get advance notice of trends and changes in regulations and international liability protocols
- ✓ stay abreast of litigation developments and legal precedents

... and more.

How can you tap into this international oil spill source? By subscribing to the *Oil Spill Intelligence Report* newsletter.

SPECIAL INTRODUCTORY OFFER

You can begin receiving the weekly *Oil Spill Intelligence Report* right away. **Just**

please continue

complete and mail the enclosed Order Coupon today.

The day we receive your request, we'll sign you up for a subscription to the *Oil Spill Intelligence Report*. Plus, for responding now, we'll send you a free copy of *The International Oil Spill Control Directory*.

Examine the first 4 issues at your convenience. If, after 4 weeks, you are satisfied with the *Oil Spill Intelligence Report*, pay the invoice we'll send you and you'll get forty-eight more issues. Otherwise, return the invoice marked "cancel," you will owe nothing, and the *Directory* is yours to keep.

Sincerely,

K. F. Coburn
Publisher

P.S. Enclose payment with your order and we'll send you a **second** free report — the *Exxon Valdez Oil Spill* (normally sold for \$67). Prepared by the US National Response Team, this report includes: description of the incident and followup; which methods are recommended for similar spills; how the Valdez spill changed our understanding of cleanup techniques; what steps your organization can take to avoid similar problems; and much more.

oil spill

INTELLIGENCE[®] REPORT

Cold Water Oil Spills ...

A Look at Oil Spill Cooperatives Worldwide ...

Exxon Valdez One Year Later ...

Bioremediation ...

Conference, Course and Seminar Planner ...

Contingency Planning: A Global Perspective ...

Over the last year the ***Oil Spill Intelligence Report*** has produced a continuous stream of special reports and focus pieces on topics of vital importance to spill professionals -- information subscribers were able to use immediately.

Right now ***OSIR's*** research team is hard at work on future specials, including: The Debate Over Tanker Construction ... New Regulations, Legislation and P&I Clubs ... Offshore Oil Facilities ... Dispersants Re-Evaluated ... Spills Due to Natural Disasters ... USSR Spill Contingency Planning and Response .. just to name a few.

In addition, the 1991 Oil Spill Control Directory is currently being researched, and promises to be the most comprehensive product and service directory to date. As a subscriber you will receive all of these valuable resources, free.

Spill professionals worldwide rely on these reports, along with their weekly issues of the ***Oil Spill Intelligence Report***, for the details their jobs demand. They tell us the ***Oil Spill Intelligence Report*** is the only reliable source of timely, global spill information. Here's what several of them have to say about the international ***Oil Spill Intelligence Report*** ...

"My colleagues and I have relied on the ***Oil Spill Intelligence Report*** for accurate, detailed oil spill information for over ten years. It's the best source of international spill reports available."

James N. Butler

*Professor of Applied Chemistry, Harvard University
Chairman, NRC Committee on Effectiveness of Oil Spill Dispersants
President, The Bermuda Biological Station
Cambridge, MA, USA*

"The ***Oil Spill Intelligence Report*** is the only publication that keeps us up-to-date on oil spill incidents and the circumstances surrounding their occurrence. It also ensures we stay current on developments in the oil spill world, such as conferences, publications, and equipment."

Donald Brodie

*Technical Advisor, Marine Pollution
Dept. of Transport & Communications
Canberra, Australia*

"The National Spill Control School has subscribed to the ***Oil Spill Intelligence Report*** since its earliest days. We look to ***OSIR*** to provide us with up-to-date information on oil spill activities throughout the world. Because we have students from around the globe, we must keep current on both domestic and international events. We will be depending on you in the future. Keep up the good work!"

George R. Oberholtzer

*Former Director
National Spill Control School
Corpus Christi, TX, USA*

"Your service is invaluable to companies such as ours. I appreciate receiving the weekly ***Oil Spill Intelligence Report***, as well as the ***International Oil Spill Control Directory***."

Karen Olsson

*Regulatory Compliance Specialist
All American Pipeline Company
Santa Barbara, CA, USA*

"We receive other periodicals about oil spills but the ***Oil Spill Intelligence Report*** is the only publication that briefly gives us so much international global news."

Marthe Melguen
Director, CEDRE
Plouzane, France

"I am a recent California Polytechnic graduate. While in school, I did a project involving research and lab work on oil spill clean-up, especially bioremediation. The information ***Oil Spill Intelligence Report*** provided me on the efforts in Valdez, Alaska was excellent."

Chris Perri
Upland, CA, USA

"The ***Oil Spill Intelligence Report*** supplements on late-breaking spills have been particularly useful."

Cheryl Anderson
US DOI Minerals Management Service
Herndon, VA, USA

"Since ***Oil Spill Intelligence Report*** was first published more than a decade ago, our group of companies have relied on ***OSIR*** for detailed, up-to-date information on spills worldwide. We would like to commend Editor Amy Stolls and the ***OSIR*** staff for a job well done."

Nigel Bennett
Director of Bennett Group of Companies
Bennett Environmental Consultants Ltd.
Bennett Remediation Services Ltd.
Aqua-Guard Technologies Inc.
Vancouver, BC Canada

"We did try your competitor: we saw, we read, we cancelled!!"

Dr. Klaus Blickle
Jastram-Werke
Hamburg, Germany

"The ***Oil Spill Intelligence Report*** is very beneficial to this industry regarding new technologies, legislation, new recovery techniques, and products. In fact, since being mentioned in ***OSIR*** worldwide response on our new absorbent boom system has increased 28% to 33%."

Thomas Cleaver
Spill Sciences, Inc.
Broomfield, CO, USA

"Marine Pollution Control responds to oil spills all over the world. I must make many critical decisions far from the spill site. The ***Oil Spill Intelligence Report*** is the leading edge in spill information: it's an essential tool in my decision-making."

David Usher
President, Marine Pollution Control
President, Spill Control Association of America
Detroit, MI, USA

"We carry out various spill activities, such as taking measures to prevent marine disaster and mitigation of damages arising from disasters. In view of that, the ***Oil Spill Intelligence Report*** is very useful, especially its speedy and correct information. As we are now studying the major Exxon Valdez incident of 1989, the information in ***OSIR*** has been timely and very beneficial to us. We expect more good information in the future."

Y Suzuki
Head of Research and Study Office
Maritime Disaster Prevention Center
Tokyo, Japan

Dear Sir or Madam:

I would like to request a copy of the publication entitled, "Restoration Following The Exxon Valdez Oil Spill, Proceedings of the Public Symposium." If there is a cost for the publication or postage and handling, please contact me and I will arrange for a check to be sent to you.

I would also like to submit our name for your mailing list. We would like to receive future reports about Restoration Planning for the Exxon-Valdez oil spill.

Please feel free to contact me if there are any questions. The publication and any future reports should be addressed to Ed Owens at the above address.

Sincerely,

Joan E. Larson
