Mr. Richard H. Sims, Chairman
Water Resources Board, State of Alaska
323 East Fourth Avenue
Anchorage, Alaska 99501

Dear Mr. Sims:

On August 7, 1981 you wrote to Noranda Mining Inc. suggesting a field trip in March to the Greens Creek Project on Admiralty Island. We have been in contact with Karen Cantillon at the Alaska Department of Environmental Conservation at your suggestion; however, at this date the weather and snow conditions don't appear favorable for a March field trip. It was mutually agreed between Ms. Cantillon and Noranda that about the middle of April the weather might be more cooperative for this tour. We will be pleased to hear from you further toward that end.

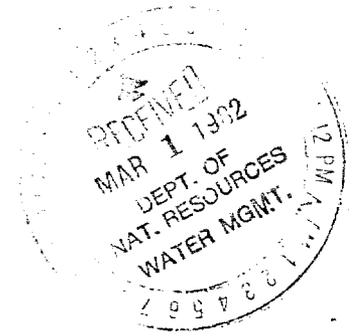

Kindly contact Karen Cantillon who will be coordinating with us toward organizing this visit with appropriate personnel.

Sincerely,

Peter W. Richardson
Project Manager
