

STATE OF ALASKA

JAY S. HAMMOND, Governor

WATER RESOURCES BOARD

August 21, 1979

Mr. Ken Holhman, Resident Engineer
Fairbanks Flood Control Project
U.S. Army Corps of Engineers - NPAFO-F
P.O. Box 60069
Airport Annex
Fairbanks, AK 99706

Dear Mr. Holhman:

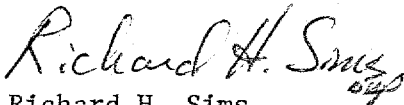

On behalf of the Alaska Water Resources Board, I wish to express our deep appreciation for the fine field trip of the Fairbanks Flood Control Project conducted by yourself and Mr. Tom Munsey.

We appreciate the fact that you interrupted your busy schedule to show us through the project. Your presentation was very helpful in giving us a better understanding of the magnitude and complexity of the project.

During subsequent meetings on August 7 and 8 we heard local testimony expressing concern about effects of the final phase of levee construction in the vicinity of the airport. In this regard we have sent a letter to the Governor suggesting that he convene a meeting of top level state agency, North Star Borough, and Corps officials to make sure that all are aware of the expressed concerns and, if possible, arrive at a jointly agreed course of action.

Again, thank you for your assistance.

Very truly yours,

Richard H. Sims
Chairman
