Re: Tanana Level B

Dear Chairmen:

During our August 7 and 8 Water Resources Board meeting in Fairbanks, we received several questions and comments concerning the proposed Tanana Level B Study.

We are passing along the main recurring items for your information and consideration. Those items are:

1. Are there any ongoing requirements or future sanctions inherent by participation in a Level B Study?
2. Much concern was expressed that there be local input during the study.
3. The local entities also expressed their concern that the study be conducted with Fairbanks as the base of operation.

We hope this is helpful in your planning.

Very truly yours,

Richard H. Sims
