Eagle River, Alaska 99577

Dear Jim,

On behalf of the Alaska Water Resources Board, I would like to thank you for your presentation on ground water availability in the Eagle River area.

We were especially impressed with your relative ease in transforming a highly complex technological report into an easily understood and interesting discussion.

In the past, general consensus among water managers was that ground water appropriations in the Eagle River area posed serious, unanswered questions. Your work, geared toward helping managers make decisions based on facts, shows a forthcoming trend that will play an important role in future coordination between resource managers and researchers.

Again, thank you for a most interesting presentation. We wish you success in future projects and would hope that you keep us apprised of your progress.

Sincerely,

David Vanderbrink
Chairman
