Target Audience: Managers and resource specialists who manage/need water for their programs (hydrologists, wild and scenic river managers, recreation planners, fisheries biologists, wildlife biologists, lands and realty specialists, etc.). Modules are open to any personnel who are interested, but some modules have a more targeted audience.

Course Prerequisite: All participants must complete on-line learning module entitled "Introduction to Water Rights," offered by BLM's National Training Center. The module is not state-specific, but instead, introduces students to basic water rights terminology and concepts.

Evaluations: Participants will be asked to complete a daily evaluation. The pre- and post-course on-line assessments will also be used to evaluate the effectiveness of the course.

	Monday, October 24
Dav's Obiectiv	e: Participants will understand how federal responsibilities fit into state
water rights sy	
0,	ce: All personnel listed in course audience description above
12:00 - 12:45	Course Orientation
	Presenter: Jolene Tallsalt Robertson, NTC
	Course Logistics
	Course Objectives
	 Introductions: Course Development Cadre, Participants in Course
12:45 - 1:00	Course Introduction: Why are water rights important in Alaska, where
	there is so much water and relatively little development?
	Presenter: Federal Lands Manager – John Trawicki, FWS
1:00 - 1:15	Break
1:15 - 2:15	Understanding Basic Concepts and Procedures of Alaska Water Law
	From the Perspective of a Federal Land Manager
	Presenter: Lin Fehlmann, BLM
	 What is a water right and what does it look like in Alaska?
	 The Prior Appropriation Doctrine and how it is applied in Alaska
	 Types of water rights in Alaska
	 Processes for obtaining water rights in Alaska
	 Overview of administration of existing rights in Alaska
2:15 - 2:30	Break
2:30 - 3:30	Understanding Federal Reserved Water Rights
	Presenter: Roy Smith, BLM
	 What is a federal reserved water right?
	 How the federal reserved rights concept started and evolved
	 What federal lands qualify for federal reserved water rights?
	 Characteristics of a federal reserved water right
	 How are federal reserved water rights claimed, adjudicated,
	protected, and exercised?
	 Federal reserved water rights created in Alaska by ANILCA

	Koy differences between federal recorded water rights and state
	Key differences between federal reserved water rights and state appropriative water rights (including reserved including reserved)
3:30 - 3:45	appropriative water rights (including reservations of water) Break
3:45 - 4:30	 Case Study With Moderated Question and Answer Session: As a federal employee, what issues do I need to think about when developing a strategy for working within the Alaska water rights system? Moderators: Roy Smith, BLM and Lin Fehlmann, BLM Moderators will present a fictional case study that will be referred to throughout the course, and then ask participants what issues should be considered as part of developing a water rights strategy. Key issues will be captured on a flipchart. Proposed development projects that will affect water quantity/quality Growing competition for water Opportunities for long-term protection and preservation Standards for management of aquatic habitats in Alaska vs. elsewhere
	 Priority of water rights vs. other work loads
	Developing a consistent USDA/DOI approach to working within
	the Alaska water rights system, while respecting different agency purposes/missions.
4:30 - 4:45	Daily Evaluation via Survey Monkey
	Please do not logout of your computers until after you have taken
	the survey. Thank you!
	Tuesday, October 25
	e: Participants will understand how Alaska water rights system works
	identify water rights procedures to meet specific land management
objectives.	nos. All parsonnal listad in course audience description above

11:00 - 11:30 Field Data For Water Right Applications – Inventory techniques,		
	11:00 - 11:30	Field Data For Water Right Applications – Inventory techniques,

October 24-28, 2016 Campbell Creek Science Center Anchorage, Alaska

	inventory forms, data management, data standards for applications and
	statements of beneficial use.
	Presenter: Lin Fehlmann
11:30 - 12:45	Lunch
12:45 - 1:15	Exercise: Generating a water right application for a federal facility in
	Alaska
	Moderator: Lin Fehlmann
1:15 - 1:30	Break
1:30 - 2:15	Land Use Authorizations on Federal Lands for Third Party Water Uses
	Presenter: Roy Smith
	 Given a proposed water diversion & conveyance facility on
	federal lands:
	 Determine the legal authority & processes used to
	evaluate the facility and make an authorization decision
	 Identify general types of operations terms & conditions that
	may be appropriate if facility is authorized
	 Identify how federal agencies should participate in the
	water rights process for a proposed facility
2:15 - 2:30	Break
2:30 - 3:15	Water Rights in Land Tenure Adjustments
	Presenter: Lin Fehlmann
	 Identify the steps and processes to address water rights issues in
	land tenure actions
3:15 - 3:30	Break
3:30 - 4:30	Exercise: Water Rights in Lands Actions. Students will consider water
	rights implications of lands actions, using the case study presented
	earlier.
	Moderators: Lin Fehlmann and Roy Smith
4:30 - 4:45	Daily Evaluation via Survey Monkey
	Thursday, October 27
Day's Objectiv	<i>re:</i> Participants will be able to understand how to obtain and manage state
reservations o	f water as part of federal land management functions in Alaska.
	ce: hydrologists, fisheries biologists, wild and scenic river managers
Те	chnical Workshop #2: Instream Flow and Lake Protection
8:30 - 8:45	Introduction to day's modules and objectives
8:45 - 10:00	Obtaining Instream Reservations: A Fish and Wildlife Service Case
	Study on the Uganik River
	Presenters: Cathleen Flanagan, FWS and Kim Sager, Alaska DNR
10:00 - 10:15	Break
10:15 - 11:45	Alaska Dept. of Fish & Game Perspective on Reservations of Water
	(includes 60-minute presentation and 30-minute question and answer
	session)
	Presenter: Joe Klein, Alaska Fish and Game
11:45 - 1:00	Sack or catered lunch on site; walking tour of Campbell Creek; exercise
11.40 1.00	

October 24-28, 2016 Campbell Creek Science Center Anchorage, Alaska

	discussion of approaches to protect instream flow reservations	
1:00 - 1:30	DNR Technical Review Process for Reservation Applications	
	Presenter: Kim Sager, Alaska DNR	
1:30 - 1:45	Break	
1:45 - 3:15	Evolution of Alaska's Reservation of Water Program and Future	
	Challenges/Opportunities	
	(includes 60-minute presentation and 30-minute question and answer	
	session)	
	Presenter: Christopher Estes, retired Alaska Fish and Game	
3:15 – 3:30	Break	
3:30 - 4:30	Panel: How can the state and feds best work together on instream flow	
	reservations?	
	Facilitator: Roy Smith.	
	Participants: Dave Schade, Kim Sager, Joe Klein, Christopher Estes,	
	Cathy Flannagan, Alan Peck	
	 Application review process 	
	 Supporting data for purposes claimed in application 	
	 Hydrologic data to support applications 	
4:30 - 4:45	Daily Evaluation via Survey Monkey	
	Friday, October 28	
Day's Objectiv	e: Participants will be able to apply new water rights process knowledge	
to on-the grou	nd situations.	
Target Audience: All personnel listed in course audience description above.		
8:00 - 8:15	Introduction to day's modules and objectives	
8:15 - 11:15	Facilitated discussion/brainstorming of water rights issues and	
(with breaks	opportunities faced by course participants	
as needed)	Facilitator: Roy Smith	
11:15 - 11:30	Daily Evaluation via Survey Monkey	
11:30	End of Course
