

GENERATING A WATER RIGHT APPLICATION – EXERCISE

Scenario: You have been tasked with filing a new application for a water right on the Campbell Creek Science Center Well. Please review the inventory form, photos and maps to answer the following questions.

1. What type of water right would you file for (surface water, ground water, storage, etc.)?
2. What priority date would you claim in the water right application?
3. What beneficial uses would you claim in the application?
4. What location would you place in the application for the point of diversion? For the place(s) of use?
5. What volume of water would you claim in the application?
6. What other information would you send to DNR along with the application?
