

**Before the Federal Energy Regulatory Commission, Application for License for Major Project, Susitna Hydroelectric Project : Volume 2C**

This electronic file contains the first pages of the document (cover, preliminary pages, and table of contents) in order to retain a documentary history of the alternative issuance of this report, APA 1796 (also numbered SUS 196).

All volumes in the 20-volume set *Before the Federal Energy Regulatory Commission, Application for License for Major Project, Susitna Hydroelectric Project* were issued with an illustrated cover. Reports APA 1795 and 1796 were also re-issued with a plain blue cover with slightly different preliminary paging.

The following pages are:

- the blue cover bearing the Harza-Ebasco label with the Alaska Power Authority Document number (this sheet is being retained in this PDF file in order to document the assigned APA number and to document the appearance of the Harza-Ebasco series statement on some copies);
- a white page resembling the cover;
- a secondary blue cover-like page;
- a white page resembling that cover-like page;
- the blue title page.

The text starting with the blue title page is identical to the issuance distributed with the whole set. The remaining text of the report is available in the other electronic file for this document.
