MONITORING THE PERFORMANCE OF THE ALASKA ECONOMY:
THE 1985 ISER MAP ECONOMIC DATABASE

Introduction

This Review is the second annual publication of the ISER MAP economic database. The database has been consolidated and expanded this year with the inclusion of three new tables which help to monitor the performance of the Alaska economy in the areas of general business activity, basic sector output levels, and state government asset management. In addition, each table has been revised, expanded, and updated to include information available through early 1985.

This comprehensive statistical summary of the economy covering most of the history of Alaska since statehood should be useful for:

- Improving our readers' general understanding of Alaska's economy and how it has grown
- Monitoring economic trends and performance in relation to past levels of activity
- Providing an analytical base for projecting future directions of development and growth of the economy

The information in this database comes from a large number of federal and state government agencies as well as from analyses done by ISER. A document entitled "ISER MAP Economic Database: Data Sources and Derivations," which indicates the source for each variable appearing in this publication, is available upon request. This data represents a small portion of the economic, demographic, and social information that ISER collects, monitors, disseminates, and makes available to the public upon request.

GLOSSARY OF TERMS

BASIC INDUSTRIES produce exportable commodities or services demanded by consumers outside the state that drive the economy. The former category includes agriculture, forestry, mining, petroleum, fishing, and directly related portions of construction and transportation. The latter includes tourism as well as federal civilian and military activities.

An ENCLAVE ACTIVITY is a self-contained project, such as the Trans-Alaska Pipeline System (TAPS), which has little interaction with the local economy but may influence the state economy. North Slope petroleum development is also defined as enclave.

An ENDOGENOUS variable is one whose value is dependent upon the level of aggregate economic activity in the state. Endogenous state revenues consist of those taxes whose receipts rise and fall with the general level of economic activity.

INFRASTRUCTURE INDUSTRIES comprise the public utility, transportation, communication, business, and other systems needed by basic and support industries to function properly.

SUPPORT INDUSTRIES produce goods and services which are purchased by basic industries and Alaska residents. These include most of services and trade, real estate, finance, and insurance.

LIST OF TABLES

1. Statewide Employment (annual average in thousands)	2
2. Alaska Gross State Product in Current Dollars by Industry, 1962-1983 (millions of dollars)	4
3. Alaska Gross State Product in Constant Dollars by Industry, 1962-1983 (millions of 1972 dollars at average U.S. prices)	6
4. Average Annual Earnings per Employee (current \$)	8
5. Real Average Annual Earnings per Employee (1967 U.S. \$)	10
6. Wages and Salaries (millions of current \$)	12
7. Personal Income (aggregates in millions of \$; per capita in \$ and 1967 U.S. \$)	14
8. Disposable Personal Income (aggregates in millions of \$ and millions of 1967 U.S. \$; per capita in \$ and 1967 U.S. \$)	16
9. Population and Labor Force (thousands)	17
10. Price Indexes	18
11. General Business Indicators	19
12. State Revenues (millions of \$)	20
13. State Expenditures (millions of \$)	22
14. State Assets and Bonded Debt (millions of \$)	24
15. Local Government Revenues and Tax Base (millions of \$)	26
16. Indicators of Natural Resource Activity	28
