Alaska Resources Library and Information Services (ARLIS) is providing this excerpt in an attempt to identify and post all documents from the Susitna Hydroelectric Project.

This book is identified as APA no. 3343 in the Susitna Hydroelectric Project Document Index (1988), compiled by the Alaska Power Authority.

It is unable to be posted online in its entirety. Selected pages are displayed here to identify the published work.

The book is available at call number QL737.R638W47 1979 in the ARLIS Susitna collection.

Habitat Responses of Microtine Rodents
to Central Alaskan Forest Succession

By

Stephen Douglas West

A.B. (University of California) 1970
M.S. (University of Alaska) 1974

DISSERTATION

Submitted in partial satisfaction of the requirements for the degree of

DOCTOR OF PHILOSOPHY

in

Zoology

in the

GRADUATE DIVISION

OF THE

UNIVERSITY OF CALIFORNIA, BERKELEY

Approved:

Daniel G. Petter 22 May, 1979
Chairman Date

Nancy Mirette

Willard J. Zelch Jr. 22 May, 1979

.....
DEGREE CONFERRED JUNE 16, 1979

TABLE OF CONTENTS

Dedication	i
Acknowledgements	ii
Table of Contents	iv
List of Figures	
Chapter 1	vi
Chapter 2	vi-vii
List of Tables	
Chapter 1	viii
Chapter 2	viii
Chapter 1	
Introduction	1
Study Area	
Geography and Climate	3
Forest Succession	3
Microtine Rodents	9
Methods	
Vegetation Sampling	10
Small Mammal Trapping	11
Diet Analysis	12
Results	
Forest Succession	13
Microtine Rodent Abundance and Habitat Preferences	23
Diet Analysis	40
Discussion	
Coexistence of <u>Clethrionomys</u> and <u>Microtus</u>	46
Forest Succession and <u>Microtus</u>	43
Forest Succession and <u>Clethrionomys</u>	52
Forest Succession and Competitive Exclusion	54
An Historical Scenario	55
Concluding Remarks	58
Literature Cited	60
Chapter 2	
Introduction	69
Study Area and Methods	
Trapping locality and Fire History	70
Trapping Procedures	72
Results	
<u>Clethrionomys rutilus</u> Abundance	73
<u>Clethrionomys rutilus</u> Reproduction and Survivorship	73
<u>Clethrionomys rutilus</u> Diet	85
<u>Clethrionomys rutilus</u> Home Range	89

TABLE OF CONTENTS

Plant Succession on the Burn	93
Colonization of the Burn by <u>Clethrionomys rutilus</u>	95
Colonization of the Burn by <u>Microtus oeconomus</u>	99
Discussion	
Multiannual Abundance Pattern of <u>Clethrionomys rutilus</u>	100
Colonization of the Burn by <u>Clethrionomys rutilus</u>	107
Colonization of the Burn by <u>Microtus oeconomus</u>	108
Literature Cited	110

LIST OF FIGURES

Chapter 1

Figure	Page
1. Interior Alaska and the Yukon-Tanana Highlands	5
2. Simplified plant succession patterns after fire in interior Alaska	8
3. Floristic similarity of 55 sites trapped for small mammals	17
4. Principal component scatterplot for the 55 sites shown in Figure 3	21
5. Abundance of northern red-backed voles, <u>Clethrionomys rutilus</u> by sites and year	24
6. Abundance of <u>Microtus oeconomus</u> , <u>Microtus pennsylvanicus</u> , <u>Microtus xanthognathus</u> , <u>Lemmus sibiricus</u> , and <u>Synaptomys borealis</u> by sites	27
7. Patterns of habitat occupancy for interior Alaskan microtines	32
8. Patterns of habitat occupancy for the genus <u>Microtus</u>	34
9. Discriminant function analysis of <u>Microtus</u> habitat occupancy	39

Chapter 2

1. Number of <u>Clethrionomys rutilus</u> on the burn and control trapping grids from June 1972 to October 1976	75
2. Total number of litters produced by overwintered and first generation females on the burn and control trapping grids	79
3. Monthly total number of lactating females on the control trapping grid during 1972-1976	81
4. Home range size computed for resident voles on burn and control trapping grids	91

LIST OF FIGURES

Chapter 2

Figure	Page
5. Monthly total number of lactating females on the burn trapping grid during 1974-1976	98
6. Number of <u>Microtus oeconomus</u> on the burn trapping grid from May 1974 to October 1976	102

LIST OF TABLES

Chapter 1

Table	Page
1. Distribution of microtine species across major successional stages	29
2. Multiple regression equations for microtine abundance and diversity	36
3. Percentage composition of diet for <u>Clethrionomys rutilus</u> and <u>Microtus</u> spp. with respect to major forest type	41
4. Intersite variation in diet among recently burned sites	43
5. Interspecific and intergeneric diet comparisons: <u>Microtus oeconomus</u> vs. <u>Microtus xanthognathus</u> and <u>Clethrionomys rutilus</u> vs. <u>Microtus</u> spp.	44
6. Percentage composition of diet for <u>Lemmus sibiricus</u> and <u>Synaptomys borealis</u>	47

Chapter 2

1. Monthly percentage of resident females and resident males in breeding condition	76
2. Minimum monthly survival rates for males and females in breeding and non-breeding condition	83
3. Biweekly percentage of first generation females in breeding condition	84
4. Percentage composition of diet for <u>Clethrionomys rutilus</u> on the control grid with respect to season	87
5. Percentage composition of diet for <u>Clethrionomys rutilus</u> in July 1974, 1975, and 1976	88
6. Vegetation development on burned area 1971-1976 and comparison with control	94
