

Susitna-Watana Hydroelectric Project Document

ARLIS Uniform Cover Page

Title: Fluvial geomorphology modeling below Watana Dam study, Study plan Section 6.6 : Initial study report -- Part B: Supplemental information (and errata) to Part A (February 3, 2014 Draft Initial Study Report)		SuWa 223
Author(s) – Personal:		
Author(s) – Corporate: Tetra Tech		
AEA-identified category, if specified: Initial study report		
AEA-identified series, if specified:		
Series (ARLIS-assigned report number): Susitna-Watana Hydroelectric Project document number 223		Existing numbers on document:
Published by: [Anchorage : Alaska Energy Authority, 2014]		Date published: June 2014
Published for: Alaska Energy Authority		Date or date range of report:
Volume and/or Part numbers:		Final or Draft status, as indicated:
Document type:		Pagination: 1 p.
Related work(s): The following parts of Section 6.6 appear in separate files: Part A ; Part B ; Part C ; Appendices ; Part A, Figures.		Pages added/changed by ARLIS:
Notes:		

All reports in the Susitna-Watana Hydroelectric Project Document series include an ARLIS-produced cover page and an ARLIS-assigned number for uniformity and citability. All reports are posted online at <http://www.arlis.org/resources/susitna-watana/>

**Susitna-Watana Hydroelectric Project
(FERC No. 14241)**

**Fluvial Geomorphology Modeling
below Watana Dam Study
Study Plan Section 6.6**

**Initial Study Report
Part B: Supplemental Information (and Errata) to
Part A (February 3, 2014 Draft Initial Study Report)**

Prepared for

Alaska Energy Authority

SUSITNA-WATANA HYDRO

Clean, reliable energy for the next 100 years.

Tetra Tech

June 2014

**PART B: SUPPLEMENTAL INFORMATION (AND ERRATA) TO PART A
(FEBRUARY 3, 2014 DRAFT INITIAL STUDY REPORT)**

Part A Reference	Description
ISR 6.6, Page 47, Section 4.1.2.9.5., 1 st paragraph, 3 rd sentence.	The sign convention was reversed in the original text. Correct language is, “The average elevation difference was added to the LiDAR point cloud elevation values...”
ISR 6.6, Appendix C, Page 1, Table C-1, Whiskers Slough samples at PRM 105.7.	The two samples at PRM 105.7 are actually bed samples rather than bank samples. These samples were collected as grab samples in ponded areas behind beaver dams, so they are similar material to floodplain materials. Table should include this note indicating the origin of these samples.
