P-939-906-20. General view of McArthur River and proposed powerplant area, looking upstream. The powerplant would be located at the base of the cliff shown in the right center foreground. Chakachamna Lake lies to the left of snow capped Mt. Spurr seen in the right background.

P-939-906-21. Chakachamna Lake looking west. The outlet of the lake is in the left foreground. The tunnel portal would be about ½ mile up the left side of the lake. The ridge seen in the foreground is the snout of Barrier Glacier.
