1700	Aquatic Habitat Observations	1700-1

APPENDICES

- A Government Agencies that have Collected or Analyzed Water Resources Data for the Susitna River Basin
- B Water Quality Parameters that have been Sampled by USGS within the Susitna River Basin
- C Data Collected by ADF&G in the Susitna River Basin from 1974 - 1977, and 1981
- D Climatological Parameters which Appear in the NOAA Reports Entitled "Local Climatological Data, Annual Summary with Comparative Data"
 - 1. Meteorological Data for the Current Year
 - 2. Normals, Means & Extremes
 - 3. Average Temperature
 - 4. Precipitation
 - 5. Heating Degree Days
 - 6. Cooling Degree Days
 - 7. Snowfall
- E Climatological Parameters which Appear in the NOAA Report Entitled "Annual Climatological Summary"
- F Climate & Water Quality Parameters Measured by R&M
- G Distribution List for Field Data Index
- H Bibliography of Available Documents Related to the Susitna River Basin

PLATE 1: Data Collection Stations for the Susitna River Basin

INTRODUCTION

The objective of the Field Data Index & Distribution System is to establish a formal system of conveying information concerning hydrologic and climatologic data availability to each member of the study team. The project data base consists of (a) Historical recorded data up to January 1, 1980; (b) Post 1980 data collected by government agencies and study team members.

Historical files have been researched and available data are documented in this report. Records which could be retrieved or copied exist in R&M Consultants files. Records which are unavailable at this time, are identified as to location of files, data type, and period of record.

Data stations are identified in this volume by a unique four digit index number which identifies type of data and station location. The first two digits of the index number correspond to the type of data collected. There are seventeen different types of water resource data indexed, so data stations series are numbered accordingly 0100 through 1700. The last two digits of the index number correspond to a unique location number. For data taken from river sampling, station numbers increase from up-stream to down stream locations. River miles are listed where applicable to help identify station locations. For data stations away from the river channel, the location number is unique for that location among each data series number.

Thus for the index number 0540, for example, the first two digits (05) identify the data as sediment discharge), while the latter two digits (40) identify the station as Susitna River at Gold Creek. Availability of other series numbers with the same location number, such as:

0140	Streamflow Continuous Gaging, Susitna River at Gold Creek
0340	Water Quality, Susitna River at Gold Creek
0440	Water Temperature, Susitna River at Gold Creek,
	et cetera

All of the data collection stations included in this index are shown on the Data Collection Stations map accompanying this volume. Most station index numbers are shown next to their associated station symbol on the map. In the cases where many index numbers are assignable to one location, index numbers are listed and cross referenced in the table of multiple record stations inset at the upper left portion of the map.

All new data collected by R&M Consultants or other organizations will be added to the index system. An update will be prepared and distributed to personnel listed in Appendix G each year. Anyone knowing of additional data that has been collected within or adjacent to the Susitna River Basin

is asked to notify R&M Consultants, P.O. Box 6087, Anchorage, Alaska - 99503, (907) 561-1733.

Hard copy of the data will be stored in the R&M Consultants offices. The data will be made available to project team members and other concerned parties upon request.

Sections of the Index that have been substantially revised in the 1984 update are: Aerial Photography (Section 1300), Aquatic Habitat Observations (Section 1700), and the Field Data Index Distribution List (Appendix G). First, the aerial photography list has been expanded considerably to include additional historical flight lines which were discovered and also to note the extent (river miles) of the Susitna River covered by the photography. Second, the index of aquatic habitat data collection sites and dates has also been greatly expanded with the assistance of the Alaska Department of Fish and Game. Finally, the distribution list has been updated to add parties who have become involved in the hydrologic aspects of the project in the past year and to delete those who no longer are involved in the project.

0200 STREAMFLOW PARTIAL RECORDS

All data collected relating to river stage or water discharge for the Susitna River Basin not previously listed under Section 0100: Streamflow Continuous Gaging are included below. This section includes all records from crest stage gages, staff gages or fragmentary data. Agencies collecting the data include: U.S. Geological Survey (USGS), R&M Consultants (R&M) and National Weather Service (NWS). The agency responsible for data collection at each site is indicated by the agency name in parentheses following the period of record.

It should be noted that National Weather Service stations collect river stage data which can be obtained from the NWS Alaska River Forecast Center on a daily basis.

Alaska Department of Fish and Game has additional data on stage and water discharge of selected tributaries and fresh-water sloughs in the Susitna River Basin for 1981. Appendix C includes location and period of record for the data available. Additional flow measurements, staff and crest gages, have been included under Section 1700 Slough Observations. Therefore they have not been listed again below.

All data given below are on file at R&M Consultants according to index number and location, unless marked by an asterisk (*) following the period of record.

<u>Index No.</u>	<u>Description</u>
0201	Raft Creek near Denali - USGS Station 15291000 Annual Maximum Discharge from Crest-Stage Gage: 1963-1977, 1979 - Present (USGS)
0203	Susitna River at Denali Highway (RM 290.7) Staff Gage: 1981 (R&M)
0205	Susitna River at Deadman Creek - R&M CSR-9 (RM 186.7) Crest-Stage Gage: 1980 - Present (R&M)
0210	Susitna River above Watana Damsite - R&M CSR-8 (RM 184.1) Crest-Stage Gage ($\frac{1}{4}$ -mile upstream of damsite): 1980 - Present (R&M)

Index No.	Description
0211	Susitna River below Watana Damsite (RM 182.8) Staff Gage (1 mile downstream of damsite): 1981 - Present (R&M)
0212	Susitna River at Devil Creek (RM 161.5) Crest Stage Gage: 1981 - Present (R&M)
0215	Susitna River above Devil Canyon - R&M CSR-7 (RM 153.2) Crest-Stage Gage (1½ miles upstream of D.C. damsite): 1980 - Present (R&M)
0218	Susitna River below Devil Canyon (RM 150.7) Staff Gage (1 mile downstream of D.C. damsite): 1981 (R&M)
0220	Susitna River at Portage Creek - R&M CSR-6 (RM 148.8) Crest-Stage Gage: 1980 - Present (R&M)
0225	Susitna River at Sherman - R&M CSR-5 (RM 130.9) Crest-Stage Gage: 1980 - Present (R&M)
0230	Susitna River at Section 25 - R&M CSR-4 (RM 124.4) Crest-Stage Gage: 1980 - Present (R&M)
0235	Susitna River at Curry - R&M CSR-3 (RM 120.5) Crest-Stage Gage: 1980 - Present (R&M)

0245	Susitna River above Susitna-Chulitna Confluence - R&M CSR-1 (RM 99.6) Crest-Stage Gage: 1980 - Present (R&M)
0246	Talkeetna River at Alaska Railroad Bridge Partial Discharge Record: 1949 (2 dates) (USGS)
0247	Talkeetna River at Alaska Railroad Bridge Partial Stage Record: 1976 - Present (NWS)
0250	Susitna River at Sunshine (RM 83.8) Partial Discharge Record: 1969-1971, 1976 - Oct. 1981 (NWS)
0251	Montana Creek near Montana - USGS Station 15292800 Crest-Stage Gage: 1963-1972, 1978, 1981 (USGS)
0252	Montana Creek at Parks Highway Partial Stage Record: 1973 - Present (NWS)
0253	Goose Creek near Montana - USGS Station 15292900 Crest-Stage Gage: 1963-1971 (USGS)
0254	Caswell Creek near Caswell - USGS Station 15293000 Crest-Stage Gage: 1963 - Present (USGS) Miscellaneous Discharge Measurements: 1963 - 1976, 1979 - Present (USGS)

Index No.	Description
0255	Little Willow Creek near Kashwitna - USGS Station 15293700 Low-Flow Partial Record: 1978 (USGS)
0255.5	Peters Creek below Purches Creek near Willow Miscellaneous Discharge Measurements: 1979 - Present (USGS)
0255.6	Peters Creek, Tributary to Willow Creek (above confluence with Willow Creek) Miscellaneous Discharge Measurements: 1979 (USGS)
0255.8	Willow Creek above Deception Creek near Willow (2.2 miles downstream of continuous gage) Miscellaneous Discharge Measurements: 1979 (USGS)
0256	Willow Creek at Hatcher Pass Road near Willow - USGS Station 15294002 Low-Flow Partial Record: 1978 - 1979, 1981 - Present (USGS)
0256.5	Willow Creek at Alaska Railroad Bridge, 1 mile north of Willow Partial Discharge Record: 1948 (1 date) (USGS)
0257	Deception Creek above Tributary near Houston - USGS Station 15294007 Low-Flow Partial Record: 1978 - Present (USGS)
0257.5	Unnamed Deception Creek Tributary near Willow Miscellaneous Discharge Measurements: 1979 - Present (USGS)

Index No.	Description
0258	Deception Creek Tributary near Houston - USGS Station 15294008 Low-Flow Partial Record: 1978 - Present (USGS)
0259	Willow Creek at Parks Highway near Willow - USGS Station 15294012 Low-Flow Partial Record: 1978 - Present (USGS)
0260	Willow Creek at Parks Highway near Willow Partial Stage Record: 1973 - Present (NWS)
0265	Kroto Creek (head of Deshka River) near Peters Creek USGS Station 15294020 Low-Flow Partial Record: 1978 (USGS)
0270	Moose Creek near Talkeetna USGS Station 15294025 Low-Flow Partial Record: 19721975, 19781979 (USGS) Partial Discharge Record: 1980 (USGS) CrestStage Gage: 1972 Present (USGS)
0272	Peters Creek near Petersville USGS Station Low-Flow Partial Record: 19751976, 19771978 (USGS)
0274	Peters Creek above Martin Creek at Peters Creek USGS Station 15294310 Low-Flow Partial Record: 19751976, 19771978
0276	Martin Creek at Peters Creek USGS Station 15294312 LowFlow Partial Record: 1978 (USGS)

0300 WATER QUALITY

Water quality data have been collected by the U.S. Geological Survey (USGS) and R&M Consultants (R&M) at several sites within the Susitna River Basin. The locations for which this information is available and the period of record at each site are given below. Since the measurements are only taken periodically the number of measurements, timing and specific parameters measured vary from year to year at any given station. A list of water quality parameters that have been measured by the USGS in the basin is presented in Appendix B. Water quality parameters measured by R&M are included in Appendix F.

Unless indicated by the agency name in parentheses following the period of record, data have been collected by the USGS.

Data collected by the Alaska Department of Fish & Game are all included in Appendix C. Therefore, they have not been listed again in this section.

The data listed in this section are all on file at R&M Consultants according to index number and name, except where dates are marked by an asterisk (*). Most of the data are also available through the U.S. Geological Survey.

0400 WATER TEMPERATURE

Water temperature data have been collected by the U.S. Geological Survey (USGS), R&M Consultants (R&M), and Alaska Department of Fish and Game (ADF&G) at many locations within the Susitna River Basin. The locations for which this information is available and the period of record at each site are given below. Continuous water temperature records are generally available for open-water months only, but the length of record will vary for each site from year to year. Descriptions of the data collected by ADF&G for 1981 have been included in Appendix C. Additional thermograph sites installed in 1982 for the slough observations can be found in Section 1700. Therefore, both sets of data have not been listed again in this section. It should also be noted that instantaneous temperature measurements have been taken and may be found in the water quality records published by the USGS.

Unless indicated by agency name in parentheses following the period of record, all data have been collected by the USGS.

The data listed in this section are on file at R&M Consultants according to index number and name, except the most recent data collected by the USGS and Talkeetna River data from 1954.

0500 SEDIMENT DISCHARGE

Suspended sediment concentration (mg/l), suspended sediment discharge (tons/day) and suspended sediment particle size analysis data have been collected by the U.S. Geological Survey (USGS) and R&M Consultants (R&M) at several sites within the Susitna River Basin. The USGS and R&M Consultants cooperated in 1981 on measurements to determine bedload sediment transport rates as a function of stream discharge, and the size distributions of this sediment. Three measurements were made at each site (Talkeetna River, Chulitna River, and Susitna River at Gold Creek and Sunshine) in 1981.

The locations where sediment information has been collected are listed below. All of the data, except the most recent data collected by the USGS, are on file at R&M Consultants.

Unless indicated by agency name in parentheses following the period of record, all data have been collected by the USGS.

0600 CLIMATE

Climatic data have been collected by the National Oceanic and Atmospheric Administration (NOAA), R&M Consultants (R&M), and others at a number of locations within and adjacent to the Susitna River Basin.

Climatic Data collected by NOAA appear for individual stations in one of two types of reports. The first, entitled "Local Climatological Data, Annual Summary with Comparative Data" is generally the most comprehensive and is published only for stations with over 30 years data. A list of the parameters included in this report is presented in Appendix D. The second, entitled "Annual Climatologic Summary" contains fewer parameters than the first, and a list of the parameters included in this report is presented in Appendix E. It should be noted that all of the parameters listed in the appendices for a particular report may not have actually been measured at any given station.

NOAA also publishes reports entitled "Local Climatological Data, Monthly Summaries". These reports are available for any station publishing an "Annual Summary with Comparative Data", and present most of the parameters contained in the annual summary on a daily basis, with selected parameters also presented on a 3-hour or hourly basis.

Data for stations not covered by the above reports can be obtained from NOAA reports entitled "Climatological Data" (CD's) which are published monthly and contain summary information on all climate stations in the State.

The miscellaneous wind data have been supplied by Mr. Jim Wise of the Arctic Environmental Information and Data Center, and are taken from the manuscript entitled "Wind Power Atlas". The data are listed by parameter collected. This information is footnoted in the table and listed at the end of the table.

Climate data measured at each R&M station include: air temperature, average wind speed, wind direction, peak wind gust, relative humidity, precipitation, and solar radiation. Longwave radiation is measured at Watana and Eklutna Lake. Snowfall amounts have been measured in a heated precipitation bucket at Watana only. Data are recorded at fifteen or thirty-minute intervals at all the stations. An evaporation pan was installed in spring of 1981 at Watana Camp and measurements are taken daily during May -September.

An attempt has been made at ordering climate stations from the upper to the lower Susitna River Basin, with R&M Stations in the upper Susitna River Basin listed first.

Climate data may be obtained through R&M Consultants.

* Miscellaneous Temperature data (see page 0600-5)

MISCELLANEOUS WIND DATA

Stations: Healy 2, Healy Power Plant I, Healy Power Plant II

Table containing wind speed, percent frequency and cumulative frequency at one meter per second increments. Table containing wind direction frequency in percent. Table containing wind speed and joint frequency.

Station: Rapids

Period summary by combined velocity groups (1 to 12 observations daily) covering 1935 - 1941.

Station: Big Delta

Period summary by combined velocity groups (1 to 3 observations daily) covering 1935 - 1941.

Station: Gulkana

Percentage frequency of occurrence, direction by speed groups - a summary of the data between January 1945 and November 1958.

Station: Summit

Period summary by combined velocity groups (16 observations daily) covering 1940 - 1941.

Station: Talkeetna

Period summary by combined velocity groups (16 observations daily) covering 1940 - 1941.

MISCELLANEOUS TEMPERATURE DATA

Station: Vee Canyon

Three-times daily observations made during March and April 1962 by US Bureau of Reclamation (USBR) drilling crews of temperatures and weather type. Reported in "Engineering Geology of Vee Canyon Damsite", USBR, November 1962.

Station: Chase ADF&G Fish Wheel Camp (RM 107.6)

Daily observations of air temperature and percent cloud cover. During August and September. Reported in "An Assessment Study of the Anodromous Fish Populations in the Upper Susitna Watershed. (Barrett, 1974).

EVAPORATION DATA

<u>Station Name</u>	<u>Reported by</u>	<u>Period of Record</u>
Watana	R&M	5/7/81 - Present
Matanuska Agr. Exp. Sta.	NOAA	1934 - Present
McKinley Park	NOAA	1969 - Present
Palmer IAS	NOAA	1966 - Present
University Exp. Sta. (UAF)	NOAA	1940 - Present

Evaporation is read once a day and is recorded in conjunction with wind and maximum and minimum temperatures.

The evaporation data are on file at R&M or, with the exception of Watana, can be obtained directly from the National Weather Service.

0700 FREEZING RAIN AND ICING

Instrumentation for the measurement of freezing rain and in cloud icing (ice buildup on transmission lines) was installed by R&M Consultants in the Susitna River Basin in 1980. Both parameters were measured at each site until 1983. In addition, an electrically - operated ice detector and counter instrument was installed at the Watana site for a period of time. Data collected from these sites are on file at R&M Consultants according to index number and name.

<u>Index No.</u>	<u>Description</u>
0710	Denali (Susitna Lodge) In-cloud icing apparatus installed October 20, 1980 Freezing rain apparatus installed November 12, 1980 Both pieces of equipment removed September 2, 1983.
0730	Watana Camp In-cloud icing apparatus installed October 16, 1980 Freezing rain apparatus installed November 12, 1980 Ice detector and counter apparatus installed December 5, 1980. Dismantled October 11, 1981. In-cloud icing and freezing rain equipment removed September 4, 1983.

0800 SNOW SURVEY

Snow depth and water equivalent data have been collected by the U.S. Soil Conservation Service (SCS), and R&M Consultants. The locations for which this information is available are listed below generally in order from the upstream end to the downstream end of the Susitna Basin.

The cross reference numbers for sites listed on the following pages correspond to map numbers as published in "Snow Surveys and Water Supply Outlook for Alaska" issued February through June by the Soil Conservation Service.

All of the data listed can be obtained from the agency responsible for the snow course or from R&M Consultants.

(A) Indicates site with snow course and/or aerial stadia marker.

(S) Indicates site with snow pillow. Continuous snow fall data.

(P) Indicates site with precipitation gage.

* Indicates discontinued site. Year when discontinued noted.

0900 SNOW CREEP

Instrumentation for measuring the effect of snow creep forces on transmission line towers was installed by R&M Consultants during the winter of 1980-81. Two locations were chosen along the proposed transmission line route, a southfacing slope on Tsusena Butte above Watana Camp and a northfacing slope near Devil Canyon.

Some previous research on snow creep was done by the U.S. Army Corps of Engineers in 1974, reported in the following paper:

Snow Creep Investigations in Southeast Alaska; Meyer, Robert. Alaska District, Army Corps of Engineers.

0920 NEAR WATANA

0940 NEAR DEVIL CANYON

Installed February 25, 1981

(Station destroyed December 1981)

1000 FREEZEUP RIVER ICE OBSERVATIONS

Field observations of the freezeup of the Susitna River were taken at regular intervals starting in October 1980. A specific reach of the river was studied on the listed dates. Observations were on the ground or aerial. All observations were thoroughly photo-documented. Condition and locations of the ice cover were noted and during the latter years of the program, much quantitative information was obtained on a continuous basis during the freezeup period. More information on the types of data collected are contained in the R&M Consultants Ice Studies Reports 1980-1983, 3 volumes.

Observers were all from R&M Consultants unless noted otherwise. All this information is on file and may be obtained from R&M Consultants.

Index Number	Date	Area of Ice Observations	Observers
1010	10/12/80	Lower Susitna	B. Drage, J. Coffin
1011	10/13/80	Oblique aerial photographs from Talkeetna to Devil Canyon	B. Drage, L. Griffiths

1100 WINTER RIVER ICE OBSERVATIONS

Field observations of ice cover conditions on the Susitna River were carried out by R&M personnel through the winter months during the period after freeze-up and prior to spring breakup. Photographs and other field observations document the extent of ice cover, stability, ice thickness, location of open water areas in the main channel and general characteristics of the channel. The results of this work have been used in hydraulic and ice studies for computer simulations of pre-project and predicted post-project conditions at low flow, and also in Environmental Studies to assess potential impacts of regulated flow. For detailed descriptions of each years ice program, consult the respective R&M Consultants Ice Study Report.

All of the information collected during winter field trips is on file at R&M Consultants.

1200 BREAKUP RIVER ICE OBSERVATIONS

Observations were made by R&M personnel during spring breakup on the Susitna River to assess the nature of ice cover breakup, position of ice jams in the channel, extent of flooding upstream of these ice jams, quantity and significance of ice floes and general decay of the ice cover. The information collected will be used for hydraulic and ice studies, as outlined in Subtask 3.06 of the Plan of Study. For detailed descriptions of each years ice study and the data collected refer to the respective R&M Consultants Ice Study Report.

All information collected during field trips is on file at R&M Consultants.

<u>Index No.</u>	<u>Date(s)</u>	<u>Description</u>	<u>Observers</u>

1300 AERIAL PHOTOGRAPHY

This section includes a listing of vertical aerial photography, both low altitude and high altitude, that has been flown over part or all of the Susitna River Basin.

For each set of photographs, the table shows the date of photography, area of coverage, scale and location of the negatives. The approximate segment of river covered is also indicated, referenced to river miles in the Susitna River Mile Index (R&M, 1982). An agency list with addresses follows the table. More detailed information concerning precise area of coverage and availability of photographs can be obtained through these agencies.

1400 HYDROGRAPHIC SURVEYS

Data on river channel morphology and floodplain characteristics have been collected by R&M Consultants from parts of the Susitna River.

Precise location, date of cross-section survey, plot showing channel geometry, calculated hydraulic parameters and general descriptions of each cross-section site are available for the river reach between Talkeetna and Portage Creek. In addition, longitudinal streambed profiles of the main channel thalweg have been run from Talkeetna to Portage Creek. Miscellaneous cross-sections have also been surveyed near access points to the Lower Susitna River (i.e. below Talkeetna).

Channel cross-sections from fresh water sloughs adjacent to the Susitna River have been surveyed by Alaska Department of Fish and Game during 1976. This data has been included as part of Appendix C and therefore has not been listed again in this section.

All of the data in this section are on file at R&M according to index number and location.

Index No.	Dates	Location	Description
1409	1976	Susitna River	Cross-sections surveyed by ADF&G
1410	10/4 - 11/19/80	Talkeetna to Portage Creek	62 cross-sections defining river floodplain and channel geometry
1411	10/11/80	LRX - 18 at river mile 106 to Talkeetna	longitudinal profile of main channel thalweg
1412	10/26 - 10/27/80	Portage Creek to LRX - 18	longitudinal profile of main channel thalweg
1413	3/3 - 3/26/81	Devil Creek to Deadman Creek	23 cross sections defining river floodplain & channel geometry
1414	5/21/81	Portage Creek to Devil Canyon	6 cross sections defining river floodplain & channel geometry
1415	9/22 - 9/26/81	Access channels to Susitna River below Talkeetna	8 cross sections to assess the effects of controlled river discharge on navigation on the Susitna River

Index No.	Dates	Location	Description
1416	7/8 - 9/20/82	Tributary stability analyses	19 profiles and cross sections on selected Susitna tributar- ies to assess the potential of stream channel perching.
1417	7/8 - 9/20/82	Selected slough and side channels from Portage Cr. to Talkeetna	68 cross sections defining slough morphology and flow regimes.
1418	7/8 - 9/20/82	Mainchannel cross sections from the 3 rivers confluence area to Sherman	35 cross sections to and in refining the HEC-2 model of the Susitna River.

1500 GLACIAL OBSERVATIONS

Glacial studies were begun by R&M Consultants and the University of Alaska during 1981. The objective of this program is to identify any problems peculiar to the existence of glaciers in the Susitna Basin. This study assessed whether significant changes in water or sediment yield could occur or if potential lake dumps exist and is oriented toward a long-term glacial observation and study program.

Data were gathered on all major glaciers of the Upper Susitna Basin with the exception of the Eureka and Oshetna Glaciers. Study of the Eureka Glacier was limited to visual observations and aerial photography. The Oshetna Glacier was not considered a major contributor to the flow or sediment regime of the Susitna River and therefore was omitted from this study.

R&M conducted the control and velocity surveys on the West Fork Glacier, West Tributary of Susitna Glacier, Turkey Glacier and East Tributary of Susitna Glacier. The velocity surveys have been repeated monthly, May through September, during 1981 and 1982, to determine ice movement as an aid in mass balance and glacier dynamics analyses.

A thermocouple string was installed to a depth of 66 feet at an elevation of 7700 feet on the West Tributary of Susitna Glacier to determine the thermal regime of the ice.

Glacial studies were supported by historical data from climate stations and snow surveys in the Susitna Basin, as well as sediment discharge records for the Susitna and Maclaren Rivers.

The results of this data acquisition effort, as well as a thorough description of field procedures and analytical methods, are presented in reports by Dr. William Harrison of the Geophysical Institute (R&M and Harrison 1981, and 1982).

1600 GLACIAL LAKE OBSERVATIONS

To determine the effects of a large impoundment of glacial water, such as the Watana or Devil Canyon reservoir, upon a stream system, a glacial lake study was begun in the spring of 1982. On April 16 R&M Consultants, in conjunction with ADF&G, visited four glacial lakes in south-central Alaska; Kenai, Skilak, Tustumena and Eklutna. They measured temperatures profiles and turbidity at each lake. It was then decided that a more intense study of one glacial lake would be a preferred approach. Eklutna Lake was chosen as an easily accessible glacial reservoir, and it is also comparable to the proposed Watana reservoir considering the following criteria:

1. Residence time of water in lake
2. Percent of drainage area covered by glaciers
3. Ratio of live storage to total storage

Continuous discharge and temperature data are being collected from the main inflow glacial streams by R&M Consultants. Daily outflow temperatures and flow releases from the tailrace of the power plant are also being monitored, by Alaska Power Administration personnel. Lake water quality profiles are being developed from sampling at fixed locations on a biweekly schedule during the summer, and at longer intervals during the winter. Profile data may include temperature, conductivity, turbidity and/or transmissivity. Measurement of light penetration in the lake was also undertaken. Dates of the lake sampling trips are listed below.

A climate station was installed on the southern end of the reservoir in June 1982. Parameters recorded every 15 minutes include air temperature, wind speed and direction, peak wind gust, relative humidity, shortwave radiation and precipitation. Longwave radiation measurement was added in July 1982. In November 1983, recording interval was changed to 30 minutes.

Data concerning the sediment regime of the lake were also collected, including sediment concentration and particle size distribution, sediment particle density distribution and minerology.

All the above-mentioned data can be found on file at R&M Consultants.

Lake sampling trips have been conducted on the following dates:

May 25, 1982
June 8, 1982
June 17 and 18, 1982
July 1 and 2, 1982
July 14 and 15, 1982
July 27-29, 1982

August 10-12, 1982
Septmeber 8-10, 1982
October 14-15, 1982
November 4, 1982
January 11 and 13, 1983
February 18, 1983
May 14, 1983
June 2, 1983
July 6, 1983
August 3, 1983
September 7, 1983
October 5, 1983
November 1, 1983
December 6, 1983
January 16, 1984
Feburary 16, 1984
March 23, 1984
April 20, 1984

1700 AQUATIC HABITAT OBSERVATIONS

An aquatic habitat (AH) study program has been conducted by the Alaska Department of Fish & Game since 1980. In the spring of 1982 and continuing into 1983, ADF&G intensified its study of selected areas.

Data collection sites are listed below according to type of site. The years of data collection at this site are noted in brackets [] following the site name. The agency responsible for each site is also noted, where this has been identified. It should be noted that this is not an exhaustive list of ADF&G study sites.

WATER QUALITY PARAMETERS THAT HAVE BEEN SAMPLED BY THE USGS WITHIN THE SUSITNA RIVER BASIN

Site Parameters

Available for each sample

Date
Time
Instantaneous Stream Flow (cfs)

Occasionally available for sample

Sampling Depth (ft)
Stream Width (ft)
Percent of Total Depth
Sample Location in Cross Section (ft from left bank)

Physical Parameters

Color (Platinum - Cobalt Units)
Hardness (mg/l as CaCO_3)
Hardness, Noncarbonate (mg/l as CaCO_3)
Methylene Blue Active Substance
pH
Solids, Dissolved (tons/day, tons/ac-ft)
Solids, Dissolved Residue at 105°C (mg/l)
Solids, Dissolved Residue at 180°C (mg/l)
Solids, Suspended Residue at 180°C (mg/l)
Specific Conductance (Micromhos/centimeter)
Temperature, Instantaneous (°C)
Turbidity (Jackson Turbidity Units)

Inorganic Parameters

Alkalinity (mg/l as CaCO_3)
Aluminum, Total Recoverable (ug/l as Al)
Arsenic, Dissolved (ug/l as As)
Arsenic, Total (ug/l as As)
Arsenic, Total Suspended (ug/l as As)
Barium, Dissolved (ug/l as Ba)
Barium, Total Recoverable (ug/l as Ba)
Beryllium, Dissolved (ug/l as Be)

Bicarbonate (mg/l as HCO₃)
Boron, Dissolved (ug/l as B)
Cadmium, Dissolved (ug/l as Cd)
Cadmium, Total Recoverable (ug/l as Cd)
Calcium, Dissolved (mg/l as Ca)
Carbon Dioxide, Dissolved (mg/l as CO₂)
Carbonate (mg/l as CO₃)
Chloride, Dissolved (mg/l as Cl)
Chromium, Dissolved (ug/l as Cr)
Chromium, Dissolved Hexavalent (ug/l as Cr)
Chromium, Suspended Recoverable (ug/l as Cr)
Chromium, Total Recoverable (ug/l as Cr)
Cobalt, Dissolved (ug/l as Co)
Copper, Dissolved (ug/l as Cu)
Copper, Total Recoverable (ug/l as Cu)
Cyanide, Total (mg/l as Cn)
Fluoride, Dissolved (mg/l as F)
Iron (ug/l as Fe)
Iron, Dissolved (ug/l as Fe)
Iron, Total Recoverable (ug/l as Fe)
Lead, Dissolved (ug/l as Pb)
Lead, Total Recoverable (ug/l as Pb)
Lithium, Dissolved (ug/l as Li)
Magnesium, Dissolved (mg/l as Mg)
Manganese (ug/l as Mn)
Manganese, Dissolved (ug/l as Mn)
Manganese, Total Recoverable (ug/l as Mn)
Mercury, Dissolved (ug/l as Hg)
Mercury, Total Recoverable (ug/l as Hg)
Molybdenum, Dissolved (ug/l as Mo)
Molybdenum, Total Recoverable (ug/l as Mo)
Nickel, Dissolved (ug/l as Ni)
Nickel, Total Recoverable (ug/l as Ni)
Nitrogen, Dissolved Ammonia (mg/l as N, mg/l as NH₄)
Nitrogen, Dissolved Nitrate (mg/l as N, mg/l as NO₃)
Nitrogen, Dissolved Nitrate + Nitrite (mg/l as N)
Nitrogen, Total (mg/l as NO₃)
Nitrogen, Total Ammonia (mg/l as N)
Nitrogen, Total Ammonia + Organic (mg/l as N)
Nitrogen, Total Nitrate (mg/l as N, mg/l as NO₃)
Nitrogen, Total Nitrate + Nitrite (mg/l as N)
Nitrogen, Total Nitrite (mg/l as N)
Nitrogen, Total Organic (mg/l as N)
Oxygen, Dissolved (mg/l, percent saturation)
Phosphate, Dissolved Ortho (mg/l as PO₄)
Phosphate, Total (mg/l as PO₄)
Phosphorus, Total (mg/l as P)
Phosphorus, Dissolved (mg/l as P)
Phosphorus, Dissolved Ortho (mg/l as P)
Potassium, Dissolved (mg/l as K)

Selenium, Dissolved (ug/l as Se)
Selenium, Total (ug/l as Se)
Silica, Dissolved (mg/l as SiO₂)
Silver, Dissolved (ug/l as Ag)
Silver, suspended recoverable (ug/l as Ag)
Silver, total recoverable (ug/l as Ag)
Sodium Adsorption Ratio
Sodium, Dissolved (mg/l as Na)
Sodium, Percent
Sodium + Potassium, Dissolved (mg/l as Na)
Strontium, Dissolved (ug/l as Sr)
Sulfate, Dissolved (mg/l as SO₄)
Uranium, Dissolved - Extraction (ug/l)
Uranium, Dissolved - Direct Fluorimetric (pci/l)
Zinc, Dissolved (ug/l as Zn)
Zinc, Total Recoverable (ug/l as Zn)

Organic Parameters

Aldrin, Total (ug/l)
Aldrin, Total in Bottom Material (ug/kg)
Biochemical Oxygen Demand, Five Day (mg/l)
Chlordane, Total (ug/l)
Chlordane, Total in Bottom Material (ug/kg)
2,4-D, Total (ug/l)
2,4-D, Total in Bottom Material (ug/kg)
DDD, Total (ug/l)
DDD, Total in Bottom Material (ug/kg)
DDE, Total (ug/l)
DDE, Total in Bottom Material (ug/kg)
DDT, Total (ug/l)
DDT, Total in Bottom Material (ug/kg)

Trithion, Total in Bottom Material (ug/kg)
Trithion, Total Methyl (ug/l)
Trithion, Total Methyl in Bottom Material (ug/kg)
Vanadium, Dissolved (ug/l as V)

Radioactive Parameters

Alpha, Dissolved Gross (pci/l as U-NAT, ug/l as U-NAT)
Alpha, Total Suspended Gross (pci/l as U-NAT, pci/g as U-NAT, ug/l as U-NAT)
Beta, Dissolved Gross (pci/l as Cs-137, pci/l as Sr/Yt - 90)
Beta, Total Suspended Gross (pci/l as Cs-137, pci/g as Sr/Yt - 90, pci/g as Cs-137)
Radium 226, Dissolved - Random Method (pci/l)

Coliform Bacteria

Coliform, Fecal - 0.45 UM-MF (Cols./100 ml.)
Coliform, Fecal - 0.7 UM-MF (Cols./100 ml.)
Coliform, Streptococci Fecal (Cols./100 ml.)
Coliform, Streptococci Fecal - KF Agar (Cols./100 ml.)
Coliform, Total - Delayed (Cols./100 ml.)
Coliform, Total - Immediate (Cols./100 ml.)

APPENDIX C

APPENDIX C

DATA COLLECTED BY ALASKA DEPARTMENT OF FISH AND GAME (ADF&G) IN THE SUSITNA RIVER BASIN FROM 1974 - 1978, and 1981

Streamflow, water quality and water temperature data have been collected by the Alaska Department of Fish and Game at a number of locations within the Susitna River Basin. Since the measurements have been taken periodically, the number of measurements, timing and specific parameters measured vary from year to year at any given station. Information available from the Alaska Department of Fish and Game has been included below. These reports are all on file at R&M Consultants.

Barrett, Bruce M. 1974. An assessment study of the anadromous fish populations in the Upper Susitna River watershed between Devil's Canyon and the Chulitna River. Cook Inlet Data Report No. 74-2. Alaska Department of Fish and Game. Division of Commerical Fisheries. 56 pp.

Figure 10: Profile of Susitna River water temperatures for September 4 - 11 at Gold Creek and Devil's Canyon Fishwheel Camp.

Figure 11: Profile of water and air temperatures recorded daily at east bank fishwheel.

Friese, Nancy V. 1975. Preauthorization assessment of anadromous fish populations of the Upper Susitna River watershed in the vicinity of the proposed Devil's Canyon Hydroelectric project. Cook Inlet Data Report No. 75-2. Alaska Department of Fish and Game - Division of Commerical Fisheries. 121 pp.

Table 10: Survey of winter conditions in Indian River, Lane Creek and Gold Creek.

Table 11: Analysis of Water Conditions in Indian River, at Chase Creek, 1974 - 1975.

Table 12: Analysis of Water Conditions at Gold Creek, 1974 - 1975.

Table 13: Analysis of water conditions at Parks Highway Bridge, 1974 - 1975.

Riis, James C. 1975. Pre-authorization assessment of the Susitna River Hydroelectric Projects: preliminary investigations of water quality and aquatic species composition. Alaska Department of Fish and Game. Division of Sport Fish. 61pp.

Figure 1: Daily water temperature in the Susitna River at Parks Highway Bridge, June 20 - September 23, 1975.

Figure 2: Maximum daily water temperatures of Birch Creek, April 11 - August 30, 1975.

Figure 3: Maximum daily water temperatures for Willow Creek, April 10 - September 23, 1975.

Table 9: Maximum and minimum daily water temperatures for the Susitna River at Parks Highway Bridge, June 20 - September 23, 1975.

Table 10: Maximum and Minimum daily water temperatures from Willow Creek, April 11 - August 30, 1975.

Table 12: Maximum, minimum and mean values of water quality data collected from the Susitna River and seven tributaries of the Susitna River.

Table 14: Water quality analysis on sample taken March 25, 1975 from the Susitna River at Sunshine.

Table 16: Water quality data collected from four tributaries of the Susitna River, August 1975.

Appendix II

Table 2: Water quality data from sloughs and clearwater tributaries of the Susitna River, June 14 - October 5, 1977.

Table 3: Daily maximum and minimum water temperatures in Rabideux Creek, May 25 - October 23, 1977.

Table 4: Daily maximum and minimum water temperatures in Montana Creek, May 25 - November 6, 1977.

Table 5: Water quality data from Rabideux Creek, May 25 - October 27, 1977.

Table 6: Water quality data from Montana Creek, June 7 - October 26, 1977.

WATER TEMPERATURE, WATER QUALITY AND STAGE
DATA COLLECTED BY
THE ALASKA DEPARTMENT OF FISH AND GAME DURING 1981

An extensive program of data collection was undertaken by the Alaska Department of Fish and Game (ADF&G) during 1981. The data collected are presented in: "Aquatic Habitat and Instream Flow Project," Susitna Hydro Subtask 7.10, Volumes 1 and 2, by the ADF&G, 1981, and analyzed and summarized in "Phase 1 Final Draft Report, Aquatic Studies Program", Susitna Hydro Subtask 7.10, ADF&G, 1982.

Physiochemical Data for Each General Habitat Evaluation Study Site

Dissolved oxygen, pH, water and air temperatures, turbidity and specific conductance were measured twice monthly at each general habitat evaluation study site, except in the impoundment reach, where these parameters were measured monthly. The data are presented for each site in a graphical format versus specific points in time and in tabular form. For locations, see the above referenced report.

Thermograph Data

Water temperature data were continually recorded at 29 sites in the study area (Table C-1, following) using Ryan Model J-90 thermographs. The data were converted into daily means, calculated as the mean of 12, two hour point temperatures. The temperature data for each thermograph site are presented as a function of time.

Stage Data

Stage data were collected at three Adult Anadromous Fisheries fishwheel sites and each lower-river general habitat evaluation study site (Table C-2, following).

Table C-1 Location and period of record for thermographs installed in Susitna River drainage. Summer 1981.

APPENDIX D

APPENDIX D

CLIMATOLOGICAL PARAMETERS WHICH
APPEAR IN THE NOAA REPORTS ENTITLED
"LOCAL CLIMATOLOGICAL DATA, ANNUAL SUMMARY
WITH COMPARATIVE DATA"

1. Meteorological Data For The Current Year

Temperature (°F)

Average Daily Maximum, for each month.
Average Daily Maximum, for the year.
Average Daily Minimum, for each month.
Average Daily Minimum, for the year.
Average, for each month.
Average, for the year.
Highest, and Date of Occurrence, for each month.
Highest, and Date of Occurrence, for the year.
Lowest, and Date of Occurrence, for each month.
Lowest, and Date of Occurrence, for the year.

Degree Days (Base 65°F)

Number of Heating, for each month.
Number of Heating, for the year.
Number of Cooling, for each month.
Number of Cooling, for the year.

Precipitation (Inches)

Total Inches of Water Equivalent, for each month.
Total Inches of Water Equivalent, for the year.
Greatest Amount of Water Equivalent in 24 hours and the Date of Occurrence, for each month.
Greatest Amount of Water Equivalent in 24 hours and the Date of Occurrence, for the year.
Total Inches of Snow and/or Ice Pellets, for each month.
Total Inches of Snow and/or Ice Pellets, for the year.
Greatest Amount of Snow and/or Ice Pellets in 24 hours and the Date of Occurrence, for each month.

Greatest Amount of Snow and/or Ice Pellets in 24 hours and the Date of Occurrence, for the year.

Relative Humidity (Percent)

Average Relative Humidity at hour 0200, for each month.
Average Relative Humidity at hour 0200, for the year.
Average Relative Humidity at hour 0800, for each month.
Average Relative Humidity at hour 0800, for the year.
Average Relative Humidity at hour 1400, for each month.
Average Relative Humidity at hour 1400, for the year.
Average Relative Humidity at hour 2000, for each month.
Average Relative Humidity at hour 2000, for the year.

Wind

Resultant Direction, for each month.
Resultant Direction, for the year.
Resultant Speed (m.p.h.), for each month.
Resultant Speed (m.p.h.), for the year.
Average Speed (m.p.h.), for each month.
Average Speed (m.p.h.), for the year.
Speed of the Fastest Mile (m.p.h.), for each month.
Speed of the Fastest Mile, (m.p.h.) for the year.
Direction and Date of Occurrence of the Fastest Mile, for each month.
Direction and Date of Occurrence of the Fastest Mile, for the year.

Miscellaneous

Percent of Possible Sunshine, for each month.
Percent of Possible Sunshine, for the year.
Average Sky Cover, tenths, sunrise to sunset, for each month.
Average Sky Cover, tenths, sunrise to sunset, for the year.
Number of Clear Days, sunrise to sunset, for each month.
Number of Clear Days, sunrise to sunset, for the year.
Number of Partly Cloudy Days, sunrise to sunset, for each month.
Number of Partly Cloudy Days, sunrise to sunset, for the year.
Number of Cloudy Days, sunrise to sunset, for each month.
Number of Cloudy Days, sunrise to sunset, for the year.
Number of Days with 0.01 inch or more of Precipitation, for each month.
Number of Days with 0.01 inch or more of Precipitation, for the year.

Number of Days with 1.0 inch or more of Snow and/or Ice Pellets, for each month.

Number of Days with 1.0 inch or more of Snow and/or Ice Pellets, for the year.

Number of Days with Thunderstorms, for each month.

Number of Days with Thunderstorms, for each year.

Number of Days with Heavy Fog, visibility 1/4 mile or less for each month.

Number of Days with Heavy Fog, visibility 1/4 mile or less for the year.

Number of Days when the Maximum Temperature was 90°F and above, for each month.

Number of Days when the Maximum Temperature was 90°F and above, for the year.

Number of Days when the Maximum Temperature was 32°F and below, for the year.

Number of Days when the Maximum Temperature was 32°F and below, for the year.

Number of Days when the Minimum Temperature was 32°F and below, for each month.

Number of days when the Minimum Temperature was 32°F and Below, for the year.

Number of Days when the Minimum Temperature was 0°F and below, for each month.

Number of Days when the Minimum Temperature was 0°F and below, for the year.

Average Station Pressure (mb), for each month.

Average Station Pressure (mb), for the year.

2. Normals*, Means, and Extremes

Temperature (°F)

Normal Daily Maximum, for each month.

* Normals are based on the previous 30 years of record.

Normal Daily Maximum, for a year.
Normal Daily Minimum, for each month.
Normal Daily Minimum, for a year.
Normal Monthly, for each month.
Normal Yearly.
Record High and Year of Occurrence, for each month.
Record High and Date of Occurrence.
Record Low and Year of Occurrence, for each month.
Record Low and Date of Occurrence.

Degree Days (Base 65°F)

Normal Number of Heating, for each month.
Normal Number of Heating, for a year.
Normal Number of Cooling, for each month.
Normal Number of Cooling, for a year.

Precipitation (Inches)

Normal Total Inches of Water Equivalent, for each month.
Normal Yearly Total Inches of Water Equivalent.
Maximum Monthly Total Inches of Water Equivalent and Year of Occurrence, for each month.
Maximum Monthly Total Inches of Water Equivalent and Date of occurrence.
Minimum Monthly Total Inches of Water Equivalent and Date of Occurrence, for each month.
Minimum Monthly Total Inches of Water Equivalent and Date of Occurrence.
Maximum Total Inches of Water Equivalent in 24 hours and Date of Occurrence, for each month.
Maximum Total Inches of Water Equivalent in 24 hours and Date of Occurrence.
Maximum Monthly Total Inches of Snow and/or Ice Pellets and Date of Occurrence, for each month.
Maximum Monthly Total Inches of Snow and/or Ice Pellets and Date of Occurrence.

Maximum Inches of Snow and/or Ice Pellets in 24 hours and Date of Occurrence, for each month.

Maximum Inches of Snow and/or Ice Pellets in 24 hours and Date of Occurrence.

Relative Humidity (Percent)

Normal Relative Humidity at hour 0200, for each month.

Normal Yearly Relative Humidity at hour 0200.

Normal Relative Humidity at hour 0800, for each month.

Normal Yearly Relative Humidity at hour 0800.

Normal Relative Humidity at hour 1400, for each month.

Normal Yearly Relative Humidity at hour 1400.

Normal Relative Humidity at hour 2000, for each month.

Normal Yearly Relative Humidity at hour 2000.

Wind

Mean Monthly Speed (m.p.h.), for each month.

Mean Yearly Speed (m.p.h.).

Prevailing Direction, for each month.

Yearly Prevailing Direction.

Maximum Speed, Direction, and Date of Occurrence of the Fastest Mile, for each month.

Maximum Speed, Direction, and Date of Occurrence of the Fastest Mile.

Miscellaneous

Mean Percent of Possible Sunshine, for each month.

Mean Yearly Percent of Possible Sunshine.

Mean Sky Cover, tenths, sunrise to sunset, for each month.

Mean Yearly Sky Cover, tenths, sunrise to sunset.

Mean Number of Clear Days, sunrise to sunset, for each month.

Mean Yearly Number of Clear Days, sunrise to sunset.

Mean Number of Partly Cloudy Days, sunrise to sunset, for each month.

Mean Yearly Number of Partly Cloudy Days, sunrise to sunset.

Mean Number of Cloudy Days, sunrise to sunset, for each month.

Mean Yearly Number of Cloudy Days, sunrise to sunset.

Mean Number of Days with 0.01 inch or more of Precipitation, for each month.

Mean Yearly Number of Days with 0.01 inch or more of Precipitation.

Mean Number of Days with 1.0 inch or more of Snow and/or Ice Pellets, for each month.

Mean Yearly Number of Days with 1.0 inch or more of Snow and/or Ice Pellets.

Mean Number of Days with Thunderstorms, for each month.
Mean Yearly Number of Days with Thunderstorms.

Mean Number of Days with Heavy Fog, visibility 1/4 mile or less, for each month.

Mean Yearly Number of Days with Heavy Fog, visibility 1/4 mile or less.

Mean Number of Days when the Maximum Daily Temperature is 90°F and above, for each month.

Mean Yearly Number of Days when the Maximum Daily Temperature is 90°F and above.

Mean Number of Days when the Maximum Daily Temperature is 32°F and below, for each month.

Mean Yearly Number of Days when the Maximum Daily Temperature is 32°F and below.

Mean Number of Days when the Minimum Daily Temperature is 32°F and below, for each month.

Mean Yearly Number of Days when the Minimum Daily Temperature is 32°F and below.

Mean Number of Days when the Minimum Daily Temperature is 0°F and below, for each month.

Mean Yearly Number of Days when the Minimum Daily Temperature is 0°F and below.

Average Station Pressure (mb), for each month.

Average Yearly Station Pressure (mb).

3. Average Temperature

Both the monthly and the annual average air temperatures are given for the period of record.

4. Precipitation

Both the monthly and the annual amounts of precipitation (in inches) are given for the period of record.

5. Heating Degree Days

Both the monthly and the annual number of heating degree days are given for the period of record.

6. Cooling Degree Days

Both the monthly and the annual number of cooling degree days are given for the period of record.

7. Snowfall

Both the monthly and the annual amounts of snowfall are given for the period of record.

APPENDIX E

APPENDIX E

CLIMATOLOGICAL PARAMETERS WHICH APPEAR IN THE NOAA REPORTS ENTITLED "ANNUAL CLIMATOLOGICAL SUMMARY"

Temperature (°F)

Mean Maximum Temperature, for each month.

Mean Maximum Temperature, for the year.

Mean Minimum Temperature for each month.

Mean Minimum Temperature for the year.

Mean Temperature for each month.

Mean Temperature for the year.

Total Degree Days, for each month.

Total Degree Days, for the year.

Highest Temperature and Date of Occurrence, for each month.

Highest Temperature and Date of Occurrence, for the year.

Lowest Temperature and Date of Occurrence, for each month.

Lowest Temperature and Date of Occurrence, for the year.

Number of Days when the Maximum Temperature was 90°F and above,
for each month.

Number of Days when the Maximum Temperature was 90°F and above,
for the year.

Number of Days when the Maximum Temperature was 32°F and below,
for each month.

Number of Days when the Maximum Temperature was 32°F and below,
for the year.

Number of Days when the Minimum Temperature was 32°F and below,
for each month.

Number of Days when the Minimum Temperature was 32°F and below,
for the year.

Number of Days when the Minimum Temperature was 0°F and below,
for each month.

Number of Days when the Minimum Temperature was 0°F and below,
for the year.

Precipitation (Inches)

Total Amount of Precipitation, for each month.

Total Amount of Precipitation, for the year.

Greatest Amount of Precipitation in 24 hours and Date of Occurrence,
for each month.

Greatest Amount of Precipitation in 24 hours and Date of Occurrence,
for the year.

Total Amount of Snow and/or Sleet, for each month.

Total Amount of Snow and/or Sleet, for the year.

Greatest Depth of Snow and/or Sleet and Date of Occurrence, for each
month.

Greatest Depth of Snow and/or Sleet and Date of Occurrence, for the
year.

Number of Days with 0.10 inch or more of Precipitation, for each month.

Number of Days with 0.10 inch or more of Precipitation, for the year.

Number of Days with 0.50 inch or more of Precipitation, for the year.

Number of Days with 0.50 inch or more of Precipitation, for each month.

Number of Days with 1.0 inch or more of Precipitation, for each month.

Number of Days with 1.0 inch or more of Precipitation, for the year.

KEY TO DATA COLLECTION PROGRAMS AT MAJOR STATIONS
IN THE SUSITNA RIVER BASIN

MULTIPLE RECORD STATIONS	Streamflow Gaging	Crest Stage Gage	Staff Gage	Water Quality	Water Temperature	Sediment Discharge	Climate	In-Cloud Icing/Freezing Rain	Snow Creep	Period of Record of Streamflow
A Susitna River near Denali	0110	0203	0310	0410	0510	0620	0710			1957-Present
B Susitna River at Vee Canyon	0120		0320	0420	0520					1961-72, 80-Present
C Susitna River near Watana Damsite	0130	0210	0211	0330	0430		0650	0730	0920	1980-Present
D Susitna River near Devil Canyon		0215	0218				0660		0940	-----
E Susitna River at Gold Creek	0140		0340	0440	0540					1949-Present
F Chulitna River near Talkeetna	0145			0445	0545					1958-72, 80-Present
G Talkeetna River near Talkeetna	0155		0355	0455	0555	0682				1964-Present
H Susitna River near Sunshine	0160			0460	0560					1981-Present
I Skwentna River near Skwentna	0165		0365	0465	0565	0686				1959-1980
J Yentna River near Susitna Station	0175			0475	0575					1980-Present
K Susitna River at Susitna Station	0190		0390	0490	0590					1974-Present
L Willow Creek	0162		0362							1978-Present
M Deception Creek near Willow	0163		0363			0563				1978-Present
N Mac Laren River near Paxson	0115		0315	0415	0515					1958-Present

- NOTES:
1. Stations recording several types of data are identified by a letter. Types of data available are indicated in the table at left.
 2. Index number for stations shown on map and in table correspond to data type and location as described in the field data index.

STATIONS	INDEX NUMBERING
■ STREAMFLOW - CONTINUOUS RECORD	0100
□ STREAMFLOW - PARTIAL RECORD	0200
○ WATER QUALITY	0300
T WATER TEMPERATURE	0400
★ SEDIMENT DISCHARGE	0500
⊙ CLIMATE	0600
⊖ FREEZING RAIN and IN-CLOUD ICING	0700
• SNOW COURSE	0800
△ SNOW CREEP	0900
