APPENDIX E

MAPS OF SITE LOCATIONS AND SURVEY LOCALES

A number of federal laws, as well as ethical considerations, mandate that site locational data not be released to the general public if there is a possibility the release of this proprietary data could create a risk of harm to such resources. The specific laws and ethical standards concerning the confidentiality of such data are summarized below:

- (a) The National Historic Preservation Act, 1966 (Public Law 89-665), Title I, sec. 101, (a)4. Information relating to the location of sites or objects listed on, or eligible for, inclusion in the National Register, should be withheld from the general public if it would create a risk of destruction or harm to such sites or objects.
- (b) Procedures of the Advisory Council on Historic Preservation, 36 CFR 800, Part 800.15(a). Information concerning the undertaking and effects of sites on or eligible for the National Register, should be made available to the general public within the limits of the Freedom of Information Act (5 U.S.C. 552), but need not include information on budget, financial, personnel and other proprietary matters, or the specific location of archaeological sites.
- (c) Archeological Resources Protection Act of 1979 (Public Law 96-95), Section 9(a). Information concerning the nature and location of any archeological resource for which the excavation or removal requires a permit or other permission under this Act or under any other provision of Federal Law, may not be made available to the public unless the federal land manager concerned determines that such disclosure would not create a risk of harm to such resources or to the sites at which such resources are located.
- (d) Code of Ethics and Standards of Performance for the Society of Professional Archeologists, Sec. III, 3.2. An archeologist shall not reveal confidential information unless required by law.

3 3755 000 44209 5

Because of the possibility that cultural resources in the Upper Susitna Basin could be damaged if their locations were made available to the general public, the distribution of this appendix is being limited to certain authorities.

Although township, range, and section locational data for cultural resources is presented in the text of this report, it is felt that due to the nature of this type of description disclosure will not create any risk or harm to cultural resources.
