

## APPENDIX B

### SEED COLLECTION AND PREPARATION DATA

Tables B-1 through B-3 list seed collected on the North Slope during 1989 through 1991, respectively. Table B-4 lists seed collected during 1991 in Russia. The tables include species collected, location, the collection date, grams of cleaned seedlot per collection and the estimated percent chaff still present in the cleaned seedlot. For the 1990 and 1991 collections, the relative size of the bulk field collection is also given (small bag, large bag, film canister, plus number of bags, canisters, etc.). The comments section provides insight on yield, effort required in cleaning seed, seed maturity, etc.

Table B-1. Species, locations, dates and data on threshing and cleaning of seed collected during 1989

Species	Collection Location	Collection Date	Grams Cleaned Seedlot	Est. % Chaff in Cleaned Seedlot*	Comments
GRASSES:					
Agropyron boreale	BP Put River No. 1	24 Aug 89	12.500		
Agropyron boreale	Kuparuk River Bridge	25 Aug 89	167.010		
Alopecurus alpinus	B.P. Put River No. 1	24 Sep 89	13.510	30	Very hard to clean seed
Alopecurus alpinus	Pump Station No. 1	27 Sep 89	1.703	30	Very hard to clean seed
Alopecurus alpinus	Van Cleave's Plots	26 Sep 89	10.435	30	Very hard to clean seed
Arctagrostis latifolia	M.P. 31 Dalton Highway	19 Sep 89	15.810		
Arctagrostis latifolia	Pump Station No. 1	27 Sep 89	5.960		
Arctagrostis latifolia	Sag. River E. of Airport	27/28 Sep 89	37.500		
Arctagrostis latifolia	IBP Plots	26 Aug 89	27.580		
Arctagrostis latifolia	72 Haul Road (introduced)	26 Sep 89	7.700		
Bromus pumellianus	Kuparuk River Bridge	25 Aug 89	20.090		Seed 90% immature
Deschampsia beringensis	IBP Plots	26 Aug 89	0.000		Seeds are immature
Deschampsia caespitosa	1972 Haul Road	29 Aug 89	20.270		Fair yield
Deschampsia caespitosa	Kup. Haul Rd/N. ARCO Store Pad	29 Aug 89	34.600		
Deschampsia caespitosa	Kuparuk River Bridge	25 Aug 89	55.210		Fair yield
Deschampsia caespitosa	Sohio-Kuparuk Reserve Pit	29 Aug 89	20.080		
Dupontia fisheri	Pump Station No. 1	27 Sep 89	5.392		Poor yield
Elymus arenarius mollis	East Dock Dunes	25 Sep 89	122.900		
Festuca brachyphylla	Sohio-Kuparuk Reserve Pit	29 Aug 89	14.988		
Festuca brachyphylla	IBP Plots	26 Aug 89	22.420		
Festuca ovina	East Dock Dunes	25 Sep 89	10.050		
Festuca rubra	Kuparuk River Bridge	25 Aug 89	7.646		Poor yield, very few with any seed inside
Festuca rubra	IBP Plots	26 Aug 89	6.390		Poor yield, very few with any seed inside
Festuca 'vivipara'	B.P. Put River No. 1	24 Aug 89	26.220	90	
Poa arctica	East Dock Dunes	25 Sep 89	36.720		
Poa glauca	IBP Plots	26 Aug 89	63.800		
Poa glauca	72 Haul Road	29 Aug 89	176.400		
Poa pratensis	IBP Plots	26 Aug 89	34.860		
Puccinellia langeana	B.P. Put River No. 1	24 Aug 89	209.530		Good yield
Puccinellia langeana	IBP Plots	26 Aug 89	253.650		Good yield
Trisetum spicatum	B.P. Put River No. 1	24 Aug 89	60.290		Tough to thresh
Trisetum spicatum	IBP Plots	26 Aug 89	41.180		Tough to thresh

\* In 1989, there was no concerted effort to estimate percent trash or purity of the seedlots.

Summary of North Slope Native Seed Collection for 1989

Gramnoids = 19 species in 37 bulk field collections  
 Forbs = 23 species in 26 bulk field collections  
 Shrubs = 1 species in 1 bulk field collection

---

Total = 43 species in 64 bulk field collections

Table B-2. Species, locations, dates and data on threshing and cleaning of seed collected during 1990

Species	Collection Location	Collection Date	Bulk Field Collection	Grams Cleaned Seedlot	Est. % Chaff in Cleaned Seedlot	Comments
<b>GRASSES:</b>						
						Seedlots placed in freezer 18 Jan 1991.
<i>Agropyron boreale</i>	Kuparuk River Bridge	14 Sep 90	1 Lg. Bag	51.23	10%	No comments.
<i>Alopecurus alpinus</i>	1972 Haul Road	10 Sep 90	1 Sm. Bag	33.46	50%	Did not run through blower, too fuzzy and light.
<i>Alopecurus alpinus</i>	East Dock Dunes	8 Sep 90	1 Lg. Bag	29.10	50%	Did not run through blower, too fuzzy and light.
<i>Arctagrostis latifolia</i>	Kuparuk River Bridge	14 Sep 90	1 Lg. Bag	10.91	65%	Appears to have very few mature, viable seeds in relation to the number of seedheads.
<i>Arctagrostis latifolia</i>	Pump Station No. 1	11 Sep 90	1 Lg. Bag	13.59	35%	Appears to have small amount of mature seed.
<i>Arctagrostis latifolia</i>	Sag. River E. of Airport	18 Sep 90	2 Lg. Bags	28.74	15%	Fair percent of seed from sample.
<i>Arctophila fulva</i>	Lonnie Lake East	26 Sep 90	1 Lg. Bag	12.48	2%	Very high percent of seed retained in seedheads.
<i>Arctophila fulva</i>	Pump Station No. 1	11 Sep 90	1 Lg. Bag	11.19	5%	No comments.
<i>Bromus pumpellianus</i>	Endicott Rd-S. Big Skookum	13 Sep 90	1 Lg. Bag	0.00	100%	Found no mature seeds, all are in flower stage.
<i>Bromus pumpellianus</i>	Kuparuk River Bridge	14 Sep 90	1 Lg. Bag	19.53	99%	Appears to have very few mature seeds, perhaps one-dozen in the seedlot.
<i>Bromus pumpellianus</i>	M.P. 365 Dalton Highway	06 Aug 90	1 U.S. Bag	62.00	5%	Good yield, Seeds are shriveled - may be immature.
<i>Calamagrostis inexpansa</i>	Kuparuk River Bridge	14 Sep 90	Very Sm. Bag	1.35	98%	Appears to be no mature seed by visual examination.
<i>Deschampsia caespitosa</i>	1972 Haul Road	10 Sep 90	1 Lg. Bag	17.40	15%	Seed screened four times, then once through blower.
<i>Deschampsia caespitosa</i>	End. Rd-West Caribou Ramp	13 Sep 90	1 Lg. Bag	5.21	85%	Same treatment as above, poor seed yield.
<i>Deschampsia caespitosa</i>	Kuparuk River Bridge	14 Sep 90	2 Lg. Bags	32.73	20%	Seed screened four times, then once through blower.
<i>Deschampsia caespitosa</i>	Pump Station No. 1	11 Sep 90	2 Lg. Bags	15.62	35%	Seed screened four times, then once through blower.
<i>Deschampsia caespitosa</i>	Sag. River E. of Airport	18 Sep 90	2 Lg. Bags	27.88	5%	Seed screened four times, then once through blower. Good clean seed.
<i>Dupontia fisheri</i>	Pump Station No. 1	11 Sep 90	1 Lg. Bag	37.36	2%	Appears to be good clean seed.
<i>Elymus arenarius mollis</i>	East Dock Dunes	14 Jul 90	1 Sm. Bag	27.12	10%	1989 seedcrop, but collected in 1990. Good yield.
<i>Elymus arenarius mollis</i>	East Dock Dunes	07 Sep 90	2 Lg. Bags	248.00	10%	Good Yield, 2 large jars of seed.
<i>Elymus innovatus</i>	M.P. 365 Dalton Highway	06 Aug 90	1 U.S. Bag	32.49	10%	Poor yield, considerable immature seed blown away.
<i>Festuca baffinensis</i>	1972 Haul Road	10 Sep 90	1 Sm. Bag	12.65	15%	Good yield.
<i>Festuca baffinensis</i>	Endicott Road-S. of Big Skookum	13 Sep 90	1 Lg. Bag	25.32	15%	Fair yield.
<i>Festuca ovina</i>	East Dock Dunes	08 Sep 90	1 Lg. Bag	5.14	45%	Very poor yield.
<i>Festuca rubra</i>	Endicott Rd-S. Big Skookum	13 Sep 90	1 Lg. Bag	5.33	95%	Very poor yield.
<i>Festuca rubra</i>	Kuparuk River Bridge	14 Sep 90	1 Sm. Bag	6.19	98%	Very poor yield, found no seeds by inspection.
<i>Festuca 'vivipara'</i>	1972 Haul Road	10 Sep 90	1 Lg. Bag	22.38	95%	Unable to find any viable seed by inspection.
<i>Festuca 'vivipara'</i>	East Dock	29 Aug 90	1 Lg. Bag	30.90	95%	Unable to find any viable seed by inspection.
<i>Poa arctica</i>	East Dock Dunes	07 Sep 90	1 Lg. Bag	23.45	25%	Fuzzy seed, hard to clean.
<i>Poa arctica</i>	Endicott Rd-S. Big Skookum	13 Sep 90	1 Lg. Bag	6.61	45%	Fuzzy seed, hard to clean. Poor yield.

Table B-2. (Cont.) Species, locations, dates and data on threshing and cleaning of seeds collected during 1990

Species	Collection Location	Collection Date	Bulk Field Collection	Grams Cleaned Seedlot	Est. % Chaff in Cleaned Seedlot	Comments
<b>GRASSES (Cont.):</b>						Seedlots placed in freezer 18 Jan 1991.
<i>Poa glauca</i>	1972 Haul Road	10 Sep 90	2 Lg. Bags	11.34	90%	Very poor yield, observed only a few seeds.
<i>Poa glauca</i>	Endicott Road-1 mile W of W Caribou Ramp	13 Sep 90	2 Lg. Bags	43.98	25%	Fair yield.
<i>Puccinellia langetana</i>	East Dock	29 Sep 90	4 Lg. Bags	39.30	25%	Poor yield from large sample collected.
<i>Poa pratensis</i>	1972 Haul Road	10 Sep 90	1 Lg. Bag	20.64	90%	All seeds appear immature. Seed in two small jars. (Mitchell Introduction - Canada Bluegrass?)
<i>Trisetum spicatum</i>	1972 Haul Road	10 Sep 90	1 Lg. Bag	8.87	65%	Seed very light, unable to remove chaff
<i>Trisetum spicatum</i>	Kuparuk River Bridge	14 Sep 90	#8 P Sack	1.15	95%	Seed very light, unable to remove chaff saved entire sample.
<i>Trisetum spicatum</i>	M.P. 354.5 Dalton Hwy M.P. 62 TAPS-dry ridge	16 Jul 90	1 Sm. Bag	0.84	80%	Lots of chaff, seeds larger and better filled than seed collected at Prudhoe.
<b>GRASSLIKE:</b>						
<i>Carex maritima</i>	East Dock	09 Sep 90	1 Lg. Bag	29.17	5%	Great yield.
<i>Carex maritima</i>	East Dock Dunes	08 Sep 90	1 Sm. Bag	24.78	5%	Great yield.
<i>Carex ursina</i>	East Dock	10 Sep 90	1 Sm. Bag	71.08 (2 jars)	5%	Seed harvested with vacuum; Sample was a slurry of mud, seed, and goose feces. Dried in oven at 30 degrees C and screened. Some seed-size sand grains.
<b>FORBS:</b>						
<i>Androsace chamaejasme</i>	72 Haul Road	26 Aug 90	1 Sm. Bag	3.00	5%	Seed easy to clean.
<i>Androsace chamaejasme</i>	East Dock Dunes	09 Sep 90	1 Sm. Bag	3.50	1%	Seed easy to clean.
<i>Androsace chamaejasme</i>	M.P. 405 Dalton Hwy	05 Aug 90	#4 P Sack	1.49	10%	Seed easy to clean. Some dirt with seed.
<i>Arabis arenicola</i>	M.P. 405 Dalton Hwy	05 Aug 90	#4 P Sack	4.19	1%	No comments.
<i>Armeria maritima</i>	East Dock Dunes	09 Sep 90	1 Sm. Bag	5.14	15%	Seed light and fluffy, not sure of quality.
<i>Armeria maritima</i>	Kuparuk River Bridge	14 Sep 90	#8 P Sack	0.96	15%	Seed light and fluffy, not sure of quality.
<i>Armeria maritima</i>	M.P. 405 Dalton Hwy	05 Aug 90	#4 P Sack	18.87	15%	Seed light and fluffy, not sure of quality.
<i>Armeria maritima</i>	Sag. R. E. of Airport	18 Sep 90	1 Sm. Bag	3.54	15%	Seed light and fluffy, not sure of quality.
<i>Artemisia arctica</i>	East Dock Dunes	09 Sep 90	1 Sm. Bag	7.00	1%	Seed cleans up well.
<i>Artemisia arctica</i>	Kuparuk River Bridge	14 Sep 90	#8 P Sack	0.41	1%	Seed cleans up well, small sample.
<i>Artemisia arctica</i>	M.P. 377.5 Dalton Hwy Franklin Bluffs Camp	17 Sep 90	1 Lg. Bag	28.23	1%	Seed cleans up well.
<i>Artemisia borealis</i>	Kuparuk River Bridge	14 Sep 90	#8 P Sack	0.31	5%	Small sample.
<i>Artemisia borealis</i>	Put #23 Gravel Mine Pit	19 Sep 90	1 Sm. Bag	0.23	5%	Poor yield of seed, most blown away before harvest.
<i>Artemisia glomerata</i>	Kuparuk River Bridge	14 Sep 90	1 Sm. Bag	5.46	15%	Poor yield; Collection extremely dusty and dirty, some dirt still in seed.
<i>Artemisia glomerata</i>	M.P. 405 Dalton Hwy	05 Aug 90	#8 P Sack	1.97	1%	Fair yield.

 -----  
 Total = 9 species in 10 field collections

## APPENDIX C

### GERMINATION DATA

Tables C-1 and C-2 list the results of germination tests for seed collected in 1989 and 1990, respectively. By counting out a specific number of seeds (300 in 1989 and 320 in 1990) and weighing them, then dividing the number by the weight, the number of seeds per gram was determined. The germination rate was derived from the mean of the three replicates (100 seeds tested per replicate). The seedlots consist of species by collection location and date since both can effect the viability of seeds. Harvested seed was placed in the deep freeze for at least 2 weeks after being threshed and cleaned. Seeds selected for germination trials were treated with clorox bleach for 5 minutes, rinsed with water and placed in a refrigerator for 6 days prior to being put in the germinator. Seeds were watered with a captan solution (1/2 g per quart) to control molds. The germinator was set for 16 hours of light at a temperature of 20 °C and 8 hours of darkness at a temperature of 13 °C. Seeds were monitored daily during the germination trials so rate of germination could be determined. Germination tests were also run on different sized seeds from selected species/collections and for different seed treatments.

Table C-1. Germination record for North Slope native seeds collected in 1989

Species	Collection Location	Collection Date	Seeds/ Germ. Test	Grams/ Germ. Test	No. Seeds/ Gram	Date in Refrig.	Monitoring Dates in Germinator	No. Seeds Germinated			Average Percent Germ.

## Summary of germination tests on seeds collected in 1989

Graminoids	= 19 species in 36 seedlots
Forbs	= 22 species in 26 seedlots
-----	
Totals	= 41 species in 66 seedlots

Average Germ. Graminoids	81.5
Average Germ. Forbs	49.2

Summary of germination tests on seeds collected in 1990

Graminoids	= 21 species in 40 seedlots
Forbs	= 36 species in 60 seedlots
Shrubs	= 4 species in 9 seedlots
Totals	= 61 species in 109 seedlots

1990 Gramnoid mean germination rate	42.1
1990 Forb mean germination rate	33.0
1990 Shrub mean germination rate	51.9

## APPENDIX D

### BOTANICAL GARDEN PLANTINGS

Tables D-1 and D-2 list the species planted in the Botanical Garden at the BP Put River No. 1 gravel pad in 1990 and 1991, respectively. The row number, species, collection location and collection date are given. For 1991, the planting rates were determined and are listed.

Table D-1. Species planted at the BP Put River No. 1 gravel pad, 27 June 1990

Row No.*	Species	Location	Collection Date

\*1 PLS = Pure Live Seed reflects the percentage of pure seed that has the ability to germinate = % Germination x % Purity

\*2 Attempted to apply seed at rate of 1 PLS per 1/4" of row (48 PLS/Ft.), when less seed was available, this amount was used.

\*3 Seed lot mechanically scarified to try improving germination.
